# Allied Packers, Incorporated.

The undersigned Committee has been constituted by a Plan and Agreement dated November 1, 1928, which contemplates the acquisition by Hygrade Food Products Corporation of properties and assets of Allied Packers, Incorporated. Copies of the Plan and Agreement may be obtained from the Secretary of the Committee or from any of the Depositaries under the Plan.

Holders of First Mortgage and Collateral Trust Convertible Sinking Fund 8% Gold Bonds and of Twenty-Year Convertible Sinking Fund Six Per Cent Debenture Bonds of Allied Packers, Incorporated, may become parties to the Plan by depositing such Bonds and Debentures in negotiable form, and accompanied by the coupon which will mature January 1, 1929, and all subsequent coupons, on or before the close of business on DECEMBER 8, 1928, with any of the Depositaries under the Plan at their specified offices, viz.:

Central Union Trust Company of New York, 80 Broadway, New York City.

Chicago Trust Company, 81 West Monroe Street, Chicago.

The First National Bank of Philadelphia, 315 Chestnut Street, Philadelphia.

The First National Bank of Boston, 67 Milk Street, Boston.

Certificates of Deposit for Bonds and Debentures will be issued by the Depositary with which the same are deposited.

Depositary with which the same are deposited.

Holders of Prior Preference Stock, of Senior Preferred Stock, of Preferred Stock and of Common Stock of Allied Packers, Incorporated, desiring to exercise the rights of purchase conferred by the Plan, must on or before the close of husiness on DECEMBER 8, 1928 deposit their stock certificates, duly endorsed in blank for transfer or accompanied by transfers in blank duly executed, and in either case bearing the transfer tax stamps required by Federal and New York State law, with Central Union Trust Company of New York as Depositary, at its principal office, 80 Broadway, New York City, and must at the time of deposit make payment to said Depositary of the first instalment of the purchase price, viz.: \$2 per share of stock deposited, against which payment Purchase Warrants will be issued as contemplated by the Plan.

Security holders are urged promptly to deposit their securities as in the judgment of the Committee the early consummation of the Plan is greatly in their interests.

Dated, November 19, 1928.

GEORGE W. DAVISON, LIVINGSTON E. JONES, F. S. SNYDER, CASIMIR I. STRALEM, LUCIUS TETER, ROSWELL C. TRIPP, Committee.

C. E. Sigler, Secretary, 80 Broadway, New York City.

Copies of a letter dated October 29, 1928, from Mr. Robert Jemison, Jr., President of the Corporation, setting forth information regarding the Corporation and this issue of stock, may be obtained from the undersigned. The substance of this letter in part is as follows:

Business—Southern Bond and Share Corporation has been organized to conduct the business of an investment trust of the general management type. It will invest and reinvest its resources in securities, broadly diversified industrially and geographically, under carefully formulated investment regulations established in the Certificate of Incorporation and By-Laws of the Corporation.

Management—The Board of Directors of the Corporation is composed of men prominent in many fields of activity, including the management of investment trusts similar in character to Southern Bond and Share Corporation. They will have available the services of the Investment Research Corporation which has supplied the economic, financial and corporate analyses used by The Investment Company of America, Pacific Investing Corporation and American Capital Corporation in the management of their investment funds which now aggregate more than \$43,000,000.

There will also be outstanding option warrants for the purchase of 83,333 shares of Class B Common Stock at \$10 a share at any time prior to June 30, 1940; and the Corporation has entered into contracts under which similar option warrants for an additional 116,667 shares will be issued at intervals during the next five years.

The issuance of Bonds, Debentures or other evidences of indebtedness maturing one year or more from the date thereof is limited by the Certificate of Incorporation to an amount equal to the aggregate of the capital then paid in, and the reserves, surplus and undivided profits of the Corporation.

Subscribers to Class "A" and Class "B" Stocks have paid in a total of over \$1,200,000 which is junior to this issue. Upon completion of this financing the Corporation will have a net investment fund of over \$3,000,000 and in addition an operating reserve estimated as sufficient to pay organization and operating expenses other than taxes during the first year and a half of operation. The net assets applicable to this issue amount to over \$75.00 per share which is over 150 per cent of the offering price.

General—Investment Trusts operating upon the principle of broad diversification and supervision of investments have had a long and successful history and are considered one of the most practical mediums yet devised for affording investors safety of principal and a liberal return. This corporation will have a broad diversification of investments and will have in the selection and supervision of its securities an advisor whose investment research program is one of the most comprehensive undertaken in the United States.

All legal matters in connection with the issuance of this stock have been passed upon by Messrs. Bradley, Baldwin, All, and White of Birmingham, Ala. and Messrs. Dykema, Jones and Wheat of Detroit, Michigan. Delivery will be made by Allotment Certificates exchangeable on October 31, 1929, or earlier at the option of the Corporation, for Certificates of Preferred Stock and Class B Common Stock covered in this offering. Said Allotment Certificates will provide for the payment to the holders thereof of dividends declared on the stock called for thereby. It is anticipated that Allotment Certificates will be ready for delivery on or about November 21, 1928.

\* 150,000 shares reserved for conversion of Class "A" Convertible Preference Stock.

Mr. Claire L. Barnes, President, summarizes his letter to us as follows:

BUSINESS: The Houdaille Corporation has been organized under the laws of the State of Michigan to acquire the capital stock or all of the assets and business, including good will, of the Houde Engineering Corporation (a New York corporation).

The Houde Engineering Corporation is manufacturing the Houdaille Hydraulic Shock Absorber, which is at the present time installed as standard equipment by many of the most important motor car manufacturers in the industry. The Houdaille Hydraulic Shock Absorber is a double acting shock absorbing device which greatly increases the riding quality of all automobiles.

The Houde Engineering Corporation started with an initial investment of about \$60,000 and has been built up to its present size and commanding position in the industry almost entirely from earnings. The year 1928 is the first year that the company has been manufacturing shock absorbers on a quantity production basis and selling their product to manufacturers to be installed as standard equipment. Heretofore the company's product has been sold principally to distributors and dealers in automobile accessories. In addition to their present customers, the company expects to greatly increase its sales in the year 1929.

EARNINGS: Certified net earnings of the Houde Engineering Corporation have been as follows: For the year ended December 31, 1926, \$179,481.29; For the year ended December 31, 1927, \$141,535.12; Net earnings for the nine months ended September 30, 1928, (which is the first nine months of the company's operations on a quantity production basis), \$944,935.10.

Earnings as above stated are after giving effect to elimination of (1) charges for royalties and patent amortization as a result of purchase of patents and writing down patent valuations to \$1.00, (2) non-recurring interest, and (3) non-recurring income (net \$45,552.89 in 1926, \$29,314.83 in 1927 and \$61,796.58 for nine months of 1928); and adjustment of Federal Income Taxes to the current rate of 12%.

Net earnings as above stated for the first nine months of 1928 amount to \$8.74 per share on the Houdaille Corporation Class "A" stock to be outstanding and \$5.01 per share on the Class "B" stock after Class "A" dividends.

DIVIDENDS: Dividends on the Class "A" Convertible Preference Stock will be payable quarterly on the first day of January, April, July and October at the rate of \$2.50 per share. The first dividend will be payable on January 1, 1929, for the period from November 16th, which is the date of incorporation of the company. It is the intention of the directors to authorize the payment of dividends on the Class "B" stock at the annual rate of \$1.50 per share.

MANAGEMENT: The Management of the corporation will be headed by Mr. Claire L. Barnes as President.

THE CLASS "A" AND CLASS "B" STOCKS ARE LISTED ON THE CHICAGO STOCK EXCHANGE

This stock is offered if, when and as issued and received by us, subject to approval as to legality by Messrs. Beaumont, Smith & Harris of Detroit, Michigan and Messrs. Chapman and Cutler of Chicago, Ill.

Authorised \$5.000.000. To be presently outstanding, not more than \$4.000.000, of which \$509,000 have been reserved for private offering in Hungary. Interest payable April I and October 1. Coupon bonds in denomination of \$1,000, registerable as to principal only. Principal and interest payable at the principal office of Guaranty Trust Company of New York, in gold coin of the United States of America of or equal to the present standard of weight and fineness, without deduction for any present or future Hungarian taxes. Redeemable as a whole or in part on any interest date at 100 and accrued interest. Guaranty Trust Company of New York, Paying Agent, Central Corporation of Banking Companies, Budapest, Fiscal Agent.

Sinking Fund, as described below, operating by semi-annual drawings by lot at 100 and interest, sufficient to redeem entire issue by maturity

The following information has been summarized from the letter of His Excellency, Count John Hadik, President of the Institute, and is subject to the more complete information contained therein:

#### **Government Control**

The Farmers National Mortgage Institute was founded in 1879 under a Special Act of the Kingdom of Hungary, for the primary purpose of providing a credit medium for the small farmer.

The Hungarian State owns 94% of the Institute's present outstanding shares and its participation cannot be withdrawn. The Institute is operated under governmental supervision through a permanent Commissioner appointed by the Finance Minister. The election of its President and Vice-President is subject to ratification by the head of the State and its Articles of Association cannot be amended without governmental approval.

#### Operation

The business of the Institute, since its formation, has been confined to the granting of mortgage loans on lands and buildings used for agricultural purposes which loans may not exceed 50% of the appraised value thereof.

The Institute has never issued any bonds or other direct obligations in foreign currencies and its pre-war indebtedness, which is now being liquidated does not exceed \$35,100.

It has never suffered a loss on any of its mortgage loans and has always paid the interest and principal, when due, of all of its Land Mortgage Bonds.

#### Security

The Bonds will be the direct obligation of the Farmers National Mortgage Institute. The Institute will at all times maintain sub-obligations secured by first mortgages on productive agricultural property situated within the Kingdom of Hungary in a principal amount at least equal to the principal amount of the Bonds of this issue outstanding plus the amount of all the other outstanding Land Mortgage Bonds of the Institute.

Interest, principal and sinking fund on the sub-obligations securing the Bonds shall be sufficient to meet the corresponding requirements of the outstanding Land Mortgage Bonds of the Institute. In case of default in any Land Mortgage

Bonds of the Institute created after January 1, 1925, all subobligations and special reserve funds created after such date will be pooled as security for all such Bonds outstanding.

#### Sinking Fund

A sinking fund is provided beginning October 1, 1929 and operating semi-annually sufficient to retire the entire issue by maturity through redemption by lot at 100 and interest. If Bonds are cancelled or redeemed in addition to sinking fund requirements, subsequent sinking fund chiigations will be correspondingly reduced.

#### Agricultural Situation in Hungary

Hungary with an area of 35,900 square miles and a population of over 8,000.000 is essentially an agricultural country, deriving almost two-thirds of its income from this source.

The present expansion of the activities of the Farmers National Mortgage Institute to provide small land owners with essential credit facilities is being carried out as an important part of the Government's program for the intensive development of the country's agricultural resources. Over 61% of the cultivated area of Hungary is composed of small farms of 140 acres or less. The Institute has in the past placed substantially all of the mortgages sought by this class of land owners.

#### Hungarian Finances

In every year since 1924 when the Reconstruction Plan of the League of Nations was put into effect and the Reconstruction Loan was issued, the Hungarian budget has shown a substantial surplus.

Since 1925. \$127,000,000 has been utilized by the government for productive capital investments without further foreign borrowing, and \$38.000,000 has been appropriated for such purposes in the 1927-1928 budget.

Hungary is experiencing a general revival in trade and prosperity. The National finances have been restored, political conditions have become stabilized, crops are satisfactory, and building operations are extensive.

Conversions from Hungarian to United States currency have been made at the rate of \$0.175 per pengo.

We offer the above Bonds for sale, when, as and if issued and accepted by us, subject to prior sale and to the approval of all legal matters by our counsel, Messrs. Coudert Brothers, New York and Paris, and Dr. Erno Wittmann, Budapest. Delivery will be made in the first instance in the form of Interim Certificates of the Institute.

Price 921/2 and accrued interest. Minimum yield over 7.60%

American Shares representing 1,000 Reichsmarks par value of Capital Stock, or any multiple thereof, exchangeable after March 1, 1929 for the equivalent par value of Capital Stock (deliverable at the office of the Agency of the Depositary in Hamburg, Germany). After March 1, 1929, or prior thereto with the consent of Scholle Brothers, holders of shares of Capital Stock may, under certain conditions, deposit such shares at the Agency of the Depositary in Hamburg, and receive American Shares therefor.

Dividends received by the Depositary upon Capital Stock represented by American Shares to be converted into dollars at rates of exchange then current, and the proceeds paid pro rata to the registered holders of American Shares by check in United States Dollars. Under present German and United States Income Tax Laws, dividends subject to deduction and withholding of 10% German Income Tax, but United States citizens entitled to credit this tax against Federal Income Taxes upon such dividends. Dividends payable annually, subject to declaration thereof at stockholders' meetings. In accordance with the by-laws of the Company, the stockholders' meeting is held within six months after the close of each fiscal year.

For further information as to the rights of holders of American Shares, and as to charges and fees on exchanges of American Shares for deposited shares, deposit of additional shares, &c., reference is made to the Deposit Agreement, copies of which will be available at the office of the Depositary.

International Acceptance Trust Company, New York, Depositary.

M. M. Warburg & Co., Hamburg, Agency of the Depositary.

The National Park Bank of New York, Registrar.

The following information has been furnished by Mr. Hermann Schoendorff, Managing Director of the Company:

Rudolph Karstadt, Incorporated, organized under the laws of Germany, owns and operates, directly or through subsidiaries, the largest chain of department and unit-price stores in Germany. Beginning in 1881 as a small shop established by Rudolph Karstadt with one employee, the business of the Company now includes 77 department stores, 17 unit-price stores (similar to American 5- and 10-cent stores), 15 factories, and a wholesale and export business, and more than 23,000 persons are employed.

Circular containing more complete information may be had on request.

We offer these American Shares, subject to allotment or prior sale, for delivery if, when and as issued and accepted by us, subject to approval of legal proceedings by counsel. It is expected that delivery will be made on or about December 10, 1928, in the form of temporary certificates for American Shares, or interim receipts.

This offering does not represent new financing on the part of the Company.

The Company has agreed to make application in due course to list these American Shares on the New York and Boston Stock Exchanges.

### Price \$22.50 per American Share flat

These American Shares will carry full dividend rights with respect to the fiscal year ending January 31, 1929, but will not carry rights to subscribe for Capital Stock presently to be offered to stockholders in the amount of \$2,360,008 par value.

# The Parker Pen Company

( A Wisconsin Corporation)

#### Common Stock

Dividends Exempt from Normal Federal Income Tax

#### CAPITALIZATION

(Upon retirement of Preferred Stock)

Common Stock—Authorized and outstanding, 200,000 Shares of \$10 par value\_\_\_\_\_\$2,000,000 The stock being offered at this time having been purchased from individuals, represents no new financing for the Company.

The following has been summarized by Mr. George S. Parker, President of The Parker Pen Company, from his letter to us describing this issue:

History and Business: The Parker Pen Company, incorporated in 1892, is one of the largest manufacturers of fountain pens and mechanical pencils in the world. From its inception the Company has made steady and substantial progress and the present net worth of the business has been built up entirely from earnings, after making liberal cash distributions. The Company has advertised its products very widely through the medium of the leading magazines and metropolitan daily papers of the country and consequently has built up a consumer following second to none. The Company sells, through over 40,000 retailers in the United States and foreign countries, a complete line of fountain pens and mechanical pencils.

Property: The Company's main factory and office building at Janesville was erected in 1920 and is well suited to the Company's needs. The Company has developed the use of automatic machinery and continuous assembly lines to such a degree that the plant is perhaps the best equipped and most efficient of its kind in the world. It is favorably located with respect to both labor and trade markets. Additional ground owned by the Company, adjacent to the present plant, is held for future expansion. Subsidiary companies operate factories in Toronto, Canada, and Heidelberg, Germany.

Financial: The audited balance sheet of the Company, as of December 31, 1927, after giving effect to retirement of the 7%

Cumulative Preferred Stock, shows current assets of \$2,178,907.42 against current liabilities of \$532,845.29. Net assets after deduction of all liabilities and reserves, as shown by this statement, aggregate \$2,923,866.91.

Earnings: Net profits of the Company and its subsidiaries for the five years ended December 31, 1927, consolidated from independent audits of the several companies, after all charges and after the payment of preferred stock dividends, which dividends will cease after February 1, 1929, together with consolidated net profits, as estimated by the Company for 1928, after payment of such dividends, are as follows:

| Years Ending<br>December 31 | Net Profits<br>As Above | Per Share |  |
|-----------------------------|-------------------------|-----------|--|
| 1923                        | \$ 548,906.14           | \$2.74    |  |
| 1924                        | 751,297.76              | 3.76      |  |
| 1925                        | 708,111.24              | 3.54      |  |
| 1926                        | 847,031.64              | 4.24      |  |
| 1927                        | 748,745.74              | 3.74      |  |
| 1928(Two Month              | s Est.) _ 1,055,000.00  | 5.27      |  |

Management: Active management of the Company will be in the hands of my sons and myself, and I shall continue as President, an office I have now held for thirty-six years. We have invited two representatives of the bankers to serve on our board of directors.

This Stock has been listed on the Chicago Stock Exchange.

This offering is made in all respects, when, as and if issued and received by us and subject to the approval of our counsel. We reserve the right to reject any and all subscriptions in whole or in part or to allot less than the amount requested.

# \$5,000,000

# **Balaban & Katz Corporation**

# 51/2% Serial Gold Notes

Dated November 1, 1928. Total authorized issue: \$7,500,000; presently issued: \$5,000,000. Principal and semi-annual interest May 1 and November 1, payable at the office of First Trust and Savings Bank, Chicago, Trustee. Coupon notes: \$1,000 denomination in all maturities \$500 denomination in last maturity only. Registerable as to principal only. Redeemable at the option of the corporation as a whole, or in part, on any interest payment date, at 102 and accrued interest to and including November 1, 1929; thereafter at ¼ of 1% less for each year up to and including November 1, 1936, and thereafter at par. Interest payable without deduction for normal Federal income tax not in excess of 2%.

FIRST TRUST AND SAVINGS BANK, CHICAGO, ILLINOIS, Trustee.

Upon completion of this financing, these notes will constitute the sole funded debt.

The following information is summarized from a letter from Mr. Herbert L. Stern, President of Balaban & Katz Corporation:

BUSINESS—Balaban & Katz Corporation constitutes one of the most important factors in the amusement business in the United States. It operates the largest and most successful group of theatres in Chicago and holds substantial interests in Great States Threatres, Inc., which operates in most of the important cities in Illinois outside of Cook County, and Kunsky Theatres Corporation, operating a chain of theatres in Detroit. The number of patrons served by the Balaban & Katz theatres is in excess of 50,000,000 yearly. Sixty-five per cent. of the common stock of Balaban & Katz Corporation is owned by Paramount Famous Lasky Corporation, one of the largest producers of films in the United States, which controls Publix Theatres Corporation, operating one of the country's largest theatre circuits.

ASSETS—Financial statement of Balaban & Katz Corporation, certified by Price, Waterhouse & Co., as of September 28, 1928, shows net tangible assets, exclusive of leaseholds and all improvements thereon, of \$16,679,432, equal to \$3,335 for each \$1,000 note of this issue.

**EARNINGS**—Net earnings available for interest and Federal Taxes during the three years and nine months ended September 28, 1928, as certified by Price, Waterhouse & Co., have averaged \$2,192,034, or 7.9 times the maximum annual interest charge of this issue, after charging an average annual depreciation of \$534,846 for the three years ended December 31, 1927, and \$762,713 for the first nine months of 1928. These earnings are as follows:

| 1925                      | \$1,868,086 |
|---------------------------|-------------|
| 1926                      | 2,446,962   |
| 1927                      | 2,311,707   |
| *1928 (first nine months) | 1 593 375   |

\*The above earnings for the nine months' period include \$271,352, representing capital gains arising under actual contracts to be consummated prior to Dec. 31, 1928. Earnings for the last quarter of 1928 are at a rate substantially in excess of the same period last year. In addition, the corporation will receive during the last quarter, the benefit of increased earnings from subsidiaries, as well as profits of the Paradise Theatre recently completed.

TRUST INDENTURE—The trust indenture under which these notes are issued provides among other restrictions that no mortgages may be created (except on after-acquired property) upon any of the property and assets of the company, unless these notes are equally and ratably secured, nor for an amount exceeding 60% of the value of the property pledged as security.

**PURPOSE OF ISSUE**—The proceeds of this issue will be applied to retire certain outstanding indebtedness of the corporation and for other corporate purposes, leaving the corporation with no mortgages upon its real estate and no funded debt other than this issue.

#### MATURITIES AND PRICES

The notes mature serially, from November 1, 1929 to November 1, 1938.

#### Price of all maturities to Yield 5.75%

These notes are offered when, as and if issued and received by us, and subject to the approval of counsel. The legality of the issue and all legal details are subject to the approval of Winston, Strawn & Shaw for the bankers, and Sonnenschein, Berkson, Lautmann & Levinson for the corporation. It is expected that temporary notes will be ready for delivery on or about December 1, 1928.

Redeemable as a whole at any time, or in part on any interest date, on 60 days published notice, at 105 prior to January 1, 1933; at 104 on said date and thereafter prior to January 1, 1951; and at 101 on said date and thereafter prior to January 1, 1945; at 102 on said date and thereafter prior to January 1, 1945; at 102 on said date and thereafter prior to January 1, 1945; at 102 on said date and thereafter prior to January 1, 1951; and at 101 on said date and thereafter prior to maturity, plus accrued interest in each case. Interest payable without deduction for Federal income tax up to 2%. Pennsylvania 4 mills and California 5 mills taxes, and Massachusetts 6% income tax on interest, refundable upon application within 90 days after payment.

The Chase National Bank of the City of New York, Corporate Trustee

Mr. H. L. Clarke, President of the Company, has summarized in part his letter of November 22, 1928, as follows:

BUSINESS AND PROPERTY:—Interstate Power Company (of Delaware) furnishes electric light and power to 267 cities and communities located in the states of Minnesota, Iowa, South Dakota and Oklahoma, and in addition supplies gas to seven communities and steam heat to two, and also operates an electric railway and bus service in Dubuque and adjacent territory. Through wholly owned subsidiaries, electric light and power are furnished to 74 communities in the states of Wisconsin, North Dakota, Nebraska and Illinois. The total population of the territory served by the system is approximately 460,000 and the Company's customers total over 91,000. The combined annual electric output is about 112,000,000 K.W.H. The capacity of the system's electric generating plants is approximately 40,000 K.W. Approximately 91% of the net earnings of the system is derived from the sale of electric light and power, 8% from gas, and 1% from electric railway and bus service. The Company and its subsidiaries own 15 steam electric generating plants, 12 hydro-electric plants, 6 gas plants and 2 steam heating plants.

CAPITALIZATION:—(Upon completion of present financing)

|                                                                      | Authorized     | ubstanding     |

SECURITY:—The First Mortgage Bonds are secured, in the opinion of counsel, by a direct first mortgage on all the real estate, plants, transmission lines and other fixed public utility properties owned by the Company (located in Minnesota, Iowa, South Dakota and Oklahoma) and by the pledge of all outstanding bonds and capital stocks of subsidiaries owning the Wisconsin, North Dakota, Nebraska and Illinois properties included in the system.

The properties were examined by Day & Zimmermann, Inc. who estimated that the cost to reproduce new, less depreciation, plus an allowance for "going concern value," as of December 31, 1926, was substantially \$41,000,000. The cost of additions since that time has exceeded \$6,000,000. The properties which are under direct first mortgage constitute over 90% of the total valuation.

EARNINGS:—Consolidated earnings of Interstate Power Company for the calendar years 1926 and 1927, as certified by Messrs. F. W. Lafrentz & Co., Certified Public Accountants, and for the twelve months ended September 30, 1928, from the Company's books, were as follows:

| 12 Months ended                                                                                                                                   | Dec. 31,<br>1926 | Dec. 31,<br>1927  | Sept. 30.<br>1928 |

#### Additional Issue

# \$1,000,000

# Long Island Lighting Company

### 6% Cumulative Preferred Stock

Par Value \$100

Preferred as to assets and dividends over the Common Stock. Redeemable in whole or in part at the option of the Company at any time after three years from the date of issuance on any quarterly dividend date on 30 days previous notice at 110 and accrued dividends. Dividends payable quarterly January 1, April 1, July 1 and October 1.

Under the present Federal Income Tax Law dividends on this stock are exempt from the Normal Tax and are entirely exempt from all Federal Income Taxes when held by an individual whose net income is \$10,000 or less. Dividends when received by corporations are entirely exempt from all Federal Income Taxes.

# Issuance authorized by the Public Service Commission (State Division, Department of Public Service) of the State of New York

We summarize from the letter of Mr. E. L. Phillips, President of the Company, as follows:

#### Business:

Long Island Lighting Company supplies either directly or indirectly substantially the entire electric light and power and gas service on Long Island up to the New York City Line, and in addition, the Rockaway District of the Borough of Queens. The Company, through its subsidiary Kings County Lighting Company, furnishes gas to a large and rapidly growing section in the Borough of Brooklyn. The combined population in the territory served is in excess of 800,000.

# Purpose of Issue:

The proceeds from the sale of this Preferred Stock will be used by the Company for additions, extensions and improvements to the properties of the Company.

Under the present Federal Income Tax Law dividends on this stock are exempt from the Normal Tax and are entirely exempt from all Federal Income Taxes when such stock is held by an individual whose net income is \$10,000 or less. Dividends when received by corporations are entirely exempt from all Federal Income Taxes.

The letter of Mr. E. W. Hill, Vice-President of the Company, is summarized as follows:

#### Business:

Louisiana Power & Light Company supplies electric power and light service in a wide area, including 74 communities in agricultural, industrial, lumbering and mineral regions in northern Louisiana, in the southeastern part of the State north and west of New Orleans and in a district on the Mississippi River south of New Orleans. Among the communities served are Algiers (a part of the incorporated City of New Orleans), Gretna, Hammond, Bastrop, Haynesville, Ponchatoula, West Monroe, Amite, Kentwood, Westwego, Napoleonville, Independence, Winnsboro, Delhi and Ferriday. Eight of the communities served are parish (county) seats. The Company also owns and operates electric railway systems in Algiers, Gretna and two other communities, supplies gas in Gretna, Bastrop and seven other communities and water service in Bastrop and four other communities and owns ice manufacturing plants in Haynesville, Springhill and Amite.

The transmission system in the north, radiating from the Company's Sterlington steam electric generating station, forms an important part of a large interconnected system serving a wide area in the states of Louisiana, Arkansas, Mississippi and Tennessee. The Sterlington station supplies a large part of the power requirements of two associated companies, Arkansas Power & Light Company and Mississippi Power & Light Company.

# Purpose of Issue:

The proceeds from the sale of these 25,000 shares of \$6 Cumulative Preferred Stock and from the sale of \$4,500,000 First Mortgage Gold Bonds, 5% Series due 1957, will provide funds to reimburse the Company for expenditures made for additions to property and for other corporate purposes.

#### Earnings:

The earnings of the Company for the twelve months ended October 31, 1928, were as follows:

| Gross earnings (including other income)<br>Operating expenses, maintenance and taxes                          |             |
|---------------------------------------------------------------------------------------------------------------|-------------|
| Net earnings                                                                                                  | \$1,801,309 |
| Interest on bonds                                                                                             |             |
| Other interest and deductions                                                                                 | 300,463     |
| Balance for dividends, depreciation and surplusAnnual dividend requirements on \$6 Cumulative Preferred Stock |             |
| (including this issue)                                                                                        | 330,000     |

The balance of \$1,136,054, as shown above, for the twelve months ended October 31, 1928, was equal to more than 3.4 times the annual dividend requirements on the 55,000 shares of \$6 Cumulative Preferred Stock to be presently outstanding. Of the total gross earnings from operation for the twelve months ended October 31, 1928, approximately 90% was derived from electric power and light service, 5% from transportation service, 3% from gas service, and 2% from miscellaneous business.

#### Supervision:

Louisiana Power & Light Company is controlled through ownership of all its Second Preferred and Common Stocks by Electric Power & Light Corporation. Electric Bond and Share Company supervises (under the direction and control of the Boards of Directors of the respective companies) the operations of Electric Power & Light Corporation and Louisiana Power & Light Company.

Legal matters in connection with the issuance of this Preferred Stock will be passed upon by Messrs. Seibert & Riggs, of New York This Preferred Stock is offered when, as and if issued and received by us and subject to approval by counsel.

# \$2,000,000

# Houston Lighting & Power Company

(Houston, Texas)

First Lien and Refunding Mortgage Gold Bonds, Series D, 41/2%

Due November 1, 1978

### Price 93 and Interest, yielding about 478%

Dated November 1, 1928. Interest payable May 1 and November 1 in New York. Coupon bonds in denominations of \$1,000. Redeemable at the option of the Company in whole or in part, on the first day of any month on four weeks' published notice at 102 and interest through November 1, 1934, the premium decreasing ¼ of 1% during each six-year period elapsed thereafter to and including November 1, 1976, and thereafter at 100 and accrued interest.

A letter of Mr. Edwin B. Parker, President of the Company, is summarized in part as follows:

The Company: Houston Lighting & Power Company supplies without competition Houston, Texas, and 60 other communities in surrounding territory with electric power and light. Houston is the center of a territory rich in natural resources. It is one of the largest cotton markets in the world and one of the largest ports in the South.

Security: Series D Bonds, in the opinion of counsel, will be secured equally with Series A, Series B and Series C Bonds by a direct mortgage on all the present physical property and franchises of the Company, subject to \$4,503,000 underlying first mortgage (closed) bonds, of which \$2,100,000 are deposited with the Trustee, thus causing these Bonds to share in their security.

Earnings: Gross Earnings (including other income) for the twelve months ended September 30, 1928, were \$7,006,083; Net Earnings, \$3,003,090. Annual interest on total bonded debt outstanding with public, including this issue, requires \$840,150.

Gross earnings for the twelve months ended September 30, 1928, increased 234%

over gross earnings for the calendar year 1922, and net earnings for the former period increased 320% over net earnings for the latter. For each calendar year from 1922 to 1927 net earnings have been largely in excess of bond interest requirements, the average net earnings amounting to \$1,566,373, as compared with the average bond interest paid or accrued of \$416,725.

Purpose of Issue: The proceeds from the sale of this issue of bonds will reimburse the Company in part for expenditures made in connection with the enlargement and extension of its property, in order to meet the greatly increased demand for electric power and light that has taken place in the last few years within the territory served, and will place the Company in funds for carrying on its extensive construction program and for other corporate purposes.

Supervision: The operations of the Houston Lighting & Power Company are supervised (under the direction and control of its board of directors) by the Electric Bond and Share Company.

A circular more fully descriptive of these Bonds will be sent upon request.

# \$5,700,000

# Central Illinois Public Service Company

First Mortgage 5% Gold Bonds, Series G

Due November 1, 1968

Price 100 and Interest

The following is summarized from a letter of Mr. Marshall E. Sampsell, President of Central Illinois Public Service Company:

Business: The Central Illinois Public Service Company supplies directly with one or more classes of public utility service 396 communities in Illinois without competition of like service. It wholesales electrical energy to 14 other public utilities companies, which in turn serve 65 communities.

The Company's properties are for the most part located in some of the best agricultural and coal producing lands of the middle west, being in the corn belt or coal mining districts of central and southern Illinois. The coal fields not only assure an adequate fuel supply, but offer a very large opportunity for the sale of electric power for mining purposes, from which source a considerable income is derived.

**Security:** These Bonds, in the opinion of counsel, will be secured by a first mortgage on all of the fixed properties, rights and franchises of the Company, now owned,

and on all such property hereafter acquired against which any Bonds may be issued under the Mortgage. The value of the fixed property of the Company as determined by independent examining engineers plus subsequent additions is largely in excess of the First Mortgage Bonds to be outstanding upon completion of the present financing.

Purpose of Issue: The proceeds from the sale of these Bonds will be used to partially reimburse the Company's treasury for the cost of extensions and additions to its property. The Company will have available ample funds to pay without further financing its \$1,400,000 principal amount of Serial Gold Notes, due January 1, 1929.

Control: The operations of the Company are controlled by the Middle West Utilities Company.

Earnings: Following is the income account of the Company for the 12 months ended September 30, 1928 and 1927:

|                                            | 1928            | 1927            |
|--------------------------------------------|-----------------|-----------------|
| Gross Earnings                             | \$13,079,630.79 | \$12,306,279.59 |
| Operating Expenses, Maintenance and Taxes. | 7,634,279.71    | 7,338,505.85    |
| Net Earnings before Depreciation           | \$ 5,445,351.08 | \$ 4,967,773.74 |

Annual interest on First Mortgage Bonds, including this issue, to be presently outstanding, requires \$2,004,850.00.

A circular fully descriptive of the issue will be sent upon request.

# HALSEY, STUART & CO.

Dated November 1, 1928 and redeemable. Interest payable semi-annually May 1 and November 1 at the office of Halsey, Stuart & Co., Inc., in Chicago or New York without deduction for Federal Income Taxes, now or hereafter deductible at the source not in excess of 2%. Denominations \$1,000, \$500 and \$100. The issuance of these Bonds has been authorized by the Illinois Commerce Commission. These Bonds are offered for delivery when, as and if issued and accepted by us and subject to the approval of counsel. Definitive Bonds will be ready for delivery on or about November 28, 1928. All statements herein are official or are based on information which we regard as reliable and while we do not guarantee them, we ourselves have relied upon them in the purchase of this security.

This offering represents Voting Trust Certificates purchased from individuals, and does not involve any financing on the part of the Company.

#### Mr. T. H. Banfield, President of the Company, has summarized his letter to us as follows:

History and Business: The Iron Fireman Manufacturing Co., incorporated in Oregon, February 26, 1926, as successor to a partnership, is the largest manufacturer in the United States of small size automatic coal stokers. National

distribution of the Iron Fireman line of stokers was first undertaken in 1925. The business has been expanded to its present proportions entirely out of earnings with the exception of an initial investment of \$160,000.

The "Iron Fireman" is an automatic coal stoker made in nine different sizes for application in small power and heating plants up to 200 horse-power capacity. The "Iron Fireman, Jr." is designed for heating residences.

The "Iron Fireman" automatic stoker permits the use of lower grades of coal, affords more complete combustion and substantial savings in labor. In the case of anthracite, for example, the "Iron Fireman" is designed to handle buckwheat and other small sizes at large savings in price as compared with the larger sizes of coal.

Dividends: The Board of Directors has declared an initial quarterly dividend of 25 cents per share on the common stock, payable March 1, 1929 to certificate holders of record on February 15, 1929.

The business of the company Management: will continue under the same management which has been reponsible for its development and successful operation. In addition Mr. Edward C. Sammons, formerly Vice-President of the United States National Bank of Portland, Oregon, will take an active part in the management. Officers of the company are T. H. Banfield, President; Edward C. Sammons, Executive Vice-President; Frank S. Hecox, Secretary, and W. H. Gray, Treasurer. These and other individuals active in the management will own a substantial amount of the Voting Trust Certificates representing common stock of the company.

This offering is made subject to allotment or prior sale, and when, as and if issued and accepted by us, subject to the approval of Messrs. Carey and Kerr for the Company, and of Messrs. McCamant & Thompson for the Bankers. It is expected that delivery of interim receipts or temporary or definitive Voting Trust Certificates will be made on or before December 15, 1928, at the office of Blyth, Witter & Co., Portland, Oregon. A business examination of the Company has been made by Messrs. Sanderson & Porter,

### Class A Common Stock

(Non-Callable)

The Class A Common Stock will be entitled to cumulative dividends of \$2 per share per annum from December 1, 1928. After dividends at the rate of \$2 per share, in any year, shall have been paid on the Class B Common Stock the Class A Common Stock shall participate equally share for share with the Class B Common Stock in any further dividends. Not to exceed 16,000 shares of this issue are reserved for issuance to present stockholders of the Company.

WELLS FARGO BANK & UNION TRUST CO.

Transfer Office
RAINIER PULP & PAPER COMPANY
San Francisco

#### CAPITALIZATION

(Upon issuance of securities as planned and retirement of present outstanding securities by redemption or exchange)

E. M. Mills, Esq., President of the Company, has summarized his letter dated October 27, 1928, as follows:

Company and Properties: The Company, organized April 26, 1926, under the laws of Delaware, is engaged in the manufacture of sulphite pulp at Shelton, Washington. The Company owns approximately 16 acres of land fronting on tidewater. Its manufacturing plant consists of a sulphite pulp mill, completed in 1927, with a daily capacity of 125 tons of unbleached sulphite or 115 tons of bleached sulphite, together with the usual auxiliaries such as wood preparing plant, warehouse, docks, etc.

Closely adjacent to the plant are two large saw mills owned and operated respectively by the Simpson Logging Company and the McCleary Lumber Company from which the Rainier Pulp and Paper Company purchases electric energy and steam at low rates under a satisfactory contract. The Company's plant is operating at full capacity.

Wood Supply: The Rainier Pulp & Paper Company has entered into a long term contract with the Simpson Logging Company whereby the Rainier Pulp & Paper Company has the right to take out, in advance of logging operations, trees up to 10 inches in diameter. The Company also has contracts with the Simpson Logging Company and with owners of other saw mills for the right to take from the conveyors of such mills such pieces of wood as are suitable for manufacturing into sulphite. Through these contracts the Company is assured of

a low cost wood supply ample for its requirements for approximately twenty years.

Earnings: Net earnings for the first five months of the present fiscal year to September 30, 1928, after all charges including interest on funded debt and current loans, depreciation and Federal income taxes were \$222,786.52. After giving effect to recapitalization, other than amortization of financing expenses, such net earnings are at an annual rate of \$649,620.91. Such net earnings are at an annual rate equivalent to \$6.49 per share of Class A Common Stock. After providing for the \$2 dividend on both the Class A and Class B shares, the balance of such earnings applicable to the Class A and Class B shares would be at an annual rate equivalent to 91 cents per share.

Management: The management of the Company is in the hands of men who are experienced and successful in the pulp and paper industry. More than fifty per cent of the Class B Common Stock and a substantial amount of Class A Common Stock, is in the hands of Isadore Zellerbach, M. R. Higgins, E. M. Mills, J. D. Zellerbach and H. L. Zellerbach, all of whom are active officers of the Crown Zellerbach Corporation, and Senator Mark E. Reed, President of the Simpson Logging Company. No change in the management is contemplated as a result of this financing.

All legal proceedings incident to the issuance of this stock have been taken subject to the approxing opinion of Messrs. Sullivan & Cromwell, Attorneys, New York City, New York.

# \$15,500,000

# Pacific Western Oil Company

### Fifteen-Year 61/2% Sinking Fund Gold Debentures

(With Stock Purchase Warrants)

To be dated November 1, 1928

To mature November 1, 1943

Coupon Debentures in denominations of \$1,000 and \$500, registerable only as to principal. Redeemable in whole or in part on thirty days' prior notice at 105% if redeemed on or before May 1, 1931, with successive reductions of 1% during each three-year period thereafter, in each case with accrued interest. Interest payable May 1 and November 1, without deduction for Federal income tax not in excess of 2%. Upon proper application Company will refund to resident holders in Pennsylvania, Connecticut, Maryland, District of Columbia, California, Iowa and Kentucky, any personal property taxes to the extent of six mills in each year, or any Massachusetts income tax not in excess of 6% in each year on the interest. Authorised and to be outstanding \$15,500,000. Guaranty Trust Company of New York, Trustee.

Each Debenture will carry a warrant entitling the holder to purchase capital stock of Pacific Western Oil Corporation at \$331, per share on or before November 1, 1938, in the ratio of 15 shares of capital stock for each \$1,000 principal amount of Debentures. Provision will be made for protection against dilution of the stock purchase privilege in certain cases. Warrants are non-detachable except in the event of the redemption of the Debentures.

Cumulative sinking fund operating semi-annually commencing November 1, 1929, calculated to retire 60% of these Debenturs by maturity.

The entire proceeds from exercise of the stock purchase warrants will be applied to the retirement of Debentures.

Jacques Vinmont, Chairman of the Board of Directors of Pacific Western Oil Company, summarizes his letter to us as follows:

Properties: Pacific Western Oil Company has been organized under the laws of Delaware to acquire substantially all of the oil producing properties, and the greater portion of the undeveloped oil properties in California, owned, leased or controlled by Petroleum Securities Company, a corporation all the stock of which is owned by Edward L. Doheny, and members of his family.

The properties comprise a total of about 40,000 acres, of which approximately 31,000 acres are owned in fee, 5,450 acres are held under lease (of which 667 acres are held jointly with others), 728 acres are controlled through ownership of mineral rights or otherwise, and 3,100 acres are held under U. S. Government permits or leases which will be acquired subject to Governmental consent (which, according to counsel, is usually ebtained in due course), together with certain production equipment, materials and supplies and gasoline absorption plants located on the properties. Of the acreage held in fee or concontrolled, a lease has been granted on a royalty basis on about 10,265 acres. Production is being obtained at present from Ventura Avenue, Inglewood, Huntington Beach, Alamitos Heights (Seal Beach), Torrance, Los Alamos and East Coyote Districts. The production for October, 1928, from the properties being acquired averaged over 16,000 barrels daily after deducting production due joint owners and after deducting royalties, averaged approximately 13,000 barrels net production. In addition to the present production, the management has shut in approximately 4,000 barrels daily, 8 wells are now being drilled, all of which are in the prolific Ventura Avenue field.

Robert B. Moran, independent engineer, estimates total recoverable oil reserves of approximately 56,800,000 barrels from present proven acreage in the properties being acquired, without taking into consideration potential recovery from undeveloped acreage.

Contracts: Pacific Western Oil Company will presently enter into a contract extending until 1938 with Richfield Oil Company of California, under which the latter will agree to purchase the entire crude oil production of substantially all the properties above described up to 20,000 barrels daily at prevailing posted market prices, and has the first call at such prices on any additional production in excess of 20,000 barrels daily from such properties, and on all production from properties subsequently acquired, such latter production, how-

ever, being subject to release under the terms of the contract in the event of sale or merger. The Company will also enter into a contract with the Richfield Oil Company of California for the sale of casing-head gasoline derived incident to its operations. These contracts will not only assure to Pacific Western Oil Company the advantage of providing an immediate market at the wells for its production at prevailing market prices but should also obviate the necessity for large expenditures for storage and transportation facilities.

Valuation and Assets: The physical properties to be acquired by Pacific Western Oil Company have been appraised by Robert B. Moran, independent engineer, at over \$43,000,000. On the basis of this appraised valuation and including working capital of about \$1,750,000, to be provided out of current financing, total assets of Pacific Western Oil Company will amount to over \$44,750,000, equivalent to over \$2,800 per \$1,000 Debenture. Such assets will be carried on the books at a valuation of about \$27,500,000.

Purpose of Issue: These Debentures, together with the capital stock of Pacific Western Oll Corporation, are being issued in connection with the acquisition of the properties and to provide working capital for the Company.

Debentures: These Debentures will be the direct obligation of the Pacific Western Oil Company and will constitute its sole funded debt. The Company has no Preferred Stock authorized or outstanding and all of its Capital Stock will be owned by the Pacific Western Oil Corporation, a holding company. Pacific Western Oil Corporation will have an authorized capitalization of 2,000,000 shares of capital stock, no par value, of which 1,000,000 shares will be presently outstanding and 232,500 shares will be reserved for the exercise of stock purchase warrants to be attached to these Debentures.

Management: Jacques Vinmont, formerly President of California Petroleum Company, is Chairman of the Board of Pacific Western Oil Company and of Pacific Western Oil Corporation, William C. McDuffie, formerly in charge of crude oil production for the Royal Dutch-Shell Group, will be President of both Companies. The executives will hold a substantial interest in the capital stock of Pacific Western Oil Corporation.

We offer these Debentures when, as and if issued and received by us subject to the approval by Messrs. Sullivan & Cromwell, counsel for the Company, and Messrs. Cravath, deCersdorff, Swaine & Wood, counsel for the Bankers of all legal proceedings incident to the issuance of the Debentures and Warrants. Messrs. Loeb, Walker & Loeb of Los Angeles are acting as California counsel for the Bankers. It is expected that delivery in the first instance will be made on or about November 27, 1928 in the form of temporary Debentures or Interim Receipts.

A summary report of Robert B. Moran is available for inspection at offices of Blyth, Witter & Co. and J. & W. Seligman & Co. in New York City.

# \$13,000,000 Kingdom of Bulgaria

7½% Stabilization Loan 1928

Forty-Year Secured Sinking Fund Gold Bonds. (Part of International Stabilization Loan of 1928).

Dated November 15, 1928, due November 15, 1968. Interest payable May 15 and November 15. Principal and interest payable in New York at the office of Speyer & Co. or of J. Henry Schroder Banking Corporation, in United States gold coin, without deduction for any Bulgarian taxes, present or future. Principal and interest will also be collectible, at the option of the holder, in Belgian francs in Brussels, in lire in Milan and in Swiss francs in Zurich, at the banking houses referred to below, at the current buying rates for sight exchange on New York. Coupon Bonds in denominations of \$1,000 and \$500.

Cumulative Sinking Fund sufficient to repay all of these Bonds at or before maturity, to be applied to the semi-annual redemption of Bonds by lot at par, the first redemption to be on November 15, 1929.

Not subject to call before November 15, 1938, except for sinking fund. The Government reserves the right to repay at par on that date, or on any interest date thereafter, all or any part of the Bonds then outstanding, upon six months' previous notice.

upon six months' previous notice.

\$4,000,000 Bonds of the above issue have been withdrawn for sale as follows: \$1,000,000 in Belgium by Banque Belge pour l'Etranger, Brussels, \$1,500,000 in Italy by Banca Commerciale Italiana, Milan, and \$1,500,000 in Switzerland by Crédit Suisse, Zurich.

These \$13,000,000 Bonds are part of an International Loan, limited (as authorized by the Council of the League of Nations) to yield to the Government a net amount equivalent to £5,000,000 Sterling; the balance of this Loan is being offered as follows: £1,500,000 Sterling Bonds in London by the Ottoman Bank, J. Henry Schröder & Co. and Stern Brothers; £200,000 in Amsterdam by Hope & Co. and Banque de Paris et des Pays-Bas; £100,000 in Prague by Živnostenská Banka v Praze on behalf of a Czechoslovakian Banking Syndicate, and Fcs. 130,000,000 Bonds in Paris by Banque de Paris et des Pays-Bas, Banque de l'Union Parisienne, Comptoir National d'Escompte de Paris, Crédit Lyonnais, Crédit Mobilier Français and Société Générale pour Favoriser le Développement du Commerce et de l'Industrie en France. de l'Industrie en France.

His Excellency Wladimir Molloff, Minister of Finance, has authorized the following statement in behalf of the Bulgarian Government; having been transmitted by cable, it is subject to correction:

The Loan is issued pursuant to the Geneva Protocol of March 10, 1928, as amended September 8th, approved by the Council of the League of Nations by Resolutions of March 10, June 9 and September 17, 1928, ratified by Acts of the Bulgarian Parliament of April 13 and September 27, 1928, and pursuant to an Act of the Parliament of November 15, 1928, approving the Loan Contract. The amount of the Loan is limited to \$13,000,000 Dollar Bonds, £1,800,000 Sterling Bonds and Fr. Fcs. 130,000,000 Bonds.

The Loan will be the direct obligation of the Bulgarian Government and will be secured by a first charge on all receipts from the import, export and other customs duties. The receipts from these revenues for the two years ended March 31, 1928, and the estimated amount for the current fiscal year, are approximately as follows:

| Fiscal year ending<br>March 31. | Amount      |
|---------------------------------|-------------|
|                                 |             |
| 1927                            | \$8,753,000 |
| 1928                            | 9,282,000   |
| 1929                            | 9,021,000   |

or, for each year, over four times the annual interest and sinking fund on the entire Loan.

By Resolution of September 24, 1928, the Inter-Allied Commission (established under the Treaty of Neuilly) released the customs revenues from the first charge for reparations and costs of occupation and the general charge treaty obligations.

If at any time the receipts from the above revenues should fall below 150% of the annual service requirements of the Loan, the Inter-Allied Commission has agreed to release, at the request of the Council of the League of Nations, from the above general charge additional revenues sufficient to insure total revenues equal to at least 150% of the service requirements, and the additional revenues so released shall be forthwith assigned to the service of the Loan.

The Pledged Revenues will be paid as collected into a special account (with the National Bank of Bulgaria), to be controlled by a Commissioner appointed by the Council of the League and, after the termination of his functions, by the Trustees for the Bondholders to be appointed by the Council of the League. The sum required for the service of the Loan will be remitted to the Fiscal Agents in monthly instalments for the account of the Trustees.

From the Proceeds of the Loan, approximately \$7,300,000 will be paid to the National Bank of Bulgaria for stabilizing the currency, and approximately \$3,163,000 to the Agricultural Bank and to the Central Cooperative Bank for additional working capital; the balance will be expended under the direct control of the Commissioner, approximately as follows: \$6,083,000 for the improvement of roads, railways and ports, \$2,433,000 for reconstruction work necessitated by the earthquakes of last spring, and \$5,353,000 for the payment of floating debt in order that the revenues of the State may be used to maintain a balanced budget.

The Currency, which has been subject to only small

The Currency, which has been subject to only small fluctuations during the past five years, will be stabilized in relation to gold by law.

For the year ended March 31, 1928, revenues were about \$50,290,000, and the surplus over expenditures was about

\$435,000, Bulgaria, with an area of about 40,000 square miles, has over 5,000,000 inhabitants, or a larger population than Denmark, Finland, Norway or Switzerland. The country is mainly agricultural, and exports considerable quantities of tobacco, cereals and other farm products.

External loans of Bulgaria were sold before the war in England and leading countries of Continental Europe; the 4½% Bonds of 1907 and 1909 (the last pre-war Loans) were marketed on a 5% basis.

Conversions have been made at 138 Leva to the Dollar and at par of exchange for other currencies.

#### Application will be made to list these Bonds on the New York Stock Exchange.

For further information, reference is made to a letter dated November 16, 1928, from His Excellency Wladimir Molloff, Minister of Finance of the Kingdom of Bulgaria, copies of which may be obtained from the undersigned. All proceedings in connection with the issuance of the above Bonds are subject to the approval of our counsel, Messrs. Cadwalader, Wickersham & Taft and associate Bulgarian counsel.

We offer the above Bonds for subscription, if, as and when issued and received by us, at

#### 97% and accrued interest, to yield to maturity $7\frac{3}{4}\%$ .

We reserve the right to close the subscription at any time without notice and to reject any application or to allot a smaller amount than applied for. Amounts due on allotment will be payable at the office of Speyer & Co., 24 & 26 Pine Street, in New York funds, on or about December 3, 1928, as called for, against delivery of Interim Receipts exchangeable for Definitive Bonds when ready.

#### SPEYER & CO.

### J. HENRY SCHRODER BANKING CORP.

### \$15,000,000

# Rudolph Karstadt, Incorporated

#### First Mortgage Collateral 6% Sinking Fund Bonds With American Shares

Each bond will carry a warrant, detachable after April 30, 1929, entitling the holder to receive without further cost, after said date, 3 American Shares, each American Share representing 40 Reichsmarks par value of capital stock of the company. These American shares will carry full dividend rights with respect to the fiscal year ending January 31, 1929, but will not carry rights to subscribe for capital stock presently to be offered to stockholders in the amount of \$2,360,008 par value.

To be dated November 1, 1928. To mature Movember 1, 1943. Authorized and presently to be issued \$15,000,000. Coupon bonds in denomination of \$1,000 registerable as to principal only. Interest payable May 1 and November 1. Principal and interest payable in United States gold coin at the principal office Dillon, Read & Co., New York, without deduction for any taxes, present or future, levied by German governmental authorities. Bondholders may, at their optic collect principal and interest in London at the office of J. Henry Schröder & Co. in pounds sterling; in Amsterdam at the office of Mendelssohn & Co. Amsterdam in guilders; or in Zurich and Basis at the office of Crédit Suisse and Société de Banque Suisse, in Swiss francs; in each case at the buying rate for sight exchan as a whole, or in part by lot, on any interest date, on thirty days' notice, to and including November 1, 1933, at 102 and interest, thereafter to and including November 1, 1933, at 102 and interest; thereafter to and including Kreditsicherung A. G., Berlin, German Trustee. Deutsch Kreditsicherung A. G., Berlin, German Trustee.

The company has made application to list these bonds on the Boston Stock Exchange and has agreed to make application in due course to list them on the New York Stock Exchange.

The indenture is to provide for a sinking fund, calculated on an accumulative basis, sufficient to retire 50% of the issue by maturity, by semi-annual redemption of bonds by lot, commencing May 1, 1929, at 100 and interest.

The following information has been summarized by Mr. Hermann Schoendorff, Managing Director of Rudolph Karstadt, Incorporated, from his letter dated November 21, 1928, copies of which may be obtained upon request, and is subject to the more complete information contained therein:

Rudolph Karstadt, Incorporated, organized under the laws of Germany, owns and operates, directly or through subsidiaries, the largest chain of department and unit-price stores in Germany. Beginning in 1881 as a small shop established by Rudolph Karstadt with one employee, the business of the company now includes 77 department stores, 17 unit-price stores, 15 factories, and a wholesale and export business.

employee, the business of the company now includes 77 department stores, 17 unit-price stores, 15 factories, and a wholesale and export business.

The bonds are to be the direct obligation of the company and are to be secured, in the opinion of counsel, by separate dollar mortgages, in favor of the German trustee, in an aggregate amount in excess of the principal amount of the bonds, such mortgages severally constituting direct first liens upon parcels of city real estate, having in each case a conservative value, as certified by an independent appraiser, of more than 2½ times the amount of the dollar mortgage thereon. The aggregate value of the properties to be mortgaged has been so appraised at over \$45,000,000. Such value gives effect, in some cases, to the construction or completion of certain buildings, estimated to require 30,500,000 Reichsmarks (\$7,259,000), which sum is to be deposited from the proceeds of these bonds, with the German trustee, to be withdrawn as construction progresses. Any deposited moneys remaining after the completion of such buildings are to be released to the company. The indenture is to permit reduction of the amount of the mortgages and/or release of mortgaged property, upon retirement of bonds, under restrictions designed to protect the security for the bonds, as to be set forth fully in the indenture. Certain of the properties to be mortgaged are at present subject to prior liens securing indebtedness in the aggregate principal amount of \$1,240,854. The company has covenanted to cause such prior liens to be cancelled and is to deposit from the proceeds of these bonds, with the German trustee, pending cancellation an amount sufficient to pay in full the indebtedness secured thereby.

SALES AND EARNINGS

Net sales of the company, and net earnings (including the company's proportion of profits and losses of subsidiary and controlled affiliated companies) after depreciation and annual Dawes Plan charges adjusted to the present rate of assessment, before interest, management partici

| January 31                                                                                                                                                                                                                                                                                                                                                                   | Net sales                                    | as above                           |

\$83,694; 1926—\$361,144; 1927—\$105,526; 1928—\$468,173.

The maximum annual interest requirement is \$2,267,187 on all interest-bearing indebtedness of the company outstanding on October 31, 1928, after giving effect to this issue and the reduction of indebtedness through the application of part of the proceeds thereof and of capital stock recently underwritten. After the application of such proceeds to the reduction of indebtedness as above, there remains \$7,701,442 of proceeds, which is to be used by the company in the extension of its business activities (including the completion of construction referred to above), and from which no benefits have been reflected in the earnings shown above.

The above net earnings of \$4,876,684 for the fiscal year ended January 31, 1928, after deducting interest paid or accrued, management participation in profits, and profits taxes, but excluding extraordinary charges and credits resulting in a net charge of \$468,173, as certified by Messrs. Price, Waterhouse & Co., were \$2,254,887, equivalent to \$1.76 per American Share, on the basis of the capital stock outstanding at January 31, 1928.

Net sales for the six months ended July 31, 1928, as reported by the company, were \$32,089,771, as compared with \$28,015,472 for the corresponding period in the preceding fiscal year.

CAPITALIZATION

The capitalization of the company as at July 31, 1928, adjusted to give effect to the issuance of these bonds, the issuance of additional capital stock referred to below, and to the application of part of the proceeds thereof, is as follows:

Funded Debt

| Funded Debt | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 | \$15,000,000 |

On January 31, 1928, the company's outstanding capital stock amounted to \$12,138,000 par value. Since that date, \$2,023,000 par value of capital stock was offered to stockholders at 150% of par in May, 1928, and \$2,360,008 par value is presently to be offered to stockholders at 175% of par. The \$14,161,000 par value of outstanding capital stock, on the basis of current quotations on the Berlin Stock Exchange (approximately 240% of par), has an indicated aggregate market value of more than \$33,000,000. The company has agreed to make application in due course to list on the New York and Boston Stock Exchanges, American Shares representing capital stock of the company in the ratio of 25 American Shares for each 1,000 Reichsmarks (\$238) par value of capital stock.

All conversions of German into United States currency have been made at par of exchange (one Reich Information herein contained has been received in part by cable.

A substantial amount of these bonds has been withdrawn for offering in Europe.

We offer these bonds, with warrants attached, for delivery if, when, and as issued and accepted by us, subject to approval of legal proceedings by counsel. It is expected that delivery will be made on or about December 10, 1928, in the form of temporary bonds, or interim receipts of Dillon, Read & Co.

The company has agreed to call its issue of \$2,264,000 First Mortgage 7% Sinking Fund Gold Bonds for redemption on April 1, 1929, at 101 and interest, and honds of that issue will be accepted, in payment for these bonds, at such redemption price discounted at the rate of 41/1% per annum.

#### Price 98 and interest

Each bond will carry a warrant for 3 American Shares, as stated above.

# CHICAGO'S HOME NEWSPAPER

More than a catchword—

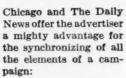

A PURPOSE—A POLICY—A FACT

Take a pair of compasses. Stick the pin at the intersection of State and Madison streets, the busiest corner in the world. Draw a forty-mile circle around it.

Here is the true Chicago market as reported in the circulation statement of the A. B. C. and defined by every factor of population and trade.

Here is concentrated more than 95 per cent of the circulation of only one newspaper, The Chicago Daily News. And here is directed its program of service.

In purpose, policy and distribution of circulation The Daily News is distinctively a CHICAGO newspaper.

A compact, stable, easily merchandised market.

A home circulation concentrated in that market.

In no other major market and its media can advertising and sales effort be more effectively combined.

# The Financial Situation.

It is refreshing to be able to note that the matter of dealing more liberally with the railroads of the country, in order that they may render the reliable and adequate service required of them and at the same time earn a fair return upon their capital investment, is now being urged upon public attention from many different quarters. With transportation rates being steadily reduced and with one class of railroad employees after another insisting upon never-ending wage advances, these rail carriers face the menace of being ground between the upper and the nether millstones. So flagrantly is this the case that the outsider has found it somewhat difficult to understand why the railroads have not pressed the merits of their case, and the urgency of providing measures of relief, with greater earnestness and vigor. If, on the one hand, the Hoch-Smith joint resolution appears to stand in the way of securing more nearly compensatory schedules of transportation rates from the Inter-State Commerce Commission, on the other hand the situation of the railroads under the absence of the needed relief, is getting steadily worse, thereby making their cause all the stronger and such as to carry conviction, when properly presented, to the minds of all disinterested persons.

But the cudgels on behalf of the rail carriers are now being taken up in good earnest. One illustration of this is found in the address delivered on Wednesday of this week, at the annual dinner of the Railway Business Association, by Daniel Willard, President of the Baltimore & Ohio RR., and another in a report on the economic situation in the railway industry submitted the same day by the Bureau of Railway Economics at the annual meeting of the American Railway Association held at the Biltmore Hotel in this city. This latter report well says

that an important problem confronting the railroads, the shippers, and the general public of the country, is: How long can the railroads continue to maintain their net income against declining traffic revenues? Gross revenues during the nine months ended Sept. 30 1928 decreased \$124,000,000, compared with the corresponding period in 1927; fortunately, this was met by a reduction in operating expenses of \$134,000,000. Only the application of the most rigid economy, we are told, saved the net railway income from showing a large decline. Yet the income for the nine months of 1928 was at the annual rate of return of no more than 4.55%, compared with 4.60%, both figures falling considerably short of the 53/4% to which the Commerce Commission says the railroads are entitled The capital investment necessarily increases from year to year and wage levels continue to rise, while the ratio of taxes to operating revenues has advanced to the highest point ever known. "In the first nine months of 1928, 6.30 cents out of every dollar of revenue was absorbed by taxes, contrasted with 6.17 cents in the same period of 1927."

President Willard, of the Baltimore & Ohio, tackles the problem without gloves. Reverting to the question put by Fred W. Sargent, the President of the Chicago & North Western Railway Co. last year when he asked whether the railroads were drifting back to the unfortunate condition in which the railroads found themselves in 1917, at the time the Government took them over as a war measure, Mr. Willard asserts that if there had been any doubt at that time concerning the right answer to that question, there could not be any doubt concerning the correct answer at the present time. "Results and tendencies clearly show that the railroads are gradually, but none the less definitely, drifting back in the direction of conditions existing before the World War-at the time, we will say, of the 5% Rate Case in the Eastern region." In that case, which was decided in 1914, the Commission reached the conclusion that the net operating income of the railroads was insufficient and should be increased.

In one particular the railroads now are even worse off than they were in this earlier period. Mr. Willard points out how the situation has changed, as compared with the former bad period, in the following words:

"Since the war conditions have changed. While the general business of the country may be increasing, and probably is, the same is no longer true, to the same extent as formerly, of the railroads. The development of hydro-electric power, extended use of crude oil for fuel, and shifts in industrial locations, have made serious inroads into the use of coal. thereby substantially reducing its movement by rail.

"The increased and steadily increasing volume of tonnage moving on the inland waterways has largely been diverted from the railroads, and it certainly must be expected that the 3,000,000 motor trucks and 20,000,000 other motor vehicles in operation on United States highways are handling some business that formerly moved on the railroads. As a matter of fact, we know that they are handling a very considerable volume of such business, both freight and

passenger.

"As a result of these influences, among others, freight traffic handled by the railroads has remained substantially stationary during the last eight years. Whether this condition is to be permanent or only temporary no one can say. It is apparent, however, that the railroads cannot now look with confidence to an increase of traffic each year, sufficient to offset the effect of reduced rates and increased operating costs, as has been the case to a certain degree in the past. There is, in such circumstances, only one remaining avenue of relief, usually involving large capital expenditures, and that is more effective and economical operation, and it will be recognized that there are rather definite limits in that direction.

"Coincident with these economic changes there has been a constant wearing away of rate structure through innumerable applications for 'adjustments.' The unwisdom and, if I may say, the unfairness of so administering this lawfully established rule of rate-making as to require the carriers to accept rates and fares insufficient to yield a fair return upon the value of their properties devoted to transportation purposes, should be apparent to anyone who gives the matter serious consideration. I have urged and now urge that a more far-seeing interpretation of the law, as well as application of it, should be had not only in the interest of fair-dealing with the carriers, but primarily in the public interest, in order that the roads may continue to meet at least the minimum standard of adequate service."

What Mr. Willard says should be heeded. If it is not possible to raise transportation rates, at least there rail carriers should be protected against any further leveling down of such rates and a firm stand should likewise be taken against further wage increases. This latter requirement is as imperative as the former. In our issue of Nov. 3 we referred to the increase in wages recommended by the Emergency Board, appointed by President Coolidge, under the provisions of the Railway Labor Act in the case of the wage dispute between the Western carriers and their conductors and trainmen, and found (according to the report last year of a Federal Board of Mediation which had denied the request) that this increase would ultimately add \$83,000,000 to the operating expense of the railroads affected, the mileage involved in the controversy being over half that of the entire railroad mileage of the country or 138,-672 miles out of a total of 237,054 miles. The whole railroad world should set its face rigidly against further wage increases of any kind, since the level of wages in the railroad service is very high and these rail carriers are in no condition to bear additional burdens of that kind.

George Hannauer, President of the Boston & Maine Railroad, in an address at the annual dinner of the National Industrial Traffic League on Thursday night at the Hotel Astor, also discussed the subject of the condition of the railroads. Mr. Hannauer pointed out that the railroad service is vastly better and continues to get better all the time; that the railroads have spare capacity so that traffic congestions and car shortages become extinct; that the railroads have been spending close on \$700,000,000

to continue to do this; that in 1920 rail operating expenses were \$5,800,000,000 and in 1927 the railroads handled 6% more traffic and spent \$1,225,000,000 less for operation; that the 53/4% level named in the Transportation Act has never been reached and that in the last five years the tendency has been away from this goal instead of toward it. More than 600 per ons attended the dinner. At the speakers' table were the presidents and vice-presidents of nearly all the trunk lines of the country.

Brokers' loans on the security of stock and bond collateral are now leaping upward with a swiftness that is both startling and alarming, and no good purpose is served by seeking to minimize the menace involved. The most unfortunate feature connected with the gigantic speculation in the stock market is that it is being conducted on borrowed money. And the stupendous magnitude of these brokers' loans constitute the evidence of this borrowing. With Stock Exchange speculation spreading like wild fire, constant expansion in borrowing by brokers is the inevitable concomitant. The expansion results from a double cause, first because the volume of speculation is itself increasing and secondly because more and more money is involved as prices rise higher and still higher. The further addition this week has been no less than \$176,315,000, raising the grand total of these loans to brokers and dealers (secured by stocks and bonds), by the 45 reporting member banks in New York City away above the five billion dollar mark, the exact figure being \$5,157,132,000. Bearing in mind that the Stock Exchange's own figures, which are more comprehensive than the Federal Reserve figures, but are compiled only once a month, usually run nearly \$1,000,000,000 higher than the Federal Reserve figures, we get some idea of how bank credit is being absorbed in the delirious speculation which has now extended to all parts of the country and to all classes of the community.

It follows as a matter of course that with this week's further increase, a new high record in all time has been established. The aggregate of these loans has now been rising uninterruptedly for thirteen successive weeks and at \$5,157,132,000 Nov. 21 the amount compares with \$4,201,131,000 on Aug. 22, showing an addition of not far from \$1,000,000,000 in the short space of three months. As compared with Nov. 23 1927 when the total was already unduly large, the increase is \$1,675,846,000. In the further expansion of \$176,315,000 during the past week the reporting member banks have themselves been the heaviest contributors, the loans made by these reporting member banks for their own account having risen during the week from \$994,367,000 to \$1,125,-922,000. The loans made for account of out-of-town banks have remained virtually unchanged, standing at \$1,750,794,000 Nov. 21 and at \$1,751,460,000 Nov. 14. The loans for account of others, the most objectionable form of borrowing, still keep mounting upward and have established still another high peak, They are now (Nov. 21) \$2,280,416,000 against \$2,-234,980,000 Nov. 14, and compare with only 827,000 twelve months ago on Nov. 23 1927.

With such a tremendous absorption of bank credit in stock speculation, it is only small consolation to find that borrowing of the member banks at the Reserve institutions is not increasing, but rather decreasing. During the week the discounts at the a year to make this possible and that they will have | twelve Reserve institutions were reduced from \$857,- 539,000 to \$799,946,000. On the other hand, the Federal Reserve Banks are continuing their policy of buying more and more acceptances in the open market, thereby nullifying to that extent the effect of the reduced direct borrowing by the member banks. During the week the acceptance holdings of the twelve Reserve Banks were further raised from \$474,400,000 to \$484,164,000. Holdings of U. S. Government securities were also increased somewhat during the week, the amount rising from \$222,339,-000 to \$226,055,000, and the result altogether is that total bill and security holdings stand the present week at \$1,514,555,000 against \$1,558,133,000 a week ago, but comparing with \$1,366,872,000 twelve months ago on Nov. 23 1927. As showing how far the Federal Reserve Banks have carried their policy of enlarging their holdings of acceptances, we may note that the acceptance holdings now at \$484,164,-000 compare with only \$161,847,000 on Aug. 8, being an addition of \$322,317,000. The holdings of U.S. Government securities are also larger, the amount now at \$226,055,000, comparing with \$207,868,000 on Aug. 8, making the combined addition to the amount of Reserve funds in use through the open market purchases of acceptances and of Government securities no less than \$340,504,000.

In this way the Reserve banks have been thrusting Reserve funds into use at a time of the wildest speculation ever witnessed, when every consideration of prudence suggested that Reserve credit should be curtailed. We know of course that the theory is that in buying acceptances the Reserve institutions are employing Reserve credit for the direct accommodation of the mercantile community, but the fallacy of the argument consists in ignoring entirely the fact that by taking over these acceptances the Reserve Banks are releasing a corresponding amount of bank credit which the member banks can apply in other directions. The acceptance holdings of the Federal Reserve Bank of New York at \$142,964,000 Nov. 21, compare with \$32,170,000 on Aug. 8, being an increase of \$110,794,000, and the holdings of U. S. Government securities at \$41,412,000 compare with \$28,501,000, an increase of \$12,911,000, making the combined addition, at this the speculative center, \$123,705,000.

On the Stock Exchange the present week prices have been soaring as never before in the history of the Exchange, with the dealings of unprecedented magnitude and the market very tumultuous in character. Reams of stock have been purchased, but reams of stock have also been disposed of in the process of realizing profits. This naturally caused violent fluctuations, sharp declines being interspersed with even more pronounced advances, but the general upward trend of prices has never been checked except temporarily. One buying wave has succeeded another, and swept everything before it and prices have mounted upward in even more pronounced fashion than in the most noted of the long antecedent period of upswings in values. The facilities of the Stock Exchange have again been taxed beyond capacity, and as a last resort the Stock Exchange authorities began on Thursday in reporting sales on the ticker to omit the volume of the sales on individual transactions-that is, no longer showing whether the sale at the given price covered 100 shares or 500 shares or 10,000 shares or 25,000 shares or whatever the amount might be. This worked well and on

the first day of trial, the ticker never fell more than 15 minutes behind. This contrasted sharply with the experience on the days immediately preceding, the ticker on Saturday last having at one time been 46 minutes in arrears; on Monday at one time 51 minutes; on Tuesday 105 minutes, and on Wednesday 66 minutes. On Friday, with the sales again omitted under the new rule, the ticker did not give quite so good an account of itself, it being at one time 48 minutes late.

The volume of business has been of huge proportions. At the half-day session on Saturday last, business again exceeded the three million share mark, and all records for a half-day's business were shattered with sales of 3,105,216 shares. On Monday, the transactions totaled 5,040,750 shares; on Tuesday 6,503,230 shares; on Wednesday 6,014,855 shares; on Thursday 5,837,600 shares, and on Friday 6,954,020 shares, this last shattering anew all past records for a day's trading, the highest previous total having been that of Friday of last week. On the Curb Exchange the dealings have also been of tremendous magnitude, the sales last Saturday having footed up 1,183,100 shares; on Monday 1,575,-900 shares; on Tuesday 1,932,700 shares; on Wednesday 2,134,100 shares, a new high record; on Thursday, 1,988,200 shares, and on Friday 1,819,000 shares. The Curb ticker likewise fell behind at times, it being 31 minutes in arrears at one point on Tuesday. The Curb ticker, however, at no time omitted to report the volume of the sales on individual transactions. It should be added that, though on the Stock Exchange the ticker, beginning with Thursday, omitted the volume of the sales, the Stock Exchange authorities undertook to supply the omission by furnishing records of the sales of each stock at intervals during the day, and at the end of the day favored the newspapers with complete compilations showing the volume of the sales for each stock, active and inactive, for the day. The Fitch sheets, too, which have for years been printing complete detailed records of the sales, showing each sale in every stock with the amount sold, have also continued publishing these records in the old way, getting their data through messengers running back and forth from the Exchange instead of from the ticker tape.

All through the week, while the general course of prices was strongly upward and the market advanced most of the time with the velocity of a cyclone, and orders to buy stocks "at the market" poured in on the Stock Exchange in overwhelming numbers and of unparalleled magnitude, there was, nevertheless, all the time selling on an extensive scale, to realize the profits which had accrued on the rise of the previous day, and this naturally was accompanied by violent declines. But such recessions in prices were never more than of temporary duration, recovery following almost immediately after the selling ceased. Meanwhile, new leaders were brought forward and new groups of stock vigorously bid up. Nor did stocks, which suffered reactions, lag behind, but resumed their upward course, as already stated, when the selling pressure was relieved. On Wednesday it appeared at times as if the market was experiencing a definite slump, so heavy were the declines, but as on so many previous occasions a vigorous rally occurred in the closing hour, and on Thursday the market again leaped forward and upward, wholly undisturbed by the downward plunge of the previous day.

On Friday it was supposed that weakness would develop as a result of the further huge increase recorded in the total of brokers' loans, this increase reaching no less than \$176,315,000. Instead, stress was laid upon the fact that the member banks had diminished their borrowing at the Federal Reserve Bank of New York during the week in amount of \$57,593,000. This was heralded as evidence that the speculative furor, notwithstanding its prodigious character, was not tending to impair the country's credit structure. Accordingly, a new buying wave swept over the market, surpassing the most spectacular previous movements of the kind. During the first half hour on Friday, the sales on the Stock Exchange reached no less than 1,320,000 shares, and though the pace subsequently slackened, the sales up to 1:30 p. m. aggregated 5,310,000 shares and for the full day up to 3:00 p.m. fell but little short of 7,000,000 shares, the actual total for the day being, as has already been stated, 6,954,020 shares. In the afternoon, however, considerable irregularity developed when the news came that the Stock Exchange would remain closed to-day (Saturday) in order to give the clerical forces in brokers' offices a chance to catch up on arrears of work. This occasioned considerable profit-taking sales by traders and others who desired to be out of the market over the week-end. As a result of such selling, considerable portions of the early gains were lost, without, however, disturbing confidence in the general level of values. It is needless to say that many new high records in peak prices for the year have been established, the list including, among others, the following:

The high-priced stocks were again the distinct feature of the market, that is, the ones which have to their credit the most pronounced advances. As already stated, the best figures of the week were not maintained at the close because of the reaction which the market experienced Friday afternoon. Case Threshing Machine and E. I. du Pont both advanced above 500. Montgomery Ward & Co., after having touched 428, closed yesterday at 422 against 414 the close on Friday of last week; Radio Corporation of America closed at 368 against 2971/2; Sears, Roebuck & Co. closed at 1851/2 against 1931/8; International Nickel at 203 against 196; American Can at 111 against 116 %; Victor Talking Machine at 146 against 1281/2; Allied Chemical and Dye at 234 against 23834; Timken Roller Bearing at 1467/8 against 1511/8; American Express at 2991/2 against 295; Warner Bros. Pictures at 127 against 1281/4; Pathe at 12 against 6; Curtiss Aeroplane at 1571/2 against 1423/4; Wright Aeronautic at 255 against 210; Commercial Solvents at 240 against 232; American Tel. & Tel. at 194 against 1951/2; General Electric at 187 against 185%; National Dairy at 128 against 122; Western Union Telegraph at 191 against 1973/4; Westinghouse Electric & Mfg. at 135% against 1391/2; Johns-Manville at 189 against 1843/4; National Bellas Hess at 169 against 1707/8; American Radiator at 1891/2 against 1873/8; Associated Drygoods at 59% against 571/8; Commonwealth Power at 913/4 against 955/8; Lambert at 131% against 1351/8; Texas Gulf Sulphur at 78 against 771/4; Kolster Radio at 931/4 against 913/4.

The copper stocks deserve separate mention for their prodigious and spectacular advances. In their case a special stimulating agency was a quite noteworthy list of increases in dividend declarations. Thus Kennecott Copper increased from \$6 to \$8 per share per annum; Phelps Dodge Corp. increased the quarterly dividend from \$2 to \$2.50 per share; Calumet & Arizona declared an extra of \$1 per share, in addition to the regular quarterly dividend of \$1.50 per share; no extra was declared three months ago; the Greene Cananea Copper Co. increased its quarterly dividend from \$1 to \$1.50 per share; and Inspiration Consolidated Copper resumed at the rate of \$3 per share per annum, by the declaration of a quarterly dividend of 75 cents per share. Kennecott Copper closed yesterday at 1451/2 against 1435/8 the previous Friday; Anaconda Copper at 1115% against 105; Andes Copper at 51¾ against 46½; Inspiration Copper at 471/2 against 377/8; Chile Copper at 673/8 against 685%; Calumet & Arizona at 126 against 122; Calumet & Hecla at 45% against 461/2; Greene Cananea at 1663/4 against 167; Granby Copper at 837/8 against 821/8; American Smelting & Refining at 278 against 282; and U. S. Smelting & Rfg. & Min. at 62 against 581/2.

The oil stocks were less prominent than last week, and several of them show net losses for the week. Texas Corporation closed yesterday at 68¾ against 74¼ on Friday of last week; Richfield Oil closed at 53 against 53½; Phillips Petroleum at 52½ against 49¾; Atlantic Refining (new) at 53½ against 55½; Marland Oil at 48¼ against 46; Standard Oil of New Jersey at 53¾ against 54; Standard

Oil of New York at 391/8 against 383/4; and Pure Oil at 30 against 281/2.

The motor stocks are irregularly changed for the week. General Motors closed yesterday at 2141/2 against 213 the previous Friday; Chrysler closed at 1291/4 against 135; Studebaker at 753/4 against 773/4; Packard at 1211/2 against 1173/4; Nash at 105 against 965/8; Hudson at 835/8 against 841/4; and Hupp at 74 against 751/8. The rubber stocks did much better this week than last. U. S. Rubber closed yesterday at 401/8 against 381/4 the previous Friday and the preferred at 69 against 671/4; Goodyear Tire & Rubber closed at 94% against 83%, and B. F. Goodrich at 813/4 against 80. In the steel group U.S. Steel at times manifested weakness and bear pressure often appeared in evidence. The stock closed yesterday at 1673/4 against 1721/2 on Friday last; Bethlehem Steel closed at 83 against 78%; Republic Iron & Steel at 881/4 against 903/8; Inland Steel at 73% against 75, and Ludlum Steel at 84% against 87.

The railroad stocks were neglected most of the time, and only a few of them participated in the upward movement, while most of them are actually lower than a week ago. New York Central closed at 1843/4 against 1851/2; Union Pacific at 2177/8 against 218; Baltimore & Ohio at 116 against 1163/4; New York-Chicago-St. Louis at 135% against 128%; Delaware & Hudson at 192 against 194; Atchison at 1981/4 against 202; Southern Pacific at 1265/8 against 125; Texas & Pacific at 181 against 180; Missouri-Pacific at 70% against 70½; Kansas City Southern at 841/8 against 72; St. Louis Southwestern at 1171/4 against 1211/2; St. Louis-San Francisco at 118 against 118; Missouri-Kansas-Texas at 51% against 531/2; Rock Island at 133 against 1331/4; Great Northern at 108 against 1093/8; Northern Pacific at 113 against 1103/4; Milwaukee & St. Paul preferred at 54 against 531/2; and Canadian Pacific at 2461/2 against 2331/2.

European securities markets have been irregular the present week, with London and the Continent again following opposite trends. A great deal of attention was directed to the international shares, particularly in the British market, where the London "Times" found it timely, Wednesday, to counsel caution in following the American advance. "The operations of American dealers have in fact raised the prices of some shares, formerly more or less in the London fold, to heights far outstanding the interest of the London market," the "Times" was reported to have said in a dispatch to the New York "Times." "These tendencies point to the desirability of British investors and others to keep a watchful eye on the speculative boom in America, for the larger the American interests in London, the greater would be the effect, actual and sentimental, of the reaction in America which must come sooner or The London Stock Exchange opened the week with considerable irregularity, speculators selling quite generally and causing a lowering of prices in most sections of the list. A steadier tone developed Tuesday, with liquidation confined to a limited number of miscellaneous shares. This was followed by a rallying tendency Wednesday, which carried almost all groups to higher levels. Trading was quieter and the movements more limited Thursday, but sharp rises were noted in the communication shares, while the international values also reg-

istered advances. Strength in cable and wireless shares was again marked yesterday, many-international issues also rising sharply. The list otherwise was firm and steady. The gilt-edged division was quiet and stable all week.

A firm opening on the Paris Bourse Monday was followed by scattered weakness which finally spread throughout the list, even drawing down rentes. Continued uncertainty in the domestic political situations was considered the cause of the selling. Although the French market was dull Tuesday, a better tone developed with trading in some of the international shares quite brisk. The trading lagged Wednesday, however, the market falling "into a complete torpor for no other reason than a lack of confidence." Quotations fell and traders were said to despair of any improvement until after the budget has been launched and until the results of the reparations negotiations are known. The dullness continued on succeeding days, with prices declining slowly. The Berlin Boerse also opened the week with a show of firmness and activity, stimulated largely by a favorable Reichsbank report and the expectation that the Ruhr labor dispute would be settled shortly. Weakness developed Tuesday, however, when it appeared that the Ruhr dispute, which affects 250,000 metal workers directly and many others indirectly, remained unadjusted. Business was suspended Wednesday, Germany observing Repentance Day, which is a national holiday. When the market reopened Thursday, further weakness developed. Trading became slow, the market being described as virtually stagnant.

Numerous discussions of naval disarmament, and of the Kellogg treaty renouncing war as an instrument of national policy, again occurred over the last week-end, with President Coolidge's Armistice Day speech on American foreign relations still the focus of attention. Europe as well as America displayed the keenest interest in the question whether President-elect Hoover had known the substance of Mr. Coolidge's address before it was delivered and whether it represented the views also of the incoming administration. This question was at least partially answered by definite statements that Mr. Hoover had not seen the speech in advance. European resentment against some of the declarations in Mr. Coolidge's speech again was made apparent in the weekly reviews, which took exception quite generally to the statements about the cost of the World War to the United States and about disarmament. Congressional circles in Washington were said in turn to have taken umbrage at the tone of acerbity in which many European criticisms were couched, and the question was seriously raised as to the effect of the incident on passage by the Senate of the Kellogg anti-war treaty. "Not only might provocation over the President's plain talk endanger the treaty's ratification by foreign governments," a Washington special to the New York "Times" said, "but the manifest resentment of European editors and the hostility exhibited toward the President's views by the Government benches when his address was discussed in the House of Commons, were calculated to stimulate opposition to the treaty in the Senate."

Sir Austen Chamberlain, Foreign Secretary of Great Britain, commented briefly on President Coolidge's speech when embarking for England last Saturday at Quebec. "We have no rivalry with the

"We have no de-United States," Sir Austen said. sire to start to enter upon a naval competition with them, but our circumstances are very peculiar and I believe they would judge us more fairly if they appreciated them. We are the center of a world-While their communications are wide empire. mainly Continental, ours lie across the seas. While the approaches to their coasts, with the single exception of the Panama Canal which is heavily fortified with a large garrison, are across the open sea, the approaches to England are through narrow waterways which expose our trade to peculiar dangers. It is natural that the British people should feel it an elementary precaution for their safety and even their existence to have a force suitable, not only in size but in character, to guard these vital sources of supply." David Lloyd George, former Liberal Prime Minister, told a London audience on the previous day that he is alarmed about Anglo-American relations. "It is no use outlawing war," he said, "when we are building cruisers, heavy guns, bombing machines and turning out the most poisonous gases. All Europe is engaged in it, and even President Coolidge is joining in."

An avenue for further naval disarmament discussions appears to have been definitely opened by a speech by Viscount Cecil of Chelwood in the House of Lords, Nov. 15, and by the American reaction to it. Lord Cecil suggested that the time has come when the United States and Britain should act together in an armament limitation program. President Coolidge, it appeared last Saturday, is willing to do so if the suggestion should come from the British Government. The President welcomes any reponsible move that would lead to effective limitation of the naval forces of the world powers, Washing dispatches said. A London dispatch of Tuesday to the Associated Press suggested, in turn, that a responsible Government spokesman may soon take up these suggestions in Parliament, with a view to furthering an Anglo-American naval accord. A suggestion for a conversation between two statesmen, one an American and one an Englishman, was made by Lord Lee, of Fareham, Thursday, at a dinner in London welcoming Ambassador Houghton back to London. Lord Lee, who was a British delegate with Lord Balfour at the Washington Conference in 1921, urged that the United States and Great Britain ought to settle the problem of their mutual naval limitation and reach an agreement on the "vexed question of freedom of the seas" strictly between themselves, without bringing in France or any other power.

Reparations and the Rhineland evacuation, definitely linked since the six-power Geneva conference on Sept. 16, were freely discussed before the German Reichstag Monday, by Dr. Gustav Stresemann, the Foreign Minister, in his first Parliamentary appearance after a long illness. The Rhineland occupation policies were vehemently criticized by Dr. Stresemann in his address. "Germany's rights are encroached upon as long as our evacuation demands are not fulfilled," he said. "We are unable to assume political burdens beyond the period set forth in the treaties as a means of obtaining earlier evacuation, nor is there a possibility for us to obtain evacuation by assuming financial burdens as the purchare price." Dr. Stresemann emphasized again, a Berlin cable to the New York "Times" said, that

evacuation and reparations were distinct and separate questions and could not be combined. Continued occupation represents only an apparent asset to the Allies, he argued, while on the other hand it acts as a barrier in negotiations based on confidence in questions of European policy.

The German Minister touched also on the Anglo-French naval compromise agreement, stressing the necessity of following the Locarno policies. "While it might be advantageous to discuss the disarmament problem in separate parleys between individual Governments, such arrangements must be subordinated to the general aim of disarmament," he remarked. The reparations negotiations he characterized as the most important foreign and financial problem of the Reich at the present time. As an official of the Government, however, he was unable to discuss Germany's viewpoint, he explained, since the first steps in the entire matter must be made by non-political experts. The final decision must rest with the responsible Governments involved, he conceded. "Meanwhile," he said, "the Government must confine itself to emphasizing the general principle that one will be able to speak of a real solution of the reparation problem only if it does not exceed Germany's 'economic capacity; this, in other words, means if it enables us to fulfill our obligations by our own economic power and without endangering the standard of life of our people." A motion of non-confidence in Dr. Stresemann was introduced in the Reichstag Tuesday, but was rejected by a vote of 219 to 98.

Preparations for the projected conference of experts to revise the reparations settlement were continued in Paris, London and Berlin, in the meantime. Suggestions that the conferees meet in Brussels appear to have gained weight. After some difficulty in finding suitable experts, the French Cabinet on Thursday named Emile Moreau, Governor of the Bank of France, and Professor O. Allix, of the University of Paris, as the French members of the commission of experts. Professor Allix is an economist of some note and was one of the French members of the Dawes commission. London dispatches of Nov. 19 indicated that Great Britain would recede slightly from the principle of the Balfour note if that proved to be the only way of scaling down Germany annuities from present totals. It had been suggested that Britain would claim arrears of £115,-000,000 which are said to be due her under reparations and Allied debt accounts, England having paid America that sum in excess of her receipts. Three of Britain's former Allies protested the claim, it was said, and it was readily abandoned. A London dispatch of Nov. 20 to the New York "Times" ndicated that England, France, Belgium, Italy and Japan had sent a joint memorandum to Berlin in reply to the German request for a conference to revise the Dawes plan. In this note the question of participation of American financial experts was formally discussed, it is said. "The invitations will be extended only after consultation with the American Government and by the method Washington approves," the dispatch said.

It was made known in Berlin by the German Foreign Office, Thursday, that the negotiations for a reparations conference had not progressed beyond the stage of diplomatic conversations and informal memoranda. Both England and France, it was stated, had asked certain special questions, chiefly concerning the powers of the experts in the proposed conference. These questions were presented through conversations with the German Ambassadors in London and Paris and were augmented by written memoranda.

Several important financial steps were taken in England this week, the foremost being, of course, the amalgation of the Treasury note issue with the Bank of England's note issue. The day announced for this fusion was Nov. 22, but so far as the British public are concerned the change will take some time. It will be marked by the gradual disappearance of the Treasury pound and ten-shilling notes and the substitution of Bank of England notes of the same denomination. The weekly statement of the Bank of England will show the effect of the change next week. "Currency fusion" was provided for by an act passed early this year. The act empowering the Bank of England to issue the necessary notes, relieved the bank from the obligation to hold gold against that part of the new notes which represents the former fiduciary currency, so called, the limit being fixed at £260,000,000. In order to insure elasticity the power to increase may be granted by the Government in case of necessity. In lieu of gold, the bank is required to hold securities in its issue department as collateral for the unsecured portion of the new notes. Silver coin up to £5,500,000 may also be considered as security. The Government, on the other hand, transferred to the Bank, assets of its currency note redemption account to an amount covering the aggregate of the fiduciary currency to be taken up.

A further event of considerable importance was the ratification by the House of Commons, Wednesday, of the transfer of cable and wireless communications of the British Empire to a private combination under Government supervision. The bill received its second reading after long debate, the Labor Party opposing the measure strenuously. In justification of the step, Arthur M. Samuel, financial recretary of the Treasury, pointed out that the Government was merely carrying out a recommendation of the Imperial Wireless and Cable Conference, in which all the Dominions participated. The necessity for the action, a London dispatch to the New York "Times" explained, was dictated primarily by the increasing competition of beam wireless with the cable companies, whose continued existence—considered neces: ary as a means of secret communication in war time-was being threatened. The concern formed to take over the services will be known as the Communications Co. The Government is leasing the beam service to this company and is selling to it the Pacific cable, the West Indian cable and the two postoffice Atlantic cables. On these three properties the purchasing company is to take over a \$6,000,000 debt and pay \$6,335,000 in cash. The beam service is to be leased for a single cash payment of \$300,000 and an annual rental of \$1,250,000.

Recommendations for the flotation of further loans by the Polish Government are the salient feature of the fourth quarterly report issued Monday, of Charles S. Dewey, American financial adviser to the Polish Government and member of the Council of the Bank of Poland. The stabilization plan, by which the international value of the zloty was fixed

year of operation, he reported, and a large budgetary surplus is indicated for the year. Budget receipts for the six months of the fiscal year ended Sept. 30, 1928, consistently exceeded the estimates, amounting to 1,393,000,000 zlotys as against expenditures of 1,332,000,000 zlotys, giving a surplus of about 61,-The situation of the railroad 000,000 zlotys. system of the country is described as entirely satisfactory, with the Government now engaged in appraising the rolling stock and other property for the purpose of raising additional money for improvements. Mention is made of objections to the present taxes on business, which in effect discriminate against large concerns. The income tax on business concerns is progressive, Mr. Dewey points out, and in practice the weight of both income and industrial tax falls heaviest on large companies. It is inadvisable to place large concerns at a disadvantage with respect to competition with small concerns, he adds, as recent experience in industrial countries shows the large scale production is more economical.

"To safeguard against any possible lessening of activity and reduction of imports due to the increased tariff rates made effective March 15, last, estimates of receipts from the two largest tax sources, the industrial tax and customs duties, were made upon a most conservative basis," Mr. Dewey states in his report. "The experience of the first six months of the fiscal year shows that the fears of the Government were not justified, as the receipts from the industrial tax exceeded those of the first six months of the preceding year by 48,-800,000 zlotys. Customs collections for the current six-months period amounted to 212,755,000 zlotys, as compared to 157,856,000 zlotys for the first six months of the fiscal year 1927-28. Tax collections as a whole, in the first six months of the current fiscal year amounted to 61 per cent. of the budget estimates for the year. Receipts from the State monopolies, which form an important source of revenue, have been satisfactory. The Tobacco Monopoly paid to the Government during the past six months 198,007,000 zlotys, as compared to 179,042,-000 for the same period of the preceding year, and the Alcohol Monopoly yielded 199,183,000 zlotys as compared to 151,127,000 during this period last year. The amount required for the service of the stabilization loan for the third quarter was approximately 15,800,000 zlotys, while receipts were approximately 7.3 times these requirements."

Rapid amelioration of the unhappy conditions existing in Rumania in recent years has been undertaken by Juliu Maniu, the new Premier and leader of the National Peasants Party. "Rumania is one of the few countries of Europe which, like the United States, is self-sufficient," M. Maniu remarked last Sunday in an interview given the Associated Press correspondent in Bucharest. "We require only foreign capital to help us develop our vast natural resources. We must have foreign money, brains and enterprise. None do we invite more cordially than America." A decree re-establishing the freedom of the press in Rumania was published in the Official Gazette, Tuesday, while at the same time civil rights were restored to most of the territory within thirtyfive miles of the frontier which has been under semimartial law for the past ten years. Referring to at 11.22 cents, functioned smoothly during the first these measures, M. Maniu declared to a group of newspaper men: "To-day is a festival of liberty. The most important factor in liberty is freedom of the press. Henceforth you are free to carry on your profession and I promise to keep you faithfully informed." Continuing his drastic reforms, Wednesday, M. Maniu ordered the State gendarmerie reduced by 12,000 men and decreed that certain conscription classes should be sent home. Aside from the financial saving, great importance was attached to this act in Bucharest as the gendarmes for the past ten years have been used largely for political terrorization. The Government also decided to continue negotiations with the Bankers Trust Company of New York for a stabilization loan, dispatches said.

Fall of the Portuguese Cabinet recently, which ended in a re-formation of a Government by Colonel Vicent Freitas, as Prime Minister, has resulted in the according of virtually dictatorial financial power in the new Government to Finance Minister Dr. Olive Ira Salazar. Dr. Salazar was also Finance Minister in the last Cabinet, his appointment to the post being viewed in Portugal with certain misgivings at the time, a dispatch from Lisbon to the New York "Times" points out. This was due chiefly to the fact that Dr. Salazar was regarded as a theoretical economist rather than a practical one. So successful have been the theories that Dr. Salazar had previously expounded as Professor of Economics in the University of Coimbra, the "Times" dispatch said, that Prime Minister Freitas has now acceded to his demands that there shall henceforth be no Governmental expenditures without formal approval by the Minister of Finance. Under the new regime, expenses are being cut to a minimum, it is said, and Dr. Salazar is introducing a program of reforms in the manner of collecting taxes and duties that is expected to increase the public revenue substantially. The whole Cabinet has agreed to support the decrees by which Dr. Salazar aims to obtain these results.

A comprehensive economic survey of the Republic of Nicaragua, which contains a number of suggestions for loans and for the general financial reorganization of the country, was made public by the State Department in Washington Monday. The survey was begun a year ago by Dr. W. W. Cumberland at the suggestion of President Adolfo Diaz of Nicaragua, and it was submitted to Secretary Kellogg March 10, 1928, copies being furnished the Nicaraguan authorities at the same time. In giving out the report, the State Department made clear that it represents only "the personal views of Dr. Cumberland." Secretary Kellogg further indicated that the State Department had not approved the report as drawn, as there were certain things recommended which the United States could not do. The suggestion for the survey was made to the State Department, which appointed Dr. Cumberland to undertake the task. The report, Washington dispatches indicate, has for some time been the basis of negotiations for a loan between New York bankers and the Nicaraguan Government and it is suggested that these negotiations will be resumed after the newly elected President, General Jose Maria Moncada, takes office on Jan. 1 next. Far-reaching participation by Americans in Nicaraguan affairs is recommended by Dr. Cumberland in the report,

which are detailed in our news department on a subsequent page. The development of the native National Guard under the supervision of American marine officers over a period of years is proposed, as well as the placing of Americans in several strategic offices for the administration of Governmental affairs.

Evidence of substantial improvement in Mexican finances during the past year was presented to the Chamber of Deputies in Mexico City November 16 by Luis Montes de Oca, Mexican Minister of Finance. Senor de Oca asked the Chamber for an increase of 6,250,000 pesos (about \$3,125,000) in the current budget, but stated that of this amount about 5,000,-000 pesos will be met by surplus revenue this year, while an additional 1,250,000 pesos will be saved by reducing expenses in other ways. He calculated that there will be a surplus of 500,000 pesos despite the new proposals. "The figures mentioned," the Finance Minister said, "show that for the first time in many years Mexico's budget will not result in a deficit but that, once equilibrium has been reached, there will be a surplus. On the other hand, it is evident that needs were so closely estimated that only the increase mentioned was required, while last year it was necessary to augment the budget 20,000,000 pesos; in 1926, 51,500,000, and in 1925 90,000,000. This satisfactory condition can be attributed in great measure to the new budget system which has permitted greater exactitude in assigning expenses for public services but doubtless such a situation could not have been maintained except for the economic policy put into effect by President Calles, who has permitted increased expenditure only when necessity demanded it and always compensated such increases by reductions in other branches. Finally, it should be mentioned that the details above show that all expenses proposed during the present year can be fully met on Dec. 31 without increasing the public debt. On the contrary, it will be reduced by the sums which this year have been paid to various Government creditors." In a Mexico City dispatch of Nov. 20 to the New York "Times," it was represented that Senor de Oca will leave Mexico City before the end of this month, first having resigned his Cabinet post, for the purpose of holding a final series of conferences with the International Committee of Bankers on Mexico in an endeavor to close a new and definite agreement for the payment of interest and amortization of Mexico's foreign debt and the debt of the National Railways of Mexico. Senor de Oca will travel north as a special representative of the Calles administration, it was reported.

Parliamentary elections in Australia, which included a plebiscite on an important financial question, were held on Nov. 17, and resulted in the return to office of the Nationalist and Country Party coalition Government. The Government majority in Parliament was reduced by the election, owing to heavy Labor victories in New South Wales. It appeared from these that the Opposition Party would win seven seats, with the likelihood that the Government majority would be reduced from twenty-nine to fifteen. Australia voted overwhelmingly in this election in favor of giving the force of law to the debts and borrowing agreement entered into by the States and Commonwealth last year, an Asso-

ciated Press dispatch from Melbourne reported. The agreement provides for the appointment of a compulsory loan council on which all the States will be represented. In the new scheme of Australian financing, as produced by Premier Bruce at the 1927 conference, the Commonwealth Government was to take over all the debts of the Australian States and contribute \$37,925,000 in connection therewith. The Federal Government was to establish joint sinking funds to provide for the extinction of the debts in fifty-eight years, and the extinction of new loans in fifty-three years. All future loans were to be controlled by the loan council.

The Bank of Finland on Nov. 17 increased its discount rate from 6½ to 7%. Otherwise there have been no changes this week in discount rates by any of the central banks of Europe. Rates continue at 7% in Germany; 6½% in Austria; 5½% in Italy, and Norway; 5% in Denmark and Madrid; 4½% in London, Holland and Sweden: 4% in Belgium, and 3½% in France and Switzerland. In London open market discounts are 43/8% for short bills, against  $4\frac{1}{4}\%$  on Friday of last week. and also 43/8% for three months bills, as against 41/4% the previous Friday. Money on call in London was  $4\frac{1}{4}\%$  on Tuesday and Wednesday, but back to 31/4% yesterday. At Paris open market discounts remain at 31/4%, but in Switzerland, have risen from 3 5-16% to  $3\frac{3}{8}$ %.

In its statement for the week ending on Wednesday just before the amalgamation of the British currency the Bank of England reports a loss in bullion of £382,484; there was, however, a gain in the reserve of gold notes in the banking department of £159,000 due to a contraction of notes in circulation of £542,000. The ratio of reserve to liabilities shows a very slight increase, the current ratio being 42.88% against 42.51% last week; in the same period last year the ratio was 31.45%. Public deposits diminished £645,000 while "other" deposits increased £55,000. Loans on Government securities increased £3,982,-000 while loans on other securities dropped £4,703,-000. Gold holdings now total £162,084,589 against £151,489,640 last year and £152,974,616 in 1926. Notes in circulation aggregate £132,804,000 against £135,213,810 in 1927. The Bank's rate of discount remains at  $4\frac{1}{2}\%$ . Below we furnish comparisons of the various items of the Bank of England return for five years.

BANK OF ENGLAND'S COMPARATIVE STATEMENT.

a Includes, beginning with April 29 1925, £27,000,000 gold coin and bullion previously held as security for currency notes issued and which was transferred to the Bank of England on the British Government's decision to return to gold standard.

b Beginning with the statement for April 29 1925, includes £27,000,000 of Bank of England notes issued in return for the same amount of gold coin and bullion held up to that time in redemption account of currency note issue.

In its statement for November 17, the Bank of France reports a decrease in note circulation of 545,-000,000 francs, reducing the total to 61,409,916,250 francs. Note circulation last Saturday amounted to 1,954,916,250 francs and the Saturday before 62,-

758,916,250 francs. Creditor current accounts rose 10,000,000 francs while current accounts and deposits showed a loss of 160,000,000 francs. Gold holdings now aggregate 30,851,839,852 francs due to a gain of 21,700,536 francs, but credit balance abroad declined 14,367,036 francs. A decrease of 635,000,000 francs was shown in French commercial bills discounted. Advances against securities dropped 23,000,000 francs while bills bought abroad rose 127,000,000 francs. Below we furnish a comparison of the various items in the bank's return for the past 3 weeks:

The Bank of Germany, in its statement for the second week of November reports a decrease in note circulation of 237,594,000 marks reducing the total to 4,172,738,000 marks. Note circulation for the corresponding week last year amounted to 3,787,-413,000 marks and for the year before to 3,009,-666,000 marks. Other daily maturing obligations dropped 15,704,000 marks while other liabilities increased 26,515,000 marks. On the asset side of the account gold and bullion rose 23,622,000 marks, reserve in foreign currency 17,474,000 marks, silver and other coin 13,167,000 marks, notes on other German banks 6,709,000 marks, advances 36,080,000 marks and investments 1,000 marks. Bills of exchange and checks dropped 303,735,000 marks and other assets 20,107,000 marks. Deposits abroad remained unchanged. Below we furnish a comparison of the various items of the bank's return for the past 3 years:

Money rates have been steady on the New York market this week, the Stock Exchange figure for call loans remaining at the undeviating rate of  $6\frac{1}{2}\%$ ; time loans also were unchanged. Bank withdrawals amounted to \$15,000,000 Monday, causing sufficient tightness to maintain the official rate without lower offerings in the outside or street market. Nominal withdrawals and light demand Tuesday caused an overflow of money into the street market, where offerings were reported at 6%. On Wednesday and Thursday outside offerings were reported at 61/4%, but in yesterday's market demand was again sufficient to prevent outside offerings. Brokers' loans against stock and bond collateral, as reported Thursday by the Federal Reserve Bank of New York on the basis of reports from 45 member banks, registered the largest weekly increase ever reported. The increase for the week was \$176,315,000, which was taken to reflect the enormous volume of speculation rempant on the securities markets. Bankers in New York are beginning to discuss the effect of the present heavy absorption of credit in securities speculation on the world money market. Eventually, it is contended in some quarters, a world-wide rise in money rates will be occasioned, which would be felt constantly in speculative circles. Much of the money available for call loans in New York is said to be due to the foreign funds attracted by the prevailing high rates for funds. An advance in foreign rates may follow as a consequence, and in this event, it is contended, speculators in New York may find their credit facilities suddenly curtailed. The Federal Reserve Bank reports having earmarked an additional \$13,015,000 of gold during the week. The usual reticence was observed by the Bank as to the identity of the purchaser, but the opinion in the financial district is that the gold was bought for German account.

Dealing in detail with the call loan rates on the Stock Exchange from day to day, it is only necessary to repeat what has been said above, namely that the rate has remained unchanged on each and every day at 61/2%, this including renewals. Time loans ruled throughout the week at 63/4@7%, for all maturities from 30 days to six months until yesterday when the single rate of 7% was quoted for the shorter maturities namely 30 days, 60 days and 90 days for commercial paper. The ruling rate for four to six months names of choice character has been 51/4@  $5\frac{1}{2}\%$ . For names less well known the rate has been 5\%4@6\%. New England mill paper continues at  $5\frac{1}{2}$ @ $5\frac{3}{4}$ %.

The posted rates of the American Acceptance Council for prime bankers' acceptances eligible for purchase by the Federal Reserve banks have again remained unchanged at  $4\frac{5}{8}\%$  bid and  $4\frac{1}{2}\%$  asked for bills running 30 days and also for bills running 60 and 90 days,  $4\frac{3}{4}\%$  bid and  $4\frac{5}{8}\%$  asked for 120 days, and  $4\frac{7}{8}\%$  bid and  $4\frac{3}{4}\%$  asked for 150 and 180 days. The posted rate of the Acceptance Council for call loans against acceptances has ruled throughout the week at  $5\frac{1}{2}\%$ . Open market rates for acceptances have also remained unchanged and are as

of last week. The range this week has been from 4.84 19-32 to 4.84 11.16 for bankers' sight, compared with 4.845-16 to  $4.84\frac{1}{2}$  last week. The range for cable transfers has been from 4.85 to 4.85 1-16, compared with 4.84 11-16 to 4.85 1-16 the previous week. At present rates it is believed that the gold export movement from London to New York is definitely halted for the time being. The firmness is not due to any real activity in the market, nor does it mean the cessation of seasonal pressure. Normally sterling must continue under seasonal pressure until about the middle of December. The most reasonable explanation of the present firmness is that London finance officials have been supporting the exchange in preparation for the amalgamation of the Treasury notes with the Bank of England issue which was put into effect on Thursday, Nov. 22. It took only moderate buying to send sterling cables from 4.84 13-16 to 4.85. The move prevented large gold shipments from London to New York which had been planned for this week. It is also thought not improbable that the buying might have come from official sources as a measure of window dressing for the Bank of England's first statement after the amalgamation, that is, for the statement to be issued on Thursday of next week. Frederick Hyde, Joint Managing Director of the Midland Bank of London, in his recent inaugural address as President of the British Institute of Bankers, said in comment on the Currency and Bank Note Act: "Bankers will watch with keen interest the working of the Act under the changed conditions, and will be able to form an opinion as to whether the system which throws the whole weight of gold movements, probably of much greater magnitude than formerly, on to a relatively small proportion of the stock of gold held by the Bank of England is the one best suited to the country's needs. Under our present system, which is continued by the new Act, the gold which can be withdrawn for export is that represented by the notes in reserve amounting to about 50 millions, the balance of about 115 millions, or much the larger part, being held as cover for notes in circulation. This latter part of the gold can be drawn upon only in the event of an abnormal contraction in the circulation, and the conditions which would make such a contraction possible would at the same time tend to turn the foreign exchanges in our favor and so render an export of gold unprofitable. It is, therefore, worth while considering whether it is wise to lock up the major portion of of our gold to meet an emergency which in practice would not occur, and, in doing so, suffer the inconvenience of the unduly high rates that might have to be enforced to keep the remainder, which is unprotected, at a sufficiently high figure to maintain confidence both at home and abroad."

The concensus of the market is that there will be no marking up of the Bank of England rate of rediscount, which continues at 41/2%, although it is admitted that such a step becomes more likely the longer money rates in New York remain at their present level. The Bank of England has shaped its policy during the past six months in such a manner as to make a higher bank rate unnecessary. A higher rate in London would be felt adversely not only by British industry and commerce, but by business Sterling exchange has continued to maintain the throughout Europe. Were an advance made in the firmness which developed so noticeably on Thursday rate, it would probably lead to an upward revision

of most of the central bank rates on the Continent. Now that the gold export movement from London has been halted, and that the seasonal pressure on sterling must steadily diminish until it reaches the vanishing point around December 15, the view that no change in the rate will take place seems well founded. However, no indications of a change of direction in the international flow of funds has appeared. Europe is a heavy buyer of securities in this market and has increased purchases since election. Our export trade balance is larger than ever, increasing European payments to us on that account. American long-term lending to foreign borrowers, while not as great during the past six months as it has been for several years previously, has nevertheless increased moderately, and while the flow of short-term funds is difficult to trace, it is in the opinion of bankers for the most part undiminished.

This week the Bank of England shows a loss in gold holdings of £382,484. On Monday the Bank of England sold £19,000 in gold bars and on Tuesday £43,000. On Thursday the Bank sold £408,000 in gold bars and exported £503,000 in sovereigns to On Friday the Bank sold £172,000 in gold bars. London dispatches on Friday stated that the £408,000 bar gold sold on Thursday was sent to Germany. At the Port of New York the gold movement for the week Nov. 15-21, inclusive, as reported by the Federal Reserve Bank of New York, consisted of imports of \$7,132,000, of which \$6,967,000 came from the United Kingdom, \$102,000 from Ecuador, \$25,000 from Colombia, \$28,000 from Peru, \$5,000 from Chile, and \$5,000 from the Belgian Congo. Gold exports consisted of \$1,052,000, of which \$1,000,000 was shipped to Canada, and \$52,000 to Germany. Practically all the gold which came from England was accounted for here last week. The shipment of \$52,-000 to Germany brings the total of these small shipments to \$763,000 in a period of 15 weeks. The Federal Reserve Bank also reported having earmarked \$13,015,000 of gold. The ownership of the earmarked gold is not disclosed, but bankers are of the opinion that it is for the account of the German Reichsbank. Yesterday the Bank of Montreal shipped \$5,000,000 gold from New York to Canada. Canadian exchange has been firm, with Montreal funds at a premium ranging from par to 11-64 of 1%. The rise in Canadian to the gold point has been both sudden and unexpected. Throughout the past two months, which is the season when Canadian exchange is usually strongest, the rate has been depressed and has ruled at a discount. Judging from precedent, bankers did not expect it to rise to a premium this year, as navigation on the St. Lawrence will close with the first cold weather, thus ending the export season. It is doubted that any gold movement can be kept up for long. For the past four years Canadian exchange has declined from a premium to a discount against the American dollar either during the last few days of November or early in December. There is nothing apparent in the present situation which would make it probable that the exchange rate will fail to follow the usual seasonal course. The size of the Canadian wheat crop is a bullish factor, but this is offset by the high money rates in New York, the small volume of Canadian long-term financing in this market, and the increased flow of Canadian funds for investment abroad.

Referring to day-to-day rates sterling on Saturday

@4.845/8; cable transfers, 4.84 15-16@4.85. On Monday sterling was steady. The range was 4.845/8@4.84 11-16 for bankers' sight and 4.85@ 4.85 1-16 for cable transfers. On Tuesday the market was steady. Bankers' sight was 4.84 9-16@ 4.84\(\frac{5}{8}\); cable transfers, 4.84 15-16\(\omega 4.85\). Wednesday the market was again steady. range was 4.84 19-32@4.84 21-32 for bankers' sight and 4.84 31-32@4.85 1-32 for cable transfers. Thursday sterling continued firm. Bankers' sight was  $4.84\frac{5}{8}$ @4.84 11-16; cable transfers, 4.85@ 4.85 1-16. On Friday firmness continued. range was 4.845/8@4.84 11-16 for bankers' sight and 4.85@4.85 1-16 for cable transfers. Closing quotations on Friday were 4.84 21-32 for demand and 4.85 1-32 for cable transfers. Commercial sight bills finished at 4.84 9-16; 60-day bills at 4.80 11-16; 90-day bills at 4.78 13-16; documents for payment (60 days) at 4.80 11-16, and seven-day grain bills at 4.83 15-16. Cotton and grain for payment closed at 4.84 9-16.

The Continental exchanges have been firm largely as a reflection of the advance in sterling. Most of the Continentals continue dull so far as actual trading is concerned, German marks and Italian lire proving somewhat an exception. Berlin continues to take gold both from New York and London. As noted above in the discussion on sterling exchange, another small shipment of \$52,000 gold was sent from New York to Berlin this week, bringing the total of these shipments to \$763,000 in the past 15 weeks. Bankers are of the opinion that the increase of \$13,015,000 in the earmarked stock of the New York Federal Reserve Bank is for German account, but official announcements are not made regarding the earmarking operations. The credit strain has lessened somewhat in Berlin, so much so that foreign exchange circles consider it probable that the Reichsbank rate of rediscount may be lowered from the present 7%. Nevertheless short-term funds continue to move from New York, Amsterdam, and other centers to the German market. For the time being no important long-term loans are being contracted for German account in New York, but large volumes of such loans have been blocked since early in May by the advance in money rates in New York. Italian lire continue in some demand owing to the flow of funds from this side from investment in Italian enterprises and from immigrant remittances. Money continues relatively easy in Rome, Milan, and other Italian centers. There is an upward movement on the stock exchanges, with great activity in transactions. A wave of optimistic sentiment is passing over Italy with the feeling that national production is about to return to normal proportions. The cost of living index of Italy rose from 485 in August to 495 at the end of October, and this fact is interpreted as a symbol of reviving economic activity. However, the balance of Italy's foreign trade does not improve. Figures available for the first nine months of 1928 show that imports of the period were 16,000,000,000 lire, against 15,674,000,000 lire in the same period last year. Exports were 10,216,000,000 lire, as compared with 11,393,000,000 lire, the adverse balance being 5,794,000,000 lire for the period as against 4,280,000,000 lire in 1927. French francs remain firm. The Bank of France continues to sell exchange in order to keep the franc at quotations sufficiently last showed firmness. Bankers' sight was 4.84 9-16 high to prevent any loss of gold for shipment to Germany. However, the sales are very much less than they were a few weeks ago. This week its holdings of foreign bills show a net reduction of 6,000,000 francs. The total holdings amount to approximately 34,152,000,000 francs. The Bank of France has the exchange situation entirely in its own control, and were it not for the fact that central banking opinion has brought about a thorough understanding with respect to gold holdings of the various leading countries, the Bank of France would be in a position to draw a great deal of gold from both London and New York. It is estimated that the Bank holds approximately \$1,300,000,000 of foreign exchange, principally on New York and London.

The London check rate on Paris closed at 124.11 on Friday of this week, against 124.09 on Friday of last week. In New York sight bills on the French centre finished at 3.90½, against 3.90½ a week ago; cable transfers at 3.903/4, against 3.903/4, and commercial sight bills at 3.901/4, against 3.90 5-16. Antwerp belgas finished at 13.891/4 for checks and at 13.90 for cable transfers, as against 13.89\\[\frac{1}{4}\] and 13.90 on Friday of last week. Final quotations for Berlin marks were 23.83 for checks and 23.84 for cable transfers, in comparison with  $23.81\frac{1}{2}$ and 23.82½ a week earlier. Italian lire closed at 5.23¾ for bankers' sight bills and at 5.24 for cable transfers, as against 5.241/8 and 5.243/8. Austrian schillings have not changed from 141/8. Exchange on Czechoslovakia finished at 2.9615, against 2.9615; on Bucharest at 0.601/4, against 0.601/4; on Poland at 11.19, against 11.19, and on Finland at 2.52, against 2.52. Greek exchange closed at 1.29 for checks and at 1.29½ for cable transfers, against 1.29 and  $1.29\frac{1}{2}$ .

The exchanges on the countries neutral during the war have been dull, but, as in the case of the Continentals, they reflect the better tone of sterling exchange. This has been conspicuously true with respect to Holland guilders. The Scandinavian currencies present no features of special interest this week. They have been quiet and firm at about the levels prevailing for many weeks past. Spanish pesetas have, it would seem, reached a condition of relative stability. The pesetas rate seems now permanently pegged around 16.12 for cables. Fluctuations have been extremely narrow. Whether the official Spanish control committee intends to keep the rate there for a long period or to change the peg price occasionally in accordance with conditions in the market is not known. Peseta futures have been active recently and remain at a substantial premium over the spot rate. The buying of futures comes mostly from long speculators who are extending their position in the belief that there will be an early return to gold. A few days ago advices from Madrid by way of London stated that the Spanish Government is considering an early return to the gold standard. The rate of probable stabilization has not been disclosed, but it is understood that there is little likelihood of a return to pre-war parity.

Bankers' sight on Amsterdam finished on Friday at 40.13½, against 40.13 on Friday of last week; cable transfers at 40.15½, against 40.15, and commercial sight bil's at 40.09½, against 40.09. Swiss francs closed at 19.25 for bankers' sight bills and at 19.26 for cable transfers, in comparison with 19.24½ and 19.25 a week earlier. Copenhagen checks finished at 26.65 and cable transfers at 26.66½,

against 26.64 and 26.65½. Checks on Sweden closed at 26.72 and cable transfers at 26.73½, against 26.71½ and 26.73, while checks on Norway finished at 26.64½ and cable transfers at 26.66, against 26.63½ and 26.65. Spanish pesetas closed at 16.11 for checks and at 16.12 for cable transfers, which compares with 16.11½ and 16.12½ a week earlier.

The South American exchanges are comparatively The gold flow from Argentina to New inactive. York seems to have come to an end during the week. There is a better tone in the South American exchanges, owing largely to the fact that the export season is approaching and promises to be more than ordinarily favorable to most of the Latin-American countries. A dispatch to the United Press from Chile on Wednesday stated that Rios Gallardo, Foreign Minister, has asked the Superintendent of Banking to give all possible facilities to the Bolivian commission studying the central bank system with a view to establishing such a system in Bolivia. Argentine paper pesos closed on Friday at 421/8 for checks, as compared with 421/8 on Friday of last week, and at 42 3-16 for cable transfers, against 42 3-16. Brazilian milreis finished at 11.93 for checks and at 11.96 for cable transfers, against 11.93 and 11.96. Chilean exchange closed at 12.10 for checks and at 12.15 for cable transfers, against 12 1-16 and 121/8, and Peru at 4.01 for checks and at 4.02 for cable transfers, against 4.00 and 4.01.

The Far Eastern exchanges have been quiet. All the Asiatic countries are preparing for an active export trade. This is especially true of India and Straits Settlements. The Dutch East Indies are enjoying a condition of great prosperity. China continues to absorb silver in quantity as fast as it is offered from any source. As noted here last week, the Bank of India advanced its rate to 6% from 5%. The firmer money rates in India are entirely a seasonal development. This advance is an incident unfavorable to the London position, as India is now attracting gold directly from South Africa, as well as from London. India has been arranging for direct shipments of large amounts from Durban, and approximately £1,200,000 were engaged last week from the Transvaal. This gold would, but for the change in the Indian situation, have gone direct to the London market. Japanese yen have been relatively weaker than they were a week ago. Nevertheless, the yen rate is fairly firm, partly due to the fact that it was officially announced only last week that the Government is giving serious consideration to the question of removing the embargo on gold. Closing quotations for yen checks yesterday were 46.20@461/4, against 46.40@46% on Friday of last week. Hong Kong closed at 50.10@50¼, against 50½@50¼; Shanghai at 64\\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( 64\)\( against 493/4; Singapore at 563/4@67, against 563/4@ 57; Bombay at 365/8, against 365/8, and Calcutta at 365/8, against 365/8.

Pursuant to the requirements of Section 522 of the Tariff Act of 1922, the Federal Reserve Bank is now certifying daily to the Secretary of the Treasury the buying rate for cable transfers in the different countries of the world. We give below a record for the week just past:

FOREIGN EXCHANGE RATES CERTIFIED BY FEDERAL RESERVE BANKS TO TREASURY UNDER TARIFF ACT OF 1922, NOV 17 1928 TO NOV. 23 1928, INCLUSIVE.

| Country and Monetary                    | Noon               | Buying R<br>Valu   |                    | ble Transfe<br>ed States M |                    | York,    |

Owing to a marked disinclination on the part of two or three leading institutions among the New York Clearing House banks to keep up compiling the figures for us, we find ourselves obliged to discontinue the publication of the table we have been giving for so many years showing the shipments and receipts of currency to and from the interior.

As the Sub-Treasury was taken over by the Federal Reserve Bank on Dec. 6 1920, it is also no longer possible to show the effect of Government operations in the Clearing House institutions. The Federal Reserve Bank of New York was creditor at the Clearing House each day as follows:

DAILY CREDIT BALANCES OF NEW YORK FEDERAL RESERVE BANK AT CLEARING HOUSE.

| Saturday, | Monday,  | Tuesday, | Wednesd'y,  | Thursday, | Friday,  | Aggregate for Week. |
|-----------|----------|----------|-------------|-----------|----------|---------------------|
| Nov. 17.  | Nov. 19. | Nov. 20. | Nov. 21.    | Nov. 22.  | Nov. 23. |                     |
| \$        | 8        |          | 120 000 000 | 8         | 8        | C- 779 000 0        |

Note.—The foregoing heavy credits reflect the huge mass of checks which come to the New York Reserve bank from all parts of the country in the operation of the Federal Reserve System's par collection scheme. These large credit balances, however, reflect only a part of the Reserve Bank's operations with the Clearing House institutions, as only the items payable in New York City are represented in the daily balances. The large volume of checks on institutions located outside of New York are not accounted for in arriving at these balances, as such checks do not pass through the Clearing House but are deposited with the Federal Reserve Bank for collection for the account of the local Clearing House banks.

# The following table indicates the amount of bullion in the principal European banks:

a These are the gold holdings of the Bank of France as reported in the new form of statement. b Gold holdings of the Bank of Germany are exclusive of gold held abroad, the amount of which the present year is £4,281,300. c As of Oct. 7 1924. d Sliver is now reported at only a trifling sum.

# The Approach to Latin-America—Mr. Hoover's Visit and the Cumberland Report.

Mr. Hoover's decision to pay an extended visit to Central and South America is an interesting, as well as an unprecedented, example of foresight and energy on the part of a President-elect in preparing himself for the responsibilities of the presidential office. The custom (not, as is often thought, a Constitutional requirement) which allows an interval of four months to elapse between the date of an election and the date at which the new presidential term begins has often been pointed to as a practical disadvantage which might well be done away with, and Congress itself has made a number of unsuccessful attempts to shorten the interval, and at the same time get rid of the evils of the so-called "lame duck" short session of an expiring Congress, by advancing the date of the inauguration of the new President and the date at which the new Congress shall meet. Most Presidents-elect, when they were not their own successor, have perforce spent this four months' interval in a kind of semi-public retirement, receiving visits from party supporters and friends, busying themselves with the selection of their Cabinet, arranging their private affairs, and in a dignified way "killing time" until the day of inauguration should arrive. The most important recent exception was made by President Wilson, who retained the Governorship of New Jersey until very near the date of his inauguration. Mr. Hoover, on the contrary, has chosen this interval of enforced official idleness to make an extended tour of the Central and South American Republics, a part of the world with which our relations have not always been happy, but in regard to which the United States, for various reasons, has long assumed certain responsibilities, and with which our relations ought by all means to be close and cordial.

It is easy to foresee some of the gains which should result from Mr. Hoover's unique tour. The mere presence in the countries to the south of us of the President-elect, seizing an opportunity which must be used now if it is to be used at all, is an evidence of interest and good will that will not pass unnoticed in the countries which will receive him as an honored guest. Only a narrow view of Mr. Hoover's journey will picture him as a kind of high-grade commercial traveler engaged in drumming up trade. It is, of course, entirely possible that Mr. Hoover's visit may give some stimulus to trade between the United States and South America, but if it does, the stimulus, we may be sure, will be mutually advantageous, and gains on one side will be matched by gains on the other. We cannot sell or buy in South America without South America benefitting in The larger significance of Mr. Hoover's tour, and the one which it is reasonable to suppose he himself has had in mind, is the opportunity which such a journey will give him of learning something at first hand of the countries in which he will sojourn, making the personal acquaintance of leaders in politics, industry and commerce, acquainting himself with the life of the people, and in general fitting himself better, by personal contact, to deal with such problems as may be presented to him as President Mr. Hoover already enjoys a wider and more intimate personal acquaintance with Europe than any President that the United States has had, and he knows a good deal about certain parts of Asia from long service there as an engineer. His South American journey will add to his equipment a personal contact with another continent whose habits of thought and political and social achievements and hopes have probably been less generally understood or appreciated in this country than those of either Europe or Asia.

We have more than once expressed the opinion that the United States, committed as it is to the maintenance of the Monroe Doctrine as a cardinal element of its foreign policy, is on that account under special obligation to avoid, in its dealings with Latin-America, anything that savors of interference with the domestic affairs of the Latin-American States. The recent entanglement of the United States in the electoral controversy in Nicaragua, while perhaps one of those matters which had to be carried through once it had been begun, has unquestionably made a bad impression in Latin-America, and is certainly an episode which it is to be hoped may not be repeated. We are on this account glad to observe that the Department of State, in making public on Monday, the day of Mr. Hoover's departure, the report of Dr. W. W. Cumberland on the proposed financial rehabilitation of Nicaragua, took pains to let it be known that the report represented only "the personal views of Dr. Cumberland," and that Secretary Kellogg allowed himself to be quoted as saying, in substance, that "not only had the State Department not approved it as drawn, but that there were certain things recommended that the United States could not do."

The Cumberland report, prepared, it is said, at the suggestion of President Diaz, proposes a general financial reorganization of Nicaragua, including the refunding of the present debt, the unification of all revenue services, and the installation of a budget system. Chief among the recommendations is a loan by the Nicaraguan Government of \$30,000,000, of which \$12,000,000, after deducting the cost of underwriting, is to be devoted to refunding the present outstanding public debt of \$5,675,000, further redemption or conversion of bonds, payment of claims, highway construction, election expenses, paving and sanitation of Managua, and other purposes. Dr. Cumberland further suggests that a majority of the stock of the Bank of Nicaragua, which is to be made the fiscal agent of the State, should be sold to Americans, and that the offices of Collector General and Auditor General should be filled by Americans, the incumbents to be nominated by the Secretary of State of the United States and appointed by the President of Nicaragua. The designation of Americans for these offices is intended, according to Dr. Cumberland, to "assure proper collection and expenditure of public funds." Among the public works recommended, to be financed from the proceeds of the \$12,000,000 loan already referred to, is a highway from Managua, the capital, to the Atlantic seaboard.

It is in every way desirable that the finances of Nicaragua, to the extent that they may be disordered, should be put in sound condition, that the revenues should be properly collected and accounted for, and that such highways or other public works as are needed should, to such extent as may be practicable, be undertaken and carried through. If these tasks, or any of them, require a foreign loan, it is equally to be hoped that a loan may in due time be forthcoming. It seems to us,

however, that it would be far better, both for Nicaragua and the United States, that the undertakings which Dr. Cumberland suggests, assuming that they are necessary or expedient to be done, should be done by Nicaragua itself on its own responsibility, and not under the surveillance of American citizens. However effective such outside surveillance may be in securing immediate results, it not only does little or nothing to develop in the Nicaraguan people a larger capacity for self-government, but almost inevitably breeds discontent, suspicion and criticism which may at any time show themselves either in domestic disturbances such as those which immediately preceded the recent election, or in some international irritation which disturbs diplomatic relations. The American people, we feel sure, do not want the United States to become in any way involved in the domestic affairs of any South or Central American State. They are ready to be helpful wherever help is needed, but they draw back from anything that savors of a part in the government of other peoples. If the Nicaraguan Government wishes to place Americans in charge of important branches of its public service, it is obviously free to do so. and any responsibility which it assumes for such a course will be its own, but for such officials to be selected or nominated by the American Government or any of its departments would, we fear, be a procedure that would return to plague us. The objections to American control, through ownership of a majority of stock, of a foreign bank which is also the fiscal agent of the foreign Government are even more weighty, since such control would necessarily involve some participation by the American owners in the domestic and foreign policy of the Government in question.

Without attempting to forecast what Mr. Hoover might think of the Cumberland project, in case it should come before him for consideration, it may be pointed out that Mr. Hoover's method of dealing with Central and South America is proceeding along different lines. We feel confident that, as he passes from Republic to Republic, he will make the best use possible of his necessarily hurried visits to cultivate personal friendships, allay suspicion or latent hostility, and offer in his own person a tangible assurance of American good will. He will have an opportunity to widen the customary sphere of politics by bringing within its range important matters that are more often wholly excluded. There is, for example, a high intellectual and artistic culture in South American centres of which the American public knows very little, and which Mr. Hoover's visit may help, indirectly of course, to make better known. Both Central and South America possess many scientists of international repute, and with them Mr. Hoover, himself a scientist of admitted standing, will have no trouble in finding a common ground. The Pan-American conference on arbitration and conciliation which is to meet at Washington early in December may well take up its duties with special zest in view of the friendly visit of the President-elect to the countries from which most of the delegates will come. It is in such directions as these, and in others like them, that good understanding and a feeling of friendly co-operation between the States of the two continents need to be comented, quite as much as in the development of trade or the extension of financial assistance.

# The Power of the President.

Now that the election is a thing of the past and the country has settled down to its daily affairs, the strength of our institutions and the general good nature of the people are once more confirmed. The election has swept away the oratory and most, if not all, the torrent of controversial assertion; the prerogatives and duties of the new President are constitutionally and closely defined and are well understood, and his record, public and private, not only laid bare, but bandied about in fragmentary discussion. It is no longer interesting.

One fact remains. "The Man on Horseback" has always been a law to himself; and a modern compiler of American history makes the statement that "the President of the United States is the most powerful executive officer in the world." Beyond what Mr. Hoover as President therefore may do constitutionally remains what he may do from his own initiative or on the strength of his own individual choice. Mr. Coolidge's "I do not choose to run" is known to have been decisive. We have no means of knowing what may be the line of Mr. Hoover's action in ways lying outside of prescribed Presidential duty. Probably Mr. Hoover himself does not know, and has not given it a thought, but he is to take his place in a sufficiently long line of Presidents of differing character and in very varied circumstances who have when the occasion seemed to demand it made their own decision and acted with entire independence. We would call attention to a few of them.

In 1803 President Jefferson learned that Bonaparte under the stress of his military campaigns and the consequent exhaustion of France was in dire need of money and was ready to dispose of France's holdings in America. Immediate action was necessary and the President lost no time in effecting "the Louisiana Purchase," obtaining for the United States the vast continental area west of the Mississippi, which Congress and the country of course accepted.

In 1823, when the Holy Alliance was understood to be favorable to an attempt to bring the South and Central American States into subjection, the English Secretary of Foreign Affairs, George Canning, suggested to the American Ambassador that the United States should take decided ground against the Alliance. The result was a Proclamation by President Monroe now known as the Monroe Doctrine, which though not in any way confirmed by Congress until December 1895, has been accepted by successive Presidents, and is now the policy of the country.

In 1833 General Jackson, whose Presidency bore the stamp of his autocratic will from the first, withdrew the deposit of the Government from the United States Bank, forcing the bank out of existence; and in 1834 was censured by the Senate for doing so.

In 1841 on the death of President Harrison, Vice-President Tyler assumed the Presidency as his right. The Constitution probably intended this in prescribing that he should so "act as President," though it was questioned. Mr. Tyler's action was accepted as fixing the practice; but not until 1886 was it actually confirmed by Act of Congress. President Tyler also asserted his independent power subsequently in blocking the movement in Congress to re-establish the Bank.

In 1861 President Lincoln took independent action in calling out troops against the Confederation. In January 1863 he issued on his own responsibility the Emancipation Proclamation and throughout the Civil War recognized that decisive action must again and again be his, and that, not merely as Commander-in-Chief of the Army. In the Cabinet, for instance, on an occasion when under the lead of one of the little groups who constantly differed with him, the body argued against a plan of his, he quietly withdrew to chat with people outside. After a while he went back and the Cabinet meeting soon broke up. When he came out he was asked how the matter was decided. "Oh," he replied, "the majority ruled. I was the majority."

In 1871 President Grant inaugurated Civil Service Reform, which has since been extended and become the rule of the Government. His inherent power as the result of his historic career was always accepted and was instantly decisive, as when he ordered the Treasury Department to take the action which stopped the uncontrollable financial panic then under way in the days of irredeemable paper money. It was the stroke of lightning which in September '69 broke up "Black Friday," the crisis of the contest between Commodore Vanderbilt and Fisk and Gould for control of Erie.

In 1890, President Benjamin Harrison, who has been regarded as one of the ablest Presidents we have ever had, warned boomers out of Cherokee territories they were invading, and the next year, after he had made an extensive trip through the South and West better to inform himself, issued a decree excluding white men from the Cherokee strip. In 1892 when Chile showed no intention to make redress for the assault on American sailors from the "Baltimore" in the streets of Valparaiso some six months before, and the Chilean Ambassador left Washington, President Harrison sent an ultimatum to Chile which brought prompt payment. Also in the Bering Sea controversy when the joint Arbitration Commission appointed to settle it had delayed action until their authority was about to lapse, and Great Britain refused to extend the life of the Commission, the President notified Britain that unless the extension of the Commission was at once granted the honor of the United States would be involved. Thereupon the extension was granted without further delay. In the one instance, eight hours was allowed for an answer and forty-eight in the other. Incidentally it may be noted that in the Bering Sea case the decision of the Board of Arbitration made the next year in Paris was against the United States. But the incident did much to establish relations of respect and comity between the two countries ever

Subsequent Presidential history is sufficiently well-known. In 1895 President Cleveland sent through Secretary Olney to Britain and delivered to Congress his message in regard to European aggression to collect debts in Venezuela, in terms so authoritative and curt that the country was startled at the possibility of war. Happily, England's reply was so quiet and moderate that the crisis passed.

President Roosevelt's readiness for prompt action in matters at home, like the relations of capital and labor, and also abroad, as in connection with the construction of the Panama Canal and in dealing with the contiguous Central American Republics, and our relations with Haiti, San Domingo and Cuba, will be remembered. The memorable cruise of our fleet around the world was recognized as an expression of the President's attitude and character at the close of an administration to be held interpretive of the United States.

With the outbreak of the Great War, President Wilson became at once the spokesman and the unquestioned leader of the country, and this quite as much from recognition of his well-known personal character, as from the office he had been chosen to fill. His part in determining the time and terms of our entering the war, of dealing with the events that occurred in its progress, and at last in the Council, the terms of the Treaty of Versailles, and the creation of the League of Nations, are all too recent and important to be forgotten. As to its enduring influence, it has been recently said by an English political leader that "the American policy expressed by President Wilson is worth more to the Democratic movement in England than battalions led by the angels."

Be all this as it may, and of course there are many opinions as to the individual instances referred to, a brief review of our history is sufficient to show the place filled by the personality of the President, whatever his party or his previous record. His position is unique. He is often unexpectedly laid hold of and set in his high place with limited knowledge of its duties on his part, and with little more knowledge of him on the part of the people.

Then arise the inevitable occasions when he finds himself the center of a critical situation, moved and often compelled to act on his own responsibility, accepting all the consequences which can neither be avoided nor shifted. Then it is that interests important and even heavy with the weight of the future rest upon him. The country is schooled not only to look to him but to trust him. In every Presidential election especially in these later days the people have had this more or less in mind or have been brought to it in their discussions.

To-day as they turn to Mr. Hoover, they are aware that as never before the world is one, and whatever the political attitude of America, we in common with others face a world in commotion, disturbing it may be, but pregnant with a future that concerns all, but cannot be forecast.

The people as yet may only be in "a yeasty ferment," but the Far East has seen the civilization of the West divided into two great hosts fighting to destroy itself in their effort to destroy each other. Over against them the East now stands wondering what is to be its course. It no longer waits to be westernized. It has learned the value of its own past, its art, its letters, its institutions. It can no longer be patronized or held to be of lower grade and inferior substance. It would at any price fit itself for equality of opportunity to play its part in the future, whatever that may be.

America faces this situation and must do her part. Our President newly chosen is to lead, and we behind him will have confidence and faith as we recognize the character of the man we have chosen. The nation's thanksgivings may well be heartfelt.

# A Tragedy of the Sea.

In the rush and bustle of to-day, when the newspapers are filled with tales of disaster, and when

be a superfluous inquiry in ethics to attempt to fix the responsibility for a tragedy at sea, costing scores of lives, wherein a questionable vessel, improperly loaded, and possessing leaky lifeboats, that could not be quickly and safely launched, becomes the central figure in an untimely sinking said to be second only to that of the ill-fated Lusitania. And yet somewhere in the dim realm of causes there lies a lesson in common duty the world may ponder at will while bereaved families suffer and are silent. And whether the spontaneous censure of the survivors falls upon the company owning the vessel or the unfortunate Captain who went down with his ship, somewhere the blame lies; and, though it may never be fully established, it brings to our attention the solemn responsibility of protecting human life.

We are aware that transportation on the sea is the safest form of travel. We are aware that travel upon the streets of our cities furnishes month by month an appalling death list in which innocent children play a principal part. We are aware that flying in the air bids fair to follow the automobile in its power to produce death, but is it not just, in the face of these recurring disasters, that a boastful civilization shall ask earnestly and intently: "Am I my brother's keeper"? The people in the majesty of law provide for inspection of public carriers. They exact certain precautions for safety. They provide the means for carrying their will into effect, and still the fatal tragedies occur, and in the rush of an all too arduous life are soon forgotten. We are shocked when hundreds are lost in a single accident that might have been prevented. We sadly shake our heads in impotency when the daily record of a few deaths becomes a commonplace bit of news. But what do we actually do, save to order inquiries, that drag along until their very verdicts are unnoted, when they finally appear, and are soon forgotten? What is the duty of the citizen in these matters? And though responsibility spreads itself thinly over the mass, are we therefore free from the duty of giving protection, where alas it is so imperatively needed?

Organized society, corporate industry, individual service, each is responsible, in some degree not easily determinable, for unnecessary destruction of life. We do live in a mechanistic age. But the machine, save for structural defects and imperfect construction, performs its work without failure. It kills no one through neglect of duty. If thousands of persons are killed by automobiles, the negligence or criminal carelessness cannot be charged to the machine in itself. That has no volition. It does its part in the service of mankind according to power and intent. Of course, an internal combustion engine can never be constructed to work perfectly all the time. Against the criminal carelessness of the users we set up laws compelling licensing and providing speed limits and requiring certain routings upon the streets and highways. And, more or less, our Courts inflict penalties for infractions of rules. But does the general public responsibility end here? We think not. The public responsibility demands that the public see that these rules are enforced, and since the users of machinery comprise a majority of the people they have a double responsibility-first as users, second as citizens. It is not enough to leave the process of enforcement to the laws. The careless driver who kills, the careless company loss of life is getting to be a commonplace, it may which invites patronage of an unseaworthy vessel,

the ignorant or careless mechanician, are each and all responsible for disasters.

As citizens and as users of machinery we are glad the fault is not ours. But, in the case we are considering, there are allegedly open port holes at starting and broken valves and misplaced cargoes and ignorant, untrained crews, the blame falls upon the owners, upon the business of ocean transportation and upon the public at large. But we are in a hurry and perhaps we think it is "none of our business." Society, organized, does not even protect itself. Corporate operation does not hold its own members to their duty-glad, often, that the disaster is not of their own making, and the officers of the law who failed as inspectors and the employers who were derelict too often escape. Responsibility is pushed back and back until the indifferent public must answer the question: "Am I my brother's keeper?" There is a vital remedy—it lies in the refusal of patronage. And if condemnation of this kind would supplement the courts there would be fewer "accidents."

Now, we have evolved the rule, of widespread application, of safety first. Do we apply it to new modes of transportation? Beyond doubt there are thousands driving machines in our streets, who is a province of transportation in the reputation of a business by destroying life are unworthy the good-will of the public ever afterward?

though technically capable, according to meager rules of licensing, are unfit, mentally and morally, and without a deep or clear sense of responsibility. Are not we, too, who permit this state of affairs, culpable? Are we not in *some* degree responsible for the tragedies of the seas, for the sinking of the Vestris?

We are aware that in these comments we seem to be fanning thin air. But our point is that we have not filled our responsibility, our duty, when we read with sorrow and indigation the heart-crushing stories of the survivors, when we lament the unfortunate dead, when we set the law in motion, and then forget all about it. Time was in our own early Puritan days, when a woman sinned she was pilloried in a public place with the scarlet letter pinned upon her breast. Horrible as that appears to us now, it did not seem so then. It was a primitive method of what men called justice, and it was rank injustice for it knew not mercy and arrogated the right of condemnation. But if, when a tragedy occurs at sea, the public would silently refuse its patronage where criminal negligence is proven, might not that teach the lesson that those who destroy the reputation of a business by destroying life are

# Indications of Business Activity

THE STATE OF TRADE—COMMERCIAL EPITOME.

Friday Night, Nov. 23 1928.

Trade has been a bit "spotty"; good in some parts of the country where the weather was seasonably cold, and not so good in other parts where it was too warm. Retail trade, owing to bad roads and floods in some parts of the Central West, has suffered to some extent. The rains which hurt trade naturally helped the Winter wheat crop, but it is plain enough that the jobbing trade has latterly slowed up somewhat. This may be attributed almost entirely to weather conditions, the autumn having been abnormally warm, to the detriment of seasonal trade in almost all departments Now, however, temperatures are colder all over the country, with more or less snow of late and even snow flurries here in New York. What the country needs above all things is seasonable weather and plenty of it. In some of the industries there is more or less irregularity; that is, the same spottiness is observable. The cotton textile industry tends toward improvement. But steel, automobiles and the shoe manufacturing industries have all been less active. same time the output of textiles has increased as well as sales to the consumer. It is noticeable, too, that specifications in the steel trade are reported larger. Coal production was active with lower temperatures. Low grade bituminous has declined. Latterly retail trade has felt the beneficial effects of lower temperatures to some extent and also preholiday buying. Special sales have improved retail business here and there. Petroleum output is increasing in Oklahoma, Texas and California. Coal output is far larger than that of a year ago. And whatever may be said about the automobile business, the output of automobiles is now up to that of the high record year of 1926. It is true that at Detroit the employment fell off 2,800 last week. But the aggregate still amounts to 277,000, or 82,200 larger than last year, and over 70,000 more than in 1926. It is remarked, too, that the tone of general business in this country is still confident, as actual trade is larger than a year ago.

Meanwhile, as already intimated, the wheat crop has benefitted by wide-spread rains and snows. The Pacific Coast has also been helped by timely rains. The corn belt it is true, needs cold dry weather after a rather prolonged period of rains and latterly snow, which have retarded the work of husking in the Central West. To-day, however, the weather was described as almost ideal in the corn belt, so much so that it is expected that the crop movement will increase. Corn has advanced somewhat owing to the smallness of the receipts at Western markets, lack of country

offerings on any large scale, and in general the steadiness of cash prices. One drawback has been the reports of rather large European cancellations of old export contracts. But sooner or later it is believed Europe will require a rather large quantity of American corn. Wheat has not changed much, as world's supplies are large and the export demand in this country has been small. It appears, however, that Argentina will have an export surplus of 220,000,000 bushels and that fact rather tends to militate against any advance here. But Liverpool reports that all the feeding grains are very steady, with a continued demand for Argentina and American corn. Speculation in grain of late has increased somewhat, as some stock market traders have liquidated and tried a little wheat as well as cotton. Cotton has advanced about a cent owing to an excellent trade demand and the fact that the ginning up to November 14 did not go beyond 11,320,000 bales which some considered too small to warrant crop estimates by the Government as high as the last one on November 8 of 14,133,000 bales. Moreover, speculation has increased sharply on an overflow of business from the Stock Market. Of late the daily transactions at the cotton exchange have been estimated at as high as half a million bales, that is for 3 days past. The exports, moreover, have made a good showing but the "into sight" figures increased this week. Worth Street's trade in goods has improved noticeably and Manchester has been more optimistic, with a better trade in cloths with India. The peak of the cotton crop movement has passed, and there are hopeful prognostications as to the size of the world's consumption of American cotton this year. Rubber has advanced somewhat as a natural ally after the prolonged decline. Besides, the London stock is decreasing and some of the rubber statistics are regarded as rather bullish.

Raw sugar has advanced with a better demand from Europe and targer purchases by New York refiners whereby prompt raws were advanced to 2½c. To-day there were 122 December notices issued which had sittle effect on that delivery. There is said to be some investment buying of sugar by Wall Street interests on the theory that all bearish points have been discounted that the price is below producing cost. Coffee has shown no marked net change, though latterly lower and there are reports that Brazil has been inclined to sell rather more freely. Certainly Brazilian prices have from time to time declined. On the other hand it is remarked that deliverable grades are scarce here, while contract prices are still much below spot quotations. The discounts on distant months are considered large and il-

logical. The talk is that the Defense Committee will accept delivery on a considerable quantity at December contracts, that is 45,000 to 50,000 bags. Raw silk has been quiet, though there are said to be orders to buy at somewhat under the market, while the possibility of a rise in Japanese exchange is not ignored. The trading at the exchange here is small for the time being, with prices about steady.

One drawback in the general business situation of the West is the fact that supplies of cattle and hogs are so large that they have noticeably depressed prices at Chicago. Hogs have sold at the lowest price seen since last Fe ruary, falling to an average of \$8.60, with cattle averaging \$15. Large supplies of storage eggs have been sold, causing a sharp decline in prices. At the Pacific Coast the lumber industry has agreed on curtailment for early next year and the effect has been to impart greater firmness to prices. Hard woods have been in better demand. Soft wood lumber has sold less readily. While cotton goods have latterly met with a somewhat better demand, with bleached goods occasionally showing a moderate advance, there has been a better demand for worsted dress goods, especially lightweight fabrics, and fancy weaves. Moreover, men's wear suitings and overcoating for the current season have been in sharp demand. In contrast with this staple broad silks have been less active. Carloadings for four weeks of October were 5.2% larger than in the same trade last year, but about 2%smaller than the same period two years ago.

The stock market is still a wild affair to use a somewhat hackneyed expression, it beggars description. Transactions have reached new high and incredible records and prices in a single day early in the week rose anywhere from 5 to 63 points. There was a setback later, noticeably on Thursday, but before the day was over there came another leap upward. There were reports too that seats had risen to \$550,000. Brokers Loans for the week ending November 21 increased \$176,345,000, a record gain for one week, rising to such a staggering new high total as \$5,157,132,100. On the 22d inst. the market wound up with net gains for the day in some cases ranging from 5 to 49 points. To-day the transactions closely approximate 7,000,000 shares, a new peak in all time making 30,500,000 shares this week, which necessitated closing the Exchange to-morrow Saturday 11 order to bring bookkeeping work up to date. There was an early advance followed by a decline of 5 to 10 points. The Curb Exchange will also be closed.

At Charlotte, N. C. textiles were generally quiet. Large buyers recently in some cases covered their needs well for some time. Prices continued firm and many textile men were said to be confident that cotton is going higher and that finished goods will advance. Greensboro, N. C. wired that mills must either produce at cheaper prices or suspend

PresidentCoolidge addressing the annual convention of the National Grange at Washington last Friday night recounted what has been done by the Government for Agriculture. He declared that no other nation has given the aid that the United States has and emphasized the assistance to industry, indicating that it should work out its own salvation. That is certainly what it will have to do in the long run, whatever panacea, palliatives or downright quack nostrums may be applied in seeking to evade the operation of the law of supply and demand, than which the

law of gravity is not more immitigable.

On the 17th inst. summerlike weather prevailed. It was 68 degrees here. At Springfield, Mass. it was 73, a high record and at Boston 76 degrees the highest in the 54 years that the Weather Bureau has been in existence. In parts of the West rainfalls were reported. On the 17th inst. of 3 to 8 inches. Floods occurred in Kansas causing losses of lives and damage to property. In parts of Oklahoma nearly 3 inches of rain fell and there were rains elsewhere in the Southwest. At Chicago on the same day the temperatures were 46 to 56, at Cincinnati 60 to 74, at Cleveland 66 to 70, at Detroit 59 to 68, at Kansas City 38 to 42, at Milwaukee 38 to 42, at St. Paul 32 to 38, Philadelphia 54 to 68, Pittsburgh 58 to 72, Portland, Me. 50 to 62, San Francisco 56 to 64, Seattle 38 to 44, and at St. Louis 48 to 62. On the 18th inst. it was 71 degrees here, a high record for that date for 58 years. The sea beaches nearby were crowded. At Atlantic City temperature was nearly 70 degrees, the board walk was thronged and extra coaches were attached to New York and Philadelphia trains. Boston had 64 degrees, Chicago 40, Cleveland and Cincinnati 41, Minneapolis and Kansas City 38, Omaha 36, Seattle 54, Portland, Me. 42 and Philadelphia 74. Flurries of snow occurred here on the

21st inst. and a light fall during the night, powdering the ground, early on the 22nd inst. speedily disappeared. The weather had been so mild in this section that on the 21st inst. at Allenhurst, N. J. lilacs were blooming and also roses in Monmouth County, N. J. started to bloom anew.

Here on the 21st inst. the temperatures were 31 to 42 degrees; at Boston 30 to 38, Cincinnati 32 to 48, Chicago 30 to 44, Cleveland 30 to 38, Detroit 28 to 34; Kansas City 36 to 60, Milwaukee 28 to 40, Montreal 24 to 32; Omaha 36 to 54, Philadelphia 38 to 44; Portland Me. 26 to 34; Seattle 46 to 58, St. Louis 32 to 60, St. Paul 32 to 44; Winnipeg 30 to 38. To-day the temperatures were 36 to 42 here. The forecast is for warmer weather, fair to-night and cloudy or rainy to-morrow. Boston was 34 to 44, Chicago 28 to 38, Milwaukee 24 to 36, St. Paul 26 to 36.

### Decrease in Retail Food Prices in October as Compared with Previous Months.

The retail food index issued by the Bureau of Labor Statistics of the United States Department of Labor shows for October 15 1928 a decrease of about one-half of 1% since September 15 1928; an increase of a little more than fourtenths of 1% since Oct. 15 1927; and an increase of 510% since October 15 1913. The index number (1913 equals 100.0) was 156.1 in October 1927; 157.8 in September 1928; and 156.8 in October 1928. The Bureau's advices, Nov. 19, also state:

During the month from Sept. 15 1928 to Oct. 15 1928, 21 articles on which monthly prices were secured decreased as follows: Pork chops, 15%; raisins, 5%; leg of lamb, 4%; sirloin steak, round steak, and oranges, 3%; canned red salmon, flour, and navy beans, 2%; ham, rolled oats, macaroni, rice, canned corn, canned peas, and sugar, 1%; and bacon, butter, and tea, less than five-tenths of 1%. Ten articles increased: Scrictly fresh eggs, 8%; onions, 5%; cabbage, and canned tomatoes, 2%; plate beef, oleomargarine, lard, and bananas, 1%; and cheese and corree, less than five-tenths of 1%. The following 11 articles snowed no change in the month: Hens, fresh milk, evaporated milk, vegetable lard substitute, bread, cornmeal, cornflakes, wheat cereal, potatoes, baked beans, and prunes.

Changes in Retail Prices of Food by Cities.

During the month from September 15 1928 to Oct. 15 1928, there was a decrease in the average cost of food in 28 out of the 51 cities as follows: Baltimore, Chicago, Cleveland, Detroit, Indianapolis, Manchester, St. Paul, and Springfield, Ill., 2%; Boston, Cincinnati, Columbus, Jacksonville, Kansas City, Milwaukee, Omaha, Peoria, Philadelphia, Portland Me., St. Louis, Scranton, Seattle, and Washington, 1%; and Bridgeport, Butte, Louisville, Alimeapois, Newark and Richmond, less than five-Butte, Louisville, Minneaporis, Newark and Richmond, less than five-tenths of 1%. The following 20 cities increased: Atlanta, Charleston, S. C., Denver, Fali River, Los Angeles, Nortolk, San Francisco, and Savannah, 1%; and Birmingham, Dallas, Houston, Little Rock, Memphis,

vannah, 1%; and Birmingham, Dallas, Houston, Little Rock, Memphis, New Haven, New York, Pittsburgh, Portland, Me., Providence, Rochester, and Salt Lake City, less than five-tenths of 1%. In Buffalo, Mobile, and New Orleans, there was no change in the month.

For the year period Oct. 15 1927 to Oct. 15 1928, 34 cities showed increases: Los Angeles and Seattle, 4%; Butte and Memphis, 3%; Charleston, S. C., Cincinnati, Dallas, Denver, Louisville, Portland, Me., Portland, Oreg., Salt Lake City, Scranton, and Washington, 2%; Buffalo, Columbus, Fall River, Houston, Manchester, Minneapolis, New Haven, New Orleans, Omaha, Providence, Richmond, Rochester, San Francisco, and Savannah, 1%; and Birmingham, Bridgeport, Chicago, Little Rock, Mobile, and Omana, Providence, Rechmond, Rochester, San Francisco, and Savaman, 1%; and Birmingham, Bridgeport, Chicago, Little Rock, Mobile, and Pittsburgh, less than five-tenths of 1%. Sixteen cities showed decreases: New York, 3%; Baltimore, 2%; Atlanta, Boston, Cleveland, Detroit, Newark, Philadelphia, St. Louis, and Springfield, Ill., 1%; and Indianapolis, Jacksonville, Kansas City, Milwaukee, Noriolk, and St. Paul, less than five-tenths of 1%. In Peoria there was no change in the year.

As compared with the average cost in the year 1913, food on Oct. 15 1928 was 69% higher in Washington; 67% in Chicago; 65% in Scranton; 64% in Richmond; 62% in Birmingham, Buffalo, and Detroit; 61% in Atlanta, Baltimore, Cincinnati, New Haven, New York, Pittsburgh, and Providence; 60% in Philadelphia; 59% in Boston, Charleston, S. C., and Fall River; 58% in Dallas; 57% in Milwaukee and St. Louis; 56% in Manchester, New Orleans, and San Francisco; 55% in Louisville; 54% in Cleveland; 53% in Minneapolis and Newark; 52% in Memphis; 51% in Indianapolis; 50% in Kansas City and Los Angeles; 49% in Jacksonville, Little Rock, Omaha, and Seattle; 44% in Portland, Oreg.; 42% in Denver, and 36% in Salt Lake City. Prices were not obtained in Bridgeport, Butte, Columbus, Houston, Mobile, Norfolk, Peoria, Portland, Me., Rochester, St. Paul, Savannah, and Springfield, Ill., in 1913, hence no comparison for the 15-year period can be given for these cities.

### Union Trust Co. of Cleveland Views Election of Herbert Hoover as President as Stabilizing Factor In Business.

The election of Herbert Hoover to the Presidency has proved a stabilizing factor in business, says the Union Trust Company, Cleveland. Along with other favorable factors, the bank finds that the result of the election gives rise to the expectation of continuing good business for some time to come. "From such signs as have been in evidence since November 6th the outcome of the election has been widely interpreted as assuring the continuance of our present era of prosperity," says the bank in its business magazine "Trade Winds." It adds:

"Mr. Hoover's attitude towards business in the past has been one of cooperation rather than restriction. His Department has fostered consistently the idea that each industry, with the aid of governmental assistance and research, should build up for itself its own code of ethics, its own

standards of practice, its own methods of co-operation, and its own regulations, in the spirit of good faith and fair play toward the public and toward busine

other businesses.

"Mr. Hoover's department has likewise approved of and fostered the idea of trade associations, as a practical working method of self-regulation within an industry. In short, Mr. Hoover believes that the basic principle of democracy should apply in business in this country just as it applies in government—and there is every reason to believe that during Mr. Hoover's coming administration his attitude upon these points will be reflected in coming administration his attitude upon these points will be reflected in the activities of the various branches of the government, particularly in the Department of Commerce

"The expectation of continuing good business appears to be based upon a sound foundation. The demand for steel and for automobiles continues upon a high level. The threatened building decline has not materialized. Returns from our large agricultural crops are coming in to the farmers, and farm dollars are returning to industry through the retailers and the sellers of agricultural implements.

"Prices of some basic com nodities, such as copper and steel, are stiffening. "Improvement is noted in industries such as coal and textiles which for some time have been suffering from depression.

"Carloadings, as anticipated, are steadily exceeding last year's totals, the figures for both September and October being in excess of those for the same months last year

# Further Falling off in Detroit Employment.

The Detroit Employers Association reports employment figures for week ended Nov. 20 as 276,952 a decrease of 2,785 from last week, but an increase of 82,241 over the corresponding period of last year.

# "Annalist's" Indexes of Business Activity for October

We quote as follows from the "Annalist," regarding its index of busines activity.

The "Annalist" Index of Business Activity, preliminary, for October is 100.8, as against a heavily revised September figure of 98.7. (The reason for the sharp revision of the September index is explained in the footnote to Table I.) The principal factor in this increase was a sharp gain in the adjusted index of cotton consumption, which rose for September to 106.0 for October. Other factors were fairly heavy increases in the adjusted indices of pig iron production, freight car loadings and bituminous coal production. Partly offsetting these increases, however, were a sharp decrease in the adjusted index of automobile production and a more moderate decline in the adjusted index of zinc production. Table I summarizes for the last three months the mo ments of the combined index and the ten component series, each of which has been adjusted for seasonal variation, long-time trend and variations in cyclical amplitudes before being weighted according to its importance and combined into the index of business activity.

THE "ANNALIST" INDEX OF BUSINESS ACTIVITY.

|                            | October. | September. | August. |
|----------------------------|----------|------------|---------|
| Pig fron production        | 105.9    | 101.6      | 102.7   |
| Steel ingot production     | 112.6    | 113.4      | 106.4   |
| Freight car loadings       | 95.4     | 95.0       | 93.4    |
| Electric power production  | ****     | 100.8      | 103.0   |
| Bituminous coal production | 92.6     | 89.8       | 86.4    |
| Automobile production      | *95.4    | 108.5      | 104.3   |
| Cotton consumption         | 106.0    | 94.2       | 95.2    |
| Wool consumption           |          | 98.2       | 101.0   |
| Boot and shoe production   |          | 104.9      | 116.1   |
| Zine production            | 91.9     | 95.3       | 99.0    |
| Combined index             | *100.8   | a98.7      | 98.8    |

\*Subject to revision. a Revised. The computation of the revised index for September resulted in an unusually sharp reversal of the movement indicated by the preliminary figure of 100.6 given in the "Annalist" of Oct. 19. Usually the revised index turns out to be very close to the preliminary figure; that for August, for example, being 98.8, as against a preliminary indication of 98.7. The reason for this close correspondence is that ordinarily the cyclical movements of all adjusted series run parallel with one another. In September, however, an extraordinary divergence occurred. All but two of the seven series for which preliminary data were available a month ago showed substantial increases, whereas the date for the remaining three series, which became available later, showed sharp decreases The magnitude of the September decline shown by the adjusted index of electric power production is, indeed, difficult to understand, unless some error crept into the figures as reported by the Department of the interior, although there is, of course, no basis for supposing that these figures were not reported correctly.

The following table shows the movement of the combined index by months since the beginning of 1924:

TABLE II. THE "ANNALIST" INDEX OF BUSINESS ACTIVITY.

|           | 1924. | 1925. | 1926. | 1927. | 1928.  |

# "Annalist's" Weekly Indexes of Business Activity.

In presenting its weekly index of commodity prices on Nov. 23, the "Annalist" says:

Price movements during the week have been highly irregular, but a sharp decline in cattle has swung the balance downward and the "Annalist" Weekiy Index of Wholesale Commodity Prices has declined to 147.9, as against 148.9 a week ago. The index is now at the lowest level since April 10, 1928.

Wheat, corn and potatoes declined slightly, but these decreases were partly offset by strength in other farm products, principally the minor grains, cotton, hogs and eggs. Food products were also lower on the average, due to declines in dressed beef, pork ribs, vea and butter. Industrial commodities showed little change, the only fluctuations of importance having been in bituminous coal and in gasoline, which have

### Loading of Railroad Revenue Freight Well Ahead of 1927 but Below 1926.

Loading of revenue freight for the week ended Nov. 10 totaled 1,053,295 cars, the Car Service Division of the American Railway Association announced on Nov. 20. This was an increase of 78,161 cars above the same week in 1927, but a decrease of 53,594 cars under the corresponding week two years ago. Further details are as

Miscellaneous freight loading for the week totaled 394,328 cars increase of 21,363 cars above the corresponding week last year but 3,544 cars below the same week in 1926.

Coal loading totaled 193,434 cars, an increase of 21,874 cars above the same week in 1927 but 48,508 cars below the same period two years ago.

Grain and grain products loading amounted to 49,356 cars, an increase of 4,232 cars above the same week last year and 4,754 cars above the same In the Western districts alons grain and grain products loading totaled 32,123 cars, an increase of 2,340 cars over the same week

Livestock loading amounted to 31,280 cars, a decrease of 5,034 cars under the same week last year and 6,880 cars below the same week in 1926. In the Western districts alone, livestock loading totaled 23,843 cars, a decrease of 4,522 cars compared with the same week in 1927. Loading of merchandise less than carload lot freight totaled 261,768 cars,

an increase of 2,992 cars over the same week in 1927 but 4,281 cars below the corresponding week two years ago.

Forest products leading amounted to 64,024 cars, 1,368 cars above the same week last year by 3.433 cars under the same week in 1926. Ore loading totaled 48,379 cars, 29,543 cars above the same

1927 and 10,529 cars above the corresponding week in 1926.

Coke loading amounted to 10,726 cars, 1,823 cars above the same week

in 1927 but 2,231 cars below the corresponding week in 1926.

All districts reported increases in the total loading of all commodities compared with the same week last year except the Southern which showed a small decrease, but the Northwestern was the only district to report an increase compared with the same period two years ago.

Loading of revenue freight in 1928 compared with the two previous

|                         | 1928.      | 1927.      | 1920.      |

### Industrial Activity Based on Consumption of Electricity-Shows Gain of 10% in October as Compared with Same Month Last Year.

Consumption of electrical energy by industry in October was 10.1% greater than in the corresponding month last year, according to reports received from more than 3,600 manufacturing plants by Electical World. All of the primary manufacturing groups, with the exception of textiles, leather and its products, and lumber and its products, showed a higher rate of operations, based on consumption of electricity, than that of October, 1927. Contrasted with September of the current year, however, general industrial activity registered a drop in October of close to 2%. survey of the *Electrical World* goes on to say:

The peak of industrial activity in 1928, from present indications, occurred in September, with October a close second and February, usually the peak month of a year, in third position. The trend line for the two final months of recent years has shown a slight downward movement.

Despite the fact that the textile group is still operating on a plane some 3.7% under last year, activity in this important industry has increased steadily during the past three months, the gain in rate of operations for this period amounting to 32%. The two final months

should find the rate of activity above the 1927 level.

The automobile industry, including the manufacture of repair and replacement parts, recorded a drop in rate of operations of about 12.2%

in October as compared with September, but activity in the industry was fully 23.7% greater than in October last year.

The rolling mills and steel plants of the nation continued on a high plane, the month of October registering a gain of 2.5% over September. The ferrous and non-ferrous metal working plants showed a gain compared with September of this year of 0.2%, based on con-

sumption of electrical energy.

With the exception of the Southern states, all sections of the country reported a higher rate of operations than a year ago. October manufacturing operations in New England were 4.7% greater than in the similar month last year. Plants in the Middle Atlantic states were operating at a rate 19.7% above last year. The North Central states recorded a gain of 24.8%, and the Western states 18.2%. General manufacturing activity in the South was 3.5% under last year.

The rate of industrial activity in October, compared with Spetmber this year and October, 1927, all figures adjusted to 26 working days

this year and October, 1927, all figures adjusted to 26 working days

and based on consumption of electricity as reported to Electrical World (monthly average 1923-25 equals 100) follows:

|                                | Oct., | Sept. | Oct., |
|--------------------------------|-------|-------|-------|
|                                | 1928  | 1928  | 1927  |
| All industrial groups          | 132.0 | 134.5 | 119.9 |
| Metal Industry group           | 144.6 | 143.0 | 110.8 |
| Rolling mills and steel plants | 144.7 | 141.2 | 111.8 |

# Gain of 16% in Life Insurance Sales in United States During October as Compared with Same Month

The regular monthly survey of ordinary life insurance was issued Nov. 20 by the Life Insurance Sales Research Bureau. The October sales total \$764,577,000, which is a 16% gain over 1927 sales. This gain is shared by 60% of the contributing companies, and practically every section of the United States records an increase. For the first ten months of the year, sales are 4% above the 1927 record. The Bureau's survey of the various sections of the country fol-

New England.—The New England States show an increase of 21% in ctober as compared to 1927 records. Massachusetts leads with an increase of 29% while Connecticut shows a gain of 22%. The year-to-date record shows a 4% increase which is shared by all States except Ver-For the twelve-month period just ended, the New England section

increased 3% over sales in the preceding twelve months.

Middle Atlantic.—This section leads the country for monthly sales, recording an increase of 23% over October 1927. This increase is shared by all the States.

For the first ten months of the year the records show a 4% gain for the section. New Jersey leads with a 13% increase. New Jersey also leads in the twelve-month period, just ended, with a 9% gain.

East North Central.—Ohio leads the States in this section with a monthly

increase of 29%. The section as a whole records a 19% gain for October and a 5% increase for the first ten months. For the twelve-month period just ended, the gain for the section is 4%. Indiana leads with an

8% gain.

West North Contral.—This section records a 9% increase which is shared by every State with the exception of Kansas which records a slight decrease. Iowa shows the greatest monthly gain in this section—a 16% increase over 1927. For the year-to-date South Dakota and Nebraska lead with a 13% gain. For the twelve-month period just ended, the West North Central States record a 4% gain.

South Atlantic.—This section records a very slight decrease in sales for October, and is the only section of the country which failed to surpass its 1927 record. Maryland leads with an 18% gain. For the year-to-date and the twelve-month period just ended, sales in the South Atlantic section equal the 1927 records. The District of Columbia leads both these periods.

East South Central.-This section as a whole records a 14% increase which is shared by every State except Alabama which experienced a slight decrease. Tennessee leads with a 25% gain. For the first ten months the section shows a 6% increase, which is also shared by every State ex-The record for the twelve-month period just ended shows a 5% gain for the section.

West South Central.-This section records an 8% increase for October. Arkansas leads the States in the section with a 43% gain. The year-to-date sales show a 6% increase in which all States share. Every State in the section also shared in the gain of 5% for the twelve-month period

-The sales in this section for October show a 17% increase Mountain .over 1927. New Mexico shows a monthly gain of 53%, the greatest gain recorded by any State. The sales for the first ten months of 1928 show a 4% increase. Nevada leads all States in the country with a 44% increase for this period. For the twelve months just ended the section crease for this period. For the twelve months just ended the section records a 2% gain. Nevada again leads all the States with a 40%

-October sales in the Pacific section show a 6% increase. For the year-to-date these States record a 1% gain. The sales for the twelve-month period just ended equal those of the preceding twelve months.

### Canadian Sales of Ordinary Life Insurance Reach New High Point in October.

During the month of October, \$55,743,000 of new paidfor ordinary life insurance was purchased in Canada. This establishes a new record for any single month's production and represents an increase of \$5,000,000 over production in May 1928—previously the highest month on record. The sales in October show a 16% increase over sales in October 1927, and 80% of the contributing companies are sharing in this increase. These figures are furnished by the Life Insurance Sales Research Bureau and represent the experience of companies having in force 84% of the total legal reserve ordinary life insurance outstanding in the Dominion of Canada. The Bureau's announcement, under date of Nov. 17, says:

Every province shares in the monthly gain. These increases range from 2% in New Brunswick and Nova Scotia to 46% in Saskatchewan.

For the first ten months of 1928, production shows a 15% gain over the same period in 1927. All Provinces share this increase and show substantial gains. Newfoundland leads with a 46% increase followed by

Alberta with a gain of 29%.

For the twelve-month period just ended the records show an increase of 13% over the preceding twelve months. Newfoundland leads for the twelve-month period with a 36% increase; Alberta follows with a 26%

The records made in the cities vary widely. Hamilton leads the cities both for the month and the year-to-date and shows substantial gains. For the first ten months of the year most of the cities show increases.

# Increase in Building Permits in Michigan During

Building permits in the 21 leading cities of Michigan for October, 1928, showed a substantial increase over the month of September, according to figures compiled by the Union Trust Co. of Detroit. October figures for the Michigan cities and data for two comparative months are as follows:

|               | Oct. 1928. | Sept. 1928. | Oct. 1927. |
|---------------|------------|-------------|------------|
| Adrian        | \$10,040   | \$11,165    | \$23,420   |
| Ann Arbor     | 172,130    | 226,430     | 341,035    |
| Battle Creek  | 319.880    | 73.825      | 405,135    |

### Industrial Situation in Illinois-Employment Again Shows Upward Movement—Analysis by Cities.

With a further gain of 0.7% in the volume of Illinois industrial employment there are now 2.4% more names on factory payrolls than was the case in October 1927. The downward movement in factory employment also appears to have stopped in Illinois and is now 2.2% greater than it was last year, says Sidney W. Wilcox, Chief of the Bureau of Labor Statistics of the Illinois Department of Labor. In his review of the industrial situation, dated Nov. 19, Mr. Wilcox goes on to say:

As indicated by the reports of 1,500 Illinois employers, 2.1% less money has been paid in wages than was the case in October. In a number of industries, notably clothing and street railways, considerable numbers have been placed on part time schedules with the result that payrolls have declined in those industries without a corresponding drop in em-

Despite the upward movement of employment, the unemployment situation is somewhat less favorable than a month ago. In Chicago alone, 786 additional applications for work have been received. Eleven of the 13 free employment offices report that more people have applied for work than was the case a month ago.

This situation is primarily due to two factors. The demand for agricultural help has been declining in most centres, so that transient labor is now drifting into large industrial centres where it hopes to be placed in manufacturing industries. The second factor is the clsoing down of outdoor industries in industrial centres because of the approach of cold

Among the industries which have played an important part in the October upswing are meat packing, coal mining and trade. Electrical products factories and agricultural implement establishements also supported the upward movement. Canners made heavy seasonal reductions.

An increase of 2.5% in the metal group indicates that approximately

4,500 workers have been added to the forces of metal manufacturers. Increases of 30 to 40 men have been reported in a large number of cases and in one instance a manufacturer reported an addition of several hundred names to his payroll. While metals ordinarily experience a pickup at this time, the present increase is greater than usual.

Manufacturers in the food industry reported a number of interesting changes, among which is a 76% reduction in canning establishments and a 2.9% pickup in meat packing plants. Ice plants have reduced their forces by no less than 20.5%, and a 12% reduction is noted in ice cream factories. The major downward movement in the food group is in line with previous October experiences but the October upswing in packing plants is greater than that which is ordinarily experienced in the packing industry.

Furniture factories in Rockford and Chicago have continued to add to their forces. This pickup is of especial interest because the industry experienced rather dull conditions during the first part of 1928. The present oickup will be of special interest to Rockford because of the large number of furniture factories in that city.

Employment in the building products group has declined except in lime and cement factories. Brick tile and pottery establishments have made a number of reductions, most of which are in conformity with the policy of previous years. Glass factories also report reductions, but in this case it should be noted that the decreased forces may not reflect a change in the demand for building glass nearly as much as a reduced demand for glass products used by auto manufacturers which take a large

part of the product of the Illinois glass industry.

Clothing factories have placed considerable numbers of workers on part time schedules and laid off a fairly large number. The payroll which reflects both reduced working time and decreased forces is 5% less than it was last month. Both men's and women's clothing factories are being

operated with reduced forces. Shoe manufacturers have also reduced their forces during October as have tanneries and manufacturers of miscellaneous leather products There are now 13% fewer workers employed in this group than was the

In the non-manufacturing industries, reductions have taken place in public utilities, services and road construction. Additions are reported in trade, coal mining and building.

COURSE OF EMPLOYMENT AND EARNINGS IN ILLINOIS DURING OCTOBER 1928.

| Industry                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | ps (Payroll                                           | Earnings                                  |       | ment. | Employ        |                  |                              |

Mr. Wilcox also furnished, under date of Nov. 19, the following analysis of the industrial situation by cities:

Employment conditions have improved in ten of the 15 leading Illinois industrial ecntres during October. Furniture factories in Rockford, and farm implement establishments in Moline-Rock Island have been leaders in the Illinois upswing which has also been supported by metal products factories and builders who have been rushing to complete projects before Corn husking is well along in the majority of agricultural centres, excepting Quincy, where it has just begun. Both Danville and Springfield report that improvement in the coal mining industry has resulted in improved business conditions and increased employment.

Aurora.-Industry has been very active in Aurora during the past 30 days. One factory which laid off 200 employees in September reports that it has now continued operations with a force of 236 people. Another factory is scheduled to open shortly. Among the leading industries the most active conditions appear to be in textiles and metals, both of which show significant additions when compared with last month. Builders are reported to be active, although building expenditure, as indicated by permits, is less than it was a year ago. The free employment office ratio shows a considerable improvement when compared although the ratio indicates that conditions have not changed appreciably during the last month.

Bloomington .- As indicated in the September review, the demand for farm help has increased in Bloomington during the past month. Corn huskers have found an especially active demand for their services, although there are reports that husking is about complete in this community. Owing to a seasonal decline in the canning industry, total factory employment has fallen off. Other leading industries have added to their forces.

According to the free employment office, employment conditions are better than they were in September or last October, this month's ratio of 105 comparing with 109 for last month and 128 for a year ago.

Cicero.—A recent study shows that Cicero has added ten industries since October 1927. This fact probably explains the increased number of available jobs at the free employment office which has placed 100 more workers than in October 1927 and 66 more than last month. The increase over a month ago is sessional in character and reflects the 1.0% cain in over a month ago is seasonal in character and reflects the 1.9% gain in factory employment. Builders are reported to be active in this community, and building permits indicate that they will continue to be busy for some

An upswing of 1.2% has characterized the course of factory employment in Chicago, where improved conditions are reported in many leading lines of industry. Foundries have added considerable numbers to their working forces, and meat packing plants report that increased business has necessitated additional workers. Printers and clothing manufacturers have reduced the number of names on their payrolls. The return of large numbers of workers to factory centres for the winter months s already taking place and in Chicago 785 more applications for work

have been received than was the case in September.

Danville.—Employment and general business conditions continue to improve in Danville. While no notable additions have been reported, the present month's upswing has been supported in all leading lines, the leaders of which are bricks and metals. Because of an unusually heavy demand for farm help, the free employment office has found it impossible to meet the demand. Building has been more active than either last

year or a month ago.

Decatur.—Industrial conditions have varied considerably in this locality during the past month. A number of foundries have been compelled to increase their schedules becasue of increased orders, while heavy reductions are reported in a number of other lines. Total employment in 22 factories declined 3.6%. declined 3.6%. The course of buildings as indicated by permits has been downward as compared with either last month or October 1927. The extent of unemployment as reflected in the free employment office ratio is on the same level as last month, although the competition for is less than it was a year ago when 143 workers applied for every 100 jobs.

East St. Louis.-Reductions have been the general rule in reporting East St. Louis establishments, most of whom are engaged in meat packing or in the manufacture of metal products. A single representative of chemicals has also reported reduced working forces. The experience of the free employment office also indicates that there are fewer jobs, the ratio of applicants per 100 positions increasing from 105 in Septe to 120 in October. Large building projects which have been scheduled to begin operations have been held back somewhat because of labor dif-According to the free employment office an agreement is expected shortly after Nov. 1.

Joliet.—Last month's downward movement has been checked by an

0.8% increase, most of which is due to increased working forces in metal products factories. Unemployment has increased, however, and the competition for jobs has been greater than it was in September. The free employment office reports that 279 more applications have been received, most of which came from outside workers who have been dismissed by outdoor industries. Some demand for huskers is reported, but according to reports there are sufficient hands to meet current needs of agriculture.

Moline-Rock Island .- Two definite movements are apparent in the reports of Rock Island-Moline manufacturers. Agricultural implement factories have added large numbers to their forces, while reductions are noted on the part of establishments manufacturing automobile equipment. The free employment office reports that jobs have not been easy to obtain, and the demand for common labor in outdoor industries has been very quiet.

Peoria.—The estimated cost of buildings to be constructed, as indicated by permits, is greater in Peoria than in any down-State centre. Other indicators of business and employment conditions also reflect improvement, manufacturers reporting a 5.6% gain and the free employment office reporting a decline in its ratio of applicants per 100 jobs Metal establishments have been especially active, although the present upswing has been supported by all lines of activity. Road builders, according to current information, are rushing their jobs to completion and have added greatly to their forces during the past 30 days.

Quincy.—Industrial conditions have remained practically unchanged in Quincy during October. All indications are, however, that both business and employment is much improved when compared with last year. the changes which have occurred the most significant are an increase in the changes which have occurred the most significant are an increase in building and the beginning of corn husking which is somewhat later in this community than in other sections. The volume of employment in factories shows a falling off of 2%, although no general movement is discernible in the reports of 15 Quincy manufacturers.

Rockford .- A decided improvement is noted in the reports of 53 manufacturers who have added 3.7% more names to their payrolls. factories have continued to increase both schedules and their forces, and in metal factories many large gains have been reported. The extent of unemployment as reflected by the free employment office ratio is comparable with a month ago, although conditions are much improved when a comparison is made with October 1927. There is a shortage of all kinds of skilled metal workers at the present time.

Springfield.—Employment conditions in Springfield have continued to improve. In October 1927 161 applications were received for every 100 jobs; this year only 108 people applied for every 100 jobs offered to the office. Factory employment has increased during the past month, especially in metal products factories. Builders also report improved conditions with prospects of further gain in November, if weather conditions

Sterling-Rock Falls .- A 3.9% reduction of employment has taken place in 17 Sterling-Rock Falls factories. The downward movement is due primarily to reductions in the canning industry which laid off a sufficiently large number to counterbalance an increase in the agricultural implement

### National Bank of Commerce in New York Expects Business In Fourth Quarter to Preceding Nine Months.

Under the head "The Business Outlook in Mid-November," the National Bank of Commerce in New York has the following to say under date of Nov. 22:

A gradually rising volume of business this year has culminated in a surprisingly high level of activity. New records for the month and in some cases for all months were reported in October in many different directions, such as export trade, steel production, rubber consumption, copper deliveries, cotton goods sales and building contracts awarded. A fourth quarter is now assured that will measure up in seasonal ratio to the standard of the first nine months. In point of volume of production the year 1928 promises to be the best that

Nor has the high rate of activity as yet reacted unfavorably on the longe term outlook for business. Expansion of production has been premised generally on the urgency of consumer requirements and a free movement of commodities into consumption. Speculation is notably absent from the commodity markets perhaps because of the very breadth and force of the movement on the Stock Exchange. Exception may be made in the case of copper where the insistence of customers in contracting for shipments recently assumed some of the aspects of a speculative boom.

Stocks of raw material and manufactured goods in the channels of trade have been increasing gradually in recent years in accordance with the tendency of retailers to pass back the burden of carrying them. A peak was reached last year when inventories proved somewhat burdensome in relation to the lower rate of business activity. In this respect the situation is better today as the trend of stocks has since been moderately downward.

# Bank of Montreal Reports Slight Seasonal Decline in Canada Balanced by Gains in Some Industries-Largest Navigation Season in Dominion's History

Although some seasonal decline in industrial activity in Canada is apparent, the general level of production, distribution and consumption is high, according to the Bank of Montreal. Building constrution continues active with no prospects of a decline; there is a larger mining of coal and ores; considerable construction of railway branch lines; and railways are placing substantial orders for equipment. Iron and steel production is at a high level. The bank in its business summary Nov. 22 also says:

The season of navigation now ending is expected to smooth movement of freight and passengers in the history of the Dominion. Transmovement of freight and passengers in the history of the Dominion. Transmovement of prosperity. In little movement of freight and passengers in the history of the Dominion. Transportation companies are showing a marked degree of prosperity. In little more than 7 months there will have passed in and out of the Port of Montreal over 400,000,000 bushels of grain, about 13,000,000 bushels in excess of 1927, traffic which stamps Montreal as the largest grain handling port in the world. Passenger steamships have also enjoyed increasing patronage owing to the popularity of the St. Lawrence route.

In the past month, foreign trade of Canada expanded to a value of \$254,968,000, as compared with \$199,757,000 in the same period last year. Taking the 7 months period since Mar. 31, the aggregate foreign commerce of Canada has reached the high total of \$1,524,266,000, an increase of

of Canada has reached the high total of \$1,524,266,000, an increase of \$200,068,000, or nearly 14%. The balance of trade is more favorable, exports having exceeded imports in this period by \$36,351,000.

### Canadian Merchandising Reaches Five Billions-Record Annual Retail and Wholesale Sales Average 20% over 1927 Volume, According to S. H. Logan of Canadian Bank of Commerce.

A merchandising volume of 5 billion dollars for the year, a new high record for Canada, is the estimate made by S. H. Logan, General Manager of the Canadian Bank of Commerce, in a special report on Canadian business. Retail sales are put at 31/2 billion dollars and the wholesale turnover at 1½ billions, an increase ranging from 5 to 50%

over 1927 and averaging about 20%. Mr. Logan says:
"The Bank's calculations are based upon the figures recently issued by the Dominish Bureau of Statistics as a result of a census of nearly 67,000 wholesale and retail establishments taken in 1924, the first of its kind in Canada, with allowance made for non-reporting firms and for the natural increase in trade that has taken place in both Canada and the United States during the past three years. Until a second census is taken, the growth of Canadian demestic trade cannot be accurately measured, but the information already obtained will be of great use for future comparative

"The result of similar investigations conducted for some years past by the Federal Reserve Board in the United States can meanwhile be accepted as indicating the changing character of distributive trade on this continent. In the United States the money value of wholesale trade has actually declined about 5% since 1925, owing partly to the increasing business done directly between manufacturer and retailer or ultimate consumer and partly to the reluctance of retailers to carry more stock than called for by the immediate requirements of their customers. On the other hand, the sales of department stores are nearly 10% higher than in 1924, while those of mail order houses and chain stores are nearly 45% higher, 10% of this being accounted for by the increase during the last twelve months.

"The marked expansion of building this summer and autumn has stimulated many trades, among them hardware, paints and varnishes, the iron and steel and other metal trades, lumber and furniture, and although a seatrade are favorable. Hardware, metal and furniture sales, however, continue to be well maintained, with both current and forward orders about 20% ahead of a year ago."

# Increased Building Activity in Canada.

The estimated value of the building authorized by 63 cities during October was \$21,508,672; this was an increase of \$206,387 or nearly 1% as compared with the September total of \$21,302,285,\* and of \$2,660,653, or 14.1%, over the aggregate of \$18,848,019 for October 1927. The value in the month under review was greater than in October of any other year for which statistics of these centres are available, while the cumulative total for the elapsed 10 months of 1928 exceeds by nearly \$28,000,000 that for the same months in 1927, the previous high level of this record, which was commenced in 1920.

Some 50 cities furnished detailed statistics, showing that they had issued over 1,300 permits for dwellings estimated

to cost approximately \$7,800,000 and about 3,500 permits for other buildings valued at almost \$11,700,000. During September, authority was granted for the erection of about 1,200 dwellings and 3,000 other buildings estimated to cost approximately \$6,700,000 and \$13,500,000, respectively. Nova Scotia, Quebec, Ontario, Manitoba and Saskatchewan registered increases in the value of authorized building as compared with September 1928, that of \$2,279,554, or 27.0%, in Ontario being most noteworthy.

In the more significant comparison with October 1927, there were gains in Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and Saskatchewan. In this comparison, Saskatchewan recorded the greatest gain, of \$1,414,750, or 324.2%. Toronto and Winnipeg showed improvement over both September 1928 and October 1927; in Montreal, there was a reduction in comparison with the preceding month, but an increase over the same month in 1927, while in Vancouver the total was lower than in either comparison. Of the other centres, Halifax, Sydney, Moncton, Quebec, Guelph, Niagara Falls, St. Catharines, St. Thomas, Sarnia, Sault Ste. Marie, York Townships, Windsor, Ford, Sandwich, Woodstock, Brandon, St. Boniface, Regina and Edmonton registered increases as compared with Sept. 1928, and October 1927.

The following table gives the value of the building authorized by 63 cities during October and in the first ten months of each year since 1920, as well as index numbers for the latter, based upon the total for 1920 as 100. The average index numbers of wholesale prices of building materials in the first ten months of the years since 1920 are also given (1913 equals 100).

| (1313 equals 100). |                                              |                                                 |                                                                         |                                                                                                        |

\* Revised. The aggregate for the first 10 months of this year was 17.3% greater than it 1927, the previous high level of the record, while the average index numbers of wholesale prices of building materials continued to be lower than in any other year since 1920, except 1927.

# Seasonal Lumber Decline.

Definite indications of the customary seasonal decline in the demand for softwood lumber appeared during the week ended Nov. 17, after a season in which the demand held up well. The decline in orders was slight, but it is considered to be typical of the period. Reports from 848 softwood and hardwood mills to the National Lumber Manufacturers Association for the current period gave production as 374,-692,000 feet; shipments 342,790,000 feet, and new business, 327,245,000 feet. An increase in the demand for hardwood lumber was reported. With one less mill reporting hardwood orders for the week showed a gain of approximately 10%

over the previous week.

The West Coast Lumbermen's Association reported for 233 identical mills production as 183,020,000 feet, as compared with an average weekly operating capacity for three years of 242,004,000 and an average weekly production this year of 194,188,000. The Southern Pine Association for 149 mills reported production as 68,692,072 feet, which was 13,788,741 feet under the three year average. The National The National Lumber Manufacturers Association adds:

# Unfilled Orders.

The unfilled orders of 339 Southern Pine and West Coast mills at the end of last week amounted to 868,369,064 feet, as against 884,220,787 feet for 341 mills the previous week. The 149 identical Southern Pine mills in the group showed unfilled orders of 244,764,346 feet last week, as against 253,135,765 feet for the week before. For the 190 West Coast mills the unfilled orders were 623,604,718 feet, as against 631,085,022 feet for 192 mills a week earlier

Altogether the 537 reporting softwood mills had shipments 89%, and orders 83%, of actual production. For the Southern Pine mils these percentages were respectively 109 and 97; and for the West Coast mills. 77 and 74.

Of the reporting mills, the 490 with an established normal production , and orders 70% thereof.

The following table compares the lumber movement, as reflected by the reporting mills of eight softwood and two hardwood regional associations. for the two weeks indicated:

|           | Past V                                           | Veek.                    | Preceding Week 1928. (Revised). |           |  |
|-----------|--------------------------------------------------|--------------------------|---------------------------------|-----------|--|

<sup>\*</sup> A unit is 35,000 feet of daily production capacity.

The West Coast Lumbermen's Association wires from Seattle that we business for the 190 mills reporting for the week ended Nov. 17, totaled 125,148,000 feet, of which 34,404,418 feet was for domestic cargo delivery, and 31,887,167 feet export. New business by rail amounted to delivery, and 31,887,167 feet export. New business by rail amounted to 49,541,849 feet. Shipments totaled 130,150,510 feet, of which 38,893,158 feet moved coastwise and intercoastal, and 29,434,500 feet export. Rall shipments totaled 52,508,218 feet and local deliveries 9,314,625 feet. Unshipped orders totaled 623,664,718 feet, of which domestic cargo order totaled 192,997,318 feet, foreign 289,883,880 feet, and rail trade 140,723,-

### Southern Pine Reports.

The Southern Pine Association reports from New Orleans that for 149 mills reporting, shipments were 9.41% above production, and orders were 2.78% below production and 11.14% below shipments. New business taken during the week amounted to 66,782,523 feet (previous week 61,312,-170), which the week amounted to 66,782,523 feet (previous week 61,312,-170). 179); shipments 75,153,942 (previous week 69,767,609); and production 68,692,072 feet, (previous week 69,255,902). The normal production (three-year average) of these mills is 82,480,813 feet.

The Western Pine Manufacturers Association of Portland, Ore., reports

production from 31 mills as 29,814,000 feet, as compared with a normal production for the week of 26,705,000. Thirty-five mills the previous week reported production as 34,091,000 feet. Shipments were slightly less last

week, and new business sightly larger.

The California White and Sugar Pine Manufacturers Association of San Francisco, reports production from 19 mills as 24,548,000 feet (65% of the total cut of the California pine region) as compared with a normal figure for the week of 25,952,000. Twenty-one mills the week earlier reported production as 26,459,000 feet. Shipments showed a nominal decrease last week, with new business considerably below that reported for the week

The California Redwood Association of San Francisco, reports production from 14 mills as 7,351,000 feet, compared with a normal figure of 8,285,000, and for the week before 7,573,000. Shipments were slightly larger last week, and new business slightly less.

The North Carolina Pine Association of Norfolk, Va., reports production from 78 mills as 12.245,000 feet, against a normal production for the week of 16,230,000. Eighty mills the preceding week reported production as 11,881,000 feet. Shipments and new business were about the same as that reported for the week earlier.

The Northern Pine Manufacturers Association of Minneapolis, Minn. reports production from nine milis as 6,286,000 feet, as compared with a normal figure for the week of 6,492,000, and for the previous week 7,812,000.

Shipments were less last week, and a good gain in new business

Northern Hemlock and Hardwood Manufacturers Association of Oshkosh, Wis. (in its softwood production) reports production from 47 mills as 4,061.000 feet, as compared with a normal production for the week of 20,214,000. Forty-six mills the week earlier reported production as 4,578.000 feet. There was some falling off in shipments last week, but new s continued about the same.

### Hardwood Reports.

The Northern Hemlock and Hardwood Manufacturers Association of Oshkosh, Wis., reports production from 69 units as 7,595,000 feet, as compared with a normal figure for the week of 14,569,000. Sixty-seven units the preceding week reported production as 6,404,000 feet. Shipments were about the same last week, with new business slightly larger.

The Hardwood Manufacturers Institute of Memphis, Tenn., reports production from 311 units as 45,926,000 feet, as against a normal production for the week of 55,879,000. Three hundred and fourteen units the week before reported production as 47,212,000 feet. Shipments were slightly less last week, and new business slightly larger.

Detailed softwood and hardwood statistics for reporting mills of the LUMBER MOVEMENT FOR 46 WEEKS, FOR WEEK ENDING, NOV. 17 1928.

comparably reporting regional associations follow:

# New Orleans World's Great Mahogany Center.

The November issue of the Hibernia Bank & Trust Co. of New Orleans "Foreign News and Comments" contains an article on the mahogany industry which indicates that New Orleans is one of the world's three greatest ports handling this expensive wood. The article states:

New Orleans receives by far the greater part of the mahogany produced in Mexico, Guatemala, Honduras, Nicaragua, and Costa Rica together with a substantial amount of that logged in Cuba. The Central American and Mexican mahogany is of a most superior quality and commands almost the highest price in the world's market—the impo through New Orleans vary somewhat, but average about 25 million board feet per annum.

The method of cutting the logs, floating them to the sea, shipping, unloading and sawing them and the final seasoning of the finished boards is dealt with in detail in the article. "Foreign News and Comments" also contains reports on the damage done by the storm in Porto Rico as also upon business conditions in Guatemala and Cuba. Porto Rico, with most of her crops destroyed by the recent hurricane, is making a valiant struggle to avert a financial crisis and has favorable chances for success. Guatemalan business conditions are very satisfactory and the country is enjoying a period of unusual prosperity. With the improvement of the sugar situation Cuban business has undergone a decided change for the better.

### Automotive Parts-Accessory Industry Closing Greatest Year-October and November Business at High Levels.

The automotive parts and accessory business is enjoying the greatest fourth quarter the industry has ever had and will close 1928 with new high records in production and sales, according to the Motor and Accessory Manufacturers Association. In October, suppliers of original equipment to the motor vehicle makers, and replacement parts and garage equipment to the trade, did virtually the same heavy volume of business that they had in September and during the first half of this month maintained operations only a The Association further little below the October level. announces:

The grand index of shipments to the car and truck manufacturers and the wholesale trade by a large and representative group of M. & A. M. A. members in October was 188% of the January 1925, figure, compared with 202% in September, 212% in August and 129% in October a year ago. Since last March, when the index for all divisions first reached 200% operations have not declined below an index figure of 187% for any month.

Business of original equipment makers in October was 200% of January 1925, as compared with 218% in September, 230% in August and 124%in October a year ago. In only the first two months of this year has the index of this group been below 200.

October shipments to the wholesale trade last month by manufacturers of service parts were at an idex of 184, as compared with 185 in September, 176 in August and 174 in October a year ago. The September figure was the highest on record for the service parts manufacturers.

Shipments of makers of service equipments, that is, garage machinery and tools, last month exceeded September, the index standing at 141 as compared with 140 in September and 120 in October a year ago.

Accessory sales to the wholesale trade in October were 91, as compared

with 122 in September, 147 in August and 103 in October last year. Schedules of original equipment makers indicate largely expanded car

production for the early part of 1929.

### Automobile Production Continues Large.

October production (factory sales) of motor vehicles in the United States, as reported to the Department of Commerce, was 398,818 of which 341,705 were passenger cars and 57,113 were trucks, as compared with 415,283 passenger cars and trucks in Sept. and 219,682 in Oct. 1927. The table below is based on figures received from 156 manufacturers in the United States for recent months, 47 making passenger cars and 123 making trucks (14 making both passenger cars and trucks). Figures for passenger cars include taxicabs and those for trucks include ambulances, funeral cars, fire apparatus, street sweepers and busses. Canadian figures supplied by the Dominion Bureau of Statistics.

# Shipments of Rubber Tires in September Exceed Production-Inventory Lower.

According to statistics compiled by the Rubber Association of America, Inc., from figures estimated to represent 75% of the industry, 5,101,187 pneumatic casings—balloons,

cords and fabrics-42,619 solid and cushion tires were produced during the month of September 1928, as compared with 5,601,856 pneumatic easings and 51,679 solid and cushion tires in the month of August, when a new high record was made for all time. Output in September 1927 totaled 3,616,390 pneumatic casings and 35,654 solid and cushion tires.

Shipments during September last amounted to 5,358,728 pneumatic casings and 43,965 solid and cushion tires as against 4,287,655 pneumatic casings and 45,881 solid and cushion tires in the corresponding period last year and 6,302,258 pneumatic easings and 52,334 solid and cushion tires in August 1928.

Inventory of pneumatic casings at Sept. 30 1928 totaled 7,323,645 as against 7,514,290 at Aug. 31, last, and 7,291,294 at Sept. 30 1927.

Inventory of both balloon and high pressure innertubes at Sept. 30 1928 amounted to 10,157,593, as compared with 10,448,085 at Aug. 31 1928 and 10,133,407 at Sept.

The total output for the 9 months ended Sept 30 1928 was 44,203,299 pneumatic casings and 394,122 solid and cushion tires, as compared with 37,997,200 pneumatic casings and 460,700 solid and cushion tires in the corresponding period in 1927, while shipments amounted to 44,242,479 pneumatic casings and 399,732 solid and cushion tires as against 38,100,254 pneumatic casings and 449,345 solid and cushion tires for the first 9 months of 1927.

The Association in its bulletin, dated Nov. 14, gave the following statistics:

| Month of Soutember                                | 192                                 | 28.                                 | 1927.                               |                                       |  |

### 197 New Agricultural Extension Workers Appointed Under Capper-Ketcham Act.

During the first four months in which funds under the new Capper-Ketcham Act have been available, 197 new extension workers in agriculture and home economics have been appointed in the 39 States reporting to date, according to an announcement Nov. 16 by C. W. Warburton, Director of Extension, United States Department of Agriculture. The announcement adds:

Thirty-four of these new workers are county agricultural agents in new counties, 43 are assistant county agricultural agents, two are negro county agents, 62 are county home demonstration agents, nine assistants, six negro home agents, 22 men county club agents, 18 women county club agents, and one a State girls' club agent.

The Capper-Ketcham Act, passed at the last session of Congress, provided \$20,000 for each State and Territory of Hawaii, available July 1 1928, for immediate use. It also authorizes a similar sum and an additional \$500,000 appropriation to be divided among the States and the Territory of Hawaii each fiscal year following, to be in addition to the extension funds available under the Smith-Lever Co-operative Extension Act of May 8 1914. In both Acts the additional funds provided are to be allotted to the States and Hawaii Territory in the proportion which the rural population of each bears to the total rural population of the United States, provided that each makes a like amount available from State or other sources to be used for the same purposes as the Federal funds.

At the time the Capper-Ketcham Act was passed a staff of approximately 5,000 technically trained men and women, including county workers, specialists, and administrative workers, were engaged in co-operative extension work. The extension system as contemplated, that is, with a man and a woman agent in each agricultural county, was about half completed, with the agricultural work much in advance of other phases. With the provision in the Capper-Ketcham Act that 80% of the money appropriated shall be used for the payment of salaries of extension agents in counties and that these agents shall be men and women "in fair and just proportions," it was felt that work with farm boys and girls and farm women would be greatly stimulated, a hope which is apparently to be realized.

"Marked progress will unquestionably be made," states Director Warburton, "toward rendering the information of the State agricultural colleges and the department available to every farm man, woman, boy and girl who may desire it."

### Federal Survey Finds Improvement in Farm Real Estate Situation—Survey Based on Reports by Co-Operating Farmers and Farm Real Estate Dealers.

Improvement in the farm real estate situation is noted by the Bureau of Agricultural Economics of the United States Department of Agriculture in its third annual survey of the farm-lands market covering the period March 1 1927 to March 1 1928. The survey is based largely upon reports made by co-operating farmers and farm real estate dealers throughout the country. The Department of Agriculture made known as follows on Nov. 15 the results of the survey.

During the period under review, farm real estate values averaged for the United States as a whole, showed the smallest decline recorded in any single year since the drastic postwar deflation set in. Values of improved farm land per acre declined but 2% on the average during 1927 and early 1928, as compared with a decline of twice that figure registered between March 1 1926, and March 1 1927. As of March 1 1928, the national average value per acre was 17% above the pre-war level, according to the survey, compared with a figure of 19% above pre-war reached on March 1 1927, and a peak of 70% above recorded on the same date in 1920. Averaged for the entire country, the current figure of 17% above pre-war represents approximately the same level of values as prevailed in 1917.

The major declines in values continued to be felt in the same regions in which the heaviest losses appear to have been centered in recent years, principally the Corn and Cotton Belts. However, in both of these, the decreases shown for the year ended March 1 1928, were smaller than those registered during the corresponding preceding period from March 1 1926 to March 1 1927. In some Southern States, the Bureau observes, values hardened materially. Equally encouraging results were reported from Montana and the two Dakotas where values for the first time in many years exhibited a tendency toward comparative firmness. Although continuing their decline of the last seven years, Iowa values showed the smallest decrease recorded since the war-time peak was reached, and in all of the Midwestern States without exception, values showed smaller losses for the year ended March 1 1928, than for the corresponding period ended March 1 1927. The Bureau makes no forecast as to whether or not the "bottom" has been reached in mid-western farm-land values.

Farm real estate values in the New England and Middle Atlantic States, according to the Bureau, showed very little change. Pacific coast values declined very little on the average. In both of these sections values taken generally have been relatively stable during the last three years, although occasional slight declines took place. A third section in which the downward trend of values was apparently halted includes the eight States of the West ordinarily designated as the Mountain group. In this division, the survey indicated values to be exhibiting a trend now reasonably stable.

survey indicated values to be exhibiting a trend now reasonably stable. Data on foreclosures and related losses of title through default averaged for the country as a whole indicated a slight decline to have taken place during the year ended March 15 1928. From a rate of 23.3 farms per thousand recorded in the 12 month period ended March 15 1927, the volume of "forced" transactions dropped to 22.8 farms per thousand. Notable decreases were shown in the Mountain States, particularly in Montana and in the Dakotas, where the loss rates in recent years have been the highest in the country having reached figures of 5 and 6% of all farms in the latter three States. Most of the New England States likewise have shown a moderate decline in the forced sale classification during the last three survey periods, the Bureau finds. Frequent increases, however, took place in the remaining States during the 1927-28 survey period, the marked decreases in the highest loss-rate States having been offset by a larger number of small increases elsewhere.

Voluntary sales, the report states, decreased. The downward drift was rather general. Outstanding exceptions to the trend were found in Montana, Wyoming and the two Dakotas. Buyers in such sales were mostly local active farmers buying for personal or family operation.

The farm tax burden continues to be a heavy charge upon land ownership, taxes on farm real estate having risen still further during 1927 to reach a figure 158% higher than before the war. The 1926 farm tax level is estimated by the Bureau to have been 153% above pre-war and the 1925 level 150% above. Although the recent trend does not show the sharp upward rate characteristic of the years immediately following the close of the war, the continuing recent increases are not reassuring to owners of American farm property, and immediate relief may be difficult to obtain.

A review of the credit situation as it affects farm real estate presents contrasting aspects, the Bureau finds. First mortgage money on the whole continued in good supply with interest rates generally favorable. Terms offered by owners to move farms in the present market were frequently found to be attractive. On the other hand the recent tightening in the money markets, according to the report, may be reflected in slightly higher farm mortgage interest rates later. A tendency for the major sources of farm mortgage credit other than former-owners to place their money with greater scrutiny of risks than formerly was in frequent evidence.

On the whole, the report concludes, the farm lands market continued to be comparatively inactive during the year with buyers few and cautious although here and there a fair degree of local activity was shown. The complete report of the Bureau's survey will be given in a printed pamphlet aow in press.

FARM REAL ESTATE—AVERAGE VALUE PER ACRE AS OF MARCH 1 1928, 1926 AND 1920 IN PERCENTAGE OF THE PRE-WAR AVERAGE (Average value in 1912-1914—100%.)

### President Miller of New York Cotton Exchange Says Adoption of Amendments Looking to Control Committee, Southern Deliveries, &c., Is a Most Constructive Step.

Gardiner H. Miller, President of the New York Cotton Exchange, declared on Nov. 16 that the action of the membership in voting on that date for Southern deliveries, limitation of interest in contracts and a control committee was one of the most constructive steps ever taken by the exchange. Of 306 ballots cast, 260 were in favor of the amendments, 45 against and one ballot void. Mr. Miller's statement follows:

"For many years the question of Southern deliveries on New York contracts has been agitated and in recent years the demand, both within and without the exchange, has been insistent that something should be done to check abnormal parities between markets and between various months in the New York market, but heretofore members of the Exchange were unable to agree upon any plan of action, with the result that the proposals which were presented to the membership were invariably defeated

"The report of the special Committee of Fifteen of which John H. McFadden, Jr., is Chairman, presented a plan, however, which eliminated most of the objections raised to the plans for Southern deliveries which had previously been submitted to the members, chief of which was the elimination altogether of New York as a delivery point. The plan adopted to-day by the vote of the membership retains New York as a delivery point without discrimination either for or against such deliveries; it also permits deliveries at five Southern points at the same differential—35 points, or 35/100ths cents per pound—which is the uniform freight rate from each of the five Southern delivery points to the New York market.

"It is believed that the changes adopted by the New York Cotton Exchange will afford a broader, safer market for hedging purposes and that with the fear of manipulation removed, the business of the exchange will undoubtedly increase. The step is a progressive one and in line with the modern tendency to eliminate unnecessary expense in the handling of merchandise, particularly in the marketing of such a great staple commedity as cotton."

The action of the members of the Exchange in voting overwhelmingly in favor of limitation of interest in contracts, a control committee with broad supervisory powers and for Southern deliveries at five points in addition to the present delivery at New York, was noted in these columns Nov. 17, page 2750. The three amendments, which become part of the by-laws and rules as a result of the vote, are regarded as one of the most important and far-reaching steps ever taken by the exchange. The amendment in regard to limitation says in part:

"The interest in futures contracts for delivery in any one month of any individual, firm or corporation, and his or its affiliations shall not exceed the limit prescribed by the Board of Managers, but this limit shall not apply to an interest in any one month wholly composed of hedges against the purchase or sale of spot or cash cotton.

"When in the judgment of the Board of Managers the hedging transactions of any individual, firm or corporation and his or its affiliations are of such volume as to unduly affect or endanger the normal parities between months or markets, or for any other valid reason, the Board of Managers may prescribe a limit in respect to the interest in futures contracts which shall include such hedging transactions."

The Control Committee is to be composed of three members of the exchange appointed annually by the Board of Managers, but not members of the board. The committee has power to direct the Treasurer of the Clearing Associa-

tion to require each carrying member to report the names and interests in any designated position of all clients, as well as his own position, &c. The identity of clearing members is guarded by the use of symbols, instead of names, in the report to the Control Committee. When an interest is found in excess of the limit fixed, however, the name of the member holding such interest is disclosed to the committee. The amendment says in part:

"The Committee shall further have the power to summon any member of the Exchange, together with any records, for the purpose of investigation and if they should find an undue congestion in any one position not in violation of the By-Laws or Rules of the New York Cotton Exchange, they shall endeavor to bring about a correction thereof, failing which they shall report the situation to the Board of Managers.

"In the event of an interest under investigation being found to have violated the By-Laws or Rules o fthe Exchange, the Committee shall so report to the Board of Managers whose decision in the case shall be final, after giving the interest and/or interests under investigation an opportunity to be heard.

The adoption of Southern deliveries by the exchange necessitates a new contract, making deliveries permissible at seller's option at New York, Norfolk, Charleston, Galveston, Houston or New Orleans. The Board of Managers is to determine when the new contract shall become operative. Precautions have been taken to safeguard trading and prevent possible artificial influencing of prices through misuse of the six delivery points the exchange will have under the new contract. The amendments add the following clauses to "acts detrimental to the best interests of the exchange."

to ship cotton to any contract delivery point of the Exchange

". . . to ship cotton to any contract delivery point of the Exchange at an obvious loss for the purpose of artificially influencing prices.

". . . to ship cotton from one designated delivery point of the Exchange to another designated delivery point of the Exchange for the purpose of artificially influencing prices.

". . . to ship cotton to one designated New York contract delivery point at a loss as compared to delivering at some other designated New

point at a loss as compared to delivering at some other designated New York contract delivery point for the purpose of artificially influencing

for any member to refuse or neglect to liquidate holdings of a client that are in excess of the permitted limit, when so ordered by the Control Committee and/or the Board of Managers."

# Activity in the Cotton Spinning Industry for October

The Department of Commerce announced on Nov. 19 that, according to preliminary figures compiled by the Bureau of the Census, 35,413,000 cotton spinning spindles were in place in the United States on Oct. 31 1928, of which 30,315,086 were operated at some time during the month, compared with 28,227,090 for September, 28,243,508 for August, 28,159,676 for July, 28,627,556 for June, 28,-948,144 for May, and 32,535,200 for October 1927.

The aggregate number of active spindle hours reported for the month was 8,694,172,114. During October the normal time of operation was 263/4 days (allowance being made for observance of Columbus Day in some localities) compared with 241/2 for September, 27 for August, 25 for July, 26 for June, and 261/2 for May. Based on an activity of 8.83 hours per day, the average number of spindles operated during October was 36,808,129, or at 103.9% capacity on a single-shift basis. This percentage compares with 90.6 for September, 87.7 for August, 79.7 for July, 88.4 for June, 95.1 for May, and 105.0 for October 1927. The average number of active spindle hours per spindle in place for the month was 246.

The total number of cotton spinning spindles in place, the number active, the number of active spindle hours and the average spindle hours per spindle in place, by States, are shown in the following statement:

| State.                | Spinning             | Spindles.               | Active Spindle H | indle Hours for October.         |  |  |

# The Outlook for the Crops on the 1st of November Report of the Department of Agriculture.

The Crop Reporting Board of the United States Department of Agriculture made public on Nov. 9 its forecasts and estimates of grain crops of the United States as of Nov. 1, based on reports and data furnished by crop correspondents, field statisticians and co-operating State Boards (or Departments) of Agriculture. The production of corn is placed at 2,895,449,000 bushels, which is somewhat less than the Department's estimate of 2,903,000,000 bushels a month earlier. The production of corn in 1927 was 2,773,708,000 bushels and the five-year average is 2,775,634,000 bushels. The production of white potatoes is now placed at 465,651,000 bushels, which compares with the Department's estimate of 464,000,000 bushels a month ago and a yield of 406,964,000 bushels in 1927. We give below the report.

Little change in crop prospects occurred during October. warm weather facilitated the harvesting of late crops, but frosts came a little earlier than usual in much of the central and western corn belt. In most other sections damage from frost and freezing has been less serious than usual. Rice, potatoes, sweet potatoes, cotton, beans, peanuts, sugar beets, apples, pears, oranges, grapefruit, and grapes are all showing yields slightly above expectations. The yield of flaxseed, however, was about 10% below that expected a month ago and the estimates of corn, tobacco and buckwheat have each been reduced less than 1%.

Combining all crops, yields per acre have been 3.4% above average elds during the past 10 years. This favorable showing is chiefly the reyields during the past 10 years. yields during the past 10 years. This lavorable showing is chief table to sult of favorable weather conditions, although in the case of corn, potatoes, hay and some other crops, the larger yields are particularly the result of the increasing use of better varieties and better cultural methods.

### Corn.

The November estimate of corn production in the United States is 2,895,-000,000 bushels, or 1/4 of 1% below the October forecast. in the Southern States were more than offset by small decreases in Iowa, In the Southern States were more than offset by small decreases in lowa, Missouri, and Minnesota. Wind and rain damaged corn in parts of Iowa during the second week of October, and some frost damage is reported from other areas. Otherwise, the month of October has been generally favorable to the drying out and harvesting of the corn crop. An average yield per acre of 28.3 bushels is reported this year. The ent estimate of corn production is above the 1927 crop by about 122,-000,000 bushels, or 4.4%

The percentage of corn that is of merchantable quality this year is reported as 82.9% as compared with 75.2 a year ago and 80.7%, the tenyear average.

Farm stocks of old corn on Nov. 1, estimated at about 54,000,000 bushels. are less than half as great as the 113,000,000 bushels estimated on the

Combining this year's production and farm carryover from last year's crop, the farm supply of corn this season is 2,949,000,000 bushels, as compared with 2.887,000,000 bushels a year ago, or an increase of about 2%.

While the farm supply of corn is only 2% above a year ago, the quality of this year's crop, especially in the Corn Belt States, is far better than a year ago. The distribution or location of this year's crop is materially different than for the 1927 crop, as there is an increase in production of 36% in the Corn Belt States east of the Mississippi River, but a decrease of about 14% in the South.

Buckwheat will not be as plentiful this year as it was in 1927. An unusually large acreage was sown but the yield of 17.5 bushels per acre was 2 bushels below that of last year, and lower than in any year 1918. As a result, total production amounts only to 14,664,000 bushels. In 1927 a large crop of 16,029,000 bushels was harvested, but the average for the past five years has been only 13,711,000 bushels. this year is somewhat lower than usual.

The production of flaxseed, while about the same as the average for the past five years, is considerably below last year's harvest. is estimated at 20,026,000 bushels, compared with 26,570,000 bushels in 1927. The decrease is due not only to a somewhat smaller acreage, but to a smaller yield per acre. The average yield is reported as 7.1 bushels per acre compared with 9.1 bushels last year and a ten-year average of 7.1 bushels. The quality is lower this year, 86.5% compared with 89.3% last year, and 89.7% the ten-year average.

The rice crop of the five producing States is estimated at 40,422,000 Last year these States produced 44,339,060 bushels, while the average for the past five years is 36.302.000 bushels. The acreage this year is less than that of 1927 by 44,000 acres, or nearly 4.4 %. The yield this year is reported as 41.9 bushels per acre, and while that is 3.7 bushels higher than the 10-year average, it is 2.1 bushels per acre lower than that of 1927. Quality is good, 91.4% compared with 89.8% last year. The average yield per acre and the quality of rice in California this year are the best experienced in a number of years.

# Potatoes.

With the acreage of potatoes largely increased in nearly all important States as a result of encouraging prices for three years, and with the yield per acre the second aighest on record, there appears to be a large supply of potatoes in all parts of the country. The total production of early and late potatoes combined is estimated at 465,651,000 bushels, compared with 406,964,000 bushels harvested last season. The estimate for this season includes some potatoes that may not be harvested and a considerable quantity of second grade potatoes that will not be marketed.

# Sweet Potatoes.

Sweet potatoes, which were unprofitable in 1927, show a total production 81,340,000 bushels. This is 12,588,000 bushels, or nearly 14 the excessively large crop of 1927, but slightly larger than the five-year The acreage was considerably reduced because of unsatisfactory average. prices for last year's crop, but the yield per acre this year is less, bein estimated at 95 bushels compared with about 101 bushels in 1927, and 94 the average during the previous 10 years. The wet weather on the Atlantic Coast and the drought in parts of Texas which reduced the yield, also resulted in a rather low average quality.

# Tobacco.

Tobacco production, responding to the generally favorable prices of 1927, shows an increase of 11.1%. The reported yields indicate a crop of

1.346,566,000 pounds, compared with 1,211,301,000 pounds a year ago, and 1,337,561,000 pounds, the five-year average. The average yield per acre this year is lower than usual, about 728 pounds compared with 768 pounds in 1927 and 785 pounds, the average of the previous 10 years, but acreage is much greater this year. It is estimated that 1,850,000 acres were harvested this year compared with only 1,577,000 acres in 1927 and 1,738,-000 acres, the five-year average. All important types except bright flue-cured and Virginia dark-fired show increased production over last year. The quality of the crop for the country as a whole is the lowest for many years, 74.4% compared with 80.5% a year ago, and 80.6% the 10-year average. A special report on tobacco will be released.

Dry edible beans are estimated to produce 17,056,000 bushels this year, compared with 16,891,000 bushels in 1927. The increase results from increased acreage: the average yield per acre showing but little change, 10.2 bushels per acre this year, compared with 10.4 last year, and 11 bushels, the 10-year average.

The preliminary estimate of production of white pea beans grown mainly The preliminary estimate of production of white pea beans grown mainly in Michigan and New York, is about 5,550,000 bushels compared with the relatively short crop of 4,800,000 bushels last year. Large white beans in the same States are about 440,000 compared with 380,000 last year. Production of the Great Northern is about 1,800,000 compared with 2,500,000 and the Red Kidney about 1,200,000 compared with the relatively short production of 866,000 last year. The Red Mexican has increased about a third owing to a big increase in Idaho, without known change in California Plates are about 3,000,000 compared with the relatively change in the compared with the relatively short production. California. Pintos are about 2,300,000 or 250,000 less than last ye Limas are about the same as last year, large limas being less and baby limas more. As Blackeyes decreased somewhat in California, and Pintos increased, and limas made little change, the other beans grown in that State, including the small whites, pinks, cranberry and Bayo are all combined, about the same as last year. About 93% of the total crop is reported as merchantable. The pick is 5.5 pounds in Michigan and New York, and slightly greater elsewhere.

November reports on fruits do not materially change earlier estimates of The apple crop suffered somewhat from storms from the production. Ozarks north, but the Eastern States had an unusually favorable fall, and the total crop is estimated at 1\$3,309,000 bushels. This is an increase of about 3% over the indication a month ago, but indicates only about an average crop.

### Grain Sorghums.

Grain sorghum yields have far surpassed expectations in the entire southern plains region, especially in Texas and New Mexico. The equivalent production for all purposes and not merely of that harvested for the grain, is about 150,000,000 bushels compared with 138,000,000 last season.

Combining the production estimates of the 17 principal crops in proportion to 10-year average value per unit, the composite production of these crops this season was 4.8% greater than last year and 7.6% greater than the average production in the 10 years, 1918-1927.

By the same method of calculation the per capita production of the principal crops of the United States this season was 3.6% greater than it was last year, and 0.5% lower than the average per capita production during the last 10 years.

### Crop Report as of Nov. 1 1928.

The Crop Reporting Board of the United States Department of Agriculture makes the following estimates for the United States, from reports and data furnished by crop correspondents, field statisticians, and co-operating State Boards (or Departments) of Agriculture and Agricultural Colleges:

|                       | Acres Ha                    | rvested in | Thousands.        |                                         | Quality.          |                  |

a Short time average. b Production is the total for fresh fruit, juice and raisinsproduction shown for 1927 and earlier years excludes grapes not harvested. c Condition Nov. 1. d Commercial movement by rail and boat.

The amount of Corn remaining on farms in the United States on Nov. 1
1928 is estimated at 1.94% of the crop of 1927, or about 53,939,000 bushels,
as compared with 113,412,000 bushels on Nov. 1 1927 and 120,967,000
bushels, the average of stocks of corn on Nov. 1 for the five years 1922-26.

Approved:

R. W. Dunlap,

Acting Secretary.

C. F. Sarle,

G. S. Ray.

Days Of the corn of the five years 1922-26.

C. F. Sarle,

G. S. Ray.

# Mid-Year Report of Silk Association of America, Inc. Reviews Statistical Position of Silk Industry in United States, Japan, China, &c.

The statistical position of the silk industry in the United States, the consumption of raw silk, the manufacture of broad silk, hosiery, ribbon and velvet, the value of United States silk products, the number of establishments employed in silk manufacture and their distribution by States, employees, wages, the amount of silk consumed in the knit goods industry and other equally interesting statistics on the silk industry in this country are contained in the Twenty-Ninth Mid-Year Report of the Silk Association of America, Inc., which was issued Nov. 17. A statement indice. ing the contents of the report says:

The United States, the report shows, is the largest silk consuming country in the world, and raw silk is the chief import of the United States. Though the major part of the consumption is in the ready to wear industries for use in the manufacture of silk dresses, silk underwear and silk hosiery, silk is also used in the interior decoration of homes, by industry, and by the United States Government for stitching army and

navy uniforms, for parachute fabrics, and other uses.

To supply the needs of the American public, the report states, the silk manufacturer has shown himself capable, during the past year, of putting on the market silks of such beautiful styling as to be equal to the finest fabrics produced abroad and the American woman has been able to obtain fabrics produced abroad and the American woman has been able to obtain better values in silk fabrics and better styling than ever before. Conditions in the broad silk industry point to a good winter and spring season. Consumption has fairly well paralleled production this year and overproduction, while apparent in competitive lines, is not considered so great as last year. In the merchandising and distribution of silks, some changes are noticeable. Hand to mouth buying has become more and more the policy of the retail trade. Buyers are less willing to commit themselves to the laying in of stocks at seasons of the year too early for rapid turnover or before fashion developments and, as a result, silk manufacturers have been obliged to keep on hand fairly large stocks to meet hurried orders.

Other divisions of the industry report an optimistic outlook for the

Other divisions of the industry report an optimistic outlook for the winter and spring seasons. Ribbon manufacturers anticipate an increase in demand for ribbons in the coming spring. Fashion has favored the velvet manufacturer with what is termed as an unprecedented demand for velvets. Increasing interest is being shown in fabrics made of spun silk. Consumption of silk knit goods—hosiery and underwear—has in-

creased during the past year.

Statistics of raw silk production in Japan and China, the two chief sources of supply, have an important place in the report. Production, export and consumption figures have been compiled, and a tabulation made of New York market prices. Statistics on cocoon production have also been included in the report as well as statistics on waste silk, a by-product of raw silk.

World and United States production of rayon and rayon imports into the United States have also been charted and rayon prices on the New York market tabulated.

### Paper Men Agree on Price Schedule to Save Industry-Canadian Government Officials Approve Stabilization Plan-Terms Not Disclosed.

The following is from the "Post" of last night (Nov 23): Newsprint manufacturers have reached an agreement on prices for paper in conference with Canadian Government officials, which is expected to lead to stabilization of that industry, according to advices received today from Montreai.

The terms of the compromise were not made public. The manufacturers met to-day with the Prime Ministers of Ontario and Quebec and the Ministers of the Crown Lands of the two Provinces. Later the following state

ment was issued:

The whole paper situation was renewed and discussed and the Ministers were informed that the manufacturers, after a week of conferences had come to a satisfactory agreement leading to stabilization of the industry, the terms of which were submitted. try, the terms of which were submitted.

"The Ministers agreed that stabilization of the industry over a period of

years was a matter of national importance and felt that the present arrangement would bring this about. Further conferences will follow to work out the necessary details.

It is understood that co-operation among Canadian newsprint men closer than at any time in the past.

Slashing of prices for paper due to overproduction in Canada had led to chaos in that industry in the Dominion, prices being cut to a point where it was contended that many of the companies would operate at a loss.

# September Figures Show Falling Off in Paper Production as Compared with Same Month Last Year.

For the first time this year the total production of paper has fallen below the level of the corresponding month last year, according to identical mill reports to the American Paper & Pulp Association. The total production of paper in September was 549,287 tons as compared with 609,421 tons in August and 532,634 tons in July. The nine months' total was 5,197,631 tons as compared with 5,093,410 tons production for the same period in 1927. Shipments during the first nine months of 1928 totaled 5,161,163 tons as compared with 5,054,323 tons in the same period in 1927. Stocks on hand at the end of September totaled 279,003 tons as compared with 261,136 tons at the end of September 1927. In its further advices the association, under date of Nov. 16, says:

The total pulp production, according to identical mill reports for September, was 184 173 tons, as compared with 199,544 tons in August and 186.615 tons in July. Production was at the rate of about 76% of

The nine months' total production of pulp was 1.860,601 tons, as compared with 1.891,317 tons produced during the same period in 1927, a decrease of about 2%. Stocks on hand at the end of September 1928 totaled 111,879 tons, as compared with 135,546 tons at the end of September 1928 totaled 111,879 tons, as compared with 135,546 tons at the end of September 1928 tember 1927.

### Petroleum and Its Products-Pecos County To Continue Pro-Rating Output.

There were no changes in crude oil quotations this week. Light oil remains in strong position, and Mid-Continent refiners are still paying a premium of 10 cents a barrel on high gravity oil in many instances. Large integrated companies are storing surplus production of light crude rather than sell at present posted prices. Expectation of a sharp increase in high gravity crude output in the Seminole area, as a result of the heavy drilling campaign in the Mission pool, may militate against an increase in posted prices, although new production from the Mission area will not attain large volume until the first quarter of 1929.

Operators in Pecos County are planning to extend their pro-rating agreement for six months, upon expiration of the present agreement Jan. 1. A test run in the Yates pool, Pecos County, early this week disclosed a potential rating of 4,208,455 barrels daily, as compared with the present production of about 72,500 barrels a day for the field under

the conservation arrangement.

Continued favorable developments in the Elwood Terrace field in California are reported this week, and it is evident that considerable new production of light oil is in sight from this field. Barnsdall Corp. and Rio Grande Oil Co. are the

largest operators in the field.

Reports of the coming visit to this country of Sir John Cadman, of Anglo-Persian Oil Co., Ltd., have revived interest in the question of South American curtailment. Sir John Cadman is closely identified with the Royal Dutch-Shell interests. He will address the American Petroleum Institute at its annual meeting in Chicago in December, and is expected to bring the American petroleum industry a plan for better stabilization of the world oil position through cooperation of Anglo-American oil interests. It is considered possible that the visit here of Sir John may result in something in the nature of a working agreement between the Royal Dutch-Shell interests and American oil companies, not only with respect to South American curtailment, but with regard to world marketing operations as well. Organization of an American oil export combine under the provisions of the Webb-Pomerene Act, now in progress, will enable the American industry, as a unit, to function more economically in foreign markets, and it is quite possible that this body will co-operate more or less closely with the European combine represented through Royal Dutch-Shell.

REFINERY PRODUCTS—CONTINUED WEAKNESS IN GASOLINE.

While no pronounced declines developed, there has been a generally easy tone in the gasoline market throughout the Refiners in the Mid-Continen ing prices fractionally lower, and while the larger interests were making some pretense of holding the market at 91/4c. per gallon for U.S. Motor, independent refiners were selling as low as 81/2c. and 83/4c. appeared to be the average going price. The tank car market in the East is unchanged, but barely holding its own at 11c. a gallon. Export inquiry has fallen off, but prices are unchanged. A number of tankwagon and service station price reductions were made in the East.

Gasoline sales in the 46 States having gasoline tax laws, and the District of Columbia, amounted to 4,652,393,575 gallons during the first six months of 1928, an increase of 680,970,224 over the corresponding period last year, according to data released by the Department of Agriculture this week. Refiners were greatly interested in October automobile production figures, showing output of 398,818 units in the United States for the month, against 415,283 in the previous month, and 219,682 in October last year.

There were no important changes this week in refined products, other than gasoline. Lubricating oil prices are higher, Pennsylvania refiners advancing their quotations in line with higher production costs due to the recent increase in crude. Fuel oil is steady to firm, with kerosene showing a softer tone and lower prices for the near future indicated on this product. Refiners in the East are getting a continued heavy volume of furnace oil business, and this has tended to aid the position of fuel oil. A chronological summary of the week's price changes follows:

Nov. 17.—Atlantic Refining Co. and Gulf Refining Co. reduced gasoline service station prices 2c. per gallon in New England to 18c. a gallon. Nov. 17.—Jenney Manufacturing Co. reduced service station gasoline

Nov. 17.—Jenney Manufacturing Co. reduced service station gasoline prices 1c. per gallon to 19c. in Boston.

Nov. 20.—United States Motor gasoline ½c. lower at 8%c. per gallon

Nov. 20.—United States Motor gasoline %c. lower at 8%c. per gallon at Chicago.

Nov. 21.—Standard Oil Co. of New Jersey and American Oil Co. reduced

service station gasoline 1c. per gallon to 21c. in Washington, D. C.
Nov. 22.—Pennsylvania refiners advanced fuel oil prices 1/2 c. per gallon.

### 

# Crude Oil Output in United States Lower.

The American Petroleum Institute estimates that the daily average gross crude oil production in the United States for the week ended Nov. 17 1928, was 2,490,850 barrels as compared with 2,497,000 barrels for the preceding week, a decrease of 6,150 barrels. Compared with the output of 2,466,950 barrels per day for the week ended Nov. 19 1927, the current figure shows an increase of 23,900 barrels daily. The daily average production east of California for the week ended Nov. 17 1928, was 1,847,350 barrels, as compared with 1,858,000 barrels the previous week, a decrease of 10,650 barrels. The following are estimates of daily average gross production (in barrels) by districts for the periods shown below:

# Gross Crude Oil Stock Changes for October, 1928.

Pipe line and tank farm gross domestic crude oil stocks east of the Rocky Mountains increased 709,000 barrels in the month of October, according to returns compiled by the American Petroleum Institute from reports made to it by representative companies. The net change shown by the reporting companies accounts for the increases and decreases in general crude oil stocks, including crude oil in transit, but not producers' stocks at the wells.

# Changes in Stocks at Refineries East of California for October, 1928.

The following is the American Petroleum Institute's summary for the month of October of the increases and decreases in stocks at refineries covering approximately 88% of the operating capacity east of California.

| (Barrels of 42 Gallons.)— | Increase. | Decrease. |
|---------------------------|-----------|-----------|
| Domestic crude oil        |           | 380,000   |
| Foreign crude oil         |           | 343,000   |
| Gasoline                  | 816,000   |           |
| Kerosene                  |           | 269,000   |
| Gas and fuel oils         |           | 1,671,000 |
| Lubricants                | 62,000    |           |
| Miscellaneous             |           | 665,000   |
| Total                     | 878,000   | 3,328,000 |
| Deduct                    |           | 878,000   |
| Not decrease              |           | 2 450 000 |

### Gas Tax in 46 States and District of Columbia Yields \$140,635,398 First Half of 1928—No Tax in Massachusetts and New York.

For the first six months of 1928, 46 States and the District of Columbia, report a total sale of 4,652,393,535 gallons of gasoline which is a gain of 680,970,224 gallons over the same period of 1927, according to information on gasoline taxation collected by the Bureau of Public Roads of the United States Department of Agriculture. In announcing this, Nov. 16, the Department said:

No tax was levied in Massachusetts and New York and a tax was in force for only month in Illinois.

The revenue collected amounted to \$140,635,398 which is \$39,384,557 more than collected on the 3,971,423,311 gallons sold in the first six months of 1927.

Nearly every State showed a gain in consumption. California heads the list with a gain of over 39,000,000 gallons and with an increase of one cent a gallon in the tax. Texas is second, with a gain of 38,900,000 gallons. Ohio is third with a gain of over 36,000,000 gallons and at an increase of one cent a gallon in the tax. Pennsylvania is fourth, with a gain of over 31,000,000 gallons and at an increase in tax of one cent a gallon. Kansas ranks fifth with a gain of over 28,000,000 gallons. Montana, with 29,678,808 gallons more than doubled her 1927 sales of 14,278,756 gallons.

678,808 gallons more than doubled her 1927 sales of 14,278,756 gallons.

In addition to the six States above mentioned, 11 others showed gains in sales ranging from 10,000,000 to 19,000,000 gallons, as follows:

| Alabama More       | than | 11,000,000 | gals.  | Missouri More than                            | 15,000,000 | gals.    |
|--------------------|------|------------|--------|-----------------------------------------------|------------|----------|
| Arakansas More     | than | 10.000.000 | gals.  | No. Carolina. More than                       | 14,000,000 | gals.    |
| Connecticut . More | than | 10,000,000 | gals.  | Oklahoma More than                            | 14,000,000 | gals.    |
| IndianaMore        | than | 15,000,000 | gals.  | Washington . More than<br>Wisconsin More than | 15,000,000 | gals.    |
| Minnesota More     | than | 12,000,000 | Karre. | AA TOCOMPATIT " " - TAYOUG STITES             | 10,000,000 | Dogwood, |

The average gasoline tax per gallon for the six month period of 1928 was 3.02 cents as compared to the average of 2.55 cents for the same period of last year. Of the total revenue collected, \$95,849,113 will be used by the State highway departments in construction and maintenance of State roads; \$29,557,416 will be used in construction and maintenance of local

roads, and \$5,630,668 will be applied to the interest and premium payments of State and county road bonds.

In general, the States showing the greatest gains in gasoline consumption are those which have improved a large mileage of highways during the last three or four years.

### Venezuelan Oil Production in October Reached New High Record, Amounting to 10,519,588 Barrels.

According to the November issue of "O'Shaughnessy's South American Oil Reports," production in Venezuela for the month of October totaled 10,519,588 barrels, a new record for all time. This was 1,042,085 barrels more than the previous high figure reached in September and was an increase of 4,495,884 barrels as compared with the total output in Oct. 1927. Shipments in October of this year amounted to 9,282,807 barrels, compared with 8,614,723 barrels in September and 5,928,121 barrels in October last

Venezuelan production during the first ten months of the current year totaled 84,536,747 barrels as against 50,254,-656 barrels in the corresponding period in 1927. Shipments amounted to 80,945,790 barrels as compared with 41,496,558 barrels in the first ten months of last year.

The above referred to report also contains the following statistics:

### World's Production of Copper for the Month of October Totaled Approximately 176,600 Short Tons, a New High Record.

According to figures compiled by the American Bureau of Metal Statistics, the world's production of copper for the month of September amounted to about 176,600 short tons, as compared with 157,500 tons in the preceding month and 148,300 tons in October 1927.

Copper output for the ten months ended Oct. 31 1928, by principal countries of the world which furnished about 98% of the total, amounted to 1,523,418 short tons, as compared with 1,367,410 tons in the corresponding period last year. The daily rate of production for these countries for the month of October 1928 was 5,601 short tons, as against 5,151 tons in the preceding month and 4,686 tons for the month of October 1927. The Bureau's figures follow:

MONTHLY COPPER PRODUCTION (IN SHORT TONS).x (By principal countries of the world, which furnished about 98% of world's total.)

### C. S. J. Trench Elected President of American Tin Trade Association.

C. S. J. Trench, of C. S. Trench & Co., has been elected President of the American Tin Trade Association, recently

formed to supplement the activities of the new National Metal Exchange, which will open its doors next month. The announcement further states:

Other officers will be: A. B. Hall (of the National Lead Co.), Vice-President, and Martin H. Wehncke (of Brandeis, Goldschmidt & Co.) President, and Martin H. Wehncke (of Brandeis, Goldschmidt & Co.) Treasurer. In addition to the officers, the directors will include Edwin Groves (of J. W. Phyle & Co.), John Hughes (of the United States Steel Corp.), James E. Pope (of the Pope Trading Corp.), and Erwin Vogelsang (of Lewis Lazarus and Sons of New York, Inc.). The new Association has adopted a specific quality tin contract, which will govern dealings in Straits and other specific qualities of tin. It is modelled after the style of the present New York Metal Exchange Tin Contract, which will no longer be available after Dec. 1 when the New York Metal Exwill no longer be available after Dec. 1 when the New York Metal Exchange goes into liquidation.

# Further Decline in Steel Output—Buying Movement for First Quarter Under Way-Pig Iron Prices Higher-Steel Prices Unchanged.

Steel output has shown a further decline, but the recession in specifications has been checked and a buying movement for the first quarter is getting under way, the "Iron Age" of Nov. 22 states in its summary of iron and steel conditions. Finished steel prices, for the most part, remain buoyant, as evidenced by advances during the week of \$2 a ton on tin plate and tin mill black plate, continues the "Age," which we further quote:

In pig iron, also, sustained market activity is indicated in most districts. In the Central West, forward contracting is extending into the second quarter of next year, and at Birmingham prices have gone up 25c a ton.

Scrap is again notable for its contrary trend. Heavy melting scrap at Pittsburgh has declined to \$17 a ton, or \$1 below the level of four

Steel ingot production in the Greater Pittsburgh district now averages 80%, compared with 85% last week. At Chicago, output has declined to 82%, largely as a result of the annual overhauling of rail mills.

Similar work is being done at the Alabama rail mill, which is scheduled to resume operations Nov. 24. The rate of steel ingot output for Steel Corporation subsidiaries is 80% for the second week.

Specifications for finished steel at Chicago were the largest since February, but new business is small, possibly reflecting a desire to keep stocks down preparatory to inventory taking. Cleveland, however, reports not only heavier shipping orders but a good volume of first

reports not only heavier shipping orders, but a good volume of first quarter contracting in alloy steel bars, sheets and strips.

The automotive industry, which accounted in large part for the recent decline in specifications, is conspicuous in contributing to the current recovery. It is also supplying the chief impetus to first quarter buying. In fact, parts makers that use steel bars are anxious to have prices named for year towards for use in figuring on contracts with motor care builders.

for next quarter for use in figuring on contracts with motor car builders.

A high rate of construction is indicated by fabricated steel awards of 47,300 tons, following a total of 55,000 tons in the previous week. The oil industry contributed one letting of 12,000 tons of storage tanks, besides miscellaneous orders (not included in the total) aggregating 10,000 tons. The gas pipe line from Tulsa, Okla., to Lockport, Ill., sponsored by the Texas Corp. and the Empire Gas & Fuel Co., will take a total of 76,528 tons, which has been divided between a Milwaukee and a Pittsburgh mill instead of being placed at Youngstown, as previously reported.

Railroad buying of the week includes the placing of 10,000 tons of rails by the Missouri-Kansas-Texas and the distribution of 800 freight cars. The Chicago & North Western is in the market for 30,000 tons of rails, and the Wabash will buy 55 locomotives.

Another slight rise in the "Iron Age" composite price for pig iron,

the tenth in three months, brings it to \$18.54 a gross ton, against \$18.50 last week and \$17.63 a year ago. Finished steel remains at 2.369c a lb., as the following table shows:

| Finished Steel.                           | Pig Iron.                                |

An easier situation in buying as well as production of iron and steel has developed in the past week, but the underlying strength of the markets has suffered no impairment, according to the "Iron Trade Review" of Cleveland. Finished steel users are generally well protected for this quarter. Advances on sheets, strip, tin plate and semifinished steel leave little incentive for speedy covering for the first quarter, while on most other lines producers have not yet opened first-quarter books. Compared with a year ago, the markets as a whole are at least 20% more active. Interest in first-quarter requirements, especially by the larger automotive consumers, is broadening. Producers of steel, sensing marked pressure for material early in 1929, are not pushing sales and are attempting to emerge from the fourth quarter with a minimum of low-priced obligations, adds the "Review," continuing:

Pig iron demand in the East is brisker, but in the Middle West a reaction to the past month's unprecedented selling has developed. Some large melters, it appears, are awaiting a similar letdown in price. More second quarter inquiry is developing, but blast furnace interests seek to avoid commitments that distance ahead, with fuel and ore costs for that period undetermined. In pig iron as well as in finished steel there is the suggestion that consumers will hold receipts down to actual requirements ase of the approaching inventory season.

The prospect for plate mills, especially in the Chicago district, is bright. In addition to some 200,000 tons that will be required for freight cars now on inquiry, Chicago mills have booked 12,000 tons for a refinery at Houston, Tex., and 10,000 tons for Pacific coast tanks. A Milwaukee maker of welded pipe is closing on a pipe line requiring 40,000 tons of plates. The shipbuilding revival has received impetus from inquiry by the Ward line for two steamers which will take 7,500 to 8,000 tons, while nearly twice that tonnage is pending in another eastern ship inquiry. The Great Lakes subsidiary of the Steel corporation may lay down two freighters requiring 5,000 tons each. Two Matson liners for the Pacific trade will call for 18,000 tons. The northern New Jersey pipe line which will entail 39,000 tons of plates is maturing.

The 1929 rail buying movement to date is fully the equal of 1928 one a year ago. From 30,000 to 40,000 tons may be placed at Chicago this week, not counting the 52,000 tons pending for the North Western and 48,000 tons for the Milwaukee railroad. The New York Central is taking bids on accessories for its recent large rail orders. The Canadian National and Canadian Pacific railroads, which last week closed on a total of 7,124 cars, have placed 1,000 automobile and 30 passenger cars additional. The Great Northern has closed on 300 ore cars and the Chicago Great Western on 800 box. New inquiry includes 1,472 cars and 1,050 underframes by the Louisville & Nashville, 300 by the Western Pacific and 200 each by the North Western and Great Northern. The Santa may close on 4,000 to 5,000 cars.

On steel bars and shapes new business has been rather slow, although Chicago mills received the best specifications since February. Cold finished, strip and sheet mills feel the slack in automotive specifications, but operations have generally been maintained at the expense of back . Cast iron pipe orders have mounted, a French maker taking 14,000 at Warwick, R. I., and a domestic maker 26,000 tons in two awards.

Tin place for the first half has been advanced \$2 per ton, to \$5.35 per base box, Pittsburgh, with the cash discount unchanged at 2 per cent. All sheet makers now quote 2.85c, Pittsburgh, on black, 3.60c on galvanized, 2.10c on blue annealed and 4.10c on autobody, without a real test. Books on hot strip have been opened at 1.90c and 2.00c, Pittsburgh, according to width. Semifinished steel has withstood some pressure, especially in the East against the \$42 wire rod price. Plates, shapes and bars generally are 1.90c to 1.95c, Pittsburgh, with producers apparently waiting on each other to open first quarter books.

October's all-time steelmaking record was based largely on the consumption of 5,024,642 tons of lake ore, 9% over September and 10% over last October, leaving only 39,554,612 tons of ore at furnaces or on lower lake docks as of Nov. 1, compared with 42,163,529 tons a year ago. Shipments of ore this month have been much heavier than in last and when the ore shipping season ends next week an ample

supply will have been brought down.

Steel corporation subsidiaries this week as last are operating at about 80%. Production in the Mahoning Valley is tapering slightly and Chicago is at about 85%. Pittsburgh mills average 80 to 85%. Under the impetus of advancing sheet and pig iron prices the "Iron Trade Review" composite of fourteen leading from and steel products has jumped 26 cents this week, to \$36.19, its highest in 13 months.

Another reduction was made in the production of steel ingots the past week, says the "Wall Street Journal" of Nov. 20. The U.S. Steel Corp. is operating at between 79% and 80% of capacity, a drop of about 1% from a week ago, when the rate was between 80% and 81%. Two weeks ago the Steel Corp. was running at 85%, continued the "Journal," adding:

Independent steel companies show a reduction of about 2% in their activities, the present rate being around 82%, contrasted with about 84% in the preceding week and a shade above 87% two weeks ago.

For the entire industry the average is placed at approximately 81%, against 82½% in the previous week and better than 86% two weeks ago.

At this time last year the Steel Corp. was running at between 70% and 71%, with independents at 64% and the average approximately 67%.

# Anthracite Industry More Active.

Increased activity in the anthracite industry is evidenced by the indexes for October, prepared by the Federal Reserve Bank of Philadelphia from reports received by the Anthracite Bureau of Information from leading collieries of the State. Employment increased 1.8% over September, although it is still 5.8% below the same month last year. Payrolls increased 29.5% over September, and also are 9.5% above the index for Oct. 1927, indicating a higher rate of colliery operations. Index numbers of employment and payrolls for recent months are shown below.

INDEX NUMBERS-1923-25 MONTHLY AVERAGE=100.

# Current Output of Bituminous Coal, Anthracite and Coke Higher Than in 1927.

According to the United States Bureau of Mines, the production of bituminous coal during the week ended Nov. 10 1928 totaled 10,543,000 net tons, an increase of 1,089,000 1

tons as compared with the output for the week ended Nov. 12 1927, but 597,000 tons less than produced in the week ended Nov. 3 1928. This decrease w apparently due to the election holiday on Nov. 6. The rocuction of anthracite for the week ended Nov. 10 last amounted to 1,784,000 net tons as compared with 1,377,000 tons in the preceding week and 1,530,000 tons a year ago. The output of beehive coke for the week ended Nov. 10 totaled 105,100 net tons, as against 90,700 for the corresponding period a year ago and 97,800 tons for the week ended Nov. 3 1928. The Bureau of Mines report is as follows:

### BITUMINOUS COAL.

The total production of soft coal during the week ended Nov. 10, including lignite and coal coked at the mines, is estimated at 16,543,000 net tons, as against 11,140,000 tons in the preceding week. The decrease, 597,000 tons, or 5.4%, was apparently due entirely to the election holiday on Nov. 6. Loadings on the other five days were higher than in the preceding week, and the average output per working day increased 5.1%.

Estimated United States Production of Bilumineus Coal (Net Tons), Incl. Coal Ceked.

| 19                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 28          |            | 127         |

# ANTHRACITE

The total production of anthracite during the week ended Nov. 10 is estimated at 1,784,000 net tons. This is a decrease of 175,000 tons, or 8.9% from the output in the week ended Oct. 27, the most recent full-time Records of daily loadings indicate that the time worked on elec tion day, Nov. 6, was equivalent to approximately one-half of a normal working day.

The weekly estimate of bituminous coal production in the United States, prepared by the National Coal Association from preliminary car loading reports, shows a total for the week ended Nov. 17 1928 of 11,100,000 net tons.

# Monthly Production of Coal in October.

The total production of soft coal during the month of October amounted to 50,360,000 net tons, as against 41,301,000 tons in September, according to the United States Bureau of Mines. The average daily rate of output in October was 172,000 tons higher than that for the month of September, an increase of 10.2%.

The production of anthracite increased from 6,036,000 net tons in September to 8,554,000 tons in October, and the average daily rate of output was 30.6% higher in October than in September. The Bureau also issued the following statistics:

MONTHLY PRODUCTION OF BITUMINOUS COAL AND ANTHRACITE IN OCTOBER (NET TONS).

# Production of By-Product and Beehive Coke in October.

According to the United States Bureau of Mines, a substantial increase marked the production of both coke and iron in the month of October. The output of by-product coke set a new high record; the production of beehive coke was the largest in any month since last March, and that of pig iron, the largest since May 1927. In comparison with September the daily rate of output increased 31% for by-product coke, 25% for beehive coke and 6.6% for pig rion.

The total output of by-product coke in the 31 days of October was 4,219,262 net tons, against 3,958,682 tons in the

30 days of September. The daily rate increased from 131,-956 tons to 136,105 tons. There were 82 active plants, and these plants produced about 86% of their capacity.

The new plant of the Youngstown Sheet & Tube Co. at South Chicago, Ill., began operations on Oct. 15. This plant comprises 70 ovens of the Koppers-Becker type.

The cumulative output of both coke and pig iron for the year to-date now shows an increase in comparison with 1927. For pig iron the increase is 0.9% and for coke 0.7%. The increase in coke has come entirely from the by-product ovens, the output of which up to Oct. 31 was 8.1% greater than in 1927. The cumulative production of beehive coke, on the other hand, shows a decrease of 43%.

As usual at this time of year, there were large surplus stocks of coke at by-product plants on Oct. 1. A group of 21 plants supplying gas for city use and producing coke suitable for domestic fuel that have reported their stocks to the Bureau of Mines in recent years had a total of 959,000 tons of unsold coke on hand Oct. 1, as compared with 879,000 tons on July 1, and 952,000 tons on Aug. 1. Figures for the same group of plants on comparable dates in other years are given below.

# Current Events and Discussions

# The Week with the Federal Reserve Banks.

The consolidated statement of condition of the Federal Reserve banks on Nov. 21, made public by the Federal Reserve Board and which deals with the results for the 12 Reserve banks combined, shows a decrease for the week of \$57,600,000 in holdings of discounted bills and increases of \$9,800,000 in holdings of bills bought in open market, of \$3,700,000 in United States Government securities, and of \$12,000,000 in cash reserves. Federal Reserve note circulation declined \$15,400,000, member bank reserve deposits \$18,400,000 and Government deposits \$8,300,000. Total bills and securities were \$43,600,000 below the amount held on Nov. 14. After noting these facts, the Federal Reserve Board proceeds as follows:

The principal changes in holdings of discounted bids for the week were decreases of \$24,600.000 at the Federal Reserve Bank of New York, \$19,300.000 at Philadelphia, \$13,200.000 at Cleveland, \$6,500.000 at St. Louis, and \$5,600.000 at Richmond, and increases of \$12,400.000 at Chicago and \$5,200.000 at Kansas City. The System's holdings of bids bought in open market increased \$9.800.000 and of Treasury notes, \$4,200.000 while holdings of United States bonds declined \$300.000 and Treasury certificates

Federal Reserve note circulation shows a decrease for the week of \$6,-800.000 at the Federal Reserve Bank of Philadelphia, \$3,100.000 at Cleveland, \$2.700.000 at Chicago, \$2,300,000 at Boston, \$2,000,000 at San Francisco and \$15.400.000 at all Federal Reserve banks.

The statement in full, in comparison with the preceding week and with the corresponding date last year, will be found on subsequent pages—namely, pages 2925 and 2326. A summary of changes in the principal assets and liabilities of the Reserve banks during the week and the year ended Nov. 21 is as follows:

| Nov. 21 is as follows:                                                                           | Increase (+) or | r Decrease ()  |

| Thursday, Nov. 29, being a holiday, the week<br>Federal Reserve banks for Nov. 28 will be issued | ly statement of |                |

for publication on Saturday, Dec. 1.

Returns of Member Banks for New York and Chicago Federal Reserve Districts—Brokers' Loans.

Beginning with the returns for June 29 1927, the Federal Reserve Board also began to give out the figures of the members banks in the New York Federal Reserve District, as well as those in the Chicago Reserve District, on Thursdays, simultaneously with the figures for the Reserve banks themselves, and for the same week, instead of waiting until the following Monday, before which time the statistics covering the entire body of reporting member banks—now 631—cannot be got ready.

The following is the statement for the New York member banks and that for the Chicago member banks thus issued in advance of the full statement of the member banks, which latter will not be available until the coming Monday. The New York statement, of course, also includes the brokers' loans of reporting member banks, which this week show an increase of \$176,315,000, the grand aggregate of these loans on Oct. 21 being \$5,157,132,000. This is first time these loans have passed the five billion mark and is the thirteenth time in as many weeks that an increase over the preceding week has been recorded.

On Aug. 22 (thirteen weeks ago) these loans totaled \$4,201,131,000, so that the net gain since then amounts to nearly a billion dollars to be exact, \$956,001,000.

### Complete Returns of the Member Banks of the Federal Reserve System for the Preceding Week.

As explained above, the statements for the New York and Chicago member banks are now given out on Thursdays, simultaneously with the figures for the Reserve banks themselves, and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks, now number in 631, cannot be got ready.

In the following will be found the comments of the Federal Reserve Board respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Nov. 19:

The Federal Reserve Board's condition statement of 631 reporting member banks in leading cities as of Nov. 14 sh ws decreases for the week of \$83,-000,000 in loans and discounts, of \$14.000,000 in investments, of \$96,000,000 in borrowings from Federal Reserve banks, and of \$19.000,000 in Government deposits, and an increase of \$64.000,000 in net demand deposits.

Loans on stocks and bonds, including United States Government obligations, were \$84,000,000 below the Nov. 7 total at all reporting banks, a reduction of \$100.000,000 being reported by member banks in the New York district and of \$9,000,000 by banks in the Boston district, while reporting banks in the San Francisco district reported an increase of \$9,000.000. "All other" loans and discounts increased \$6,000,000 in the San Francisco district and \$5,000,000 in the Cleveland district, and declined \$6,000,000 and \$5,000,000, respectively, in the Chicago and Atlanta districts, all reporting banks showing a small increase for the week.

Holdings of United States Government securities declined \$16,000,000 in the New York district and at all reporting banks, while holdings of other

Holdings of United States Government securities declined \$16.000,000 in the New York district and at all reporting banks, while holdings of other bonds, stocks and securities increased \$10,000.000 in the New York district and \$2,000.000 at all reporting banks, and declined \$6,000.000 in the San Francisco district.

Net demand deposits, which at all reporting banks were \$64.000.000 above the Nov. 7 total, increased \$33.000.000 at reporting banks in the San Francisco district, \$18.000.000 in the Chicago district, \$10.000.000 in the Chicago district and \$7.000.000 in the Kansas City district. Time deposits increased \$8.000.000 in the New York district and \$6.000.000 at all reporting banks.

The principal changes in borrowings from Federal Reserve banks for the week were reductions of \$98,000,000 at the Federal Reserve Bank of New York, \$24,000,000 at Chicago and \$9,000,000 at San Francisco, and increases of \$14,000,000 at Boston and of \$9,000,000 each at Philadelphia and Cleveland

A summary of the principal assets and liabilities of 631 reporting member banks, together with changes during the week and the year ending Nov. 14 1928, follows:

| 1928, follows:                                                   |                                |                            |                                           |

\* Nov. 7 figures revised.

### Summary of Conditions in World's Markets According to Cablegrams and Other Reports to the Department of Commerce.

The Department of Commerce at Washington releases for publication Nov. 24, the following summary of market conditions abroad, based on advices by cable and radio:

### ARGENTINA.

General conditions throughout the week were good and crop conditions favorable. A storm has caused damages appraised at some 3,000,000 paper pesos (about \$1,260,000) damages at Villa Maria. The announcement that President-elect Hoover will visit Argentina has made a favorable impression upon the business men of the country.

### AUSTRALIA.

Business conditions were slightly more favorable in October, particularly with industries not affiliated with automotive lines, although these were reported as slightly better throughout the country. No important labor difficulties are anticipated at present, and wheat and wool crops are very satisfactory. General improvement in the business trend is indicated by an increased demand for money and by an exceptional activity in the job printing business. Incorporation of new companies, however, continues very low except in engineering lines. The outlook for Christmas business is satisfactory, though imports continue on a moderate scale.

### AUSTRIA.

Nothing has happened to disturb seriously the favorable trade and industrial situation which has prevailed in Austria for several months in practically all important lines of business. A modest improvement has started in the cotton spinning mills and cotton trade after a period of uninterrupted depression since last winter. Iron and steel production is holding close to peak levels and the principal metal consuming industries report substantial advance orders on hand, including electrical equipment, locomotive and car building, wire and steel cable, agricultural machinery, and machine tool branches. Seasonal goods, such as footwear, clothing and hats, are reported moving well in the retail trade. The credit situation has shown very little change in recent weeks the banks report am de funds, particularly from abroad, to meet all current requirements, while the demands on the national banks are fluctuating within a relatively normal range.

### BRAZIL.

The general commercial and credit situation remains uncertain. Business men are apprehensive as to the outlook, and there are rumors of important failures approaching. Exchange weakened a little during the week, but is expected to react favorably to the improved New York coffee market.

### BRITISH MALAYA.

Business continues conservative but confidence in the future is fully restored and a gradual steady return to normal conditions may be expected, importers are showing interest in new agencies and are otherwise planning ahead. Interest in rubher circles is centered in extent of probable rubber exports in November and December. Local market is steady and quiet. Automobile sales continue dull although some interest is shown in taking on new lines. Low stocks in practically all textile lines have resulted in exporters causing retailers to buy for immediate needs only. Market for other canned goods is brisker. Dealers anticipate increased demand for fertilizers from rubber estates following keener competition since lifting of restriction. Plans for installation of carrier telephone between Kuala Lampur and Ipoh are reported and if successful this type of long distance telephone will be erected throughout the Federated Malay States.

# CANADA.

The trend of trade during the past week is described as generally satisfactory, although both wholesalers and retailers are complaining over the continuation of warm weather, which has delayed Christmas buying in some quarters. Eastern Canada reports satisfactory business and rural trade in Ontario, except in the northern regions which sustained crop losses from wet weather, has been improving. There is somewhat less optimism in Alberta and Saskatchewan as lower grades and yield in crops become apparent, but the Priarie section is generally prosperous. British Columbials busy, and retail grocery trade in Vancouver is reported as particularly good.

Railway extension in the west, heavy orders for new railway equipment, and new mining developments are maintaining the good demand for iron and steel heretofore noted. October production of pig iron was 3% over the previous month and the output of steel ingots and castings 9% heavier. The only universal steel plate rolling mill in Canada is expected to operations before the close of the present year. Lumber companies are reported to be purchasing tractors for their logging operations, which have been somewhat delayed because of warm weather and heavy rains.

# CHINA.

No particular trade development has occurred during the past month in Shanghai trade areas, and business in general has adopted a wait-and-see policy pending Government reorganization and policies. Several staple lines were shipped to interior points for replenishment of stocks, but these now show declines. Import transactions are temporarily retarded due to reluctance of dealers to assume additional obligations prior to Chinese New Year settlement period. North China business is quiet. Railways continue disrupted, although the return of a small amount of rolling stock has permitted the inauguration of semi-weekly passenger service between Peking and Mukden. Manchurian crops are estimated locally to be 2% above last year's crops. All lines in the Shanghai area report few transactions. Excessive taxation above agreed amounts have closed foreign owned cigarette factories in Tientsin and Hankow.

# FINLAND

Due to the pronounced stringency in the money market that has prevailed for some time the Bank of Finland was obliged to increase the official discount rate by one-half per cent to 7% effective Nov. 17. Except for the money crisis conditions within the country are practically normal. Industrial activities are satisfactory, the export markets are continually developing, and unemployment does not exceed normal. The harvest is expected to be average but a decline in imports is looked for due to the reduced purchasing power of the people as a result of crop returns falling below those of last year.

# FRANCE.

The formation of the new Poincare cabinet which assures the continuance of former economic policies, the prompt passage of the national budget and adequate defense of French interests in the coming negotiations concerning reparations and with regard to war debts has been received favorably in business circles. The industrial situation remains steady. The coal market has been strengthened by the termination of the textile strike, the

resumption of purchases by sugar refineries and good demand from other industries, based partly on the fear of labor complications in the coal mines. Export demand for French iron and steel products continues strong with orders booked well ahead. Demand for construction steel was unusually large during October. A seasonal slackening has occurred in automotive sales. Machinery prices are generally steady and the volume of domestic and export business is increasing. Manufacturers of electrical equipment are operating at capacity and the market for radio supplies is active. Difficulties in obtaining building materials on reparations account have retarded the house building program. The cotton industry, though still below normal, has become more stable. Wool manufacturing improved decidedly during October after a slow beginning. The raw silk market, though active at the beginning of October, was quiet during the remainder of the month. Silk conditionings are considerably above last year. Orders booked are somewhat below normal but the general situation is not unsatisfactory. Rayon activity is steady. Rubber is active with prices steady; hides and skins prices are declining and seasonal activity in the retail shoe trade is satisfactory. Labor difficulties, especially a dockers strike at Berdeaux tends to unsettle trade. Car loadings from Jan. 1 through Oct. 20 show a satisfactory gain over the corresponding period of 1927. Planting of winter grains began about Oct. 15, under favorable circumstances with acreage about equal to last year. Prospects for the sugar beet crop continue to improve as the harvest progresses favorably.

### GREECE.

A gradual improvement in business conditions continues, following the depression caused by the dengue fever epidemic. The improvement is partly reflected in the larger customs receipts for October, after a sharp drop in revenues from this source. Crop reports indicate favorable returns. Estimates for cereals, cotton, wine and oilve oil show larger increases over last year. The tobacco crop, however, is expected to be smaller, although the quality is better than last year. Important recent achievements in the public works program include the signing of a contract for irrigation work in the Struma Valley. Passenger traffic in the port of Piraeus which had heretofore been controlled by boatmen appears to have been ended by new facilities which permit steamers to come alongside.

### HAITI.

Heavy, well-distributed rains have filled all irrigation ditches and reservoirs of the Islands and have improved further the condition of growing crops. Temperatures throughout the Territory have been higher than normal for November. Bankers report there has been no material change in the volume of trade compared with the preceding month but that there are indications of an increase of 5 or 6% over the corresponding month in 1927. Retail merchants are complaining of slower trade, but collections are reported as fair to good. A distribution of \$750,000 by banks to Christmas Savings Clubs during the second week of December is expected to improve business somewhat. About 30 sugar mills are expected to be busy grinding the new cane crop by December 1st.

### INDIA.

A distinct improvement in India's labor situation has encouraged the industrial outlook, but trade conditions generally are marked by duliness. Heliday trade is reported from most large centers as disappointing. A partial failure of the wheat crop has not only prevented a surplus for export but has necessitated impertation of considerable ameunts of this commodity from Australia and Canada. This is the first time that Canadian wheat has been exported to India. Cotton acreage is reported to be about 20% above the average for the past ten years. Crop conditions are generally good, but stocks are accumulating and export demand is disappointing. Local mills are buying sparingly and the price trend is downward. Jute is quiet and barely steady, due to heavy stocks at local mills, with the export demand only average.

# ITALY.

Total figures for the Italian foreign trade for the first eight months of the year show, according to a report from Commercial Attache M. M. Mitchell, Rome, a decrease of 138,527,000 lire in the value of imports over the corresponding period for last year and a decrease of 1,116,202,000 lire in the value of exports. Compared to the first eight months of 1927 this is a decrease in imports of .9% and in exports of 10.9%. During this period of 1927 the exports equalled 70.4% of imports, and during 1928 they have fallen to 63.3%. No details are as yet available as to the nature of the goods going to make up these differences.

# JAPAN.

Due to the enthronement ceremenies and numerous holidays, all business lines show little activity. The money market is quiet and stock exchange dull, with lower quotations in many leading issues. Removal of the gold embargo is believed unlikely before May. Tariff questions will perhaps receive no action before December. The raw silk market is dull, with indications that prices will be maintained at present levels to the close of the year, unless sharp yen changes occur. Second forecasts in rice crops of Japan and Chosen place estimates slightly below the first forecasts.

# MEXICO.

Mexican business in general during the week ended Nov. 17 1928, was far below normal for this season of the year. A national convention of capital and labor was inaugurated by President-Elect Portes Gil for the purpose of carefully considering the proposed new labor law which, if approved, is to go into effect or January 1 1929. Air mail service between Mexico City and the important mining center of Matehala was inaugurated on Nev. 15. Dollars exchange continues firm with silver at a discount of approximately 3.80%.

# NETHERLAND EAST INDIES.

General conditions continue presperous with rubber the only depressed market. All financial factors are favorable and preliminary trade returns indicate that import trade continues to advance although export values have fallen off. Activity in the automotive market is unabated. Imports in September were 68% higher than the previous month and included a number of new models. The Government has announced plans to buy locally a large number of automobiles, chiefly of the small type, for use of officials. Machinery sales are moving well and imports of staples for the native trade continue active. Textile trade, however, is seasonally dull. American fresh fruits are appearing in good quantities and condition and special lines of foodstuffs are coming on the market for the Christmas season. Imprevement has occurred in the sugar trade and the unsold balance has been reduced to 298,600 long tons. Current crop estimates have increased to 2,945,400 tons. Rubber trade is quiet, stocks being held pending developments. Government orders requiring better quality of native rubber are rigidly enforced, causing some curtailment in native tapping.

### UNITED KINGDOM.

After allowing for one additional working day in October of this year as compared with the same month of 1927, a slight increase in the total valuation of exports of British goods is apparent in the latest trade figures. On a monthly valuation comparison, British Board of Trade returns show October exports of United Kingdom goods to have been 5.1% greater than those for the same month of last year; by the same comparison, imports were at a decline of 2.2% and re-exports were 6% less. Exports of United Kingdom goods aggregated £64.310,000 while imports and re-exports totaled £102.-640.000 and £8.880,000 respectively. All of these valuations were substantially greater than the totals for September, and the export total, being only slightly exceeded by that in the March trade, was the second largest monthly valuation of British exports for the year. On the basis of aggregate figures, the October export valuation appears as especially encouraging, as tending to offset the heavy reduction reported for September. A slight improvement in employment is also indicated, unemployment registers on Nov. 5 showing a reduction from the previous week of 25,000 persons seeking work in Great Britain while the number reported for Northern Ireland was less by 1,000.

The Department's summary also includes the following with regard to the Island possessions of the United States.

### PHILIPPINE ISLANDS.

Business in October was good but November opened with trade slightly quieter although specialty lines remained active. Excellent trade for the Christmas season is anticipated. Indent ordering of textiles improved in October and arrivals of textiles were heavy. Merchants and importers carrying stocks, however, reported slow business with stocks accumulating. Improvement continued in the automotive trade and prospects for November trade are very good. Demand for tires resulted in some shortages of pneumatics for trucks. Sales of most imported foodstuffs were good. Early sugar crop reports indicate an output of centrifugal for the coming season of 600,000 tons. October's abaca market was very quiet with little interest in the United States or London and the copra market continued steady with heavy production. The tobacco trade expressed satisfaction at recent passage by Philippine legislature of bill equalizing Philippine tobacco and sugar duties with tariff of United States.

### PORTO RICO.

Economic conditions in Porto Rico remain stable with sales is most staple lines steady. Construction work continues active and the relief society is ordering locally appreximately 5,000,000 feet of lumber and 1,700 tons of corrugated galvanized sheets for use in reconstruction activities. October retail business in San Juan was reported to be better than in any previous month of the current year and November promises to be equally good. This can be attributed to the reconstruction necessary after the September hurricane which has placed considerable money in circulation and afforded work for a large number of laborers and tradesmen. The trend of business beyond the period of rebuilding cannot be determined at this time. The fertilizer business is slow on account of the inability of many tobacco farmers to finance purchases. San Juan bank clearings during the first 14 days of November were \$8,125,000 as compared with \$9,100,000 in the same period of last year.

# Amalgamation of Note Issues of British Treasury and Bank of England.

On Nov. 22, the date when the amalgamation of the note issues of the British Treasury and Bank of England became effective, Associated Press advices from London this referred to the change:

Today marked another important stage in the gradual disappearance of wartime expedients in Great Britain, for it was the "appointed day" for the fusion of the Bank of England note issue with the much larger issue of Treasury notes, of £1 10s. denominations, which were only known in British currency during and since the war.

The whole of the British note issue and circulation will henceforth revert, under the control of the Bank of England, which for months, has been printing the new pound and ten shillings notes at the rate of a million a day. These will gradually replace the old treasury notes. It probably will be some months before all the old notes are exchanged.

exchanged.

Before the war, the smallest denomination of paper money was a £5 Bank of England note, the remainder of the currency being in gold, silver and copper coin. The issue of bank notes was made by hte Bank of England, and was practically covered by reserve of gold in the bank.

On the outbreak of the war, the Government, to impound all gold for war finance authorized treasury notes in denominations of £1 and 10s., which were not exchangeable for gold. The issue of these notes during the war, and inflation period following, reached an enormous total because there was no limit fixed by law. Eventually, however, the Government decided to apply the brakes and at the present time the issue has been reduced to roughly 300 million pounds, compared with the issue of Bank of England notes of about £185,000,000.

Winston Churchill's last budget provided that this issue of treasury notes should henceforth be fused with the Bank of England issue, and the whole be under the control of the Bank of England.

The New York "Times" in a London message Nov. 21 had the following to say:

Tomorrow England will be provided with a new paper currency, the amalgamation of the treasury or currency note issue with the Bank of England's note issue. This will apparently mark the permanent disappearance of gold as a medium of exchange in domestic payments here.

After today the Bank of England will be ready, in fact eager, to exchange every pound and ten-shilling note now on issue for its own notes of the same denomination. These currency notes came into existence in England owing to the great demand for gold for foreign payments that arose on the outbreak of the war.

It became necessary to substitute paper for gold money for domestic payments and, because the step had to be taken on short notice, the issue was made by the British Treasury and not by the Bank of England. It had always been intended that the issue should ultimately be transferred to the bank, in accordance with the principale that an institution independent of the government should be the note-issuing authority. The profits of the whole note issue, however, will in the ufture accrue to the government.

The new notes will be the same size as the old but the design will be based on the existing Bank of England notes of five pounds and upward

which are so well known in Europe. The principal addition will be a special waterwark representing in profile the head of Britannia, whose figure has appeared on the bank's notes from the earliest days.

The panel in the right-hand top corner containing the denomination will be printed in green ink with an underlying cross-banded tint of blue. The ten-shilling note will be printed red with an underlying mauve tint. The design on the back of both notes has been worked up from the acanthus leaf motif surrounding the seated figure of Britannia on the face of the bill.

In the pound note elaborated foliage in tints of blue, green and mauve supports the reproduction of the long, low, main front of the Bank of England, below which on either side is Pistrucci's "St. George and the Dragon." In the 10 shilling note the sketch of the Bank is omitted, and instead of Pistrucci's model the value of the note in figures is shown in two interstices in the leaves.

The act empowering the issue relieved the Bank of England from the obligation to pay in gold coin and fixed the new issue provisionally at £260,000,000, with power to increase it if found necessary. This will

As security the Bank of England is obliged to hold securities in its As security the Bank of England is obliged to hold £5,500, issue department sufficient to cover it, and is allowed to hold £5,500,000 of silver coin as part of these. The government, on the other hand, will transfer tomorrow to the Bank assets of its currency note redemp-tion account to an amount equal to the total of the transferred treasury

Previous items regarding the amalgamation of the British issues appeared in these columns Nov. 10 page 2627 and Nov. 17 page 2761.

#### Stock of Money in the Country.

The Treasury Department at Washington has issued the customary monthly statement showing the stock of money in the country and the amount in circulation after deducting the moneys held in the United States Treasury and by Federal Reserve banks and agents. It is important to note that beginning with the statement of Dec. 31 1927 several very important changes have been made. They are as follows: (1) The statement is dated for the end of the month instead of for the first of the month; (2) gold held by Federal Reserve banks under earmark for foreign account is now excluded, and gold held abroad for Federal Reserve banks is now included; (3) minor coin (nickels and cents) has been added. On this basis the figures this time are for Sept. 30 They show that the money in circulation at that date (including, of course, what is held in bank vaults of member banks of the Federal Reserve System) was \$4,846,198,357, as against \$4,802,819,937 Aug. 31 1928 and \$4,948,462,098 Sept. 30 1927, and comparing with \$5,698,214,612 on Oct. 31 1920. Just before the outbreak of the World War, that is on June 30 1914, the total was only \$3,458,059,755. The following is the statement:

|                                  |                  |                | MONEY HEL                                                      | D IN THE    | TREASURY.                          |                 | MONEY O       | UTSIDE OF                            | THE TREASU      | JRY.           | Population                       |

a Includes United States paper currency in circulation in foreign countries and the amount held by the Cuban agency of the Federal Reserve Bank of Atlanta. 5 Does not include gold bullion or foreign coin other than that held by the Treasury, Federal Reserve Banks, and Federal Reserve agents. Gold held by Federal Reserve banks under earmark for foreign account is excluded, and gold held abroad for Federal Reserve banks is included. c These amounts are not included in the total since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.

d The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States.

States, e This total includes \$19,423,519 of notes in process of redemption, \$151,808,946 of gold deposited for redemption of Federal Reserve notes, \$5,403,885 deposited for redemption of national bank notes, \$2,430 deposited for retirement of additional circulation (Act of May 30 1908), and \$7,561,883 deposited as a reserve against postal savings deposits.

f Includes money held by the Cuban agency of the Federal Reserve Bank of

f Includes money held by the Cuban agency of the Federal Reserve Bank of Atlanta.

g Figures revised to conform to changes effective Dec. 31 1927. Further revised figures for 1917 and 1920 used beginning with Aug. 31 1928 statement.

Note.—Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of \$156,039,088 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve bank. Federal Reserve notes are secured by the deposit with Federal Reserve bank. Federal Reserve of gold and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act. Federal Reserve banks must maintain a gold reserve of at the federal Reserve account of the federal Reserve and the properties of the Federal Reserve hald including the gold redemption fund which must be deposited with the United States Treasurer, against Federal Reserve notes in actual circulation. Lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal Reserve bank notes. National bank notes are secured by United States bonds except where lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding secured by Government bonds.

#### J. P. Morgan Returns from Abroad.

J. P. Morgan, who had been abroad since July, returned on the White Star liner Olympic which reached New York on Nov. 21. Russell C. Leffingwell, a partner in J. P. Morgan & Co., and John McHugh P regident of Chase National Bank were likewise passengers on the steamer.

#### Removal of Embargo on Gold Sought by Japan.

The Clearing Houses of the cities of Tokyo and Osaka have asked that the embargo on gold exports from Japan be

lifted, according to a statement attributed to the Commercial Secretary of the Japanese Embassy in New York on Nov. 13. The "Journal of Commerce" in indicating this said:

The decisions of the Clearing Houses were drawn up Oct. 15, it was ated. The requests of the Clearing Houses, it is understood, reflect general movement in Japan to bring the nation back to a gold basis. The recent rise of the yen is attributed to the movement for the bring-

ing of Japan back to a gold basis. The statement of the Embassy

"The recently reinforced discussion for lifting the embargo on gold export brought about on Oct. 21 the decision of the clearing houses in lokyo and Osaka in the favor of immediate lifting, and in addition thereto the various financial concerns held the opinion that the financial and industrial readjustment having already reached satisfaction and the international balance sheet also indicating an improvement there would be little fear of a bad effect from the embargo lifting. From these current favorable opinions the yen exchange market met a continuous drastic rise from the \$45 basis for the United States currency on Oct. 15 to \$47.75 on Oct. 26, although it experienced a reactional fall thereafter. The stock and bond markets showed a sympathetic fall, discounting the result from the embargo lifting.

We also take the following from the "United States Daily" of Nov. 14:

Resumption of free gold shipments is the center of financial discussion in Japan, the Department of Commerce stated Nov. 13. Japan's foreign indebtedness on Sept. 29 was 2,142,000,000 yen. The statement follows

The removal of the gold erport embargo continues to be the principal subject of discussion in the financial world. Opinions of bankers, economists and business men, as expressed in the local press, are remarkably unanimous that the permanent advantages of the resumption of free gold shipments are far more important than the temporary adverse effects. There is also unanimity of opinion to the effect that conditions in Japan are favorable to the early removal of the embargo.

There is, however, a great deal of uncertainty with respect to the preliminary measures necessary. Certain financiers believe necessary previously to establish credit reserves in New Certain financiers believe that it is un-York and London. Other authorities are equally emphatic in their opinion that Japan's foreign gold or credit reserves are too small to permit free gold shipments without very serious effects on the country's financial and economic structure. They contend that adequate reserves must first be built up, presumably by the flotation of foreign loans, since domestic gold reserves are required as a reserve for the note issue of the Bank of Japan under the existing law.

During recent weeks there has been a very marked decline in Government bond prices. It seems to be agreed that the primary cause for this break in the market was a rumor that the Cabinet contemplated heavy addi-tional issues of Government bonds. The decline is, more probably, a normal reaction; since for some time the larger banks were buying Govern-ment bonds in order to utilize their surplus funds and this buying has diminished.

diminished.

The Department of Finance has proposed new special income and business profit taxes to make up the deficit in the national revenue which will be caused by the transfer of the land and business taxes to the prefectural governments. According to the draft of this plan, the new special income tax will be levied only upon the income from lands, buildings and other immovable properties. Income from labor or services will not be affected. The new income tax will be 2%, and an additional tax of 1½% will be assessed on business profits. It is estimated that these two taxes will yield an annual revenue of from 40,000,000 yen to these two taxes will yield an annual revenue of from 40,000,000 yen to 45,000,000 yen.

Japan's foreign indebtedness totaled 2,142,000,000 yen on Sept. 29, ac-eding to a report of the Department of Finance. Of this total, 1,453, cording to a report of the Department of Finance. 000,000 yen represented Government loans, 257,000,000 yen municipal or other public loans, and 432,000,000 yen industrial and commercial bonds and debentures. Interest payments on these loans are estimated at about 112,000,000 yen a year.

#### Plan Proposed for Rehabilitation of Nicaragua's Finances Calls for Loan of \$30,000,000 and Sale of Majority Stock of Bank of Nicaragua to Americans.

The State Department at Washington made public on Nov. 19 a report on economic and financial conditions in Nicaragua prepared by W. W. Cumberland, who in November last year was delegated by the State Department, at the instance of President Diaz of Nicaragua to undertake a survey of conditions in that country. In presenting a plan for the rehabilitation of Nicaragua's finances Dr. Cumberland proposes, among other things, a loan of \$30,-000,000, and the sale of a majority of the stock in the Bank of Nicaragua to Americans. From a Washington dispatch Nov. 19 to the "Times" we quote the following regarding the report:

The report was given out today for publication by the State Department with the consent of President Diaz. The department made clear, however, that it represents only "the personal views of Dr. Cumberland." Secretary Kellogg in amplification of this position said that not only had the State Department not approved it as drawn but there were certain things recommended that the United States could not do. He did not reveal what these things are, asserting that he was not prepared to discuss the report in detail.

Dr. Cumberland undertook the survey on Nov. 15, 1927, as he was returning to the United States to engage in private banking in New York after several years service as financial adviser and General Receiver of Haiti. He spent approximately three months in Nicaragua and submitted his report to Secretary Kellogg from Managua on March 10, 1928. Copies were furnished President Diaz at the same time.

Since then New York bankers and agents of the Nicaragua on terms, with the report at a guide have endeavored to agree upon terms.

ment, with the report at a guide, have endeavored to agree upon terms for floating a \$12,000,000 loan to Nicaragua, for the purpose of consolidating the present debt, providing means for rehabilitation of the financial structure of the government and for carrying out economic improvements in the republic.

These negotiations collapsed several months ago for reasons which never were announced but which were understood to involve doubts entertained by American bankers as to the stability of Nicaragua. With prospects of law and order improved in the past few months and a Presidential election carried out peacefully, it is now the expectation that the negotiations will be resumed after General Jose Maria Moncada, the Library President electric in insurance of the property of the control of the

the Liberal President-elect, is inaugurated on Jan. 1.

The extent of American participation in Nicaraguan affairs recommended by Dr. Cumberland is far-reaching. He not only holds up as the keystone of the arch of the new Nicaraguan State which he envisages a National Guard developed to proper efficiency over a period of years by American marine officers, but stipulates that Americans should be placed in several strategic offices for the administration of governmental affairs. governmental affairs.

Among the points he makes are that a majority of the stock of the Bank of Nicaragua should be sold to Americans and that the bank be Bank of Nicaragua should be sold to Americans and that the bank be made the fiscal agent of the State, and that Collector General and the Auditor General should be Americans, nominated by the American Secretary of State and appointed by the Nicaraguan President, so as "to assure proper collection and expenditure of public funds."

Appointment of Americans to the two latter offices, he adds, "would be welcomed by the Nicaraguan people."

The present outstanding funded debt of Nicaragua is \$5,675,000, of which \$3,296,567 is external. The \$12,000,000 loan, after deducting the cost of underwriting, would be used for refunding this public debt and for other necessary expenses as follows:

| Redemption or conversion of 1909 bonds                | \$3.297.000 |
|-------------------------------------------------------|-------------|
| Redemption or conversion of customs guaranteed bonds  | 2 372 000   |
| Expenses of redeeming or converting outstanding bonds | 26,000      |
| Payment of claims                                     | 2,000,000   |
| Highway construction                                  | 3 000 000   |
| Payment of balance of \$1,000,000 loan                | 250,000     |
| Payment to Salvador                                   | 55,000      |
| Election expenses                                     | 150 000     |
| Paving and sanitation of Managua                      | 350,000     |
| Miscellaneous                                         | 100,000     |
|                                                       |             |

Total .....\$11,600,000 Dr. Cumberland rejects as "childish" any suggestion that American participation in the administration of Nicaraguan finances would mean

the surrender of the sovereignty of Nicaragua. American investments in Nicaragua," he says, "of some \$10,000,000, including both private investments and loans to the Nicaraguan government, are surprisingly small in amount. In fact, American financial interests are greater in each of the other Latin-American republics, with the possible exception of Paraguay, than in Nicaragua.

The New York banks which have for years interested themselves in the chal affairs of the republic are not at the date of this report credi-

tors of the government for more than \$250,000 and they have no agricultural or industrial commitments whatever."

#### Outline of Financial Plan.

The financial plan recommended calls for: The appointment of a collector general who would collect all revenues and receipts and deposit them with the Bank of Nicaragua as fiscal

The appointment of an auditor general to examine the accounts and

records.

The designation of a high commission, consisting of the Finance Minister, the Collector General, who would be entrusted with framing the budget and have a veto power over any legislation designed to

reduce revenues and receipts and exercise control over currency issues.

The establishment of a claims commission, consisting of two Nicaraguans, to pass upon claims, foreign and domestic, arising out of revolutionary and other troubles.

In addition the plan would authorize the sale of a majority of stock in the Bank of Nicaragua, with minority representation on the Board of Directors by Nicaraguans, and would set up the bank as fiscal of Directors by Nicaraguans, and would set up the bank as fiscal agent of the republic. The Nicaraguan government would be authorized to contract a loan of not more than \$30,000,000, of which the first series would be the contemplated \$12,000,000, which would be expended by direction of the high commission.

The Pacific Railroad would also be permitted to borrow \$2,250,000 on conditions approved by the directors of the road and by the high commission for extensions and improvements.

#### Russia's Creditors Join in New Effort to Secure Payment-Proceed Against Poland, Esthonia, Lavia and Others-Americans Not Represented in New International Committee.

It was stated in the New York "Journal of Commerce" of Nov. 19 that new vigorous efforts on the part of holders of pre-Soviet Russian bonds to protect their interests and attempt to realize on their investments are currently being made by the new International Committee of Holders of Russian Bonds. The paper quoted further stated:

The first step to be undertaken by this committee, it is learned on excellent authority, is to attempt to determine the proportional liability of Poland, Esthonia, Latvia, Lithuania and Rumania on these bonds, since they were issued when these countries were included in the Russian Empire

The new International Committee was formed late last month at a conference in London. it differs from previous efforts to put up a solid front for all Russian international creditors in that only holders of Government bonds are included, while claims against private persons and property rights are not represented. The policy of the committee is to insist that no separate agreements with Russia be made by any of the bondholders, so that an agreement with one country recognizing debts will now have to apply to all. Thus, the Russian effort to make a separate agreement on her national debt with England or France in order to obtain new loans would not be possible if the

present committee achieves its purpose.

The new International Committee includes all important holders of Russian pre-war bonds except American. Holders of Russian bonds here are not formally organized, but tae National City Co. has usually acted in protection of their interests. As far as can be learned the National City Co. has not joined the International Committee and has no intention of requesting

The committee has indicated that it will proceed to have determined the ilability of the succession States to the Russian Empire under the terms of a convention affixed to the Treaty of Versailes. This clause provided that a special commission be formed to establish the proportional liability of each. Such a commission has never been formed, and it is to secure its formation at the earliest possible moment that the committee is now making energetic preparations.

There is one complicating factor in this connection. In the treaties of peace between Russia and Poland, as well as several other of the succession States, it was provided that the Soviet Government assumed all obligation on the Russian pre-war debt. This clause of course had only nominal significant the state of the state ficance as long as Russia did not pay her debts. The bondholders claim that such a clause has no validity, as long as they do not receive payment on their obligations from the Soviets

The International Committee has made known that these successor State may prove liable for about 20% of the Russian debt. Principles for the division of national debts among successor States have not been clearly established in international law, according to the best authorities, but generally the division is made on the basis of national wealth or tax payments. In certain instances, according to one international legal authority, debts are divided according to population and area also.

#### Economic and Industrial Conditions in Denmark During September-Re-opening of Private Bank Following Its Closing on September 28.

The measures taken toward the re-opening on Oct. 3 of the Private Bank of Denmark, the closing of which on Sept. 28 was referred to in our issue of Sept. 29, page 1749, are indicated in the statement regarding the economic and industrial conditions in Denmark during September, issued Nov. 20 by the National Bank of Copenhagen and the Danish Statistical Department. We quote therefrom as

As far as banking and financial conditions are concerned the interest during the past month is especially associated with the events concerning Bank. After an investigation of the Private Bank's position by the bank inspector was completed, it was apparent in September that a reorganization was necessary, and as those negotiations which during the eatter half of Sentember wer e introduced bety principal banks and the State remained without result, the Private Bank closed September 28th. In the course of a few days, however, it was possible without the co-operation of the State to bring about an adjustment, as the three other principal banks in connection with a number of institutions closely allied to the bank subscribed a new share capital of 28 Mill. Kr.; for further safety of the depositors a coalition consisting of Stockholms Enskilda Bank, Hambross Bank, London, and Guaranty Trees Co., New York, together with the three Danish principal banks, have subscribed a contribution capital of 15 Mid. Kr. irrevocable for a number of years,

hich is liable for the bank's obligations after the bank's own capital. As here according to the bank inspector's investigation remained 12 Mill. r. of the bank's old share capital, the capital contributed to meet the capital contributed to meet the capital contributed to meet the capital of 40 Mill. Kr., and a sponsible contribution capital of 15 Mill. Kr. As moreover the bank's panection with the activities, which caused the essential losses, at the time was arranged, there was brought about an entirely sufficient ad responsible basis for the bank's continued activity, and the bank opened nd reasonable basis for the bank's continued activity, and the bank opened a Oct. 3rd.

These events have not had any important influence on the extent of the

ree principal private banks' outstanding loand and deposits, as the atstanding loans increased with 4 Mill. Kr., the deposits with 1 Mill. Kr. he rather unimportant withdrawals of bank book deposits in the Private ank during the days before the close of the bank, have thus been more an compensated for by the increase in the deposits of the two other banks. he outstanding loan of the National Bank has however during the month deposits of the part 22 Mill. Fr.

reased with about 22 Mill. Kr.

Neither has the month of September brought any great fluctuations in e bank's accounts with foreign countries, as the three principal private inks foreign credits during the month have been increased with 8 Mill.

r. as far as the account in foreign currency is concerned, at the same time e net debt to foreign countries in Danish Kroner has gone down 1 Mill. Kr. so the National Bank has during September increased its stock of foreign rrency, namely with 7 Mill. Kr., so that it appears that there was rather considerable amount of foreign currency on the market. The National ank's amount of bills in circulation is as a result of the increase in the standing loans and stock of foreign currency increased from 340.9 to 0.3 Mill. Kr.; in September, 1927 the amount of bills was 351.4 Mill. Kr. For settling of accounts by the check-clearing undertaken by the banks d savings banks through the National Bank, there was during the month livered checks amounting to 434.0 Mill. Kr. against 412.0 Mill. Kr. in

The average weekly transactions on the Copenhagen stock exchange September amounted to 3.8 Mil. Kr. for bonds (August, 1.2 Mill. Kr.) stocks 1.8 Mill. Kr. (August, 1.2 Mill. Kr.); in September, 1927, the

responding figures were 1.8 and 2.2 Mill. Kr.

In the index for stock exchange quotations there was during September increase from 93.0 to 93.7 for bonds and a decrease from 100.1 to 99.9 stocks (the quotations of July 1 1914, fixed at 100). Compared with ptember, 1927 the stocks (roup "other companies", which especially ludes agricultural stocks (102.3 in September, 1928 against 91.6 in ptember, 1927) and shipping stocks (respectively 119.3 and 118.0) were h this year. The banks' index was for both years 85.5 and the industrial iks were lower this year with 91.1 against 94.6 last year; the complete ex was 2.2 points higher this year, namely 99.9 against 97.7.

The following is also taken from the statement:

The Danish export of agricultural products was in September, 1928, ser than during the corresponding month last year for butter and eggs, slightly smaller for bacon and meat; the average weekly exportations butter to: butter, 2,765,800 Kilos (September, 1927, 2,670,800 Kilos); s, 956,300 scores (913,800 scores); bacon, 4,893,200 Kilos (4,936,600 os); beef and cattle, 1,11^,800 Kilos (1,222,100 Kilos). The prices of the exported articles were for all articles with the exception

ggs, higher than in September last year, the average weekly notations ag: butter, 330 Kr. (September 1921, 326) per 100 Kilo; eggs, 1.55 Kr. 9 Kr.) per Kilo; bacon, 1.54 (1.43 Kr.) per Kilo; beef, 59 ore (58 ore)

Kilo on the hoof.

The trade balance with foreign countries in August amounted to 155.

I. Kr. for imports and 146 Mill. Kr. for exports, so that there was an ort surplus of 9 Mill. Kr. against 10 Mill. Kr. in August, 1927. For months January-August the import surplus was this year 78 Mill.

against 63 Mill. Kr. in 1927. he Statistical Department's wholesale index went down in Septemb a 154 to 151. The decrease which is especially due to the fall in the sof grain and fodder, is found in the individual groups especially for stable food stuffs (7 points) and fodder (11 points); besides building erial has fallen two points and the leather group and chemical technical is each 1 point, while animal food stuffs have increased four points. e fluctuations have to a marked degree continued the improvement e relation between the prices for import and export articles, as the price x for imports in September fell from 148 to 138, while the price index exports increased from 144 to 149.

e freight rate figure in September increased from 103 to 107.2.

ember 1927 the figure was 109.0.

ne percentage of unemployed was at the end of September 12.2 against in September last year, in the real industrial professions the percentage respectively 13.3 and 16.4.

ne Government's revenue from consumption taxes was in September Mill. Kr. of which 5.0 Mill. Kr. were custom revenue taxes proper eptember 1927 the corresponding figures were 12.7 and 5.0 Mill. Kr.

#### bilization in Poland Functioning Smoothly, According to Quarterly Report of Financial Adviser Charles S. Dewey-Need for Tax Reform Pointed Out.

abilization in Poland is functioning smoothly, accordto the fourth quarterly report of Charles S. Dewey, erican Financial Adviser to the Polish Government and ber of the Council of the Bank of Poland. Mr. Dewey ts out that government receipts in the first half of fiscal year from April 1 through Sept. 30 have consistexceeded the estimates and provide for a considerable cet surplus. Actual receipts during this period amounto 1,393,000,000 zlotys as compared with 1,332,000,000 s expended, giving a surplus of about 61,000,000 zlotys. says:

safeguard against any possible lessening in business activity and ion of imports due to the increased tariff rates made effective on 15 last, estimates for receipts from the two largest tax sources, dustrial tax and customs duties, were made upon a most conservative

The experience of the first six months of the fiscal year shows he fears of the Government were not justified, as the receipts from dustrial tax exceeded those of the first six months of the preceding year by 48.8 million zlotys. Oustoms collections for the current th period amounted to 212,755,000 zlotys as compared to 157, 0 zlotys for the first six months of the fiscal year 1927-1928. Tax

collections as a whole, in the first six months of the current fiscal year, amounted to 61% of the budget estimates for the year.

"Receipts from the state monopolies, which form an important source of revenue, have been satisfactory. The Tobacco Monopoly paid to the government during the past six months 198,007,000 zlotys as compared to 179,042,000 zlotys for the same period of the preceding year and the Alcohol Monopoly yielded 199,183,000 zlotys as compared to 151,127,-000 zlotys during this period last year.

"Customs rates were revised on March 15 1928 in order that they might be relatively the same under the present stabilized zloty as under totaled approximately 115,100,000 zlotys as compared with 80 million zlotys for 1927. The amount required for the service of the stabilization loan for the third quarter was approximately 15,800,000 zlotys so that the receipts were approximately 7.3 times the requirements of the loan convice."

The report stresses the need for tax reform, now being studied by a committee appointed by the Minister of Finance. It says:

"There is objection to the present taxes on business in that in effect they discriminate against large concerns. The income tax on business concerns is progressive and in practice the weight of both the income and

industrial tax falls heaviest on large concerns.

"It is not advisable to place large concerns at a disadvantage with respect to competition with small concerns. Recent experience in industrial countries has proved that large scale production is more economical and Polish industry will be unable to compete with foreign concerns if it is kept from developing to its normal size. There is reason to believe that in the near future effective steps will be taken to improve the greatest of the respective of textiler in Polesel.

prove the system of taxation in Poland."

#### Visit to Russia of Charles S. Dewey, American Financial Adviser to Poland.

Regarding a brief visit to Moscow by Charles S. Dewey, American Financial adviser to Poland, a wireless message from Warsaw Nov. 18 to the New York "Times" said:

Charles S. Dewey, the American financial adviser to Poland, returned from Moscow to-day after a four days' visit at the Soviet capital. He re-iterated the statement that his journey was purely of private nature and that he, with his wife and family, enjoyed themselves on their brief holiday.

"There was nothing behind my Moscow trip," he said here. purely personal. Moscow made an impression like that of any other city that is very busy and has plenty of taxis. I noticed that the Government co-operative stores were full of buyers. The people look healthy.
"I talked with Litvinoff, the Assistant Foreign Commisar, Piatakoff,

the State Bank Director and Briachanoff, the Finance Commissar and discussed Soviet economic and financial condition. They informed me on Soviet domestic affairs without even mentioning foreign relations. I think it is very useful for me as Poland's financial adviser to get acquainted with economic conditions in neighboring countries."

In Warsaw the opinion prevails that Mr. Dewey especially investigated

the possibilities of Polish exports to Russia and of increasing the mutual exchange of goods. His statement more or less confirms this. He denies all rumors that he went to Moscow at the behest of the American Government or American interests to discuss Russo-American relations with the hope of reaching some basis for negotiations on the old Russian debta.

#### Increase of 73% in Long Term Mortgage Credit in Poland in First Six Months of 1928 as Compared with Same Period Last Year.

The amount of long-term mortgage credit increased 73% in the first half of 1928 in Poland as compared with the same period in 1927, reflecting the success of the stabilization plan. The New York office of the Legation of Poland, in announcing this Nov. 17, said:

The total number of mortgage loans in the first half of 1928 was 10,658

aggregating 184,863,000 zlotys, as compared with 9,921 for the whole year 1927 aggregating 214,165,000 zlotys.

The scarcity of long-term credit and the high interest rates have constituted a considerable handicap in the economic development of Poland. The continual expansion of Poland's industry has called for a supply of capital which at first was only reluctantly offered. The majority of the

capital which at first was only reluctantly offered. The majority of the mortgage loans enumerated above were advanced by private banks, the Bank of Poland using little of its capital for this purpose.

The different exchanges in which these loans have been payable afford an interesting indication of the new confidence in the stability of the zloty. In the year 1927 loans to the value of 80 million zlotys were advanced in paper zlotys, about 60 million in gold zlotys, 59.5 million in dollars and 9.6 million in pounds sterling. During the first half of 1928 there was a considerable increase in the credit offered in paper zlotys which appropriated 123.3 million. Gold zloty issues were negligible in which aggregated 123.3 million. Gold zloty issues were negligible in amount, dollar issues decreased to 36 million, and loans in pounds sterling amounted to 20 million.

There is a marked downward trend in the rates of interest. During the first half of the year the great majority of the loans were offered at 8% although in later months the 7% figure was also common.

#### New Central Bank of German Industries Elects Ex-Finance Minister Reinhold Chairman.

According to cable advices received here by the Int national Germanic Co., Ltd., the new Central Bank for German Industries, of which Dr. Peter Reinhold, former German Minister of Finance, is Chairman of the Board, has been officially registered and all legal formalities in connection with its organization have been completed. Cable dispatches also state that the authorized capital of the new bank, organized with the support of American banking interests, has been paid in. The capital consists of R. M. 7,500,000 fully paid bearer shares and R. M. 10.000.000 25% paid registered shares. The bearer shares have been purchased by a group of German private bankers and the registered stock will be held by State and Provincial Banks of Germany and other banking interests in Germany, Holland and America, including the International Germanic Co., Ltd., which will be the largest holder of the registered shares. The bank plans to interest itself primarily in the introduction of long term loans to the middle-sized and smaller industries of Germany. It is expected to grant secured loans for twenty years which, including interest, will be amortized in forty equal semi-annual payments. The Board of Directors of the new institution is announced

as follows: Chairman, Dr. Peter Reinhold, former German Minister of Finance, Dresden; Vice-Chairman, Degenhardt, President of Saxon State Bank, Dresden; Vice-Chairman, W. E. von Marx, Vice-Chairman, International Germanic Trust Co., New York; Vice-Chairman, Hans Arnhold, Gebr. Germanic Trust Co., New York; vice-Chairman, Hans Armold, George, Arnhold, Dresden; Vice-Chairman, Dr. Albert Hahn, Director, Deutsche Effekten-und Wechselbank, Frankfort o.M., Berdin; Directors: Mr. von Wolf, President of Bavarian State Bank, Munica; Dr. Stubben, President, Brunswick State Bank, Brunswick; Dr. Schrod, Director, Hessian State Bank, Darmstadt, Mr. Rabeling, Director of Oldenburg State Credit Institute, Oldenburg; Dr. Schall, Minister and Director Wurttemburg Giro Central Institute, Stuttgart; Mr. Thorner, Director Lippe State Bank, Detwold; Hered G. Argan; President, International Germanic Co., Ltd. Detmold; Harold G. Aron, President, International Germanic Co., Ltd., New York; Paul May, of Lippmann, Rosenthal & Co., Amsterdam; L. P. Sheldon, Vice-President, Blair & Co., Inc., New York; Henry Retzmann, Member of the Board of the Central Institute for German Industries, Leipzig; Mr. Glaeser, Vice-President Prussian Central Co-operative Credit Institute (Preussische Central-Genossenschaftskasse); Mr. Lehmann, Director Central Institute of German Provincial Banks, Berlin; Mr. von Bruckhausen, Director of Provincial Bank of Westfalia, Munster; Mr. Sachs, Ministerial Darector, Berlin; von Meister, Regierungsprasident, Hochst, o.M.; Mr. von Marx, Lamdrat, Frankfort, o.M.; Dr. Fritz Oppen-Hochst, O.M.; Mr. von Mark, Lamdrat, Frankfort, O.M.; Dr. Frinz Oppenheimer, Attorney at Law, Berlin; Alfred Jarislowsky, of Jarislowsky & Co., Berlin; Johann F. Schroeder, of I. F. Schroeder Bank, Bremen; Siegfried Aufhauser, Consul, of H. Aufhauser, Munich; Hans Weinschenck, of Bass & Herz, Frankfort, O.M.; Friedrich A. Straus, of Straus & Co., Karlsruhe; Dr. Heinz von Bottinger, of F. W. Krause & Co., Berlin; Ernst Ludwig Friedmann, of E. L. Friedmann & Co., Berlin; Franz Feilchenfeld, Director, Bank of Foreign Trade, Berlin (Bank für Auswartigen Handel); Julius Gumpel of Ephraim Meyer & Son, Hanover; Dr. Ernst H. Heimann of E. Heimann, Breslau; William von Thelemann, of Merck, Finck & Co., Munich, and Kurt Krahmer, Deutsche Vereinsbank, Frankfort, o.M.

Items regarding the new bank appeared in these columns Sept. 1 page 1187 and Sept. 29, page 1748.

#### Italian Bank Closes.

The "Wall Street Journal" of Nov. 22 announced the following advices from its London bureau:

Advices from Rome say the Piccolo Credito Ferrarra Bank, operating widely in northern Italy, has closed its doors. The Italian government as authorized the Agrarian Credit Institution to advance necessary funds to meet immediate needs of many thousand small depositors, mostly farmers. Five directors of the bank are reported to have been arrested.

#### Bulgaria Seeks Postponement of Reparation Payment.

Associated Press Advices Nov. 20 said:

The Council of Ministers adopted to-day a formal petition to the Repara-tions Commission asking that body to postpone until March, 1929, the current instalment on Bulgaria's reparation payments. The petition stated that the money was needed to enable the government to continue restoration work in the "Valley of Roses" and other regions devastated by the earthquakes of several months ago.

#### Offering of \$13,000,000 Bonds of Kingdom of Bulgaria.

Speyer & Co. and J. Henry Schroder Banking Corp. offered on Nov. 21 for public subscription at 97 and accrued interest, to yield 7\%, \$13,000,000 Kingdom of Bulgaria 71/2% Stabilization Loan 1928 forty-year secured sinking fund gold bonds. Of the \$13,000,000 total, \$4,000,000 were withdrawn for sale as follows: \$1,000,000 in Belgium by Banque Belge pour l'Etranger, Brussels, \$1,500,000 in Italy by Banca Commerciale Italiana, Milan, and \$1,500,000 in Switzerland by Credit Suisse, Zurich.

The offering circular says:

These \$13,000,000 Bonds are part of an International Loan, limited (as authorized by the Council of the League of Nations) to yield to the Government a net amount equivalent to £5,000,000 Sterling; the balance of this loan is being offered as follows: £1,500,000 Sterling Bonds in London by the Ottoman Bank, J. Henry Schroder & Co. and Stern Brothers; £200,000 in Amsterdam by Hope & Co. and Banque de Paris et des Pays-Bas; £100,000 in Prague by Zivnostenska Banka v Praze on behalf of a Czechoslovakian Banking Syndicate, and Fcs. 130,000,000 bonds in Paris by Banque de Paris et des Pays-Bas, Banque de I'Union Parisienne, Comptoir National d'Escompte de Paris, Credit Lyonnais, Credit tobilier Francais and Societe Generale pour Favoriser le Developpement due Commerce et de l'Industrie en France.

It is pointed out that this is one of the few recent foreign loans in which the leading banks of France are participating by making a public issue of a large part of the bonds, thus assuring a broad international market. As to the purpose of the loan it is announced:

From the proceeds of the loan, approximately \$7,300,000 will be paid to the National Bank of Bulgaria for stabilizing the currency, and approximately \$3,163,000 to the Agricultural Bank and to the Central Cooperative Bank for additional working capital; the balance will be

expended under the direct control of the commission, and possess as follows: \$6,983,000 for the improvement of roads, railways and possess follows: \$6,983,000 for the improvement of roads, railways and possess follows: \$2,433,000 for reconstruction work necessitated by the earthqua of last spring, and \$5,253,000 for the payment of floating debt in or that the revenues of the State may be used to maintain a balance

The currency, which has been subject to only small fluctuations dur the past five years, will be stabilized in relation to gold by law.

Speyer & Co. announced on Nov. 21 that they had be advised by cablegram that subscription lists for the Kin dom of Bulgaria loan closed in London at 9:30 o'clo that morning, the issue having been oversubscribed.

The bonds will be dated Nov. 15, 1928, and will become due Nov. 15 1968. Provision is made for a cumulati sinking fund, sufficient to pay all of these bonds at or before maturity, to be applied to the semi-annual redemption bonds by lot at par, the first redemption to be on Nove ber 15, 1929. The bonds are not subject to call before November 15, 1938, except for sinking fund. The Gover ment reserves the right to repay at par on that date, or any interest date thereafter, all or any part of the Bon then outstanding, upon six months' previous notice.

The bonds will be in coupon form of denominations of \$1,0 and \$500. Principal and interest will be payable in N York at the office of Speyer & Co. or of J. Henry Schrod Banking Corp., in United States gold coin, without ded tion for any Bulgarian taxes, present or future. Princip and interest will also be collectible, at the option of holder, in Belgian francs in Brussels, in lire in Milan. Swiss francs in Zurich, at the banking houses referred below, at the current buying rates for sight exchange New York.

Wladimir Molloff, Minister of Finance, in advices to bankers offering the bonds says:

The loan is issued pursuant to the Geneva Protocol of March 10, 1 as amended Sept. 8th, approved by the Council of the League Nations by resolutions of March 19, June 9 and Sept. 17, 1928, rat by acts of the Bulgarian Parliament of April 13 and Sept. 27, 1 and pursuant to an act of the Parliament of November 15, 1928, apping the loan contract. The amount of the loan is limited to \$13,000 dellar bands.

dollar bonds, £1,800,000 sterling bonds and Fr. Frcs. 130,000,000 be. The loan will be the direct obligation of the Bulgarian Govern and will be secured by a first charge on all receipts from the im export and other customs duties. The receipts from these revenues the two years ended March 31, 1928, and the estimated amount the current fiscal year, are approximately as follows:

Fiscal year ending March 31 Amount \$8,753,000 1927 1928 9,282,000 1929 9,021,000

or, for each year, over four times the annual interest and sinking

on the entire loan.

By resolution of Sept. 24, 1928, the Inter-Allied Commission (clished under the Treaty of Neuilly) released the customs revenues the first charge for reparations and costs of occupation and the get charge for treaty obligations.

If at any time the receipts from the above revenues should fall

150% of the annual service requirements of the loan, the Inter-Allied mission has agreed to release, at the request of the Council of League of Nations, from the above general charge additional revsufficient to insure total revenues equal to at least 150% of the serequirements, and the additional revenues so released shall be fort assigned to the service of the loan.

The pledwed service will be paid as recollected into a special service.

The pledged revenues will be paid as recollected into a special ac (with the National Bank of Bulgaria), to be controlled by a Co-sioner appointed by the Council of the League and, after the tertion of his functions, by the trustees for the bondholders to be app by the Council of the League. The sum required for the servi the loan will be remitted to the fiscal agents in monthly instalment the account of the trustees

For the year, ended March 31, 1928, revenues were about \$50,29 and the surplus over expenditures was about \$435,000.

Bulgaria, with an area of about 40,000 square miles, has over 5,00 inhabitants, or a larger population than Denmark, Finland, Norw Switzerland. The country is mainly agricultural, and exports considerables of the people and other form products.

Switzerland. The country is mainly agricultural, and expose quantities of tobacco, cereals and other farm products.

External loans of Bulgaria were sold before the war in Englan leading countries of Continental Europe; the 4½% bonds of 190 1909 (the last pre-war loans) were marketed on a 5% basis.

It is stated that conversions have been made at 138 to the dollar and at par of exchange for other curre Items regarding the loan appeared in these columns 3, page 2446 and Nov. 17, page 2762.

## Offering of \$2,000,000 7% Bonds of Farmers' Nati

mortgage institute of Hungary. An offering of \$2,000,000 Farmers National Mor Institute 7% Hungarian Land Mortgage sinking fund bonds was made on Nov. 20 by J. G. White & Co., Inc. E. H. Rollins & Sons at 921/2% and accrued interest yield over 7.60%. A sinking fund, operating by annual drawings by lot at 100 and interest, is deeme ficent to redeem the entire issue by maturity. The offered are part of an authorized issue of \$5,000,000. stated that there is to be presently outstanding, not han \$4,000,000, of which \$500,000 have been reserved for crivate offering in Hungary. The bonds will bear date let. 1 1928, and will mature Oct. 1 1963. They will be cousion bonds in denomination of \$1,000, registerable as to principal only. Principal and interest (April 1 and October 1) will be payable at the principal office of Guaranty Trust Company of New York, in gold coin of the United States of America of or equal to the present standard of weight and lineness, without deduction for any present or future Hungarian taxes. The Guaranty Trust Company of New York, is Paying Agent; Central Corporation of Banking Companies, Budapest, is Fiscal Agent. Information suppled to the bankers offering the bonds by Count John Hadik, President of the Institute, follows:

#### Government Control.

The Farmers National Mortgage Institute was founded in 1879 under a Special Act of the Kingdom of Hungary, for the primary purpose of providing a credit medium for the small farmer.

The Hungarian State owns 94% of the Institute's present outstanding shares and its participation cannot be withdrawn. The Institute is operated under governmental supervision through a permanent Commissioner appointed by the Finance Minister. The election of its President and Vice-President is subject to ratification by the head of the State and its Articles of Association cannot be amended without governmental approval.

#### Operation.

The business of the Institute, since its formation, has been confined to the granting of mortgage loans on lands and buildings used for agricultural purposes which loans may not exceed 50% of the appraised value thereof.

The Institute has never issued any bonds or other direct obligations in foreign currencies and its pre-war indebtedness, which is now being liquidated, does not exceed \$35,100.

It has never suffered a loss on any of its most and here always and here alw

It has never suffered a loss on any of its mortgage loans and has always paid the interest and principal, when due, of all of its Land Mortgage Bonds.

#### Security.

The Bonds will be the direct obligation of the Farmers National Mortgage Institute. The Institute will at all times maintain sub-obligations secured by first mortgages on productive agricultural property situated within the Kingdom of Hungary in a principal amount at least equal to the principal amount of the Bonds of this issue outstanding plus the amount of all the other outstanding Land Mortgage Bonds of the Institute.

Interest, principal and sinking fund on the sub-obligations securing the Bonds shall be sufficient to meet the corresponding requirements of the out-

standing Land Mortgage Bonds of the Institute.

In case of default in any Land Mortgage Bonds of the Institute created after Januray 1 1925, all sub-obligations and special reserve funds created after such date will be pooled as security for all such Bonds outstanding.

#### Sinking Fund.

A sinking fund is provided beginning October 1 1929, and operating semiannually sufficient to retire the entire issue by maturity through redemption by lot at 100 and interest. If Bonds are cancelled or redeemed in addition to sinking fund requirements, subsequent sinking fund obligations will be correspondingly reduced.

#### Agricultural Situation in Hungary.

Hungary with an area of 35,900 square miles and a population of over 8,000,000 is essentially an agricultural country, deriving almost two-thirds of its income from this source.

The present expansion of the activities of the Farmers National Mortgage Institute to provide small land owners with essential credit facilities is being carried out as an important part of the Government's program for the intensive development of the country's agricultural resources. Over 61% of the cultivated area of Hungary is composed of small farms of 140 acres or less. The Institute has in the past placed substantially all of the mortgages sought by this class of land owners.

#### Hungarian Finances.

In every year since 1924 when the Reconstruction Plan of the League of Nations was put into effect and the Reconstruction Loan was issued, the

Hungarian budget has shown a substantial surplus.

Since 1925, \$127,000,000 has been utilized by the government for productive capital investments without further foreign borrowing, and \$38,000,000 has been appropriated for such purposes in the 1927-1928 budget.

Hungary is experiencing a general revival in trade and prosperity. The National finances have been restored, political conditions have become stablized, crops are satisfactory, and building operations are extensive.

Conversions from Hungarian to United States currency have been made

at the rate of \$0.175 per pengo.

\$15,000,000 Loan Offered for Rudolph Karstadt, Inc.,

#### \$15,000,000 Loan Offered for Rudolph Karstadt, Inc., Germany's Largest Store System—Issue Oversubscribed.

A \$15,000,000 loan for Rudolph Karstadt, Inc., the largest chain and department store organization in Germany, was placed on the American market Nov. 22 in the form of 15-year first mortgage collateral 6% sinking fund bonds by Dillon Read & Co.; International Acceptance Bank, Inc.; Bankers Co. of New York; Equitable Trust Co. of New York; Bancitaly Corp.; Kissel, Kinnicutt & Co.; Scholle Bros.; Edward B. Smith & Co., and Shields & Co. A substantial amount of the issue has been withdrawn for offering in Europe. The bonds which were offered at 98 and interest were oversubscribed the day of offering. The bonds will carry warrants, detachable after April 30, 1929, entitling the holder to receive without further cost three American shares, each representing 40 Reichsmarks par value of the company's capital stock. The American shares will carry full dividend rights for the fiscal year ending January 31, 1929, but will not carry rights to subscribe for

capital stock which will presently be offered to shareholders.

Proceeds of the offering, and of \$2,360,008 par value capital stock presently to be offered to stockholders, will be used by the company for improvements and additions to its properties, for the retirement next April of \$2,264,000 first mortgage 7% bonds and for payment of other indebtedness. From a small shop established in 1881, the business of Rudolph Karstadt, Inc., has grown to be the largest chain of department and unit price stores in Germany. The Company operates 77 department stores, and 17 unit price stores in the leading German cities, as well as 15 factories and a large wholesale and export business. Plans were recently announced for extending its chain of unit price stores to France, in association with French interests and for expanding its German chain at the rate of about 20 new stores a year. Further data in connecton with the offering are given in our Investment News Department on a subsequent page.

# Offering of 105,000 American Shares of Rudolph Karstadt, Inc.

Scholle Brothers and Shields & Co., Inc., Nov. 23, announced the sale of 105,000 American shares (representing 4,200,000 Reichsmarks par value of capital stock) of Rudolph Karstadt, Inc., at \$22.50 per American share flat. The offering does not represent new financing on the part of the company. For further details see under "Investment News Department" on a subsequent page.

# Bonds of Danish Consolidated Municipal Loan Called for Redemption.

The National City Bank of New York, as fiscal agent, has issued a notice to holders of Danish Consolidated Municipal Loan 25-year 8% sinking fund external gold bonds, series A and series B, respectively, dated Feb. 1 1921 and due Feb. 1 1946, to the effect that \$325,000 aggregate principal amount of the bonds have been drawn by lot for redemption on Feb. 1 1929 at 107½ and accrued interest. Payment on the drawn bonds will be made upon presentation and surrender at the head office of the National City Bank of New York, 55 Wall St., on Feb. 1, after which date interest on the drawn bonds will cease.

#### Definitive Bonds of Municipality of Medellin now Ready for Delivery to Holders of Temporary Bonds.

Hallgarten & Co. and Kissel, Kinnicutt & Co. announce that definitive bonds of the issue of \$9,000,000 Municipality of Medellin (Department of Antioquia, Republic of Colombia) external 6½% gold bonds of 1928, dated June 1 1928 and due Dec. 1 1954, are ready for delivery to holders of outstanding temporary bonds. Exchange may be made at the office of the National Bank of Commerce in New York, 31 Nassau St., New York City.

# Record Volume of Trading on New York Stock Exchange—Local Exchange and Markets Elsewhere to Close To-day (Saturday)—Curtailed Ticker Service in Effect.

The volume of trading on the New York Stock Exchange soared to new high figures this week-yesterday's figures (Nov. 23) of total share sales very nearly reaching the 7 million mark—the amount of the transactions being 6,942,-That the day was likely to witness new high figures of trading was evident shortly after the opening of the market, the sales of stock in the first half hour having been 1,327,200 shares, compared with 770,500 shares in the period from 10 to 10:30 a. m. on the preceding day. On both the 20th and 21st the transactions exceeded 6,000,000 shares, and on the 22nd they fell a little short of that figure. As a result of the pressure which has resulted from the extraordinarily heavy trading, the Governing Committee decided yesterday (Nov. 23) to close the Exchange to-day (Nov. 24). The offices of the Stock Exchange members will remain open as on previous occasions when the Stock Exchange closed on Saturday to permit clerical forces to catch up with their work. The New York Curb Market will also be closed to-day, and some of the Stock Exchanges outside New York which have likewise voted to close to-day are the Philadelphia, Boston, Pittsburgh, Chicago and Detroit Stock Exchanges.

Notwithstanding the fact that the New York Stock Exchange put into effect on Nov. 22 its previously announced

plan of omitting the volume of individual sales from the ticker, the unprecedented volume of trading yesterday found the ticker a half hour behind the market at the closing hour; earlier in the day it had been as much as 48 minutes behind. Notice of the elimination of the individual sales was issued as follows on Nov. 21:

#### NEW YORK STOCK EXCHANGE

Committee of Arrangements

November 21 1928.

To the Members of the Exchange:

Commencing at the opening on Thursday, November 22, 1928, the volume of all individual sales will be omitted from the ticker, except that the opening sale of each stock will be printed in full with the volume as formerly.

Arrangements have been made with the printer of the sales sheets, Francis E. Fitch, Inc., to compile reports of individual sales from slips furnished by reporters on the Floor, and to publish them on the sales sheets.

The total sales of all stocks will be printed on the ticker at periodic intervals, and total sales of individual stocks will be given to the newspapers by special wire at various times during the day.

By order of Committee of Arrangements .:

ASHBEL GREEN, Secretary.

Last night's "Sun" referring to yesterday's (Nov. 23) trading said:

Sales Volume Top Record.

In point of sales volume to-day was the biggest ever. Transactions aggregated 6,942,500 shares exclusive of inactive stocks and "rights." was nearly 300,000 shares in excess of the former record of 6,666,200 shares made on November 16. It was a record breaking day on the New York Curb Market Exchange also, sales there reaching a total of approximately 3,000,000 shares. As an outcome of the heavy trading on the Curb, the Curb ticker at one time feli a whole hour behind the market.

To end the confusion caused by the lateness of the curb ticker the governors of that exchange decided to-day to emulate the example of the New York Stock Exchange and omit all sales volume excepting on opening The innovation will go into effect next Monday. transactions. Governors announced that the sales volume will be printed every hour on the Curb board ticker.

From the "Times" of yesterday (Nov. 23) we take the following regarding the dealings of the day before:

Investors and speculators throughout the country were obliged yesterday to follow the stock market with a ticker service that gave only actual quota-tions and that omitted for the first time all figures as to volume. The New Stock Exchange, however, succeeded in eliminating most of the

ticker delays and in bringing the tape nearer to the market than it has been at any time since the present phase of the bull movement started.

After the day's experience the stock market community was pretty generally agreed, in spite of the handicap imposed upon traders, that the

decision of the Exchange authorities had been justified. The Exchange officials and ticker expert were pleased with the results, which exceeded their highest expectations. The latest that the ticker ran at any times resterday was fifteen minutes at 12 o'clock. It was five minutes behind at the close and the last of the quotations on active stocks were tapped This was in striking contrast to what had happened off at 3:21 o'clock. previously. On Tuesday, for instance, the ticker ran two hours and fifty-two minutes after the end of trading, with the last quotations in the active issues printed at about 5:20 o'clock. Yesterday the ticker wound up its day's work, including the quotations in the inactives, at 3:32 o'clock,

Limit of Abbreviation.

The omission of the sales totals, which was ordered as an emergency measure and which will not be continued any longer than necess sents the limit to which the Exchange can go in abbreviating the present ticker service. With the possible exception of a negligible saving in time that might be accomplished by further revision of the symbols, the Exchange has done everything it can with the ticker now in use. The new and speedier ticker which has been ordered will not be in service throughout the country until late in 1929 or early in 1930, although its installation will begin shortly. That ticker is designed to record 7, even 9,000,000 share markets with little if any delay. That ticker is designed to record 7,000,000, 8,000,000 and

The plan tried out yesterday of dropping all volume figures had been received with misgivings when it was announced, traders fearing that such an omission would make it impossible for them to judge the market accurately. Brokers and traders, however, accepted the change without serious protest, feeling that anything would be preferable to the tardy ticker service which they had been receiving.

Yesterday the only volume figures printed were in the opening transacons. Thereafter, each trade was reported separately but with only the price indicated and that by the fewest characters that could be used. The same system of abbreviations in reporting prices that has been in use for several months was followed.

Regarding the pressure which the staffs of brokerage houses have been subjected to with the large volume of trading the "Times" of Nov. 21 said:

Clerical Staffs Work All Night.

The lights burned ail night in Wall Street after such a tremendous day. Few firms could disband their staffs, even three or four hours after the normal quitting time, and most staffs worked until the dawn to make inroads of the high mountain of clerical work piled up by the tremendous markets. Most of them now are far behind and it is expected that the Stock Exchange authorities will grant a holiday on Saturday, as they did in the Spring, when a long succession of big days put their clerical work far behind. The Exchange governors will hold a special meeting today, and probably will announce some action. All members, however, are not in favor of a holiday on Saturday, because of the big overhead due to the wirerental charge, which is on the basis of a six-day week.

Just what has aroused the speculative fervor which a A consensus of dozens of bankers, brokers and speculators themselves.

A consensus of dozens of bankers, brokers and speculators in the financial district during the last few days credits largely the election of Herbert Hoover to be President. It is believed his administration will parallel that resident Coolidge and that industry will expand and prosper. Industrial expansion, with increased dividends and mergers in prospect, is another reason advanced. Still another is the possible attitude of Mr. Hoover toward railroad consolidations, expected in Wall Street to be favorable. Still another reason offered is the theory that employment is high and "everybody has money." A purely banking reason advanced is that this is an era of "gold inflation," despite the big exports of the metal from the

United States this year, and another banking reason advanced is that th era of high money has definitely passed and that by the turn of the yes money rates will be definitely "cheap" in comparison with those now

Scenes on the floor of the Stock Exchange and on the Curb Marke were the wildest in the history of the two institutions. Every available broker was at work and it was a day in which there was not a moment rest. About the active posts were literally mobs of milling, shoving, excite brokers trying to catch a bid or flil an offer. On the Curb, too, there w excitement.

Stock Exchange galleries were filled to capacity. News of the market

attracted a steady stream of visitors to both exchanges.

Brokerage offices, down town and up, were jammed to the doors. Brokerage offices, down town and up, were jammed to the doors. Many of the speculators find themselves in a dilemma. They don't know whether to sell and take their profits or hold on an risk a reaction which may be a strenuous as has been the market's rise. Most of them feel, however, that it cannot continue at its present rate.

In an effort to reduce ticker delays, which have become increasingly serious as trading expanded, the New York Stock Exchange decided late yesterday afternoon to omit all figures as to volume in recording current stock market transactions. Beginning within a day or so, probably tomorrow, the tape will cary the number of shares on opening sales only. Thereafter each trade will be printed separately as at present, but with no figure to indicate the number of shares involved.

This plan, admittedly drastic, has been suggested before, but aroused

such opposition among brokers and traders that it was not adopted. Recently the Exchange announced that, beginning soon after Dec. 1, it would omit all figures as to volume on all transactions involving fewer than 50 shares. Even that plan, although generally accepted as unavoidable in the circumstances, has been opposed on the ground that volume figures are sential to traders following the market by the tape.

The decision to eliminate all volume figures was reached after the Exchange authorities had seen the ticker run two hours and forty-two minutes beyond the 3 o'clock close of trading, the greatest delay ever experienced.

The Exchange authorities hope that by eliminating the volume figures, the ticker delays can be reduced, possibly by one-half. The omission of volume figures will continue as long as the market is of such size as to make The new and speedier tickers, which were ordered some time ary. ago, will not be in operation throughout the country before the latter part of 1929 or the early part of 1930.

Arrangements will be made to supply sales totals to newspapers and press associations. Special telegraph printers will be provided for the afternoon newspapers and press services and through these the Exchange will announce the totals at intervals. The present plan is to furnish the morning newspapers with the total sales in each issue as soon as possible after the close of the market.

#### 32 Stocks Lent "Flat" by Exchange Traders-Number Is Largest in Several Months.

The following is from the New York "Times" of Nov. 20: Thirty-two stocks on the New York Stock Exchange were lent "flat" in the loan crowd after the close of the market yesterday—that is, they could be borrowed by Exchange members from other members without interest. This is the largest number to be lent flat in several months. Two stocks continue to be lent at a premium. They are Baldwin Locomotive, lending at 1-64%, and Wheeling & Lake Erie Railroad, lending at 1-33%The rates generally are 5½ to 6½% for the run of railroad and industrial shares. However, one stock, Drug, Inc., is lending at 1½%, three are lending at 2% and one, American Tobacco, at 3%.

The issues which were lent flat last night were American Brake Shoe,

American Brown Boveri, American Woolen, common and preferred; Armour & Co. B, Chicago Pneumatic Tool, Chicago & Eastern Illinois, Chicago Great Western preferred, Continental Baking A, Crucible Steel common, Cuyamel Fruit, Cushman's Sons, Devce & Reynolds, Foundation Company, Jones Brothers Tea, Jordan Motors, Lehigh Valley, Manhattan Electrical Supply, National Bellas Hess, National Lead, Pressed Steel Car, Real Silk Hosiery, Remington, Savage Arms, Simmons Company, Sloss-Sheffield Steel, United Fruit, United States Rubber first preferred, United States Pipe, Virginia-Carolina Chemicai common and preferred and Western Union.

Several New York Banks Sharply Cut Own Loans to Brokers-a Few Large Institutions Practically Withdraw from Market-Build up Eligible Paper Portfolio at Same Time.

According to the New York "Journal of Commerce," of Nov. 20, considerable interest has been aroused in financial circles here by confirmed reports that several New York banks have been reducing the volume of their outstanding brokers' loans, and at the same time have built up their

holdings of eligible paper. Continuing, the account says: The fact that these steps have been taken simultaneously with the development of an unprecedented volume of trading on the New York Stock Exchange and widespread public participation in stock speculation has been regarded as significant.

The New York banks have played a reduced role in the call money market ever since the Federal Reserve authorities in the late spring evinced their strong displeasure at the persistent rise in these collateral loans, and showed that they felt a bank was unjustified in rediscounting at the Reserve banks in order to lend money to brokers. On Jan. 4 New York banks had advanced on their own account \$1,511,177,000, or nearly 40% of all loans made through them to brokers. Their loans averaged above \$1,250,000,000 until the late spring and then dropped to around the \$800,000,000 level.

In the recent expansion of the brokers' loan total the New York banks ed their loans on own account to well above lars, though this time such loans constituted little more than 20% of the total advances to brokers. Thus local banks are now responsible for little more than half as large a part of the brokers' loans total as was the case at the beginning of the year.

Last week the New York banks sharply reduced their loans by \$79.

000,000. The burden of financing brokers has thus been passed on largely to out-of-town banks and especially to the outside lenders included in the designation "loans for the account of others." Last week these outside designation "loans for the account of others." loans accounted for 45% of the total, out-of-town banks for 35% and New York banks for barely 20%.

One large New York bank, it has been determined, is practically entirely out of the call loan market, as far as its own lendings go. Another has reduced its loans, and has again lowered the percentage it is willing to lend on the value of many active securities. On the other hand, there are certain banks which indicate that they continue to make large and increasing loans on call for their own account, which accounts for the mainin the size of the total.

Simultaneously with a reduction in their brokers' loans, many banks are expanding their holdings of eligible paper. One large institution which is practically entirely out of the brokers' loans market has been endeavoring to place as large as feasible a portion of its assets in the form of rediscountable bills. By having a large portion of their assets in this shape these banks feel they will be in a position to react any this shape, these banks feel they will be in a position to meet any tightening of the money market by having paper freely acceptable for re-discount at the Reserve banks. Furthermore, should the Reserve banks again object to rediscounting by institutions having large amounts of money on loan to brokers, these institutions would not be open to such

#### Market Value of Listed Shares on New York Stock Exchange on Nov. 1 \$61,075,813,465.

On Nov. 1 1928 there were listed 1,142 different stock issues aggregating 727,792,206 shares, as compared with 1,131 stock issues aggregating 711,197,109 shares on October 1st preceding. The announcement of the Stock Exchange, issued Nev. 19, further said:

Also, on Nov. 1 1928, the total market value of all listed shares was \$61, 075,813,465—an increase of \$1,743,689,954 over the figure of \$59,-332,123,511 for October 1.

Over the same period, borrowings in New York on security collateral increased \$366,081,377 from \$5,513,639,685 on Oct. 1 to \$5,879,721,062 on Nov. 1.

The ratio of Exchange member borrowings to listed share values thus increased 0.33%—from 9.29% on Oct. 1 to 9.62% on Nov. 1.

The average market value of all listed shares advanced \$0.49 per share, from \$83.42 per share on Oct. 1 to \$83.91 per share on Nov. 1.

#### Bankers' Acceptances at New High Level—Total Volume at \$1,122,746,889 Exceeds Outstanding Commercial Paper by \$790,000,000—Service Rendered by Federal Reserve System in Bull Market.

The volume of dellar acceptances reported by American banks as outstanding on Oct. 31 broke at ecords, not only for the fifteen years of acceptance financing - this country, but compared with Sept. 29 figures, for any ngle month. Complete figures for all accepting banks reporting to the American Acceptance Council showed a total of \$1,122,746,-889 which was \$118,580,709 more than the total reported for Sept. 29 and a gain of \$147,580,065 over the amount in the market one year ago. Robert H. Bean, Executive Secretary of the Council, in his monthly report, issued Nov. 16, from which the foregoing is quoted, also has the following to

Since Aug. 31 when the banks reported \$952,000,000 the lowest level for the year, there has been a very heavy increase in the use of bankers acceptance credits, amounting to \$170,000.000 for the two months period.

That this is only about the customary seasonal increase in bills, however, is clearly indicated by a comparison of totals for similar periods in three

|           | 1926.         | 1927.         | 1928.         |
|-----------|---------------|---------------|---------------|
| August    | \$582,634,000 | \$782,055,000 | \$952,051,000 |
| September | 614,151,000   | 863,823,000   | 1,004,106,000 |
| October   | 681,647,000   | 975,166,000   | 1,122,746,000 |

The record volume of over eleven hundred million in dollar acceptances is largely due to the energetic business building ability of about one hundred outstanding banks whose total of acceptances now exceeds one billion dollars.

With these banks acceptance credits are given first consideration with the result that many formerly large users of credit in the form of commercial paper are new steady drawers of bankers bills.

The decline in the use of commercial paper is seen in the figures for the outstanding of both bankers acceptances and commercial paper during the past four years on Oct. 31:

1925. 1926. 1927. Commercial Paper....\$684,000,000 \$593,000,000 \$611,000,000 Acceptances....... 674,000,000 682,000,000 975,000,000 1,122,000,000

It is now certain that a great share of the financing of American trade and the movement of this year's seasonal products will rest with the leading banks of this country, many of whom are making full use of the credit services permitted them under the Federal Reserve Act, and gaining to themselves a substantial amount of new earnings in the form of acceptance commissions.

For the past twelve months the average of outstanding bills has exceeded one billion dollars on which the acceptance commissions alone have netted the banks more than \$10,000,000 in the aggregate.

The survey just completed shows a very heavy gain in export credits, the

amount for which purpose stands at \$416,000,000 or \$102,000,000 more than is being used for import transactions.

That the season's crops are reaching the storage point is seen in the increase for the month of \$39,000,0000 in the volume of bills against goods stored in domestic warehouses, but this item is still \$34,000,000 below that for Oct. 31 1927

The use of dollar acceptance credits of American banks to finance goods stored in warehouses abroad or for inter-country shipment continues to increase, there now being \$207,000,000 in bills for such purposes against \$97,000,000 last year.

Cotton is the principal commodity represented in the heavy increase in bills reported at this time followed by substantial amounts for rubber, s, sugar and tobacco.

Bills to finance the importation by American manufacturers of heavy purchases of Australian wool have not as yet reached the market but their indicated appearance a few weeks hence will further swell the total of acceptances

The Federal Reserve banks continue to co-operate admirably with the accepting banks and the bill market by maintaining a heavy portfolio of

bills purchased in the open market. For several weeks, since the newly created bills have come into the market in heavy volume, their holdings have averaged better than 365 million dollars which, with the bills held for account of foreign purchasers, have taken care of over 59% of the

total volume outstanding.

This support of the Federal Reserve banks has enabled the dealers to maintain steady discount rates for bills during a period of unusually heavy

operations.

There is no immediate prospect of any change in the bill rates, a condition reassuring to the accepting banks desiring to offer their customers a low cost for their acceptance credit requirements.

If they are able to maintain rates at about their present level, the bill market dealers will make it possible for the banks to get the benefit of a full season of acceptance credits, which from present indications would raise the total volume of bills another \$125,000,000 by Jan. 30 next.

The statistics supplied by Mr. Bean follow:

TOTAL OF BANKERS ACCEPTANCES OUTSTANDING FOR ENTIRE

#### \$13,015,000 of Gold Earmarked Here By Undisclosed Buyer -Bankers Concerned As to Renewed Exports Would Sharply Tighten Credit Here.

The Federal Reserve Bank of New York announced on Nov. 22 that it has earmarked \$13,015,000 of gold for foreign account during the past week. In noting this the "Journal of Commerce" yesterday (Nov. 23) said:

This is practically the first important earmarking operation for foreign

account since the extensive French transactions of last spring.

No explanation of this operation was forthcoming at the Reserve bank, but it was regarded as of the first importance in banking circles. Early in the summer, the gold export movement came to a halt after approximately \$500,000,000 in the precious metal had been withdrawn from this market. The gold withdrawals had directly led to the tightening of credit here. Further gold withdrawals, therefore, would tend again to tighten domestic credit conditions, at a time when the large and expanding volume of bank credit makes additional reserves necessary. The amount earmarked yesterday was insignificantly small, but if foreign central banks resume the process of building up their reserves with American gold, serious consequences are foreshadowed. Above all, if the earmarking was encouraged, it may indicate a change in reserve

German Position.

In the absence of an official statement it was the majority opinion in international banking circles that the gold was destined for the account of Germany. It was pointed out that Dr. Wilhelm Schacht has frequently stated of late that he will buy gold abroad whenever the influx of short-term foreign credits into Germany becomes large, in that way hoping to prevent large amounts of short-dated balances from accumulating within the country. He fears the disorganizing effects of the possible sudden subsequent withdrawal of such balances. Buying gold raises money rates abroad and reduces such rates within Germany, and thus tends to halt the short term lending. Dr. Schacht has absorbed thus tends to halt the short term lending. Dr. Schacht has absorbed large amounts of gold from the London market recently in connection with this policy

Not every informed observer agreed that Germany was the taker of the gold, whoever. Others believed it more likely that France was the buyer. It is pointed out that the reserve ratio of gold to circulation and deposit liabilities of the Bank of France has now fallen to slightly above 38%, against a legal minimum of 35%. At the time of stabilization the ratio was 40 per cent, but subsequent business expansion and increased credit requirement have lowered the ratio despite moderate gains in the gold supply. If France resumes her role of buyer of gold in this mar-ket she is amply provided with resources in the way of foreign balances French foreign exchange holdings now total about \$1,400,090,-000 in all forms. A large portion of this is in the shape of dollar bills, which can be used at any time to draw gold from here to Paris.

rarded as rem were Canada and Bulgaria. Canadian exchange is now at the gold point, and a shipment of \$1,000,000 has been made from this country to Canada. It is barely possible that the Canadians have changed their traditional policy of receiving actual shipments of gold, and instead will earmark gold here, to release it several months later when gold ship-ments normally would move from Canada to this country. Thus, the

expense of the periodic gold shipments back and forth from this country to Canada could be eliminated.

Bulgaria floated a stabilization loan early this week, of which \$13,000,000 was place here. Of this loan, \$7,500,000 was to go to the National Bank of Bulgaria. Despite the recency of the loan flotation, it is thought barely possible that the proceeds may have been converted The increase reported yesterday in gold earmarkings brings the amount of gold held with the Reserve banks for foreign account to \$52,154,000. First earmarkings occurred in 1922. Most recent changes were the release in October of \$1,200,000 from earmark and the addition of the same amount in September to earmarked gold held here. At the time it was believed that these movements were for Polish account.

#### George E. Roberts of National City Bank on Credit Situation and High Interest Rates.

The "high interest rates signify more than the effects upon whoever pays them" was the statement made by George E. Roberts, Vice-President of the National City Bank of New York, in discussing in New York on Nov. 20 "The Credit Situation" before the Fifth Conference of the National Association of Finance Companies. "They signify," said Mr. Roberts, "that a competitive situation exists, that a selective process is going on, that somebody who would like to use credit is not getting it. That means a check upon activity and a restriction of purchasing power somewhere, and in the long run that is not good for business, or good for the corporations whose stocks are in the market."

Mr. Roberts observed that "it is sometimes said that the public will never submit to autocratic control of bank credit," but that, he averred, "is precisely the purpose for which the Reserve system was established." He pointed out that "the resources of the local banks, member and non-member, are far greater than they were before the Reserve system was established, and those banks are as free as they ever were, until they begin to draw upon Reserve system resources. When they do that they are bound to conform to the policies of the Reserve system." Mr. Roberts declared that a member bank, in applying for Reserve credit "for the purpose of either directly or indirectly supplying credit for purposes which are distinctly outside the scope and in contravention of the authority of the Reserve Act" is disloyal to the system. He added: "There is another obvious reason, based upon ordinary considerations of prudence, why member banks should not borrow Reserve credit for forbidden purposes. It is unsound banking, because they are sacrificing their reserves." Mr. Roberts told the gathering that "if the Reserves Banks were to shut up tight and not issue another dollar of credit, brokers' loans might continue to increase, if the rates offered were high enough to attract credit from other uses." A further observation was that "the banks, which have been steadily accumulating bonds since 1922, have turned sellers this year, and have disposed of probably \$600,000,000 to \$700,000,000 to set free funds to meet the decline of deposits and for use in the short term market." The address follows in full:

#### The Credit Situation.

A great change has come over the general credit situation in the past year. One year ago money was lending in this city upon stock exchange collateral at about 4%; in recent months it has been ranging from 6 to 7% and higher. Upon commercial paper the advantage has been less, but from 1 to 1%% and long term investment rates are higher. The change is significant because it results from a change in fundamental conditions.

In order to understand them one must first have a clear idea of bank credit. A bank loan usually results in a deposit, for the borrower generally takes credit in his bank account and checks against it. He may check it all out but the checks will be deposited in other banks. Hence a general increase of bank loans usually causes a general increase of bank deposits, most of them payable on demand. Our banking laws for the protection of the situation require that every bank shall keep cash reserves against their deposits. Our banking system is based upon gold, and in the last analysis the capacity of our banks to expand their credits depends upon their holdings of gold. The gold is now consolidated to a great extent in the Reserve banks.

From 1920 to 1927 we had an almost uninterrupted inflow of gold, excepting the year 1925, when largely on account of our participation in the Dawes Plan loan to Germany we had a net export of about \$135,000,000. In every other year of that period we had a surplus of gold imports, and the aggregate gain was nearly \$2,000,000,000. We did not get this gold because we wanted or planned for it; conditions were such that the world dumped it in our lap. It came as the result of abnormal economic, financial and political conditions in Europe.

This gold flowed into the member banks and was passed on to the Reserve banks, becoming the basis of credit. The Federal Reserve Act requires that in what are known as Central Reserve cities, which are only three, New York, Chicago and St. Louis, the reserve shall be 13% on demand deposits, in what are known as Reserve cities, comprising 64 cities of leading importance, 10%, and for all other member banks 7% on demand deposits. For time deposits, on not less than 30 days' notice the required reserve is 3% for all banks.

It is of some importance that the proportion of time deposits in total deposits has been steadily increasing. On Dec. 29 1922, it was 28% for all member banks and for June 30 1928 it was 37%. This low rate on time deposits lowers the average rate on all deposits and thus increasing the credit expansion which may be had on the gold reserve.

Governor Roy A. Young, of the Federal Reserve Board, in an address before the American Bankers Association a few weeks ago, stated that on an average, for \$100 of deposits carried by a member bank a Reserve bank receives \$7.50. That is approximately 13 to 1, and means that one additional dollar of reserve will support \$13 of new credit, or \$7,500,000 of new gold will support \$100,000,000 of new credit.

In the first several years of this inflow since 1929 a considerable part of the new supplies was used to pay off loans at the Reserve banks, and the increase of credit outstanding was comparatively small, but in the five years from June 28 1922 to June 30 1927, with an increase of \$800,000,000 in our gold stock, total loars and investments of member banks increased by about \$8,000,000,000, which is approximately 10 to 1.

by about \$8,000,000,000, which is approximately 10 to 1.

If we include the non-member banks in the calculation, the proportion of credit to gold is higher. In the same five years the loans and investments of all banks, member and non-member, increased by \$17,000,000,000 or a credit expansion of more than 20 to 1.

These figures in detail give the measure of the influence of these importations of gold upon the credit situation, and suggest the influence which this credit expansion has had on our business life. In some respects this influence is not as apparent as might be expected. From the beginging of the movement foreign observers predicted a general inflation of prices in the United States, similar to that which resulted from the credit expansion which followed upon our entrance into the war in 1917, but that has not

The fact is that business had been innoculated against the inflation fever. It had experienced inflation from 1915 to 1920, and deflation in 1920 and 21, and wanted no more of either. There has been no inflation in commodities since 1921, and the increased supplies of credit were turned into the stock and securities market. The conditions there were favorable. The level of prices in 1921 was abnormally low. Prices had been depressed by the high interest rates during the war and years following, and by the demoralized state of business of 1921. After 1921, some of the industries have been depressed, the country has been generally prosperous since. Industrial costs were high, but enterprising managers poured out great expenditures for improvements, and results have been seen in the earnings. Capital has been accumulating and flowing into the market from more sources than ever before, and this, together with the increasing supplies of bank credit resulting from the gold imports, caused a rapid decine of

Lower interest rates always have a prompt reaction upon capital values. If the general level of interest rates declines, capital values inevitably rise. In an 8% money market, such as we had in New York in 1920, a 6% bond, reckoned simply on the basis of current yield, would be worth 25% less than par, or 75, but if money should fall to a 4% basis, as a good many people one year ago were thinking it likely to do, that bond on a long term basis might be worth 150. The same argument applies to stocks and the decline of interest rates was the most potent influence in getting the rise of stocks and securities under way.

Furthermore, in many cases, the physical properties represented by the stocks in the market, owing to the increase of constructional costs, have a replacement value higher than before the war, and this has been another factor in the re-valuation of capital assets.

Finally, it is to be considered that the corporations whose stocks are listed on the New York Exchange, and more particularly those which have been leaders in the market, may be said to be the elite of American corporations and of investments available to the public. They are leading, outstanding, progressive, corporations with records of success and apparently strong in their fields.

Furthermore, the years since the war have been, as I have indicated, years of many industrial and business changes, in which these companies have been prominent—of mergers, reorganizations and consolidations which while putting a good many concerns out of business have been advantageous to survivors—years of new ideas and methods in industry and in merchandising—and in many cases the results have been of the kind which fire the imagination.

The agricultural implement industry will serve as an illustration. In 1921 this industry seemed to have an uninviting outlook for years to come, but to-day it is riding the high tide of prosperity, and looking out upon the most promising future it has ever known. It has rehabilitated itself and is promising to create a new agriculture.

These changes and developments, with the favor rg fundamental condition of a continuing supply of new credit at low interest rates have been the basis of the greatest period of stock speculation ever known. Once such a movement gets under way it tends naturally to gain suport and momentum, and this one was plunging ahead with tremendous impetus; when suddenly something happened. A new situation developed, which suggests the old problem of what would happen if an irresistable force should meet an immovable obstacle.

A change, dramatic in its suddenness, and vital importance, has taken place in the past year. The inflow of gold, which had been almost uninterrupted for seven years, ceased, and more than that, an outflow began, which in the course of ten months took away practically ail of the gains of the previous years.

Under our old banking and currency system, which we lived under for years, and under which we had an almost complete suspension of cash payments in 1907, that loss of gold would have been calamitous; for having built up a great fabric of credit on those importations of gold, we would have had to pull it down, at the same rate, some 20 to 1, at which it had been built up, and that would have meant general disaster. The Federal Reserve system, however, by reason of being the holder of the consolidated gold reserves of the country, and a large reserve of credit-making capacity, was able to handle the situation without any contraction of credit. There has been no contraction of credit on account of the loss of over \$500,000,000 of gold.

The stock market took that service as a matter of course and went on buying stocks and borrowing more money, as before. A rising stock market must have more credit, or at least it always wants more, and it would not make much head way, if all purchases had to be made with payments in full, cash down. The Reserve authorities, however, soon let it be known that they considered it one thing to release Reserve credit to take the place of the gold exported, but another and very different thing to release it to serve as the basis of continuing stock speculation, and that they were unwilling that their reserves should be drawn upon for that purpose. They raised the discount rate in January 1928, again in May and again in July, and took other steps to tighten the credit situation.

Interest rates began to rise, but the stock market had no intention of being cut short in a prosperous career by any mere shortage of gold reserves or an announcement of banking policy. It expressed confidence that it could get money by bidding for it, and proceeded to do so, with considerable success. Of course, bankers knew that high interest rates would attract money. They have an old maxim in London that 10% will draw gold out of the ground. The manner in which money or credit responds to high rates is simply an illustration of the ordinary workings of the law of supply and demand. If any commodity is in short supply, so that there is not enough to meet all demands, the price naturally rises under the influence of competition, until a part of the demand is eliminated, and and equilibrium is established on the new basis. The people who are willing and able to pay the price, get what they want and others go without. That is what has been happening in the money market since the price of money began to rise. The price has fluctuated from day to day, which shows that it has not

been artificially controlled but has been responding to supply and demand. It never was supposed by well-informed persons that the supply of credit for brokers' loans would be peremptorily shut off. There are many more or less elastic elements in the situation. In the first place, the Reserve banks have not ceased or hesitated to discount eligible paper—the class to which they are by law restricted—at 5% and the preferred class known as acceptances, as A16%, and the argument of reserve resilt customs. known as acceptances, as 41/2 %, and the amount of reserve credit outs ing has been substantially increased in the last three months. It usual policy to release reserve credit with some freedom in the fall se on account of crop-moving demands and the increased activity of business, and when it is considered that each dollar of reserve credit may become the basis of \$10 to \$20 of other bank credit, it is evident that the entire credit situation is likely to be affected.

Moreover, if the reserve banks were to shut up tight and not i other dollar of credit, brokers' loans might continue to increase, if the rates offered were high enough to attract credit from other uses. In time of

scarcity the highest bidder gets what he is after.

There is elasticity in the use of credit in all quarters, particularly over limited periods. Nearly every locality can practice economy in the use of credit for a time, and with money lending in Wall Street at 6, 7 and  $7\frac{1}{2}$ % interest there has been a strong inducement to do so. have and an inducement to restrict or discourage home borrowings and corporations to trim or postpone expenditures for a time. Savings, profise and other free funds, which normally would be going into permanent in vestments, are to some extent, attracted to the stock market for investment or loan. Bond flotations have fallen off, and the banks, which have been steadily accumulating bonds since 1922, have turned sellers this year, and have disposed of probably \$600,000,000 to \$700,000,000, to set free

funds to meet the decline of deposits and for use in the short term market. We have an illustration of the influence of these high rates in the effect upon Canadian funds. The Canadian banks usually draw considerable gold from this country in the crop-moving season, last year \$25,000,000 from September to December; this year with the largest crop in her history they have taken none, and a recent statement of the Canadian banks has shown over \$300,000,000 loaned on call in foreign countries, the largest sum they ever reported, and the greater part of it undoubtedly in New

Credits have been transferred here from other countries in various ways, attracted by the high rates, and part of the gold which went abroad last year is now coming back, from Argentina and Great Britain. These countries don't like to give it up. They are now back on a gold basis, and they need what gold they have as the basis of credit. There is little reason to doubt that so far as productive purposes are concerned their needs are greater than ours

So there is nothing remarkable in the fact that under the inducement of high interest rates money has been available in increasing amounts for brokers' loans. This, however, does not nullify the fundamental change in the situation. This country is still on a gold basis and gold is required in increasing amounts if bank credits are to continue expanding, although it is true that we make a little gold go a great way. Nevertheless, the great period of accumulation has run its course. We may get more, but we will have to maintain high interest rates here in order to get and to keep it, and it is a question whether the game is worth the candle.

It is to be remembered that high interest rates signify more than the effects upon whoever pays them; they signify that a competitive situation exists, that a selective process is going on, that somebody who would like to use credit is not getting it. That means a check upon activity and a restriction of purchasing power somewhere, and in the long run that is not good for business, or good for the corporations whose stocks are in the

It is said that the situation is artificially tight and that the Reserve banks should loosen up credit. They have, it is said, 65% of reserve, which is abnormal and unnecessary. Reference is often made to the gold certificates in circulation, which might be taken into the reserves.

The Reserve authorities reply that they are forbidden to lend for any but commercial purposes, and that the terms and spirit of the Reserve act clearly make evident that the resources of the system were not to be

drawn upon for investment or speculative purposes.

The stock market people have said in effect: "We don't ask you to supply credit for our operations; all we ask is that from now on you supply all the credit needed for business purposes and leave the rest of the money "We don't ask you to and credit to us." Of course, that would be farcical. The money market is not divided into water tight compartments and Reserve credit cannot released for any purpose without to some extent affecting all divis of the market. Its release for one purpose may set free credit for a wholly different purpose, and in the last analysis if the Reserve banks intend to control their reserves they must control them absolutely, and business of all kinds must adjust themselves to the conditions.

It is sometimes said that the public never will submit to autocratic control of bank credit, but that is precisely the purpose for which the Reserve system was established. We had no central control over bank credit for many years, and the system broke down completely, again and again, for want of it. The old system was intolerably weak and incompletely and the Edward Property of the control o petent, and the Fderal Reserve system was established for the purpo creating a final banking authority, outside of the competitive conditions which hamper the management of other banks, this central authority to be vested with control of a final reserve fo credit, not to be drawn up for either investment or speculative purposes, but to be used only for the support of regular industry and trade, and above everything else to main-

tain the integrity of the currency.

As to the 65% reserve a great deal of misconception exists. It is 65% of the demand liabilities of the Reserve banks themselves, but practically it is the only reserve for all the member and non-member bank deposits in the country and for a great part of the currency. When the Reserve banks were established they undertook to supply currency to member banks and the latter were relieved from the requirement of carrying other reserves. If all the gold in the Treasury was combined with the reserves of the Reserve banks the total sum, measured against all demand liabilities would give not 65% but about 6.5%. The percentage of our banking and currency system to-day is not materially different from that of the Bank of England, and the reserves of the two systems are lower in proportion to liabilities than those of any other important banking system in the world. It is not true that our reserves are abnormally high.

ong, amply strong for any demands that conceivably may be made upon them-for the banks are strong in the confidence of the public, which is the main thing. They ought to be kept strong, and they ought not to be criticized for

conservative policies

I repeat that the Reserve system was established to be a final authority within its field. That field does not include the credit operations of the member banks within their own resources. The resources of the local banks, member and non-member, are far greater than they were before the Reserve system was established, and those banks are as free as they ever were, until they begin to draw upon Reserve system resources.

they do that they are bound to conform to the policies of the Res When they are using Reserve credit that credit is indisinguishable from their own, and it cannot reasonably be claimed that a member bank is justified in applying for Reserve credit for the purpose of either directly or indirectly supplying credit for purposes which are distinctly outside of the scope, and in contravention of the authority of the Reserve act.

member bank to do that is to be disloyal to the system, to barrass its policies and to contribute so far as a single member can to the defeat of the purposes for which the system was established.

The Reserve system was established to give protection and stability to the credit situation in the interest of all business, and it would seem to be an unanswerable proposition that all banks and all business should support

the policies of the system and cooperate to make them effective.

There is another obvious reason, based upon ordinary considerations of prudence, why member banks should not borrow Reserve credit for forbidden purposes. It is unsound banking, because they are sacrificing their They all have enough ineligible paper, without going into debt to acquire more. Their eligible paper is practically their only reserve. It is the means by which they have recourse to the Reserve bank to take care of any emergency demands which may come upon them. Hundreds of member banks in the West and South have failed since 1920 because they did not have eligible paper; surely it is folly to go into debt and give up eligible paper to do so, no matter how good it may be.

If the present credit situation is not artificial, in the sense of being planned and arranged, there certainly are anomalies in it. It is not the usual thing to have money supplied at 5½ to 6% for commercial purposes, while bringing 6 to 7½ and sometines 8, upon good stock exchange colleteral. The explanation, however, is simple enough: The one is eligible paper, which can be passed up, if desired, to the Reserve bank, and the other is Furthermore, there is the fundamental difference, that the one class of paper represents productive uses and the other does not. tries and business of the country must be carried on; they are the basis at last of even stock exchange values, and it is important that their needs

shall be supplied at reasonable prices.

On the other hand, what difference does it make, in any public sense whether A or B owns certain stocks, or whether a transfer from one to the other occurs at \$100 or \$200 per share. What difference does it make that the level of stocks is what it is to-day instead of what it was one year ago, except that the rise has tied up a lot of credit and so increased the cost of credit for all uses. The rise has not increased the assets of the corporations, or lowered their production costs, or increased their earning power or increased the real wealth of the country. It has resulted simply in a revaluation on paper, largely in anticipation of future developments. Surely it cannot be contended that the benefits of such a revaluation at this time can be compared with the benefits to be derived from keeping the regular business of the country in motion.

The situation is that the banks have been giving the preference to regular business, and letting the stock market have, from day to day, wha had to spare of available funds. That has not been enough to satisfy the stock market demand, and the market has been bidding vogorously for The market, and not any outside authority, has been making the rate, and doing so because the current rates have been necessary to attract the supply of credit wanted.

Another anomaly is that the price of credit for short collateral loans is now far above the rate upon long term investments. permanent situation. The banks now hold over \$10,000,000,000 of investments, most of them bonds which it is safe to say pay much less than the current rate on brokers' loans. This disparity could not exist for long if the opinion was general that brokers' loans would continue to take an indefinite amount of credit at present rates.

Ordinarily there is a fairly definite relationship between interest rates in the several divisions of the money market, but at this time the rate for brokers' loans is far out of line with rates for long term investments, and yet in the long run these stocks and bonds in the market must be taken by

somebody for long term investments.

Furthermore, it is agreed that originally the main factor in the rise of stock and security prices was the decline of interest rates. What does this change of rates mean. Are all interest rates to be permanently higher. If so, how can the present level of stock and security prices be maintained, and if not, where are the new supplies of credit coming from to bring them

Of course, we are familiar with the argument based upon the increasing wealth of the country, and the multiplied number of investors. It is good as far as it goes, but see just how far it goes. The increasing wealth can have bearing on this situation in just two ways, to-wit: as it produces a flow of purchasing power and as it can be made the basis of bank credit. It cannot be made the basis of bank credit except as we have increasing The flow of income is all right, but the difference between the present situation and that which we have become used to in recent years is that heretofore we have had the flow of income, plus \$10^.000,000 of bank credit for each \$5,000,000 or \$10,000,000 of gold imports, while now it looks as though our purchasing power is to be reduced to current income with perhaps a comparatively small annual addition to the gold

## George L. Harrison Appointed Governor of Federal Reserve Bank of New York Succeeding the Late Benjamin

Announcement was made yesterday (Nov. 23) of the appointment of George L. Harrison as Governor of the Federal Reserve Bank of New York, succeeding Benjamin Strong, whose death was noted in our issue of Oct. 20, The Reserve Bank's announcement follows: page 2170.

At the meeting yesterday (Nov. 22) of the directors of the Federal Reserve Bank of New York, George L. Harrison was appointed Gov-ernor of the bank to succeed Benjamin Strong. Mr. Harrison has ernor of the bank to succeed Benjamin Strong, Mr. Harrison has been associated with the Federal Reserve System since its organization in 1914. He served first as Assistant General Counsel and later General Counsel of the Federal Reserve Board. Since 1920 he has held the office of Deputy Governor of the Federal Reserve Bank of New York and in that capacity had charge at first of the cash and collection functions of the bank, and more recently of relations with foreign banks and gold operations.

In addition to the Bank's announcement Gates W. McGarrah, Chairman of the Board of the Bank, issued the following statement:

It gives me great pleasure to announce the appointment of Mr. Harrison as Governor of the Federal Reserve Bank of New York,

As Deputy Governor he has demonstrated to the directors his ability and thorough knowledge of all the operations of the Federal Reserve System and it is a matter of gratification to the directors to be able to announce the appointment of one so well qualified for the office.

The Bank also issues the following with reference to Mr. Harrison's career.

Mr. Harrison was born in San Francisco, California, on January 26, 1887, the son of Colonel George F. E. Harrison, at that time stationed at San Francisco as military instructor at the University of California, and Mary Ray Harrison. He prepared for college at the Western High School at Washington, D. C. He was graduated from Yale in 1910 and from the Harvard Law in 1913. While at Harvard he served as associate editor of the Harvard Law Review. Following his graduation from law school he served for a year as legal secretary. his graduation from law school he served for a year as legal secretary to Justice Oliver Wendell Holmes of the United States Supreme Court, and in the fall of 1914, two weeks before the opening of the Federal Reserve Banks, he was appointed Assistant General Counsel of the Federal Reserve Board. He serve din that capacity until he went abroad in 1918 with the American Red Cross as Captain and Assistant abroad in 1918 with the American Red Cross as Captain and Assistant Zone Commander of the French Zone. On his return to this country in 1919, he was appointed General Counsel of the Federal Reserve Board. He left Washington in 1920 to become a Deputy Governor of the Federal Reserve Bank of New York. From 1920 until 1926 he had charge of the cash and collection functions of the bank, which include more than half of the personnel of the bank. As the relations with foreign banks of issue became increasingly important in connection with the credits extended by the Federal Reserve Banks to these banks of issue, Mr. Harrison then devoted a large proportion of his time to these operations, including the gold transactions handled by the bank. Since 1920 he has acted as secretary to the Conference of Governors of all the Federal Reserve Banks, meetings of which are held semi-annually in Washington. In connection with the foreign operations of the bank, he has made a number of trips abroad in recent years and conducted a number of the negotiations which led eventually to the extension of credits by the Federal Reserve Banks to foreign banks of issue to aid in monetary stabilization abroad. He was with Governor Strong on his last trip abroad in the summer of 1928. of 1928.

#### President E. C. Mitchell of National City Bank On Appointment of G. L. Harrison as Governor of New York Federal Reserve Bank.

Regarding the selection of George L. Harrison as Governor of the Federal Reserve Bank of New York, Charles E. Mitchell, President of the National City Bank, said:

"In view of his recognized understanding of central banking both here and abroad, his close association for the past six years with Benjamin Strong, and his pronounced strength in personality, the public will regard with satisfaction the selection of George L. Harrison as Governor of the Federal Reserve Bank of New York."

#### Governor Roy A. Young of Federal Reserve Board In Address Before National Grange Appeals for Retention of Federal Reserve System Solely as Credit Structure.

The Washington correspondent of the New York "Journal of Commerce" on Nov. 20 stated that industry and finance, where speculatively inclined, received another warning on that date from Governor Roy A. Young of the Federal Reserve Board, coupled with the suggestion that some constructive advice on the subject of inflation was obtainable from the agricultural industry. Further reporting Gov. Young's declarations on the subject the account went on to say:

Speaking before the National Grange, Governor Young explained the mechanics of banking as it involves the Federal Reserve System. Earlier in the day Senator Charles Curtis of Kansas, Vice President-elect, discussed farm relief legislation.

"Of late," Governor Young told his audience, "we have heard a great deal about speculative credit. This particular kind of credit is not unknown to your industry, as you had your experience with inflated values several years ago. You have learned that the intelligent use of credit is advantageous, and you have also learned the results of the values several years ago. You have learned that the intelligent use of credit is advantageous, and you have also learned the results of the indiscriminate use of credit.

"Those who today in other fields are speculatively inclined, I believe, can well afford to stop and reflect, and if the present speculative situation is comparable to that of agriculture nine or ten years ago they can well seek advice from your industry rather than from some of the sources they are now using."

Governor Young stated that there is little, if any, speculative credit used in agriculture now. He explained the methods by which agriculture is added in the production and marketing of its products; how the

ture is aided in the production and marketing of its products; how the money needed for these purposes comes from the system through member and non-member banks to the farmer. He declared that the mechanics of all of this is not thoroughly understood by the non-member banks and therefore not appreciated, but he stated he felt sure that as time goes on "it will be understood and thoroughly appreciated by them."

He explained that experience had shown that the additional seasonal Reserve credit needed between August 1 and December 31 of each year amounts to approximately \$300,000,000. There is some lack of knowledge, he said, as to how this money goes into productive industry and edge, he said, as to how this money goes into productive indus as to how the farmers are otherwise aided by the Government. Не теferred to the establishment of the Federal Intermediate Credit banks, whose credit ordinarily is secured by issuing and selling debentures.

"Occasionally a situation arises wherein the managers of those insti-"Occasionally a situation arises wherein the managers of those insti-tutions cannot sell their obligations quickly and advantageously to the American public," he explained. "A tight money situation did exist this fall, with the result that the Reserve system, through various Fed-eral Reserve banks, purchased debentures from the Intermediate Credit banks and also discounted some of their obligations. This assistance is of a temporary nature, but it has enabled the Intermediate Credit banks to dispose of their debentures in an orderly and systematic way.

This assistance upon the part of the Reserve banks was beneficial and

appreciated. He cited cited illustration designed to point out the inconvenience that would develop if credit anywhere along the line should fail to function, also that the Reserve system holds what might be termed a keystone

also that the Reserve system holds what might be termed a keystone credit position nationally and internationally.

"Through Congress the people have given themselves in the Federal Reserve system a wonderful credit structure, not only for the benefit of the agricultural industry but for all industries," Governor Young declared in conclusion. "It is, however, a credit structure and, in my opinion, should not be made anything else. Many people have criticized it adversely, but please remember that it was created by human beings, it beings operated by human beings, and human beings sometimes errors. it adversely, but please remember that it was created by human beings, is being operated by human beings, and human beings sometimes err. Generally speaking, however, I feel it has functioned as well as was humanly possible. Many people have overestimated its powers and many others would like to add to it responsibilities which are not directly related to credit and finance. I appeal to the National Grange to do everything in its power to retain the Reserve system as a credit structure and a credit structure only."

Senator Curtis, in addressing the Grange this afternoon, declared he believed that Congress would properly deal with the farm situation; that

believed that Congress would properly deal with the farm situation; that he had not lost faith in its ability to work out a constructive program provided the subject was approached openmindedly after informal con-

ferences with Congressional leaders.
"I simply pledge to you my support for such legislation which might be enacted that will bring to agriculture the relief it is entitled to," he declared in his remarks, made brief because of the condition of his throat.

#### Secretary Mellon Reported As In Favor of Discontinuance of National Bank Notes.

While declining to directly express his views, Secretary of the Treasury Mellon on Nov. 22 is reported in the "Journal of Commerce," to have given the distinct understanding that he does not favor the continuance of national bank notes as a permanent part of the national currency system. We quote from a Washington dispatch to the paper named, its advices (Nov. 22) continuing:

Mellon, however, indicated he probably would simply call the attention of Congress that some action should be taken relative to the national bank currency, since the Consol Bonds, of which \$599,724,050 are out-

While the bonds do not mature until April 1, and there will be the last session of the Seventieth Congress, probably a special session and then the first session of the Seventy-first Congress prior to that time, Mellon feels that some action should be taken far enough in advance for the benefit of the bankers.

There is a difference of opinion among the national bankers as to

There is a difference of opinion among the national bankers as to whether the currency should be continued. It is generally felt here that the bankers as a rule favor the use of National bank currency for a number of reasons. Mellon pointed out that the National bank currency furnished a supply of money to the Government at somewhat less cost than would be the case if this system did not exist.

on the other hand, on the Secretary's behalf, it was shown that the National bank notes are really not a suitable part of the currency system and that if it had not existed at the time the Federal Reserve Act was enacted, "never would have been established." This not system is not quite in line with the American idea of currency, according to Mr. Mellon.

At the time the Federal Reserve Act was passed in 1914 it was contemplated that the Government would do away with the National bank notes gradually. To wipe out this currency at once would have been notes gradually. T unwise, it was felt.

However, as fourteen years have elapsed and with \$700,000,000 National bank notes still in existence, Mr. Mellon considers that it is time to call on Congress for some definite action.

If Congress decides that the National bank notes to be retained as a permanent part of the currency system, the Treasury Department will ask for authority to reduce their size to that of the new paper money which will "go on the market" next July. It is considered improbable that this will be done at the present Congress, however, as no immediately considered that the present congress, however, as no immediate that the present congress, however, as no immediate the present congress and the presen ate action relative to the National bank currency is anticipated.

Should Congress decide to go into the National bank currency situa-tion it was anticipated that extensive hearings would be held and that officials of the Reserve Board, Reserve Bank Governors and Treasury officials as well as prominent National bankers would be called on to give testimony as to the advisability of discontinuing or maintaining

this currency.

The Consol Bonds which back up the National bank currency draw 2% interest.

#### Resignation of J. W. McIntosh as Comptroller of the Currency-J. W. Pole Named as Successor.

Announcement was made on Nov. 20 of the resignation of Joseph W. McIntosh as Comptroller of the Currency, and the appointment by President Coolidge of John W. Pole of Cleveland, Ohio, as successor to Mr. McIntosh. The Treasury Department's announcement says:

Mr. Pole's active and executive experience in banking has been continuous for the past twenty-three years. His banking career began in an executive capacity with the First National Bank of Decatur, Alabama, and continued in that and other banking institutions for more than ten years.

After the establishment of the Federal Reserve system, Mr. Pole became identified with the Comptroller's Office and was appointed Chief National Bank Examiner of the Sixth Federal Reserve District. At the beginning of the Dawes Administration as Comptroller of the Currency, he was designated Chief National Bank Examiner of the entire United States and in this capacity he has served until the present time. an extremely wide and intimate acquaintance with bankers throughout the country and his training and experience have made him especially fitted for the office to which he has been appointed.

President Coolidge, in expressing his appreciation of the services rendered by the retiring Comptroller, addressed him as follows:

"Hon. J. W. McIntosh, Comptroller of the Currency, Washington, D. C.
"My Dear Mr. McIntosh:—I have your letter of Nov. 17, tendering
your resignation as Comptroller of the Currency, and hereby accept it,
to take effect on the appointment and qualification of your successor.

"In accepting your resignation I want to take this opportunity of expressing to you my deep appreciation of a valuable service you have rendered to the government in the important post which you are now relinquishing, and my best wishes for your success in the future. Very truly yours, CALVIN COOLIDGE."

Mr. McIntosh, in submitting his resignation, wrote Secretary of the Treasury Mellon as follows:

"My dear Mr. Secretary:—I hand you herewith my letter of resigna-tion, addressed to the President of the United States, which, if you will, I shall appreciate your sending to him on Monday morning.

"May I at this time express to you my sincere appreciation for the

opportunity of serving under you and for the many evidences of confidence and friendship which you have shown in the four years of my incum-

bency of this office.

have many regrets upon leaving the office which I occupy and it would have given me great pleasure to have served out my full term. However, as I explained to you, after ten years of public life in Washington, I feel that I have reached the age where I must give some attention to my private affairs.
"My contact with you I consider a great honor and one which will be remembered with pleasure all my life."

In reply Secretary Mellon said:

"My dear Colonel McIntosh:—It is with a feeling of very genuine regret at I receive your resignation as Comptroller of the Currency. I know that for some time past you have retained this office at a personal sacrifice, and I cannot let this opportunity pass without expressing to you my sincere appreciation of the services which you have rendered to the Treasury and to me.

"At the time you assumed office nearly four years ago, the banking situation in some sections of the country was in an unsatisfactory and somewhat insecure condition. Since that time this situation has shown marked improvement; and this is due in no small measure to the constructive efforts and the sympathetic attitude which you have shown toward the banks in helping them to work out their difficulties. In your conduct of all matters of which you have had charge, you have shown yourself intelligent, efficient and loyal, and I shall always look back with pleasure on our association together in the work of the Treasury."

Mr. McIntosh, who had previously been Deputy Comptroller, was appointed Comptroller in December 1924.

#### Proposal Advocated By President-Elect Hoover for Creation of \$3,000,000,000 Construction Reserve Fund To Stabilize Employment Presented At Conference of Governors in New Orleans.

At the Conference of Governors in New Orleans on Nov. 21, a plan for the creation of a \$3,000,000,000 reserve fund for the promotion of construction work in dull periods was brought forward by Gov. Ralph O. Brewster of Maine. According to a New Orleans dispatch to the "Times" Gov. Brewster stated that he offered the plan at the request of President-elect Herbert Hoover, as an authorized exposition of a part of his program for the reduction of unemployment. The dispatch indicated that Mr. Hoover's authorization for placing the proposal before the Governors was given to Governor Brewster within the last week and was sent to him by telegraph. As to the reported basis of the proposal we quote the following Boston advices Nov. 21 to the "Times."

The plan for a nation-wide construction reserve to be held for use ine pian for a nation-wide construction reserve to be held for use in times of unemployment and overproduction which was announced before the Conference of Governors at New Orleans today as advocated by President-elect Hoover is based on a plan put forth by William T. Foster of Newton, head of the Pollak Foundation for Economic Research, and Waddill Catchings, New York banker, in their book, "The Road to Plenty."

Mr. Foster, who is widely known as an economist was in New York banker, in the policy of the New York banker, in the New York banker

Mr. Foster, who is widely known as an economist, was in New Orleans today at the request of President-elect Hoover, to assist Governor Brewster in presenting the plan.

The Foster-Catchings theory, developing the relation of the construction industry to sustained prosperity, created doubt among some construction to the construction of the const conservative economists when it was first announced but recently began to find converts.

Mr. Foster is a native of Boston, worked his way through Harvard, graduating near the head of a class of 600, became an instructor at Bates College and later at Bowdoin, and in 1910 accepted the presidency of Reed College of Portland, Ore., remaining there ten years. He took up the work of the Pollak Foundation in 1920. Previous to the publication of "he Road to Plenty" he wrote several other books dealing with economic subjects.

A. Lincoln Filene, speaking today at a building congress meeting in place of Mr. Foster, expressed the opinion that in a few years the Foster building reserve system would be actually applied.

As an example of the present building system, Mr. Filene pointed out that the new Boston post office was being constructed in a prosperous time with the stock market continually rising, instead of a dull He advocated an annual budget among the New England building trades to boom business and provide for the interchange of ideas.

In stating that the Governors attending the conference declined on Nov. 21 to endorse the proposal by resolution, Associated Press accounts from New Orleans on that date said that at the request of Governor Brewster the conference considered his proposal of endorsement in an executive session. At its conclusion it was announced

officially that no action had been taken as it was not a policy of the conference to adopt resolutions.

From a New Orleans dispatch Nov. 22 to the New York "Evening Post" it is learned that seven of the Governors at the conference have agreed to place the proposal in force in their respective commonwealths.

With reference to the proposal the advices to the "Times"

Nov. 21, said:

As outlined by Governor Brewster, the procedure provides for the cooperation of Federal and State governments in controlling construction work for the public good so "that a reserve may be prudently

accumulated in time of plenty against the lean year that is to come."

"The economic foundation of this policy," said Governor Brewster, "and the specific ways of putting it into operation were expounded by William T. Foster and Waddill Catchings of the staff of the Pollak Foundation for Economic Research."

Indeed, the process! public surface would store up a receive of

Under the proposal public authorities would store up a reserve of construction projects equal in cost to two years' normal expenditure on improvements and release this reserve at times of unemployment. Such a fund, Governor Brewster said, would be one of the best forms

Such a fund, Governor Brewster said, would be one of the best forms of insurance against national panics.

"These views of the way in which the States and other public authorities may cooperate with the Federal Government in controlling in some measure construction work for the common good," Governor Brewster began, "are presented to the Conference of Governors at the request of Herbert Hoover as an authorized exposition of a portion of his program for stabilizing the prosperity fo the United States."

He continued:

"In requesting the presentation of this project to the Conference of Governors Mr. Hoover emphasized the importance of establishing cooperation between Federal, State and municipal governments in accordance with the proposals outlined at the time of the unemployment

conference in 1922.

"With an annual expenditure of \$7,000,000,000 upon construction, America is in a position to stabilize prosperity to a most remarkable extent. Public authority spends more than \$1,500,000,000. With this we are here primarily concerned."

"Private business will soon follow such practical demonstration as the government may make. This may apply not only to construction, but to the renewal and extension of capital facilities of every sort.

"It is the considered recommendation of the one who has received the overwhelming mandate of the American people to guide and quard

the overwhelming mandate of the American people to guide and guard their progress in the next four years that a construction reserve may prudently be accumulated in time of plenty against the lean year that

is to come.

"This involves simply the provision of the necessary funds or credit to be released when indexes shall indicate the need, and such designation of projects as may commend itself to the authority concerned."

Governor Brewster assured his hearers that no infringement of legislative prerogatives was contemplated, because no project could be carried out except as the Legislature might direct, although the rapidity of the construction program within defined limits could be accelerated or retarded to synchronic with national and local needs.

"Insurance Against Panics"

"The creation of such a construction reserve," the Maine executive went en, "is one of the best forms of insurance against the panics of our past. It may be a cure-all but it certainly will alleviate our ills. In some measure it is possible to do for employment what the Federal Reserve system has done for finance and with equal advantage to the country as a whole.

"Picture the approach of an economic crisis with unemployment threatening on every hand. The release of \$3,000,000,000 in construction contracts by public and quasi-public authorities would remedy or ameliorate the situation in the twinkling of an eye. Federal indexes are already becoming available that remove the problem from the domain of speculation or opinion and place the need upon a basis of simple facts.

"No centralization of authority is proposed, but merely the creation of a condition by concerted action that shall make possible a remedy that will appeal persuasively to all. Follow the flow of those \$3,000,000,000 to the contractor, to the laborer, to the material men, to the factory, to the factory employes, to the merchants, to the farmer. It goes like the house that Jack built and unemployment is at an end."

Lator advices (Nov. 22) from Now Orleans to the same

Later advices (Nov. 22) from New Orleans to the same

paper stated:

Governor Brewster explained today that Mr. Hoover's plan was predicated on the establishment of fact-finding agencies, the duty of which it would be to ascertain the state of the nation's business. If indications showed depression near, large sums would be released by Federal and State agencies, large numbers of men would be put to work on construction of buildings, roads and public supplies and the expected depression would be avoided.

Agreement among the various authorities concerned on the basis for proper fact-finding would be one of the first problems to be solved,

said the Governor.

Such agreement would mean legislation by Congress and the several States. He was confident that the legislation would be authorized.

He went on:
"Of course these things cannot be made effective overnight or in a few months. Moreover it will be necessary for the several States to handle matters in their own way and in accordance with their needs. It will be for the Governor and legislators to make such recommendations for laws as they deem necessary. It will also be necessary to educate the public. It is not generally known that two States have programs in accord with that proposed. They are Pennsylvania and California.

"The whole thing is in line with the modern tendency of business President Hanrahan of the Boston & Maine Railroad recently told me that he had been asked by one of the directors why, in time of depression, he had not reduced his maintenance of way expenditures. He replied that that was the time to increase them."

The proposal received attention at the annual Convention of the American Federation of Labor, also in session the present week at New Orleans, William Green, President of the Federation, stating (we quote from the "Evening Post") that the program is a full and complete indorsement of the wage policy of the organization. The "Post" advices Nov. 22 likewise said:

So important did the convention deem the Brewster speech that it was read to the delegates and made a part of the proceedings of the convention. "This morning an event took place," declared Mr. Fry, (Secretary of the Metal Trades Department) "which, in addition to placing the stamp of approval upon our basis for wages, also constituted what may be turning point to the history of American industry and the relationship we have to it.

"At a conference of Governors, Governor Brewster delivered an address which was of outstanding importance to our welfare, as well as the total the country of which was of a whole Covernor Brewster as well as

that of the country as a whole. Governor Brewster's address dealt with the question of under-consumption due to insufficient wages and idleness. Its substance was not only a complete indorsement of our trades union basis for wages, but in addition was an indorsement of one of the policies of this Federation for the purposes of relieving and preventing unemployment.

"Of greater significance than the approval of this address by the Governors conference was the fact that President-elect Hoover authorized Governor Brewster to make the statement. The economic understanding of the relationship of wages to the prosperity of industry and

commerce which we have expressed has now received the authorized approval of the President-elect of the United States.

"I saw the speech of Governor Brewster before it was delivered. If it had been delivered before the election, you can readily understand and appreciate its significance.

"My statement here this afternoon was read by Governor Brewster, so that the looking up of our efforts in the wage question has the approval of the man who made that address before the Governors. This is the first time in the history of any country that the Chief Executive of a nation and the Chief Executives of the States have indorsed the philosophy and understanding and principle of the wage problem, which the wage earners have worked out."

#### Forthcoming Treasury Issue - The Following Preliminary Notice of a Forthcoming Treasury Offering Was Issued Nov. 22 by the Federal Reserve Bank of New York.

#### FEDERAL RESERVE BANK OF NEW YORK

Circular No. 891, November 22 1928 New Treasury Issue

Preliminary Notice of Offering and Methods of Filing Subscriptions To all Member Banks, State Banks, Trust Companies and Savings Banks in the Second Federal Reserve District:

From advices received from the Treasury Department of the United States, this bank is enabled to transmit to banking institutions in this district the following information:

1. That a Treasury offering may be expected shortly.

2. That the subscription may be closed by the Treasury without advance notice, and therefore,

3. That each subscribing bank, upon receipt of information as to the terms of the Treasury offering (either in the press, through the mails or by telegram) should promptly file with the Federal Reserve Bank any subscriptions for itself and its customers. This is important, as no guarantee can be given as to the period the subscription books may remain open, and subscribing banks, even before receipt of official subscription blanks, may file their subscriptions by telegram or by mail with the Federal Reserve Any subscriptions so filed by telegram or mail in advance of receipt by subscribing bank of subscription blanks furnished for the particicular issue should be confirmed immediately by mail, and on the blank provided, when such blank shall have been received.

4. That if the terms of the offering when announced provide for both cash subscriptions and subscriptions for which payment may be tendered in other securities, the subscribing bank should prepare its subscriptions in such manner as to indicate the method by which it proposes to make payment and the respective par amounts of securities, if any, to be tendered in payment.

## Classification of Subscriptions, Etc.

Bank Customers' Subscriptions: With regard to issues, subscriptions to which the Treasury determines for the purpose of allotment shall be considered as on a cash basis irrespective of whether or not payment is to be made in cash or in securities, the following classification will be required of subscriptions made for account of customers, stating the number of subscriptions

Class A—Subscriptions for \$1,000 or less for any one subscriber; Class B—Subscriptions for over \$ 1,000, but not exceeding \$ Class C—Subscriptions for over \$ 10,000, but not exceeding \$ 1,000, but not exceeding \$ 10,000, but not exceeding \$ 10,000; 50,000: Class D—Subscriptions for over \$ 50,000, but not exceeding \$ Class E—Subscriptions for over \$ 100,000, but not exceeding \$ 500,000; Class F—Subscriptions for over \$ 500,000, but not exceeding \$1,000,000;

Class G—Subscriptions for over \$1,000,000.

Where the maturing securities are not by the instructions accompanying the offering given a preference they shall be treated as cash and such sub-scriptions to be paid for in securities should be included in the classification.

Bank Subscriptions—A subscription for a bank's own account should not be included in the above classification of subscriptions for account of customers but should be clearly indicated as for the bank's own account and in addition to subscriptions for customers.

Subscriptions Not Classified .- Where under the terms of an offering or under instructions accompanying an offering, the Treasury agrees to allot new securities in full for any of its securities maturing on the date of the new issue or on any later date, subscriptions to be paid for in such securities should not be classified.

#### Application Forms to be Furnished.

When the terms of the offering are announced, notice thereof, together with subscription blanks, will be mailed promptly by this bank to banking institutions in this district. Should notice and subscription blanks for any reason be delatyed in reaching such institutions this bank will nevertheles receive subscriptions either by letter or telegraph. It is suggested that subscriptions be promptly transmitted to this bank.

It it be found necessary to telegraph subscriptions they should be confirmed immediately either by letter or on subscription blank, setting forth the classifications indicated above and method of payment, and clearly stating that the confirmation is not an original subscription so that duplication may be avoided.

> Very truly yours GATES W. McGARRAH, Acting Governor

#### President Coolidge on the Farm Problem-Declares Aid to Co-operatives-Sound Farm Policy.

Addressing the annual convention of the National Grange at Washington on Nov. 16, President Coolidge referred to the co-operative movement as "sound in theory" and, he added "when conducted in a businesslike way offers the most promising solution of the great marketing problem.' The President went on to say that "it avoids any attempt at price fixing or putting the Government into business, both of which would be fatal to the independence of the farmer and in the end would bring disaster. It likewise," he added, "avoids the hazardous proposal of a subsidy, which the American people would never be willing to pay for any length of time. It rests on the sound merchandising principle of taking the product and disposing of it in the most advantageous way that shrewd and orderly marketing affords." He likewise said that "such further assistance as is necessary to render this effort effective through setting up a board for its administration, supplied with sufficient funds to demonstrate its soundness in its experimental stage, may well be

provided by the national Government."

The President in his address reviewed the measures undertaken by the Government in behalf of the farmer since 1920. In instancing what had been done he mentioned the enactment of the Emergency Tariff Act, passed, he said, especially for the benefit of agriculture, and which had been followed up by the permanent tariff measure of 1922." He noted that "the passage of these laws at once restored the sheep industry and kept the great dairy industry in a prosperous condition. He furthermore said that "in framing both these measures the advice of the representatives of the farm organizations was not only sought but the rates of duty on agricultural products were fixed in accordance with their recommendations." In stating that "it has been asserted that if we removed our duties on imports foreign manufacturers would sell more goods in this country which would enable them to purchase more of our agricultural products," the President observed that "about 65% of our importations now come in free of duty." "Suppose," he said, "we removed the tariff on some of the balance. It is assumed in that case that foreign countries would send in imports. If that were done," he continued, "our own factories would close and our people would be out of employment. Such a result has never helped but always injured agriculture. If this did not occur, it would mean that our wages and profits must be reduced to meet foreign competition, in which case there would be no imports and, according to the argument, no additional sales of farm produce abroad." The President spoke, among other things, of the financial help to agriculture through the War Finance Corporation, the Intermediate Credit Banks and the Federal and Joint Stock Land Banks, and the assistance to the co-operative movement through the Capper-Volstead Act and the creation of a Division of Co-Operative Marketing in the Department of Agriculture. In con-cluding his address, the President said:

The profound interest of the Government is demonstrated by the fact that it is doing more for the agriculture of the nation than any other Government does or ever did. But we are still far from perfection. Much remains to be done. But as we consider the progress that has come during the life of the National Grange we have every reason to expect that further improvement will be still more rapidly made, to the end that life on the farm may be broader, fuller and richer.

The address in full follows:

Ladies and Gentlemen:

The last half century has seen many organizations formed in the name of agriculture, usually to relieve some local or national distress. When conditions have improved the organization has dissappeared. But the National Grange, having a much broader basis, has continued without interruption a long and useful existence.

The main reason for this has been the sound foundation on which it stands. It has not devoted its efforts to the treatment of local and temporary symptoms, but with a wider and more penetrating view it has sought to eradicate causes. It has been interested in securing prosperity, improving living conditions and encouraging education; but primarily it has stood for the development of the men, women and children of the farm in intelligence, character and moral worth. Realizing that these are the most important products of life in the open country, it has never are the most important products of life in the open contact, falled to place upon them its main emphasis. Based on this need, which goes on alike in prosperity and adversity, while other organizations were committing their life and thier reputation to the promotion of panafor the relief of all the ills of the farm. some of which have been tried, some rejected and some proved a delusion, the Grange has continued to hold a sound and conservative position and to grow steradily in influence and in the public estimation. It has been an inspiring example to the other successful farm organizations now in existence.

When its activities began the farm was isolated, highways were bad educational facilities were poor, labor-saving machinery on the land and in the home were scarce, social life was almost entirely lacking. Grange has steadily given its support to the movement for better roads and better schools, to developing agricultureal colleges and experiment stations, organizing the National and State Departments of Agriculture It is entitled and to the general improvement of life in the farm home. to great credit for the vast improvements which the last fifty years have

In its early days the influence of the National Government upon agriculture was indirect and remote. It had the sale of the public lands through which it opened up the agricultural domain of the Middle West, and it did something to encourgae land and water transportation in those areas. But it was not until the agricultural colleges and experiment stations were established in 1862 that the Federal Government began directly and specifically on a consideral scale to contribute to the encouragement and improvement of agriculture.

The Department of Agriculture with a seat in the Cabinet began or a very modest scale. It is now made up of many bureaus employing about 22,700 persons, having agents in all parts of this country and some abroad giving special attention to the culture of every tring that grows on the land and to all kinds of domestic animals, promoting ducation, supervising production, transportation and marketing, building roads, protecting health, regulating grain exchanges and packing industries, and expending about \$155,000,000.

All of this has been of such a quiet and unobtrusive growth and development that many of our people, even though they are engaged in farming, are almost unaware of its existence. This opinion is so prevelant that it is often asserted the National Government is not doing much for agriculture. As a matter of fact, this money outlay represents only a small part of what the United States really does for the farmer.

#### Previous Eras of Farm Distress.

In common with every other business activity, this country has seen periods of prosperity and periods of depression in agriculture. Your organization has had experience with at least two eras of great distress.

Following the Civil War there was a rapid settlement of the great prairie States, resulting in so large an increase of farm products that they could find no satisfactory market, notwithstanding the vast growth of our industrial activities at the same time. Both, however, were coerating on a falling market, which culminated in the distress and the panic of the early '90s. As is always the case in time of distress, those who were afflicted were not always discriminating in their attacks and criticisms. These were particularly prevalent against the railroads, the packing houses, the grain trades, and the banks, and finally upon the United States currency.

During this period the country twice turned the two great political parties out of office sometimes voting to reduce the tariff and sometimes voting to raise it. We can see now that the fundamental difficulty was overproduction. complicated by unsound money. The United States Government was trying to fix the price of silver by law, which, of course, was bound to fail

This period ended in the last years of the century, when sound a currency law was enacted and our great industrial development began under the stimulation of the protective tariff of the McKinley Administration. This was also the period of the introduction on a large scale of farm machinery, substituting horsepower, steam power and gasoline power, and later some electric power, for man power, greatly increasing the productivity of the invidual on the farm. Scientific knowledge was also applied to both the raising of crops and live stock, but our industrial demand was so large that farm prices steadily increased until at the time of the World War their lader price was far above the index price of other commodities.

their index price was far above the index price of other commodities.

With the high prices and unlimited demand of the war period we all know what happened. A great artificial inflation took place in all kinds of property. The prices of farm products and farm land, in common with all other prices and rates of wages, reached a very high level. The farmer was called on in the name of patriotism to enlarge his production, and the spirit in which he responded was a determining element in winning the war and saving the allied nations from starvation.

#### Holds Deflation was Inevitable.

But this was followed by the drastic horizontal deflation which occurred in 1920. The loss which this brought to those who owned farm products and farm lands was stupendous. The suffering was enormous. This has sometimes been charged to the efforts made by the Government, beginning in the fall of 1919, to reduce the mounting cost of living. I thin! it is apparent now that it was bound to come in any event.

During the seasons of 1919 and 1920 the inhabitants of Europe began

During the seasons of 1919 and 1920 the inhabitants of Europe began to raise their own food and distant colonial supplies which had accumulated through lack of shipping were brought in. The needs of our own markets, left bare by the war, for the raw materials of the farm had become supplied. Deflation was bound to occur, as it always does after the inflation of a war period.

But its occurrence was none the less filled with distress. The artificial prices had stimulated overproduction. The final result was disaster, as the final result is always disaster in the vicious circle of an artificially high price and increased production. In the end, overproduction occurs, which brings the artificial price down with a crash, to the ruin of all concerned

It was this condition of agriculture with which the country has had to deal since 1920. We had more ready money than any one else, so that the products of other countries were headed for our shores. In the winter of 1921 our imports of wheat from Canada represented 40,000,000 bushels. Enormous imports of wool and other farm products were taking place.

To meet this condition the Emergency Tariff Act, passed especially for the benefit of agriculture, was enacted, followed up by the permanent tariff measure of 1922. The passage of these laws at once restored the sheep industry and kept the great dairy industry in a prosperous condition. In framing both these measures the advice of the representatives of the farm organizations was not only sought but the rates of duty on agricultural products were fixed in accordance with their recommendations. Of course, if the country adopts the policy of protection, it has to be applied not only to the things the individual sells, but also to the things he buys. This general rule, however, was almost completely suspended in the case of agriculture. Practically everything the buys for the purpose of engaging in the business of farming comes in free of duty.

Of course food and clothing pay a duty because they are made of raw farm products, but they are not peculiar to the business of farming like barbed wire, cotton gins, binding twine, threshing machines, mowing machines, plows and harrows. It is true that there is a duty of \$1.12½ on a ton of pig iron, but there is a duty of \$14 a ton on wheat and \$240

#### The Question of Import Duties.

It has been asserted that if we removed our duties on imports foreign manufacturers would sell more goods in this country, which would enable them to purchase more of our agricultural products. About 65 per cent, of our importations now come in free of duty. We afford the largest free market in the world, with the possible exception of Great Britain. Between 15 and 20 per cent. of the balance are farm products which are protected,

Suppose we removed the tariff on some of the balance. It is assumed in that case that foreign countries would send in imports. If that were done, our own factories would close and our people would be out of employ-

ment. Such a result has never helped but always injured agriculture. If this did not occur, it would mean that our wages and profits must be reduced to meet foreign competition, in which case there would be no imports and, according to the argument, no additional sales of farm produce abroad. We should only have distress and living conditions much below what they are now in our industries. This has never benefited agriculture. Whether these results in whole or in part, instead of being benefited agriculture would be injured by losing some of the best of its important domestic market.

In addition to this, it does not, follow at all that if foreigners secured money be selling commodities in our market they would spend it here in corresponding purchases. They would buy where they can buy the cheapest. We know that there are other countries which have low-priced land and low-priced labor, which makes it possible to raise grain and cattle cheaper than we can. If additional purchases were made, every economic principle compels us to suppose they would be made in those regions.

compels us to suppose they would be made in those regions.

Another agency that was brought into action to assist agriculture at this juncture was the War Finance Corporation. It carried financial help directly to agriculture, arranging financing for approximately 1,000,000 bales of cotton and going to the relief of the live-stock industry. At one time its loans reached nearly \$300,000,000. The revival of agriculture is told in the complete liquidation of these loans with almost no loss. This action saved our animal industry. Another method of relief was the Agricultural Credit Corporation, formed to furnish capital for diversification in the North Dakota region. It has been doing much to restock that locality with cattle, sheep and hogs with a most beneficial effect.

#### The Intermediate Credit Barks.

To furrish long-time credit for raising and marketing crops and live stock the Government advanced \$60,000,000 to supply the capital for twelve Intermediate Credit Banks. These were especially adapted to the needs of co-operative marketing associations. Their total rediscounts and advances up to last October amounted to more than \$458,000,000 made at reasonable rates, which have also tended to make rates generally reasonable for agriculture.

The real estate mortgage requirements of agriculture have been provided for by the Federal and Joint Stock Land Banks, which have made more than 450,000 loans on farm lands, aggregating more than \$1,900,000,000. these are made at rates lower than the farmers of any other country enjoy on any extended scale. It funishes capital at a price lower than it can be secured for industry.

Because of the large sums available at these banks, other money lending institutions have been obliged to reduce their rates to about the same point. Without the benefit of this law farm loans would probably range nearly 3 per cent. above what they now are. The main reason for these low rates is because the Federal Government made the bonds of these banks free from all taxation.

The direct benefit which accrues to the borrowers from these banks, because all national, State and local taxes are thus remitted on their borrowings, is probably not less than \$500,000,000 r year. When it is considered that the same benefits extended only in a somewhat less degree to those who borrow from other sources, the advantage to agriculture derived from our Federal farm loan fund system reaches a stupendous sum. It is a benefit the like of which no Government anywhere on earth ever bestowed on an industry.

Your organization has seen the co-operative association. The National Government first undertook to assist this movement by the passage of the Capper-Volstead act, and it has more recently passed another important law setting up a division of cooperative marketing in the Department of Agriculture equipped with men and money to stimulate and develop the method of diposing of farm produce. The grain exchanges and the packing industries have teen brought under Government supervision and control. About \$4,000,000 has recently been added to the appropriation for agricultural research. Cotton standards have been adopted. Agriculture has been protected from poor seed. An investigation is under way to find new uses for cotton. Authorization has been granted for licensing agricultural warehouses.

A farmer has been put on the Federal Reserve Board, a former Master of the National Grange has been placed on the Tariff Board and finally there have been four sweeping reductions in Federal taxation, which I am told by the Department of Agriculture practically relieve the farmers from paying taxes to the Federal Government.

### Expansion of Department Work.

The work of the Department of Agriculture has been strengthened and expanded. A noteworthy development, in addition to the scientific and and research work upon which it is continually diligent in behalf of the farmer, as well as in behalf of the consumer, is the establishment of a comprehensive radio service through which a vast amount of vital market information and other helpful facts is now carried to millions of farmers daily through the medium of stations in all parts of the country. At the same time the market news service has been extended until the leased wires now cover nearly 8,000 miles and reach from coast to coast.

The different things the National Government is doing to aid agriculture is a most impressive list.

With this assistance the great agricultural depression has been gradually relieved. In 1921 the purchasing power of farm products had dropped to 69. In October of this year it had risen to 90. The live-stock industry is especially prosperous, but grain prices are not so encouraging. Yields per acre for this season were about 3% above average for the last 10 years, while the acreage of crops harvested was the largest of record. This gives a very definite assurance of an increased gross income for agriculture as a

It is apparent that the farmer has become very well schooled in the art of production. But further advances will be made through the use of improved machinery and of improved breeds of stock, more scientific cultivation and the elimination of all wasteful methods which will reduce the cost and increase the quality of production. The farmer who can proceed in these directions is on a solid foundation with every assurance of success.

The lesson which has not yet been so well learned is that of marketing. One of the greatest handicaps of agriculture is temporary overproduction. The world is hungry to consume all that the farmer ever raises. His difficulty arises from attempting to sell at the wrong time or the wrong place.

The most successful method of meeting this difficulty has been through co-operative associations. They have enabled agriculture in a large way to take better advantage of all the agencies of distribution, the bankers, the carriers, the commission merchants, the packers and the millers. This is a movement to unify all the agencies of production, distribution and consumption, so that they can function as a co-ordinated whole which will sell at the right place and at the right time. A fine example of this is the Grape Exphance recently established in California.

Exchange recently established in California.

This movement toward co-operative marketing is still in its infancy. It has sometimes failed through lack of management, but it is sound in theory, and when conducted in a businesslike way offers the most promising solution

to the great marketing problem. It avoids any attempt at price fixing or putting the Government into business, both of which would be fatal to the independence of the farmer and in the end would bring disaster. It likewise avoids the hazardous proposal of a subsidy, which the American people would never be willing to pay for any length of time. It rests on the sound merchandising principle of taking the product and disposing of it in the most advantageous way that shrewd and orderly marketing affords. Such further assistance as is necessary to render this effort more effective through setting up a board for its administration, supplied with sufficient funds to demonstrate its soundness in its experimental stage, may well be provided by the national Government.

#### Strength of the Farm Home.

My own views on farm relief have been so many times set out in my messages to the Congress that I do not care to dwell upon them on this occasion. Sometimes I wonder if gatherings of farmers are not a little tired of hearing discussions of farm relief.

The great strength of the farm in our national life lies in the farm home. It has been the prime source from which have sprung the ability and the character of the nation. Those who suggest that the farmer is in danger of being reduced to a state of peasantry entirely disregard the inherent independence and resourcefulness that are bred in life in the open. That spirit does not depend upon the possession of a large amount of property or income or the price of agricultural products

I was born and raised in such surroundings, and on this subject I know whereof I speak. The danger of the development of the peasant spirit in this country lies in our crowded tenements, which shelter the dependent wage earners of our great centres of population. Under present conditions that menace also is disappearing. From that danger our farm population is the most remote.

Every one knows that agriculture was prostrated by the inevitable result of a cruel and remorseless deflation. All the property of the country suffered at the same time, but agriculture was slowest in recovering and in many respects was least able to help itself. The Government of the United States wants to see the condition of the farmer continue to improve. It is very encouraging to know that it is far better than the condition of the farmer in any other country. The profound interest of the Government is demonstrated by the fact that it is doing more for the agriculture of the nation than any other Government does or ever did. But we are still far from perfection. Much remains to be done. But as we consider the progress that has come during the life of the National Grange we have every reason expect that further improvement will be still more rapidly made, to the end that life on the farm may be broader, fuller and richer.

#### Treasury Department Announces July 1 as Tentative Date for Issuance of New Small Size Paper Currency-Congress to Decide Question of Retiring National Bank Notes.

In making known on Nov. 16 that July 1 of next year had been fixed as the tentative date for the initial issuance of the new small size paper currency the Treasury Department indicated that National bank notes will not be included in the initial distribution. The statement of the Department says that "it was originally contemplated at the time of the creation of the Federal Reserve system that national bank currency should be retired." However, it says "since a considerable period of time has elapsed, the Secretary of the Treasury deems it advisable to submit the matter to Congress for its further consideration at the next session. "Should Congress determine that National bank currency is to be continued in circulation, the Department will be prepared to begin production of National bank notes in the reduced size early in the fiscal year 1930, which begins on July 1, next." The Treasury Department's statement follows:

At the conference of Governors of the Federal Reserve Banks, the Treasury to-day stated its tentative plans for the issuance of the small size currency which are subject to modifications after the Governors of the Federal Reserve Banks have had an opportunity to study them. July 1929 has been fixed as the time for the initial issue. All kinds of currency except National bank notes and all denominations from \$1 to \$20 will be included in the initial issue and it is probable that the higher denominations of gold certificates and Federal Reserve notes will be issued at the same time.

Issues of old-size United States currency by the Treasury will cease about April 30, 1929, and thereafter for two months the currency demands will be met by Federal Reserve Banks from their stock on new or circulated old-size currency. This may involve for a short period the circulation of notes that would ordinarily be retired from circulation because of their condition, but it is believed that the public will accept this as a temporary measure rendered necessary by the plans for the change to new-size currency and in this way will co-operate in facilitating the carrying out of the program.

the carrying out of the program.

On July 1 1929 there will be in the hands of the Federal Reserve banks for distribution a sufficient number of small-size bills of the various kinds and denominations to meet the reasonable demands. It will probably be necessary for a period of time to allocate distribution so that for several weeks a certain proportion of old-size currency will remain in circulation, due to the problems involved in the cancellation and redemption of the old-size currency. At as early a date as is possible, however, the Treasury will require the redemption of all outstanding old-size currency as rapidly as it reaches the Federal Reserve banks.

The issuance of the new-size currency will be through the Federal Persyands and their branches.

Reserve banks and their branches.

The Secretary of the Treasury will later issue a further public statement definitely fixing the issue date and method of distribution. Full details will thereafter be furnished the individual banks by the Federal Reserve Bank of the district from time to time as required.

Advance orders for currency cannot be accepted by the Treasury from individual banks or others, as the distribution will be handled through the Federal Reserve Banks in the manner above indicated.

National bank currency will not be included in the initial distribution. It was originally contemplated at the time of the creation of the Federal Reserve system that this currency should be retired. However, since a considerable period of time has elapsed, the Secretary of the Treasury

deems it advisable to submit the matter to the Congress for its further consideration at the next session. Should the Congress determine that the National bank currency is to be continued in circulation, the Department will be prepared to begin production of National bank currency in the reduced size early in the fiscal year 1930 which begin on July 1

#### Problem of Railroads to Maintain Net Income in Face of Declining Traffic and Revenues-Decrease of \$124,000,000 in Gross Revenues in First Nine Months of 1928.

How long can the railroads continue to maintain their net income against declining traffic and revenues is an important problem confronting the railroads, the shippers and the general public of this country, according to a report on the economic situation in the railway industry submitted on Nov. 21 by the Bureau of Railway Economics to the annual meeting of the American Railway Association held at the Biltmore Hotel in New York.

"Gross revenues," according to the report, "for the first nine months in 1928 were \$4,534,000,000, a decrease of \$124,000,000, or 2.7% under the corresponding period in The report went on to say:

This decrease in revenue reflects reductions of more than 2% in freight traffic and more than 6% in passenger traffic. At the same time, operating expenses totaled \$3,341,000,000, a reduction of \$134,000,000 under the corresponding period in 1927 or 3.9%. Transportation expenses were reduced \$65,000,000 or 4%. Maintenance of equipment expenses were reduced \$48,000,000 or 5%, and maintenance of way expenses, \$25,000,000 or 4%, a total reduction of \$73,000,000 or 4.6% in maintenance expens as a whole. These various reductions in operating expenses during the first nine months of 1928 marked the extent to which the railways have kept their expenses in hand during the current year. Only the application of the most rigid economy has saved the net railway income from showing a large decline.

'Net railway operating income for the nine months period amounted to \$820,000,000 contrasted with \$810,000,000 for the corresponding period in 1927. In the face of a decline in gross revenues amounting to \$124,000.000, this slight increase in net income was secured only through the application of economical and efficient methods to railroad operation. The net income for the first nine months of 1928 was at the annual rate of return of 4.55% compared with 4.60% for the corresponding period in 1927. The incres in net income was relatively smaller than the increase in investment, and the rate of return therefore declined.

"Wage levels continue to rise while the ratio of taxes to operating revenues now stands at the highest point ever known. In the first nine months of 1928, 6.30 cents out of every dollar of revenue was absorbed by taxes.

contrasted with 6.17 cents in the same period of 1927.

"Large capital expenditures and close attention to efficiency have resulted in the highest standard of efficiency being attained by the railroads this year on record. The majority of efficiency factors have shown imment in 1928, and in some cases marked improvement, compared with the preceding year with the exception of the average load per freight car which factor is one for which responsibility is shared with the shippers

"Net tons per loaded car (including less-car-load freight) averaged 26.5 tons for the first nine months this year, the lowest for any corresponding period of the preceding five years.

"In :espect to the factors for which railway managements were wholly responsible, the operating efficiency of the railways in 1928 has shown continuing improvement over that of the past five years. Their general efficiency during this period is marked not only by progress in many of the individual factors of performance and by improvements in the general index of efficiency, but also by the economies which enabled them to maintain their net income against declining traffic and revenues. How long this process can be continued is one of the important problems now confronting the railway industry, the shippers of the country and the general public.

#### Railroads Short "Fair Return" by \$2,897,036,186-If Railroads had a "Guarantee" from the Government, the Government Would Now Owe Them That Amount.

The following is from the Nov. 16 issue of Railroad Data, the organ of the Committee on Public Relations of the Eastern Railroads:

On Sept. 1, 1928, there had elapsed eight years since the war-time Government guarantee of net return to the railways expired. While the Transportation Act became a law on March 1 1920, the provisions of the Act did not go into full effect until after the expiration of a six-month guarantee period, that is, on Sept. 1 1920. In the eight years from Sept. 1 1920 to Sept. 1 1928 the Class I

steam railways and large switching and terminal companies in the United States failed to earn a "fair return" on their property investment by \$2,897,036,186.

#### What "Fair Return" Means.

The "fair return" was fixed by the Inter-State Commerce Commission under the provisions of the Transportation Act, at 6% until March 1 1922, and at 5%, % after March 1 1922. It is based on the carriers' book inroad and equipment, including materials and supplies and vestment in cash, at the beginning of each year.

If—as has been erroneously alleged many times—the railroads had

ernme overn them this 2 billion 900 million dollars. Since the railroads have no "guarantee," the government does not owe it. It has simply been lost the railroads and by those who invest their savings in providing railroad facilities for the country.

#### Shortages Graphically Shown.

The shortage of actual earnings under the "fair return" for the indi-dual periods is shown in the chart below. [This we omit.—Ed.] The vidual periods is shown in the chart below. white areas represent the net railway operating income actually earned by the Class I railroads, while the black areas show the difference between the net railway oprating income actually earned and the amount equal to the "fair return" on property investment as shown by the books of the carriers.

It will be noted that the so-called "fair return" varies from year to year. This follows from the fact that the railroads annually make substantial investments in additional facilities. The net increase in property investment for the eight full years from 1920 to 1927, inclusive, was more than 4 billion 700 million dollars.

Meeting of German-American Board of Trade.

Germany's assets and present earning power were the subject of an address at noon Tuesday, Nov. 20, by Harold G. Aron, Chairman of the Executive Committee of the International Germanic Trust Co. and President of the International Germanic Co., Ltd., at a luncheon of the Board of Trade for German-American Commerce at the Bankers' Club. Mr. Aron was Chairman of the Organization Committee of the International Germanic Trust Co. and continues as Chairman of the Executive Committee of the Trust Company as well as President of International Germanic Co., Ltd.

#### ITEMS ABOUT BANKS, TRUST COMPANIES, ETC.

New York Stock Exchange memberships were reported posted for transfer this week as follows: Walter A. Hardy to Albert E. Fagan, consideration \$480,000; J. Chauncey McKeever to Ector O. Mumm, \$470,000; Maurice A. Gilmartin to Willard A. Waldheim, \$480,000; Palen Nelson to John W. Foster, \$480,000; George B. Thurnauer to Edwin J. Connor, Jr., \$490,000; William C. Moore to Milton M. Cohen \$495,000; Alfred J. Johnson to Michael Addison, \$495,000; Les F. Weil to Buell Hollister, \$525,000; Marshall W. Trask to Harold J. Henry, nominal; Edmund J. Drummond to William P. McDermott, \$530,000. Arrangements were reported made to-day for the sale of a membership for \$550,000, the highest recorded price. Two other memberships were reported to have been arranged for at \$540,000 and \$530,000 respectively.

A new high record price for New York Curb Market membership was reached this week when arrangements were reported for the sale of a seat at \$160,000. The last preceding sale was for \$150,000.

The New York Cotton Exchange membership of Silvan Newburgh was reported sold this week to Norrie Sellar for \$31,250. The last preceding sale was for \$30,550.

A new high record price for New York Produce Exchange seats was made this week when a regular membership was reported sold for \$26,250. Subsequently a sale was made at \$26,000.

A Chicago Stock Exchange membership was reported sold for \$70,000, an advance of \$5,000 over the last preceding sale and a new high record price.

Chicago Board of Trade memberships have made a steady advance during the week. The first sale was at \$29,500 (a new high record) up to this time and an advance of \$500 over the last preceding sale. Following transactions were at \$30,000, \$35,000 and \$45,000.

A Chicago Curb Market membership was reported sold this week for \$10,000, a new high record, and an advance of \$2,000 over the last preceding sale.

A Philadelphia Stock Exchange membership was reported sold this week for \$30,000, a new high record price.

The regular monthly luncheon meeting of the British Empire Chamber of Commerce was held on Thursday, Nov. 22, at 12:15 p. m. at the Whitehall Club, 17 Battery Place. Alfred H. Swayne, Vice-President of the General Motors Corporation, and Sir Mark Sheldon, K. B. E., were the speakers.

Among those sailing on Nov. 21 on the Berengaria was Thomas C. Boushall, President of the Morris Plan Bank of Virginia, which recently consolidated with the oldest Morris Plan Bank, that of Norfolk. Mr. Boushall said that he was going abroad to assist in starting the Morris Plan Co. in England. "There is no company or bank in England which is engaged in the making of loans based on character and earning power," he said, "although the need for such a service has been felt. The so-called 'hire purchase' system, which corresponds to our instalment selling, is very popular, and the Morris Plan should come to play as big a part in British finance as it has in American. While I shall probably visit Paris and Brussels, we do not plan to extend

European Morris Plan activities outside of England as yet." Mr. Boushall will be gone about six weeks.

Lee, Higginson & Co. this week laid the cornerstone of their new building, 35-41 Broad St. The building, which will have nine stories, is to be ready for occupancy before May 1 1929. The building will make a marked change in the character of the block in which the old Curb Market was conducted up to a few years ago. It will replace a row of low brick buildings and will be of classic design fronting 106 feet on Broad St. and with a depth of 110 feet.

The Straus National Bank & Trust Co. of New York this week opened its new building at Fifth Ave. at 46th St.

The fifteenth annual dinner of the Bankers Forum New York Chapter, American institute of banking section of the American Bankers Association will be held at the Hotel Pennsylvania, New York on Thursday evening, December 6, at 7 o'clock. The Guest of honor will be Craig B. Hazlewood, Vice-President of the Union Trust Co., Chicago., and President of the American Bankers Association.

At the special meeting of the shareholders of the Corn Exchange Bank of New York on Nov. 21 the proposal to increase the capital stock from \$11,000,000 to \$12,100,000, by the issue of 11,000 additional shares to be offered for subscription to the shareholders at \$400 per share, to the extent of 10% of the stock held by them on January 3 1929 was ratified. Warrants for the additional stock will be mailed to shareholders of record Jan. 3 1929, and payment will be required to be made in full on or before Feb. 1 1929. The plans to increase the capital were noted in our issue of Oct. 20 page 2184.

ZJames A. Beha, who as noted by us Nov. 17 page 2769 resigned as New York State Superintendent of Insurance to become Chairman of the Board of directors of the International Germanic Trust Co., of New York, took up his duties on Nov. 20 in the company's offices, 26 Broadway. Mr. Beha received during the day many messages and personal calls of congratulations from leaders in the financial, insurance and political life of the country.

Another notable increase is revealed in the banking resources of the Trust Companies of the Nation through the distribution of the Silver Anniversary issue of "Trust Companies of the United States" published and distributed for 25 years by the United States Mortgage & Trust Co. of New York. The impressive total of \$21,946,819,035 was reached on June 30, of this year. This shows a gain of \$1,465,000,000 over a year ago. The States having resources of over \$1,000,000,000 each are as follows:

| California   | \$1.184.485.141 |
|--------------|-----------------|
| Illinois     | 2.142.689.340   |
| New Jersey   | 1.454.058.402   |
| New York     | 6.558.213.700   |
| Ohio         | 1.792.497.187   |
| Pennsylvania | 2.784,312,235   |
|              |                 |

15,916,256,005

The resources of these six States account for about 73% of the Country's total. The largest gain was made in New York which showed an increase of over \$500,000,000. Substantial increases in other States give Illinois \$91,000,000, Iowa \$62,000,000, Missouri \$68,000,000, New Jersey \$190,000,000, Ohio \$104,000,000, Pennsylvania \$244,000,000, and Wisconsin \$129,000,000. The Capital, Surplus & Undivided Profits and Deposits in the six States named are as follows:

| California   | 122,515,140<br>83,875,000<br>295,930,000<br>93,195,000 | Surplus & Undi-<br>vided Profits.<br>\$58,751,494<br>145,226,594<br>111,569,599<br>480,006,141<br>88,972,064 | Deposits.<br>\$1,026,747,290<br>1,743,230,558<br>1,173,403,371<br>5,328,729,644<br>1,543,869,331 |
|--------------|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Pennsylvania | 180,891,049                                            | 390,835,672                                                                                                  | 2.071,491,967                                                                                    |

\$838,191,189 \$1,275,361,564 \$12,887,472,161
In reviewing the figures, John W. Platten, President of the
United States Mortgage & Trust Co., states in the intro-

ductory:
Nearly twenty-two billion dollars, the highest peak yet attained in the banking resources of the Trust Companies of the Company, is revealed by the figures in this the Silver Anniversary Edition of "Trust Companies of the

During the past year their resources have increased almost one and a half billion dollars and compared with ten years ago the increase is over twelve and a half billion dollars.

Never before has there been such widespread interest in the fiduciary activities of Trust Companies and the rapidly increasing number of appointments under wills and trusts is unmistakable evidence that both individuals and corporations are recognizing more and more the capacity of these companies for administrative service of the highest type.

This yearly publication of the United States Mortgage & Trust Co., it should be borne in mind, is not limited to trust

companies, per se, but embodies statistics of all companies with the word "trust" in their titles, actively engaged in business in the United States and Territories, coming under the jurisdiction of the State Bank Commissioner, Auditor, etc., and doing either a trust or banking business or both, and those banks, banking associations, or institutions acting in a fiduciary capacity without the word "trust" in their titles, but supervised as above, and commonly classed as trust companies by the State officials to whom they are amenable.

An announcement as follows was issued Nov. 22 by the Guaranty Co. of New York:

Guaranty Co. of New York has taken corporate proceedings to increase the capital stock of the company from \$5,000,000 to \$9,000,000. When this increase in capital becomes effective a stock dividend of \$4,000,000 will be declared out of the company's surplus and reserve accounts. As the Guaranty Trust Co. of New York owns all of the stock of Guaranty Co. of New York, the dividend will be paid to the Guaranty Trust Co. of New York.

The "Times" of Nov. 22 commenting on the action said: The first instance on record of a stock dividend by an investment subsidiary of a New York bank became known yesterday when the Guaranty Co. announced that it has arranged to increase its capital stock from \$5,000,000 to \$9,000,000.

In making the change the Guaranty Co. is capitalizing its recent large earnings. The result will be to issue additional stock to the trust company, and the enlarged capital will enable the Guaranty Co. to enlarge the volume of securities that it can underwrite

of securities that it can underwrite.

The Guaranty Co. is organized along different lines from the investment subsidiaries of most New York banks. The general practice is for the stockholders of the parent bank to own the stock of the subsidiaries, the stock being issued share for share in inseparable units. In the case of the Guaranty, however, the subsidiary's shares are not issued to the holders of the trust company's stock, but are simply carried by the trust company as part of its investments. The new stock of the company thus can be merely added to the investments of the trust company, a method that could not be followed where a subsidiary's stock is issued with the parent company's shares. In most cases it is not possible to change the number of a subsidiary's outstanding shares, except where the bank is changing its own capitalization.

The Guaranty Co., which was organized in 1920 by taking over the bond department of the Guaranty Trust Co., has contributed largely to the growth of the trust company through its underwriting and distribution of securities. Harold Stanley, now a partner in J. P. Morgan & Co., was the first head of the investment company, and its present president is Joseph Swan.

The enlargement of the capital of the company follows an increase of \$30,000,000 in the capital funds of the Guaranty Trust Co. last June. At that time the trust company's capital was increased from \$30,000,000 to \$40,000,000 and its surplus from \$30,000,000 to \$50,000,000, in addition to which its latest statement showed undivided profits of more than \$10,-000,000. The trust company's total resources were given as \$838,129,668 in its latest statement.

Guaranty Trust Company of New York, which acts as transfer agent or registrar it is stated, for more than 28% of the corporations whose stock is traded in on the New York Stock Exchange and more than 17% of those whose stock is traded in on the Curb Market, has moved its Transfer Department to larger quarters on the main floor of 128 Broadway, which building the Company recently acquired. The new offices afford the additional facilities that the growth of the Guaranty's transfer and registration business made necessary.

The Directors of the Sate Bank and Trust Company of this city on November 21 approved a proposal to increase the capital of the institution from \$5,000,000 to \$6,250,000. A special meeting of the stockholders will be called shortly to ratify the plans of the directors. The new stock will be offered to stockholders at \$205 a share, \$100 to be apportioned to the capital, \$100 to surplus and \$5 to the capital of the Staban Securities Corporation, the bank's investment subsidiary.

The newly organized Plaza Trust Company of this city will open for business on December 5 at Fifth Avenue and Fifty-second Street. The institution has a capital of \$2,000,000 and a surplus of \$1,000,000. An item regarding the bank appeared in these columns October 27 page 2321.

Dr. A. H. Giannini, Chairman of the Board of Directors of The Bank of America National Association, New York, was honored by the Anglo-American committee of the Association of Motion Picture Advertisers of America at a banquet at the Biltmore Hotel on Nov. 20. Dr. Giannini was presented with a silver trophy and the presentation was made by Sam Harris, editor of "The Cinima" of London, who came from London especially to confer the trophy. This token is bestowed annually on the individual selected by the committee as the one who has most advanced Anglo-American goodwill through services connected with the motion picture industry. Dr. Giannini is said to be the first banker to finance motion pictures here and abroad. At the banquet the speakers were Dr. Giannini, Will Hays, Chairman of the Motion Picture Producers' and Distributors' Association of

America; Major General Robert Lee Bullard; Ralph Blumenfeld, Editor of the London Express; J. E. Otterson, President of the Electric Research Products, Inc.; Nathan Burkan and Sam Harris.

Incident to the proposed split-up in the stock of Chelsea Exchange Bank of New York on the basis of four shares for every one now held through the issuance of new stock with par value of \$25 a share, it is rumored says one of the news agencies, that dividends at the rate of \$2.50 per share will be paid on the new stock. This would be equivalent to \$10 per share on the present capitalization or a 25% increase in the current dividend rate. The Chelsea Exchange Bank reports total resources of the bank, as of November 15 1928, of \$26,464,000 compared with \$24,112,000 a year ago. Gene Pope, President of Colonial Sand & Gravel Co., has been elected a director of Chelsea Exchange Bank.

Uzal Condit Varick, Vice-President of the American Trust Company of New York died on November 17. Mr. Varick was fifty-five years of age. He began his banking career in 1890 with the Fourth National Bank of New York. Eleven years later he was appointed National Bank Examiner from which post he resigned in 1903 to become Cashier of the Sprague National Bank of Brooklyn. Later he became Assistant Treasurer of the Lawyers' Title and Trust Company, now the Lawyers Trust Company, and in 1919 became Vice-President of the American Trust Company.

According to an advertisement in the Brooklyn "Eagle" of Oct. 24 the Kingsboro National Bank of Brooklyn is being organized by a group of Bay Ridge residents. The bank, which will be formed with a capital of \$500,000, surplus of \$250,000 and undivided profits of \$100,000, will commence business the early part of 1929, with the completion of alterations in its own building at 6901 5th avenue, corner of Bay Ridge avenue. The announcement says:

The capital stock has been fully subscribed at \$170 per share, with the reservation that the Organization Committee may reduce the amount of stock to be allotted upon said subscriptions, in order to give to the people of Bay Ridge the opportunity of becoming stockholders upon the same basis.

The capital stock of the bank is, therefore, hereby offered to the people of Bay Ridge for subscription at \$170 per share (to be applied \$100 for capital, \$50 for surplus and \$20 for undivided profits to cover building, equipment and other corporate purposes).

Payments are called for as follows: 10% with subscripiton; 15% November 1; 25% on December 1; 25% January 1 and 25% on the call of the Organization Committee.

"The Bank of Yorktown of New York has issued its Statement as of November 15 1928, showing resources of \$7,732,759 and deposits of \$6,045,490—an increase in deposits of \$2,000,000 in the past year. George M. Adrian is President of this Institution located at Eighth Avenue and Thirty-Eighth Street, the 'Ready-to-Wear Center.'"

At the meeting of the shareholders of the Second National Bank of Hempstead held on November 15, it was voted to increase the Capital Stock from \$100,000 to \$300,000 in order to care for the additional service it is rendering to the community.

Dr. Willard E. Wheelock has been elected a director of the First National Bank of Rockville Center and Jacob Post already a director, has been made Chairman of the Board.

The stockholders of the Weehawken Trust & Title Co. of Union City, N. J., on Oct. 16 voted to increase the capital of the institution from \$800,000 to \$1,000,000 and to reduce the par value of its stock from \$100 to \$25, with a view enabling its depositors to become stockholders. The bank will shortly establish a branch office on Summit Avenue at Eleventh Street, Union City, N. J. The increase in capital will become effective on January 18 next.

Effective Nov. 1, the First National Bank of Boothbay Harbor, Me. (capital \$50,000), was placed in voluntary liquidation. The institution has been taken over by the Augusta Trust Co. of Augusta, Me.

stowed annually on the individual selected by the committee as the one who has most advanced Anglo-American goodwill through services connected with the motion picture industry. Dr. Giannini is said to be the first banker to finance motion pictures here and abroad. At the banquet the speakers were Dr. Giannini, Will Hays, Chairman of the Motion Picture Producers' and Distributors' Association of made it seem necessary to add somewhat to capital." The

increase will be the first voted by the company since it began business in 1913. It is proposed to hold a special meeting of the shareholders on Dec. 11 to vote on the enlargement of the capital, and, providing action at that meeting is favorable, new stock will be issued to stockholders of record Dec. 1 in the ratio of four new shares for each share of old stock held at par, \$100 a share. The Travelers Insurance Co., it was stated, owns 930 of the 1,000 shares of capital stock of the bank now outstanding, the remaining 70 shares being held by the directors of the bank as qualifying shares. The original subscription price for the 1,000 shares was \$125 a share and the 930 shares held by the Travelers Insurance Co. are carried on its books at \$116,250, or \$125 a share. At the beginning of the present year, it was said, the Travelers' Insurance Co. reported this stock as having a total market value of \$302,250, or \$325 a share. The Travelers' Bank & Trust Co. commenced business in 1913 with a capital of \$100,000 and a paid-in surplus of \$25,000. Since then the surplus has increased to \$500,000 as of Oct. 1 last, and undivided profits on that date were \$196,034. Total assets of the institution as of Oct. 1 this year aggregated \$10,048,779. The officers of the bank in addition to Mr. Fubbard are as follows: Martin Wells, Secretary and Treasurer; R. C. Dickenson, Trust Officer; Joseph W. Bennett, Auditor; John B. Bolles, Assistant Secretary, and Frederick F. Fisher, Assistant Treasurer. The directors at their meeting on the 13th also voted a 5% dividend payable Dec. 1 on old stock of record that day.

According to advices from Boston on Nov. 17 to the Wall Street Journal", the Shawmut Association, affiliated with the National Shawmut Bank of Boston, has acquired a substantial stock interest in the Hingham Trust Co., Hingham, Mass. The institution has a capital of \$100,000, surplus and undivided profits of \$162,000 and deposits of approximately \$1,700,000.

A personal loan department for the accommodation of small borrowers has been opened by the National Shawmut Bank of Boston. The following statement concerning the matter was issued last week by the institution:

To meet the needs of small borrowers, the National Shawmut Bank of Boston has established a Personal Loan Department. This Department will make loans of \$100 to \$1,000 at 6%, without requiring collateral from the borrowers.

from the borrowers.

This new Shawmut Department seeks to accommodate reputable men and women of limited means who may need money for emergencies or who may wish to take advantage of an opportunity demanding a small amount of capital. It permits them to borrow in a private, dignified manner, free from burdensome rates and terms.

Such persons, if regularly employed, may procure a personal loan after they have satisfactorily answered certain questions and have obtained the signatures of two other responsible individuals, who become co-makers of the note. The borrower receives the full amount of the loans, less 6% per annum and a small investigation expense ranging from 75 cents to two dollars.

Loans will be made for one year and repayment will be made in the form of weekly or monthly deposits in the Shawmut Savings Department. These deposits will draw interest at 3% per annum and at the maturity of the note the fund in the Savings Department will be sufficient to pay the loan and leave a small deposit to the borrower's credit.

On Dec. 10 stockholders of the Mechanics National Bank of Worcester, Mass., will vote on a proposal to increase the bank's capital from \$400,000 to \$500,000 by the issuance of 1,000 shares of new stock (par value \$100 a share) at \$250 a share, as reported in the Boston "Herald" of Nov. 9, which went on to say:

Shareholders will have the right to subscribe to one new share for each four. This will make surplus and undivided profits approximately \$1,400,000. In 1925 bank declared a stock dividend of 100%.

Edwin R. Marshall was elected President of the Boulevard Trust Co. of Brookline (Boston) at a recent meeting of the directors, according to the Boston "Herald" of Nov. 15. Mr. Marshall succeeds William A. McKinney, who has held the Presidency for a number of years. Mr. McKinney will now devote his efforts to special administrative problems as a member of the executive committee and as a Vice-President. The new President has long been a leader in banking and investment fields and is President of the Old Colony Corporation of Boston (the investment division of the Old Colony Trust Co.) He is also a Vice-President of the Old Colony Trust Co. and trustee of the Old Colony Investment Trust and Old Colony Trust Associates.

On Nov. 15 George Warren Grant retired as Vice-President of the Old Colony Trust Co. after 51 years of active business

life in Boston. Mr. Grant had been Vice-President of the trust company since 1913. According to a brief outline of his: career, appearing in the Boston "Transcript" of the same day, Mr. Grant, who was born in Salem, Mass., in the early eighties joined the staff of Blake Brothers then one of the largest dealers in commercial paper in Boston. From there, at the age of 28, he went to the National City Bank as Assistant Cashier and within three weeks was promoted to the Cashiership. Subsequently he was associated in an official capacity with the Elliot National Bank, the Third National Bank, and the National Shawmut Bank. His. connection, however, with the Shawmut was of short duration, for in 1902 a few weeks after he entered that institution, the City Trust Co. was organized and Philip Stockton, its President, selected Mr. Grant as Treasurer. Mr. Grant took an active part in the organization of the new company and to him, in no small measure, was due its phenomenal growth. Upon the merger of the City Trust Co. with the Old Colony Trust Co. in 1910, Mr. Grant was given a leading position with the enlarged bank and in 1913 was made a Vice-President, the office he has now resigned.

Directors of the Old Colony Trust Co. of Boston at a recent meeting elected G. P. Gardner, Jr., a member of the board and made the following appointments in the bank's personel; L. D. Seaver, Vice-President; A. W. Bosworth, Assistant Vice-President; A. S. Newhall, Cashier; A. H. Garbutt, Assistant Cashier; A. H. MacIntyre, Trust Officer, and J. D. Trenholm, T. Lewis Kennedy, R. E. Roach and Walter A. T. Norris, Assistant Trust Officers.

Roy A. Hovey, Bank Commissioner for Massachusetts, was authorized on Nov. 20 by Judge Pierce of the State Supreme Court to pay a dividend of 3% to depositors in the commercial department of the defunct Hanover Trust Co. of Boston, as reported in the Boston "Transcript" of that date. This dividend will be paid before Christmas, and will make with dividends already paid 66% of the entire claims of commercial depositors. The Boston paper went on to say:

Mr. Hovey said that, having adjusted and settled with the approval of the Court the claims of the Polish Industrial Association and the estate in bankruptcy of Charles Ponzi, amounting together to \$1,443,600.90, the claims presented and allowed against the commercial department are \$1,236,080.29. The Commissioner has cash on hand of \$60,367.14 and of this \$37,082.41 will be required to pay the seventh and last dividend authorized by Judge Pierce. Mr. Hovey says that in figuring the claims on which a dividend may be paid, he has not considered unclaimed deposits of \$56,-425.41 and rejected claims of \$161,565.92.

The Hanover Trust Co. was closed Aug. 11 1920. Savings depositors have been paid in full.

Dr. Samuel Empey Robertson, President of the Dime Savings Institution of Newark, N. J., and former medical director of the Presbyterian Hospital died at his home at Maplewood, N. J., on Nov. 8. Dr. Robertson was at one time President of the old Newark Board of Trade and of the Newark Institute of Arts and Sciences. He was a member of the City Planning Commission under the late Mayor Haussling. Dr. Robertson had been connected with the Dime Savings Institution since February, 1900, and had served as President since 1916. He was born in Canada 69 years ago.

The newly organized First National Bank of Whippany, N. J., which opened for business on Sept. 27 reported deposits as of close of business Nov. 10 of \$154,801. The institution has a capital of \$50,000 and a surplus of \$12,500. The President, Robert B. McEwan, Jr., is Vice-President and Treasurer of R. R. McEwan & Son. A. F. Townsend, the Vice-President, is President of several large plants; the Manhattan Rubber Company being one of them. D. A. Baldwin, the Cashier was formerly a member of the Chief National Bank Examiner's staff in the 2nd Federal Reserve District and for many years was connected with the old Liberty National Bank and Central Union Trust Co. of New York. The stock of the bank which has a par value of \$100 was disposed of at \$125 a share.

At a meeting of the Board of Directors of the Central National Bank of Philadelphia, held Nov. 22, Charles E. Ingersoll asked to be relieved of some of his activities, and the Board unanimously elected him to the newly created position of Chairman of the Board of Directors, effective Jan. 1 1929. Archie D. Swift, Vice-President, was unanimously elected President. Mr. Swift has been with the bank for the past 12 years, coming from Ridgway, Pa., where, for

a number of years, he was Cashier of the Elk County National Bank.

That the directors of the Industrial Trust, Title & Savings Co. and of the Fern Rock Trust Co., both Philadelphia institutions, have voted to submit a proposal to consolidate to their respective stockholders, was reported in the Philadelphia "Ledger" of Nov. 23. The date of the stckholders' meetings has not yet been determined. A special meeting of the stockholders of the Industrial company will be held on Dec. 7 to vote on a proposed increase in the bank's capital of \$100,000 (2,000 new shares of the par value of \$50 a share). The present capital is \$500,000 (10,000 shares of \$50 par value). The new stock, it was stated, is to be offered to stockholders of record Dec. 7, in the proportion of one new share for each five shares held, at the price of \$300 a share. Stockholders of the Fern Rock Trust Co. are scheduled to hold a special meeting on Jan. 10 to vote on a proposed capital increase from \$200,000 (4,000 shares of the par value of \$50 a share) to \$400,000 (8,000 shares of \$50 par value), the new stock to be offered to the stockholders at the price of \$80 per share. These special meetings, the "Ledger" stated, "had been arranged for before the merger had been decided upon, it was said yesterday.' J. Edward Schneider, President of the Industrial Trust, Title & Savings Co. was reported as saying that the name of the new organization will be the Industrial Trust Company. The consolidated bank will have combined capital, surplus and undivided profits of \$4,000,000 and resources of approximately \$18,000,000.

George E. Painter and C. C. Taylor have been elected directors of the Dollar Savings & Trust Co. of Pittsburgh, Pa. (North Side). Mr. Taylor is Senior Vice-President of the First National Bank at Pittsburgh.

Frank L. Stein, President of the Ohio National Bank of Columbus, Ohio, tendered his resignation as President and as a director of the institution at the regular monthly meeting of the directors on Nov. 16 and was succeeded by Fred A. Miller, who has been Chairman of the trust committee of the bank for the past five years, according to the Ohio "State Journal" of Nov. 17. At the same time Edwin Buchanan, a Vice-President of the bank for the past seven years, was elected Executive Vice-President. Mr. Stein resigned the Presidency in order to devote his time to his own outside interests, it was said. The directors expressed their appreciation of his 29 years of service with the institution.

On Nov. 19 John H. P. Brewster tendered his resignation as a Vice-President of the Cosmopolitan Bank & Trust Co. of Cincinnati, Ohio, according to the Cincinnati "Enquirer" of Nov. 20. Mr. Brewster went to the Cosmopolitan two years ago. Prior to that time he was Assistant Cashier of the Cincinnati branch of the Federal Reserve Bank of Cleveland from its establishment. He plans to engage in a wider field of activity, the paper mentioned said.

That the Kenton Savings Bank & Trust Co., Kenton, Ohio, was closed recently, pending an audit of its books, was reported in the following press dispatch from Kenton on Nov. 8, printed in the Toledo "Blade" of the same date:

Completion of the audit and appraisal of the assets of the Kenton Savings Bank & Trust Co., here, whose doors were closed after a run on the institution, will not be completed until four or five weeks, E. H. Blair, State Superintendent of Banks, says.

Blair, State Superintendent of Banks, says.

Circulation of rumors was blamed by the State official for the run.

When the bank's ready funds became nearly depleted the bank officials called upon the State Department for advice. The State men upon their arrival took charge of the bank's affairs and closed the doors to make an audit and appraisal.

Before the bank is re-opened its officials desire to be able to give the public the bank examiners' statement of the bank's true condition.

Edward E. Blackburn, President of the Marion National Bank and the Marion State Bank, Marion, Ind., and interested in a number of industries in that city, died on Nov. 10 in a Kokomo, Ind., hospital, following a stroke of paralysis suffered the previous night while speaking at a bankers' dinner in that place. Mr. Blackburn was a native of Kentucky, but moved to Marion more than twenty years ago where with others he organized the Marion National Bank of which he was President at his death. Among other interests he was Secretary and Treasurer of the Rutenbur Electric Co. of Marion and Vice-President of the Appa-

lachian Highway Association. The deceased banker was prominent in the affairs of the Indiana State Bankers Association.

W. J. McAneeny, Vice-President and Treasurer of the Hudson Motor Car Co., has been elected a director of the Merchants' National Bank of Detroit, according to advices from that city appearing in the "Wall Street Journal" of Nov. 17.

After Mar. 4, Vice-President Charles G. Dawes will return to the Central Trust Co. of Illinois, Chicago, as Chairman of the Board.

Stockholders of the Peoples Trust & Savings Bank of Chicago on Nov. 15 approved the proposed increase in the bank's capital from \$1,000,000 to \$2,500,000, noted in our issue of Oct. 6, page 1902. At the same meeting the directorate was increased from 13 to 17 members.

A new Chicago bank—the Brainerd State Bank—was formally opened at 87th St. and South Ashland Ave. on Nov. 17. Visitors at the opening received American flags as souvenirs of the occasion. The new bank, which is the thirteenth in the chain of the John Bain banks, is capitalized at \$200,000 with surplus of \$100,000 and reserve fund of \$20,000. Mr. Bain organized his first bank 22 years ago.

A special meeting of the stockholders of the Congress Trust & Savings Bank of Chicago will be held on Dec. 21 for the purpose of voting on a proposed increase in the bank's capital from \$400,000 to \$500,000. The letter calling the meeting, signed on behalf of the directors by Henry S. Henschen, President of the institution, says in part:

In the judgment of the Board of Directors, the growth of the Bank to date, and the opportunities for expansion, which are evident on every hand, make it desirable to increase the Bank's Capital Stock to \$500,000. The Bank's quarters will before long need enlarging, and it seems likely that a Trust Department and a Real Estate Loan Department will be required in the near future.

It is planned to issue the new stock at \$150 per share, of which amount \$100 will be credited to Capital Stock, \$10 to Surplus and \$40 to Contingent Fund. Each stockholder of record at the close of business on December 21st will be entitled to subscribe for one new share for each four shares then held. It is expected that payment of the new shares will be called for on Dec. 28.

Two important Kansas City (Mo.) banks are in process of consolidation, namely the Fidelity National Bank & Trust Co. and the New England National Bank & Trust Co. The Fidelity Savings Trust Co. and the Fidelity National Co. (affiliated institutions of the Fidelity National Bank & Trust Co.) are also included in the merger. The consolidated bank, according to the Kansas City "Star" of Nov. 14 will continue the name of the Fidelity National Bank & Trust Co. and will be located at the present site of that institution, the Southwest corner of 9th & Walnut Sts. On this corner, a bank and office building 18 stores or more in neight will probably be erected. The capital of the new institution will be \$3,000,000. It will have a surplus of \$1,000,000 and \$1,700,000 representing the securities company's value, making the capital resources \$5,700,000. Deposits will approximate \$50,000,000. The capital stock, 30,000 shares of the par value of \$100 a share, will be held by the present stockholders of the respective banks as follows: 20,000 shares by Fidelity stockholders and 8,000 shares by New England stockholders. The remaining 2,000 shares will be placed on the market at a minimum price of \$225 a share. The consolidation will go into effect about Jan. 1. Henry C. Flower and Lester W. Hall, Chairman of the Board and President, respectively, of the Fidelity National Bank & Trust Co. will retain the same positions with the enlarged bank, while J. F. Downing, Chairman of the Board of the New England National Bank & Trust Co., will be Chairman of the Executive Committee of the new bank.

James T. Bradley, a Vice-President of the Commerce Trust Co. of Kansas City, Mo., and a member of the Kansas City Chamber of Commerce, died on Nov. 15 at the Bethany Hospital in that city. The deceased banker was born in London, Ont., Canada, but moved to Missouri with his family when a boy. His banking career began in 1884 in Sedan, Kas., when he entered the employ of the Turners' Bank of that place. In 1891 Mr. Bradley was made a national bank commissioner for Kansas, a position he held for seven years. In 1903 he went to Kansas City, Mo., as Cashier of the National Bank of Commerce and served in that capacity until 1916 when he was elected a Vice-President of the institution. Subsequently upon the consolidation of the National Bank of Commerce and the Commerce Trust Co. to

form the present institution, Mr. Bradley continued as a Vice-President of the enlarged bank, the office he held at the time of his death.

Godfrey Schirmer, founder and President of the American National Bank of Denver, Colo., died Nov. 14th in his 66th year. Mr. Schirmer, born in New York, was educated in Germany and for some time was German Consul at Denver. He was the only Denver bank president who had his seat out in front where every one entering the bank has immediate access to him. Mr. Schirmer was a collector of coins and stamps but noted for charitable activities. At the time of his death he was Treasurer of no less than 15 charitable organizations. Mr. Frank Kirchoff a prominent Denver contractor has been elected President of the bank to succeed Mr. Schirmer.

The closing and taking over by the State Department of Trade and Commerce on Oct. 23 of a small Nebraska bank, the Nebraska State Bank at Ohiowa, after it was learned that its cashier, C. H. Brinkman, had disappeared the previous Sunday, Oct. 21, was announced on Oct. 23 by Clarence Bliss, Secretary of the Department, according to advices by the Associated Press from Lincoln, Neb., on the same date, printed in the Omaha "Bee" of Oct. 24. It appears a note from Brinkman, stating that he was short in his accounts and could not remain to face impending developments in the bank's affairs, was found at the bank the morning of the closing by W. H. Weiss, Assistant Cashier, and brother-in-law of Brinkman, to whom it was addressed. The note requested Weiss to report the bank's condition to the State Department and ask that an examiner be sent to investigate. This Weiss accordingly did. Secretary Bliss was reported as saying that a \$12,000 shortage already had been found and this would probably be increased when a complete check of the bank's accounts had been made. When last examined, Jan. 23 of the present year, the dispatch said, deposits of \$123,000 were shown. The bank was capitalized at \$15,000 and had a surplus of \$2,500. Brinkman owned a majority stock interest of \$8,800 in the institution, it was stated. A dispatch from Geneva, Neb., on Oct. 23, appearing in the paper mentioned, said in part:

County Attorney Guy A. Hamilton says the State investigation so far has not shown criminal action in the conduct of the bank by Brinkman

and that no charges against him have been filed. "Brinkman apparently struggled along as long as he could," Hamilton

"He has shown an honest attitude. The capital is impaired but there has be a chance to pay out depositors."

Investigators say statements of the operating expenses of the institution did not show the bank operating at a loss, as was the case, but that no mbezzlements have been found.

Willis G. C. Bagley, President of the First National Bank of Mason City, Iowa, has been elected President of the Citzens' Savings Bank of Hanlontown, Iowa, to fill the vacancy aused by the death of C. H. McNider of Mason City, who organized the institution in 1899 and served as its President rom that time until his death a few weeks ago, according to press dispatch from Mason City on Nov. 19 to the Des Moines "Register." The appointment of Mr. Bagley to suceed the late Mr. McNider as President of the First National Bank of Mason City was noted in the "Chronicle" of Nov. 10

A press dispatch from Kirksville, Mo., Nov. 16, appearing the St. Louis "Globe-Democrat" of the next day, stated hat an initial dividend of 50% will be paid depositors of the ailed Commercial State Bank of Kirksville about Dec. 20, ccording to plans announced by Special Finance Comhissioner L. L. Vaughn. The bank's liabilities are \$160,000 nd the Commissioner now has \$63,000 on hand in cash and xpects that collections within the next thirty days will inrease this sum considerably, the dispatch said. The advices irthermore stated that it was believed for a time the bank ould pay in full, but the latest information is that it will not y more than 75% of its obligations. Failure of the instituon in June last was noted in our issue of July 7 1928, page 62.

Breckinridge Jones, Chairman of the Board of Directors the Mississippi Valley Trust Co. of St. Louis and identied with banking progress in Missouri and the Middle West r nearly 40 years, died on Nov. 21 in his 73rd year. Death s due to an infection of the throat. Well known in iddle Western banking circles, Mr. Jones was generally cognized as the "father of the trust company section" the American Bankers' Association. As early as 1896 the American Bankers' Association.

he inauguarated a movement to form a national organization of the trust companies of the United States which later resulted in the formation of the trust company division of the Association. The deceased banker was born in Boyle County, Ky., the son of Daniel W. and Rebecca Robertson (Dunlap) Jones. His early educational opportunities were meagre, but in 1875 he was graduated from Centre College, Danville, Ky., with the degree of A. B. For a year thereafter he taught school at Lawrenceburg, Ky., and then entered a law office in Stanford, Ky. and for two years read law at night. In 1878 he was admitted to the Kentucky bar and the same year moved to St. Louis and entered the St. Louis Law School. After attending a summer session of the University of Virginia Law School in 1879 he opened a law office in St. Louis and practiced his profession for nine years. In 1888 Mr. Jones became Vice-President and General Manager of the Decatur Land & Furnace Co. of New Decatur, Ala., but after a successful reorganization of the company he returned to St. Louis and resumed his law practice. After a brief period, however, he was elected Secretary of the Mississippi Valley Trust Co. and from that time on continued with the institution. Before assuming the Chairmanship in February 1925 (the office he held at his death), Mr. Jones had been President of the bank since 1912. At the time of his death he was a member of the Advisory Council of the Fderal Reserve Board.

Advices from Richmond, Va., on Nov. 19, printed in the "Wall Street News" of the same date, stated that the Richmond Trust Co. of that city has secured from the State a charter amendment authorizing it to reduce its maximum authorized capital stock from \$1,000,000 to \$500,000, and to reduce its actually issued and outstanding capital stock from \$1,000,000 to \$500,000. The change does not materially affect the capital of the company other than to increase .ts surplus, it is said.

Advices from Petersburg, Va. on Oct. 22 to the Baltimore "Sun" reported the closing on that day of the Union Trust & Mortgage Co. of Petersburg. The following notice was posted on the bank's door:

City of Petersburg, to-wit: By virtue of authority vested in me by law Thave this day suspended the Union Trust and Mortgage Company pending the application for a receivership given under my hand this 22d day of October, 1928. M. E. Bristow, Deputy Commissioner of Insurance and Banking of Virginia."

Subsequently, the dispatch said, Herbert Pritchard, acting President of the trust company, issued the following statement:

Due to unliquid loans and investments, the Union Trust and Mortgage Company has been forced to suspend doing business. A movement to reorganize is in progress, which it is hoped will succeed."

In conclusion the advices said:

Meanwhile a receiver for the company has been applied for.

Commissioner Bristow granted authority for the insurance department of the company to continue business. It is the opinion of bankers and other citizens of Petersburg that had the real estate market here been as good two or three years ago as it is at present., the bank would not have been forced into temporary suspension.

A later dispatch from Petersburg (Oct. 24), appearing in the "Sun" of the following day, stated that Judge Mullen, of Hustings Court, had appointed Bernard C. Syme receiver for the closed bank, his bond being fixed at \$250,000. Syme, who is a prominent lawyer and for some time was State Attorney, had taken charge of the institution, it was

A press dispatch from Dunn, N. C., on Nov. 14, printed in the Raleigh "News and Observer" of Nov. 15, stated that following action taken the previous night by its directors, the First National Bank of Dunn failed to open for business on Nov. 14 and was later placed in the hands of the national bank examiner. It appears the directors decided to close the bank when a small "run" developed on the afternoon of Nov. 13 that gave promise of reaching larger proportions if the bank opened the next day. According to its last published report (Oct. 3), the closed bank had total resources of over \$500,000. It was capitalized to \$50,000 and had a surplus of \$20,000. From the dispatch we take the following:

The First National Bank, one of the several banks in this part of the State to be caught in the failure of the bank in Wilmington operated by the Coopers several years ago, having a part of its assets tied up in the failure of the Wilmington bank, has been struggling to overcome its losses since 1921. Since it was taken over by the present management its losses have been practically negligible, and, according to all information its affairs have been wisely and safely administered. In the pa year its struggle has been even more against odds, following a run which

fi

th 3/4 br Oin C E ti coti C C tl

A recent examination of the bank, however, revealed sufficient bad paper, practically all of which was brought over from the stressful period just following 1920, to impair the capital. The Comptroller of the Currency, under whose department the bank operated, advised that the bad paper be taken out, even if it became necessary to assess the stockholders for an amount necessary to take up the doubtful paper.

Acting on the advice of the national bank examiner, the directors of

Acting on the advice of the national bank examiner, the directors of the First National were planning to organize a new bank, to be known as the Citizens National Bank, assess stockholders of the old bank, take over and liquidate its affairs. The plan had been instituted quietly, and up to the last night more than \$40,000 of the needed \$50,000 capital for the new bank had been subscribed. Information concerning the move leaked out yesterday morning, depositors became panicky, and the run developed yesterday afternoon, necessitating the action taken by the board of directors.

Announcement was made Nov. 16 that the First National Trust & Savings Bank of San Diego, Cal., through its holding company the San Diego-California Co., has purchased the Bank of Southern California in La Mesa, Cal., according to advices from San Diego on that date, appearing in the Los Angeles "Times" of Nov. 17. E. J. Belcher, Jr., President of the San Diego bank, the dispatch went on to say, was named President of the acquired bank, with W. B. Whitcomb and G. H. Schmidt as Vice-Presidents; L. J. Heitcam as Manager and Cashier, and J. Foster Couts, Assistant Manager and Cashier.

L. S. Gilhousen, Assistant Cashier of the Los Angeles-First National Trust & Savings Bank, Los Angeles, on Nov. 12 observed his twenty-eighth year as a banker and of continuous service with one institution. A news item from the bank says:

Mr. Gilhousen, who was born in Kahoka, Mo., came to Los Angeles in 1900 and entered the employ of the Los Angeles National Bank as collector. In 1905 the First National Bank, the Los Angeles National and the Southwestern Banks were consolidated under the name and charter of the First National Bank of Los Angeles. In that same year the stock of the Los Angeles Trust Company and that of the Metropolitan Bank and Trust Company were acquired by the stockholders of the First National Bank, becoming the Los Angeles Trust & Savings Bank and later the Pacific-Southwest Trust & Savings Bank.

On Sept. 1 of last year the First National Bank and the Pacific-South-

On Sept. 1 of last year the First National Bank and the Pacific-Southwest Trust & Savings Bank consolidated under the national charter and the name of the Los Angeles-First National Trust & Savings Bank. Mr. Gilhousen, who has been with the bank through the various changes, was

appointed auditor in 1920 and assistant cashier in 1921.

Erle M. Leaf, President of the National Bank of Commerce of Los Angeles, announced on Nov. 15 the election as Vice-President in charge of new business of T. C. Scroggs. former Vice-President and Cashier of the Seaboard National Bank of that city, according to the Los Angeles "Times" of Nov. 16. The election of J. W. Westerfield, for several years chief clerk of the National Bank of Commerce, as an Assistant Cashier, to act as personnel officer, was announced by Mr. Leaf at the same time. Mr. Scroggs, the paper mentioned said, formerly held the following positions: Vice-President and director of the Oklahoma Stock Yards National Bank, Oklahoma City, Okla.; Vice-President of the Bank of St. Bernard, New Orleans, La.; President of the American Trust & Savings Bank, El Paso, Texas, and President of the El Paso Cattle Loan Co. In 1923 he became associated with the Collins staff of Philadelphia as consultant for their bank clients in the Middle West.

The election of Judge Henry H. Rolapp as a director of the National Bank of Commerce was reported in the Los Angeles "Times" of Nov. 14, which went on to say:

Judge Rolapp was former President of the Amalgamated Sugar Co. of Ogden, Utah, and was also general counsel for the Great Western Sugar Co. Although Judge Rolapp has retired from many of his business activities, he is still a director of the Descret National Bank of Salt Lake City, director of the Home Fire Insurance Co., director of the Royal Coal Co. of Utah and director of the Rocky Mountain Packing Corporation.

A press dispatch from San Francisco on Nov. 20, printed in the "Wall Street News" of the same date, stated that the United Security Bank & Trust Co., (a Giannini institution) with headquarters in that city, is about to file new articles of incorporation at Sacramento, Cal., changing its present name to Bank of America of California, according to official advices. The dispatch continuing said:

No changes other than in designation of the institution will be made, officials state. No connection with Bank of America, of New York, is

indicated by the new neame.

A suit of the Security Bank & Trust Co. of Los Angeles, pending in the Superior Court of Orange County, Calif., will thus be nullified by the contemplated change in name. This action will allow the former United Security Bank & Trust te incorporate in its chain approximately 50 banks now held by the French American Corp. following adoption of the new name, Bank of America of California.

Items with reference to the suit brought by the Security Bank & Trust Co. of Los Angeles against the San Francisco bank to prevent the latter from using the word "Security" in its title appeared in the "Chronicle" of June 16 1928 and Sept. 29 1928, pages 3705 and 1756, respectively.

According to the Toronto "Globe" of Nov. 10, the directors of the Canadian Bank of Commerce the previous day elected Arthur F. White, former President of the Standard Bank of Canada, a Vice-President and a director of the enlarged institution, and also elected S. H. Logan, the General Manager of the Canadian Bank of Commerce, and six former directors of the Standard Bank of Canada members of the Board. These latter are: Thomas H. Wood, A. R. Auld, W. K. George, F. W. Cowan, and A. M. M. Kirkpatrick. Our last reference to the proposed merger of these important Canadian banks appeared in the "Chronicle" of Sept. 29, page 1761.

#### THE WEEK ON THE NEW YORK STOCK EXCHANGE.

Except for the downward reaction on Wednesday, the New York Stock Market has continued its record-breaking advance during the present week. The phenomenal rise in stock prices was somewhat checked by the midweek setback, but the advance was again renewed the following day when the tremendous demand for all classes of stocks continued unabated. On Monday, the sales were slightly over 5 million shares and on Tuesday in excess of 61/2 million shares. On Wednesday and Thursday 6,014,855 and 5,837,600 shares respectively and on Friday the sales reached a total of 6,942,500 shares, this last establishing a new high record for a day's business. The enormous daily turnover completely swamped the mechanical facilities of the exchange, so much so that the tickers were at times nearly behind the transactions on the floor, until Thursday when the Stock Exchange ticker began reporting merely the price of each sale and no longer the number of shares sold. This worked a corrective. Radio Corporation, Case Threshing Machine, International Harvester, and DuPont made sensational gains several times during the week, but there has also been widespread trading in copper, oils and the public utilities. The report of the Federal Reserve Bank for the week ending Nov. 22, made public after the close of the market on Thursday, showed an increase in brokers loans amounting to \$176,315,000, the largest increase in the history of the market. Call loans continued at 61/29 throughout the week.

Price movements had an appearance of irregularity durin the short session on Saturday, both buying and selling order flowing into the market in record volume. The most striking features of the day were on the side of the advance, Radi leading the upswing with a block of stock at 300; later in the day the price receded to 293, shot ahead to 304 and close at 301½, a net gain of 4 points. American Tel. & Tel. als attracted considerable speculative attention, as it opened at above 200 and then slid back to its previous close at 1953 Bethlehem Steel assumed the leadership of the steel grou as it pushed steadily ahead to 81, its highest price since 192 United States Steel common remained practically unchange from its preceding close. Montgomery Ward had anoth spectacular jump of 10 points and closed at 424. The strong stocks of the oil group included Shell Union Oil, Philli Petroleum, and Standard Oil of California, all of whi moved into new high ground. Texas and Gulf Sulphur w a feature of unusual strength and closed 4 points higher 80%. Packard proved the star of the motors and reach new high ground above 122. General Motors, however slipped back and most of the independents followed suit.

The Market lost none of its buoyancy on Monday, thou prices, for a time, were somewhat irregular due in part heavy profit taking in the early part of the session. T day's turnover passed the 5 million mark, more than 800 dividual shares were dealt in and the tickers were 51 minu late. Radio Corporation assumed the leadership with spectacular jump of 30 points which carried its closing pr to 331. Copper stocks continued in stronger demandance and Chile advancing into new high ground we substantial gains. Westinghouse Elec. & Mfg. Co. clos at 14034 with a gain of 334 points, Du Pont moved and 4 points, Case Threshing Machine registered a gain 1914 points to 449. American Home Products, Colum Carbide and Carbon, International Paper, and Super Steel also made noteworthy advances. Unpreceden

buying orders again rolled into the market on Tuesday, the day's sales reaching more than 61/2 million shares. The influx of buying orders came from all parts of the United States and from many foreign countries. The volume of buying was so immense that the ticker ran 105 minutes behind. Speculative activity was at a fever heat all through the day until the last hour when a sharp downward reaction occurred as a result of profit taking by some of the early buyers. Some noteworthy advances of the day were Radio Corporation 26½ points, Du Pont 52 points, International Harvester 431/4 points, Woolworth 63/8 points, Wright Aero 61/4 points, Liquid Carbon 7 points, Goodyear Tire 6 points, Calumet & Arizona 65% points, Canadian Pacific 71/4 points and Case Threshing Machine 453/4 points. Steel stocks and Motor issues did not participate in the extravagant advances of some of the leaders.

On Wednesday the stock market suffered a bad break in the early trading, but a moderate rally toward the end of the day carried many issues above their early lows, though numerous sharp losses were still in evidence in the general list. General Motors sold below 207, but closed at 208¾ with a loss of more than three points. Chrysler and Packard also declined from 2 to 3 points. Radio Corporation moved up and down throughout the session and finally closed at 359 with a net gain of 1 point for the day. Wright Aero was another spectacular feature and moved ahead 8 points to 221. Case Threshing Machine which enjoyed several spectacular advances during previous days yielded about 19 points. International Harvester also was below its

preceding close.

Trading was again fast and furious on Thursday and sensational advances into new high ground were registered by many of the more active speculative stocks. Wright Aero was one of the outstanding strong features as it moved briskly ahead and closed at 270 with a gain of 49 points for the day. Curtiss Aeroplane stocks followed with a gain of 15 points and closed at 155. Speculative interest was for a time directed to the copper stocks, Kennecott advancing about six points to 14334. Anaconda, Chile, Greene Cananea and practically all of the rest of the group moved ahead to higher levels. Mid-Continent was the strong feature of the Oil shares as it advanced three points to  $43\frac{1}{2}$ . Marland Oil moved up to 485%, Houston Oil improved about one point and so did Pan-American P. & T. With the possible exception of General Motors, the motor stocks were stronger, particularly Chrysler which gained five points to 130\% and Packard which improved  $4\frac{1}{2}$  points to  $120\frac{1}{2}$ . Many of the so-called specialties were bid up from three to five points and stocks like Montgomery Ward, Victor Talking Machine, and Union Carbide and Carbon were in strong demand at higher prices. Railroad issues also were higher and moved briskly upward under the guidance of Union Pacific, Great Northern and New York Central. Independent Steel shares moved forward under the leadership Bethlehem Steel, but United States Steel common lagged behind.

Stock prices swung violently backward and forward in a mixture of advances and declines in the boiling market on Friday. Transactions were so heavy that even under the new system the ticker fell behind, at one time more than 34 of an hour. Motor stocks were in demand and moved briskly forward under the leadership of General Motors. Other features were numerous throughout the list, and included new record prices by such stocks as Kansas City Southern, New York, New Haven & Hartford, Erie common, Pere Marquette, Andes Copper, Inspiration Copper, Commercial Solvent, Cerro de Pasco, Kennecott Copper, Federal Mining & Smelting, Wright Aeronautical, Mid-Continent Petroleum, Superior Oil, Marland Oil, Consolidated Gas, Case Threshing Machine and Union Carbide and Carbon. The New York Stock Exchange and the Curb Market will be closed on Saturday, Nov. 24, to enable the clerical forces in brokers offices to catch up on arrears of work.

#### COURSE OF BANK CLEARINGS.

Bank clearings the present week will show a very heavy increase compared with a year ago, but the greater part of this is due to the fact that Thanksgiving Day fell in this week last year while the present year it will come a week later. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ended to-day (Saturday, Nov. 24), bank exchanges for all the cities of the United States from which it is possible to obtain weekly returns will be 50.8% larger than for the corresponding week last year. The total stands at \$14,232,227,271, against \$9,436,252,733 for the same week in 1927. At this centre there is a gain for the five days ending Friday of 76.0%. Our comparative summary for the week follows:

| Clearings—Returns by Telegraph.<br>Week Ended Nov. 24. | 1928.            | 1927.           | Per<br>Cent. |
|--------------------------------------------------------|------------------|-----------------|--------------|
| New York                                               | \$7,558,000,000  | \$4,294,000,000 | +76.0        |
| Chicago                                                | 659,734,312      | 471,566,852     | +39.9        |

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them to-day, inasmuch as the week ends to-day (Saturday) and the Saturday figures will not be available until noon to-day. Accordingly, on the above the last day of the week has in all cases had to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous—the week ended Nov. 17. For that week there is an increase of 10.0%, the 1928 aggregate of clearings for the whole country being \$13,501,893,604, against \$12,272,796,306 in the same week of 1927. Outside of this city the increase is only 6.6%. The bank exchanges at this centre record a gain of 22.2%. We group the cities now according to the Federal Reserve districts in which they

Week Ended November 17.

are located, and from this it appears that in the New York Reserve District (including this city) clearings show an expansion of 27.0%, but in the Boston Reserve District there is a decrease of 21.6% and in the Philadelphia Reserve District of 8.2%. In the Cleveland Reserve District clearings have declined 1.4%, in the Richmond Reserve District 14.6% and in the Atlanta Reserve District 13.9%. In the Chicago Reserve District the totals are larger by 3.9%, but in the St. Louis Reserve District there is a loss of 9.4%and in the Minneapolis Reserve District of 9.0%. The Dallas Reserve District records a falling off of 7.3%, the Kansas City Reserve District of 12.3% and the San Francisco Reserve District of 4.2%.

In the following we furnish a summary by Federal Reserve districts:

CURRENCY.

CURRENCY.

The Currency and Bank Notes Act 1928, providing for the transfer of the ne of £1 and 10s. 0d. currency notes to the Bank of England, is to come operation on the 22nd of this month. This date has been fixed by an ler in Council made on Nov. 1 1928.

In its issue of Oct. 20 last, the "North China Herald" states that "A new rer dollar is to be issued to commemorate the establishment of the tionalist Government at Nanking, to replace the memento dollar minted the second year of the Republic (1912). On the obverse side of the new a will be the portrait of the late Dr. Sun-Yat-Sen, and on the reverse, attractive allegorical design symbolising the growth of the Kuomintang I some of the improvements planned for this country."

#### DIVIDENDS.

Dividends are grouped in two separate tables. In the first we bring together all the dividends announced the current week. Then we follow with a second table, in which we show the dividends previously announced, but which have not yet been paid.

The dividends announced this week are:

| Name of Company.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Per<br>Cent.                                                                         | When<br>Payab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                          | Books Closed<br>Days Inclusive.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Philadelphia Banks.—The Philadelphia Clearing House return for the week ending Nov. 17, with comparative figures for the two weeks preceding, is given below. Reserve requirements for members of the Federal Reserve System are 10% on demand deposits and 3% on time deposits, all to be kept with the Federal Reserve Bank. "Cash in vaults" is not a part of legal reserve. For trust companies not members of the Federal Reserve System the reserve required is 10% on demand deposits and includes "Reserve with legal depositaries" and "Cash in vaults."

Beginning with the return for the week ending May 14, the Philadelphia Clearing House Association discontinued showing the reserves and whether reserves held are above or below requirements. This will account for the queries at the end of the table.
